				2016/07/13	<p>clarifies why there this road is included as it is currently being used as a general access road to a number of farms.</p> <p>We would very much like to see the road concept map could you please obtain a copy for us.</p> <p>I also note that the border road cuts across arable lands how is this dealt with in terms of hectares lost for planting?</p> <p>I look forward to hearing from you.</p> <p>Kind regards, Michael C. Myers</p> <p>COMMENTS ON ACCESS ROAD TO GROOTDRAAI:</p> <p>Dear Tian,</p> <p>As requested, attached are the maps for the border road on the Grootdraai section, we call this land the river land 1, on our Farm maps this land falls under Hoekfontein, land number 10 (77.38 hectares).</p> <p>If you look at the proposed route for the road the road will actually run in the lands, as these lands run right up to the edge of the river, in some areas</p>	<p>and if you can please provide written comments as to which section of the road you are concerned about. You can either print the specific map and write your concerns or you can refer to a specific map and indicate your concerns by referring to the chainage points indicated on the map.</p> <p>We try to stay along the current "road" as far as possible and only deviate where it is impossible to build a road from a civil and environmental point of view.</p>

					<p>where there is enough space between the land edge and the river to accommodate the road and remanence of the old border road is still visible, but if you look at the attached maps it appears that the plan is to run the road in the land or on the edge of the land.</p> <p>I think the reason for doing this is that you will not have to rebuild the old river road as this is completely over grown in some areas and in others washed away. On this subject we would like to be involved in the cutting of trees on our farms so this is done in a controlled manner.</p> <p>I note that you will be making use of the road we use past our Diepkloof house down to the river as a quick access road, this would be beneficial to us as we constantly do repairs to the road prior to planting or harvesting season, we should however like to see the road widened as this would allow us to get our big truck, big planter and tractors to the river and back safely.</p>

rons@intekom.co.za	SCHUTTESDRAAI DIEPSPRUIT PAN SOMERSET	356 341 313 241	0 0 0 0		<p>I hereby wish to record my serious objection to any tampering with the river banks of the Caledon river to make a border road. I have farmed on this border for over 50 years and nothing works better than good relations with our Lesotho citizens.</p> <ol style="list-style-type: none"> 1. Cost – we can't even keep the roads we have in good repair – can we get assurance that these will be kept in good working order before more money is wasted. 2. A strip of 30 m along my border will have serious economic implications to my farming operations. A one-time compensation will never cover the taking of this selected piece of ground. 3. I draw water from the Caledon river in various places and it will affect these. 4. I have a borehole in this strip that supplies my whole farm. 	<p>October 2015 forwarded to us by electronic mail.</p> <p>The contents of your correspondence have been noted and will be placed on record for consideration of these important matters, as part of the environmental assessment and authorisation process, as outlined in the Background Information Document made available to you.</p> <p>As part of this process, a response to the matters you have raised will be provided to you in due course.</p> <p>Your participation is highly appreciated.</p> <p>Kind Regards, Gerhard Schoeman</p>	<p>Section 5: Activities to be undertaken</p> <p>Section 20.1: Negative impacts on the environment.</p> <p>Section 22: Project conclusion and way forward.</p> <p>Section 21.3.9: Geotechnical impact assessment</p> <p>Roads</p> <p>Section 7.1: Need for proposed activity.</p> <p>Cattle and watering</p> <p>Section 5.3: Proposed gates and cattle grids.</p> <p>Traffic</p> <p>Section 5.7: Access Roads</p>

					<ol style="list-style-type: none">5. Fences along the border get stolen as has been proved in the past – there is almost nothing left of the last fence. How will this be prevented?6. The increase traffic on the border will affect both the wild animal and bird life in the area.7. When the last border road was repaired it caused erosion on the banks.8. How will the public be kept off this road?9. Will we be compensated for this proposed road at rates for irrigable land?10. At times our cattle drink water from the Caledon river – how will the road and fence allow for this?11. Up to now border patrol by vehicle have proved useless – the vehicles can be heard from miles away.12. Drones to patrol would be more effective and cheaper to operate and save all the economic and environmental effects of this road and fence.

					<p>2. The process that is now being undertaken will take some years before the road is in place. In the meantime, the farmers on the border are being invaded every day.</p> <p>An interim security plan needs to be drawn up and put into action as a matter of urgency. If this is not done, then by the time the new road is completed there will not be any farms left to be protected. They will be occupied by Lesotho citizens as is already happening.</p> <p>3. I would like to propose that the right of access to the farms be done by way of registering servitudes and not expropriation. It will be a lot quicker and will be less complicated.</p> <p>As there is, all be it destroyed, an existing road which has been used by the security forces I would have thought that some sort of servitude already exists</p>

				2016/07/13 (09:01)	<p>I also note that the border road cuts across arable lands how is this dealt with in terms of hectares lost for planting?</p> <p>I look forward to hearing from you. Kind regards, Michael C. Myers</p> <p>Attached are the maps for the planned border road on Terugdraai, this farm falls between Boschfontein and Grootdraai, we call this land river land 2, on our maps the land falls under Hoekfontein as land number 11 (21.00 hectares).</p> <p>Different to the river land 1 the land does not run right up to the edge of the river apart from a small piece as one access the land from the road. The road that links the two land will as we see it become part of the border road according to the maps so we will have to be able to gain access to the road to enable us to get to this land, I understand that the farmers will not be able to get onto the new road as no gates will be allowed.</p> <p>If this is the case, we will not be able to get to the land and we lose more</p>

					<p>plan is to run the road in the land or on the edge of the land.</p> <p>I think the reason for doing this is that you will not have to rebuild the old river road as this is completely over grown in some areas and in others washed away. On this subject we would like to be involved in the cutting of trees on our farms so this is done in a controlled manner.</p> <p>I note that you will be making use of the road we use past our Diepkloof house down to the river as a quick access road, this would be beneficial to us as we constantly do repairs to the road prior to planting or harvesting season, we should however like to see the road widened as this would allow us to get our big truck, big planter and tractors to the river and back safely.</p> <p>Also see my e-mail re the other arable lands issues.</p>
