1.2 Background information Document

The Background Information Document is an integral part of the public participation process, as it

- Gives an overview of the EIA and public participation processes;
- Outlines the legislative background (NEMA, IWULA);
- Invites Interested and Affected Parties (I&APs), to participate in the process;
- Provides information to all Interested and Affected Parties.

Background Information Documents (BIDs) were sent via email to Interested and Affected Parties listed. The BID is represented overleaf.

Background Information Document Matla EMP consolidation including application for Stopping Phase 1

October 2017

Exxaro Matla Coal (Pty) Ltd

GCS Project Number: 13-400/16-1208

DMR Ref Number: MP 35/5/1/2/3/2/1 (327) EM

ENVIRONMENTAL ASSESSMENT PRACTITIONER: GCS (PTY) LTD

GCS Water and Environment (Pty) Ltd (GCS) is a fully integrated water, environmental, and earth science consulting services company based in the Republic of South Africa. GCS provides a professional consulting service in the fields of environmental, water and earth sciences. GCS has a team of highly trained staff with considerable experience in the fields of environmental and water science.

GCS will act as the Independent Environmental Assessment Practitioner (EAP), as well as the Public Participation Practitioner for this EIA, environmental authorisation processes and PPP.

INTRODUCTION & BACKGROUND

Matla is an existing underground coal mining operation that began end 1973 and consisted of four complexes: Mine 1, Mine 2, Mine 3 and E'Tingweni. E'tingwini was mined completely, closed and rehabilitated. Mine 1 was closed, and a new Mine 1 Shaft is being constructed for further mining. The remainder of the shafts are still operational.

The Matla Management Team has decided to consolidate all environmental authorisations (EMPs and IWULs) in order to achieve the following:

- Better management of the various legal requirements set out in each authorisation,
- Improvement in the management of the costs associated with the implementation of the legal requirements; and
- To avoid duplications in compliance related matters and ensure all reporting requirements are met.

Matla has the following authorisations in place which will form part of the consolidation process:

- Environmental Management Plans:
 - Matla EMP - Existing operations: Mine 1, Mine 2 and Mine 3;
 - Matla Water Treatment Plant; and
 - Matla Mine 1 New Shaft.
- Integrated Water Use Licenses:
 - Matla EMP - Existing operations: Mine 1, Mine 2, Mine 3 and Crushing and Screening Plant;
 - Matla Water Treatment Plant;
 - Matla Mine 1 New Shaft; and
 - Matla River Diversion.

This Background Information Document (BID) has been compiled by GCS with following aims:

- To introduce the proposed project and related activities to potential I&APs;
- To provide information on the Environmental Assessment and related processes;
- To inform I&APs on how to be involved in the Environmental Assessment process;
- To invite all parties to register as I&APs on the Environmental Assessment database; and
- To provide all I&APs with opportunity to comment on the proposed project and associated process, including biophysical and socio-economic aspects, as well as any other issues of concern.

PUBLIC PARTICIPATION - CONTACT DETAILS

MATLA MINE SETTING	
Province:	Mpumalanga
District Municipality:	Nkangala District Municipality Gert Sibanda District Municipality
Local Municipality:	eMalahleni Local Municipality Govan Mbeki Local Municipality
Nearest Towns:	Evander (9km S), Leandra (10km SW), Ogies (15km N), eMalahleni (33km NE)
Quaternary Catchment:	B11E of the Olifants River Catchment

What is an EIA/EMP and what does an EIA/EMP contain?

The *Mineral and Petroleum Resources Development Act, 2002* (Act No. 28 of 2002) (MPRDA) prescribes the processes to be followed when compiling the Environmental Impact Assessment (EIA) and the Environmental Management Programme (EMP), in respect of the mining operations.

The process aims to ensure that all relevant factors are considered when evaluating the potential environmental impacts of a project, as well as developing appropriate environmental management measures to mitigate these impacts.

The purpose of the EIA is to assess the current environment in which a proposed activity will take place and assess all potential impacts in terms of its extent, duration, intensity and significance relating to the specific activity.

The EMP describes the goals and objectives for environmental management to minimise or eliminate the potential environmental impacts; the action plans to bring effect to those goals and objectives; the procedures to be implemented to ensure integration of environmental management into the daily operations; as well as a plan to raise awareness of employees and the surrounding community with regards to environmental management.

PROPOSED SPECIALIST INVESTIGATIONS

The specialist investigations listed in **Error! Reference source not found.2** are currently being undertaken for the proposed development (in terms of the MPRDA and the NWA).

