

## APPENDIX B: SITE PHOTOGRAPHS

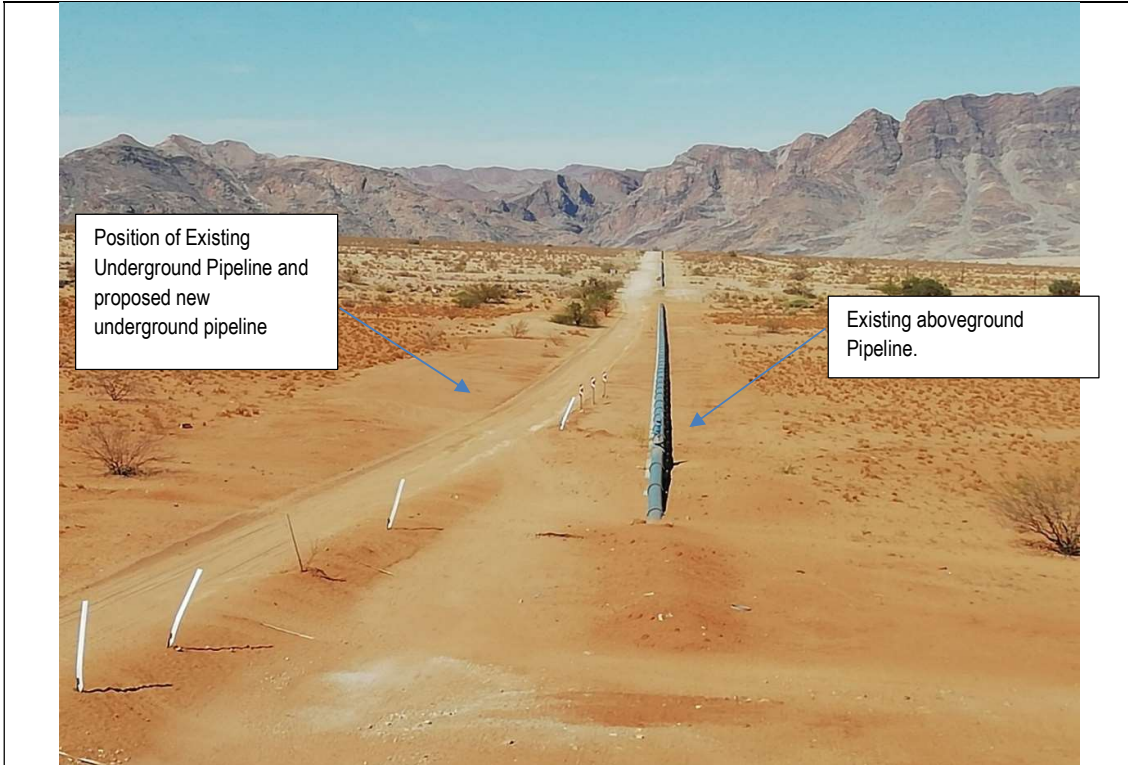

Plate 1: The existing aboveground bulk water pipeline lies to the right of the dirt road. The existing underground bulk water pipeline which will be replaced is located to the left of the road. Direction of Pipeline in the photo is towards the Pella Drift / Orange River.

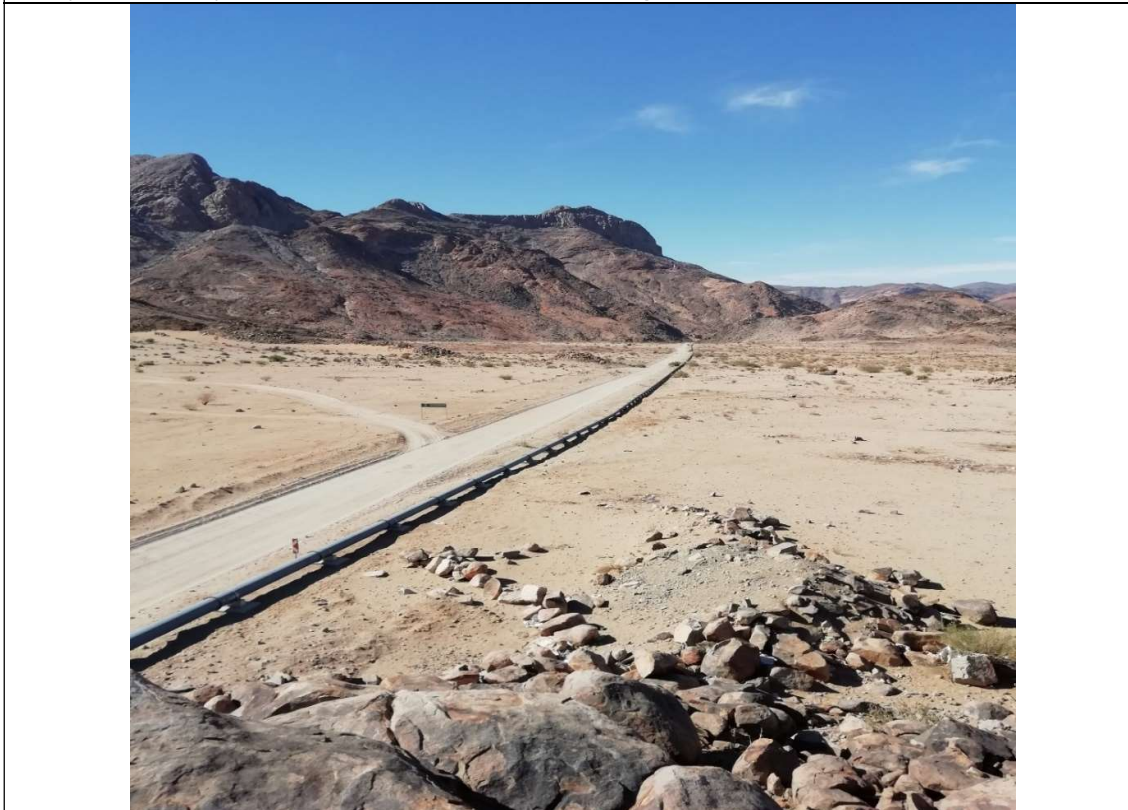

Plate 2: Photo taken of Pipeline servitude at closest proximity to the Town Pella, which lies 90 degrees to the right of this photo.

Plate 3: Section of Te Goob Se Laagte, a tributary of the Orange River which lies in close proximity to the foot of the mountain range pictured. The proposed new bulk water pipeline will traverse a section of the Te Goob Se Laagte on its way to the Pella Drift Water Treatment Plant.

Plate 4: The Pella Drift abstraction tower housing the extraction pumps required to supply the water treatment plant with raw water.

Plate 5: Photo of the booster pump station which will be upgraded as part of the proposed project.

Plate 6: The existing Midway substation which will require upgrading to allow for the booster pump station to be upgraded due to a lack of additional capacity.

Plate 7: Existing Water Treatment Plant

Plate 8: Existing Horseshoe Reservoir 1

Plate 9: Existing Horseshoe Reservoir 2
