Dear all,

Thank you for attending the public meeting on the 25th October 2016.

We would like to draw your attention that these minutes were drawn from notes taken from the Public Meeting; please provide corrections / additions if applicable.

We would like to advise that while utmost care was taken to record your comments accurately and faithfully, there may be some discrepancies between what has been written in the minutes that follow and what was actually said. We apologise for this and request that you correct the minutes and e-mail back to us for final amendments.

Many thanks for your participation at the meeting, as well as for your understanding regarding the minutes.

Regards

A handwritten signature in black ink, appearing to read "Judith Fasheun".

Rodney	Yisnaie	RY	Community member
Christopher	van Schalkwyk	CV	Community member
Edna	William	EW	Community member

Item No	Item Description	Response / Comment
1.	JF: Welcome and Introduction	
2.	JK: Presentation 1	
3.	JF: Presentation 2	
4.	DISCUSSION	

Item No	Item Description	Response / Comment
	PV: This line being built by Eskom, has it nothing to do with Biotherm?	JF: Biotherm and the proposed line will benefit from each other. Biotherm will be able to inject its generated electricity to the line.
	Community member: Which corridor will be chosen for the line construction? Are there any people studying the line now?	JF: At this stage we cannot conclude. Once all the studies have been completed and we have taken I&APs comments into consideration, then we will be able to weigh the options of choosing the most feasible line. This will be done at the EIA phase. Yes, most of the specialists have been on site to survey the corridors. This will also help them verify their desktop findings.
	Community member: Will there be any job opportunities for us during construction phase?	MM: The construction companies have a certain number of people whom they request from the community in terms of the labour. However, the job is so specific and hence they already have team that will do highly technical parts of the job. So when they need extra labour, then they can come to the community and liaise with the community leaders and ask them who can assist with the labour they need.
	PV: When is the next meeting? For the next meetings please have them in the morning as you can see the participants are not so many for this meeting.	JF: Phase 2, as explained during the presentation, will probably be either in February or March 2017. Thank you for letting us know. The next meeting will be held in the morning as preferred and we will consult with the municipality for preferred dates and time.
	Community member: Will Eskom consult with the landowners in terms of the servitude? Will the landowners benefit from this construction?	JF: After Environmental Authorisation, the Eskom Negotiator will have to meet with each landowner with regards to the servitude and also the landowner will have the opportunity to raise condition for his property during the construction phase. For example, the landowner may give conditions such as when he wants his gates opened and locked by the construction team. MM: I don't think benefit is the right word to use. What happens is; Eskom appoints valuers to value the property for the land that the line is going to go through. The valuers determine the value of the land that would be lost along the servitude and Eskom will compensate the landowners for that value. But it is not that they

Item No	Item Description	Response / Comment
		will a get more than what they are producing on the land.
5.	Meeting was declared closed.
