

**GENERAL NOTES**

- The Contractor is responsible for the correct setting out of the building and all external and internal walls with particular reference to boundaries, setbacks and setting out points.
- The Contractor is to verify all levels, heights and elevations on site and to check these against the drawings before putting any work in hand.
- The Contractor is to locate and identify existing services on the site and to protect these from damage throughout the duration of the contract.
- The Contractor is referred to the Standard Guidelines for Quality Control issued by the office for all program requirements for workmanship and materials. This document is to be used in conjunction with this drawing.
- Any errors, omissions or omissions are to be reported to the Architect immediately.
- Contractor is to be 400 Approved D.P.C.'s, whether or not these are shown on drawings, to all external walls at each floor level or ground level and to all external doors, gates or other openings in external walls. Carefully verify to be checked.
- Any quantities shown on the drawings must be reported to the Architect for verification before any work is put in hand.
- Do not scale the drawings; refer to figured dimensions only.