Table 2: Specialist Studies being undertaken

SPECIALIST STUDIES
Biodiversity Impact Assessment (Fauna and Flora)
Hydrological (Surface Water) Investigations
Geohydrological (Groundwater) Investigations
Heritage Impact Assessment
Social Impact Assessment
Soil, Land Use and Land Capability Impact Assessment
Wetland Impact Assessment

REGULATORY CONTEXT

The environmental authorisation processes are being run in parallel as far as practically possible to streamline the process in terms of the required stakeholder consultation associated with each authorization process. Accordingly, the following environmental authorisation processes and stakeholder engagement processes will be undertaken:

THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT (MPRDA)
The environmental authorisation process, required in terms of the MPRDA, considers the project as a whole including all activities related to the proposed Matla Stooeping Project. The amendment to the EIA/EMP developed in terms of the MPRDA will address all the environmental impacts and proposed management measures associated with the proposed mining operation, as well as provide background on the current environmental conditions on site.
Matla is required to conduct an environmental assessment for all new activities in terms of the Stooeping Project and submit a Scoping Report and EIA/EMP to the DMR in Mpumalanga for authorisation.
THE NATIONAL WATER ACT (NWA)
The NWA stipulates that activities which have the potential to impact on a water resource and which do not constitute Schedule I water uses (e.g. abstraction of groundwater for domestic use in a household); cannot be authorized in terms of the General Authorization notices; or which are not existing lawful water uses require authorization by means of a water use licence (WUL) issued by the Department of Water Affairs (DWA). In accordance with the requirements of the NWA, a Water Use License Application (WULA) will be compiled for the Matla Stooeping Project and submitted to the DWA to ensure the legality of the identified water uses associated with the proposed operation.
The water uses, in terms of Section 21 of the NWA, which may be applied for by in respect of the operation include the following: Section 21(c) - Impeding or diverting the flow of water in a watercourse; and Section 21(i) - Altering the bed, banks, course or characteristics of a watercourse.
NATIONAL ENVIRONMENTAL MANAGEMENT ACT (NEMA)
Additional activities were triggered in terms of the NEMA for the proposed phase 1 stooeping. A Scoping and EIA process in terms of the 2014 EIA regulations will be followed for inclusion of the new activities.

THE PUBLIC PARTICIPATION PROCESS

Public involvement is an essential part of any environmental assessment process. As an I&AP you will be given the opportunity to provide your input into the environmental assessment process. All comments will be recorded and presented to the project team and regulatory authorities.

I&APs include any person who will be directly or indirectly involved and/or affected by the project. To be recognized as an I&AP one must register with GCS to be added to the stakeholder database for the project. All registered I&APs will be kept informed of the decision taken by the DMR and DWA.

Step 1: Notify I&APs and identify issues	<ul style="list-style-type: none"> • Notify I&APs of the project proposal; • Identify any issues/concerns of I&APs; • Provide I&APs with a BID on the project, including a locality map and a Registration and Comment Sheet; and • I&APs are required to register their interest in the project to receive further project information.
<p>To assist I&APs with their understanding of the project, a public meeting or consultation in a similar manner, to which all I&APs are invited or will be involved, will be held during the review period. Copies of the report will be made available on request from GCS.</p> <p style="text-align: center;">Matla Stopping Public Meeting Kriel Golf Club Lapa 9 November 2017 16h30</p>	
Step 2: Draft & Final Scoping Report	<ul style="list-style-type: none"> • The DSR is made available for a 30 day public review period; • Comments received from I&APs during the review process are considered; and • The FSR is updated and submitted to DMR.
Step 3: Draft EIR and EMPr for I&AP review	<ul style="list-style-type: none"> • Compilation and release of a DEIR for a 30 day review period to the public.
Step 4: Final EIR and EMPr	<ul style="list-style-type: none"> • The FEIR, including the CCR and EMPr will be compiled for submission to the DMR for decision making.
Step 5: Environmental Authorisation and Appeal Period	<ul style="list-style-type: none"> • All registered I&APs will be notified in writing of the decision by the DMR regarding the authorization, being positive or negative for the project. All I&APs will also be notified of the appeal period, as well as the manner of appeal.
Public Notification	<p>A major part of the PPP is to notify members of the public of the proposed activities, particularly those who may be directly or indirectly affected by the proposed project. This will be achieved via the following means:</p> <ul style="list-style-type: none"> • The placement of an advertisement in a regional newspaper; • Notices, in English will be placed at the site; • Distribution of BIDs to landowners and occupiers of land adjacent to the proposed prospecting area and to I&APs on request; and • Local authorities will be notified in writing and automatically registered as I&APs.
How to comment	<ul style="list-style-type: none"> • Should you wish to register as an I&AP in order to be kept informed, please complete the registration form on the overleaf and submit to GCS via fax, post or email. • Any further enquiries can be directed to GCS telephonically, or via fax or email. • It is important that you provide your contact details so that we may respond to your comments or questions.
<p>Kindly note that should you require any other party to be contacted, please provide their contact details as well.</p>

2 Appendix B-2: Scoping Phase

2.1 Availability of Draft Scoping Report

Identified I&AP's were notified of the availability of the Draft Scoping Report for public review for the period 26 October 2017 to 27 November 2017, as well as the Public Meeting via Advertisements, Email, Fax and Sms.

2.1.1 Advertisements

Advertisements, according to Regulation 41 of NEMA regarding the project background, the assessment process being followed, the availability of the draft Scoping Report (DSR) for public comment and a public meeting were placed on 27 October 2017 in both the Witbank News and the Ridge Times (shown overleaf).

2.1.2 Email

An email notification went out to all Identified I&APs on the Matla Database informing them of the availability of the DSR for review and the Public Meeting to be held on 9 November 2017. Proof of email notification is shown overleaf.

2.1.3 Fax

Fax notification went out to all Identified I&APs on the Matla Database informing them of the availability of the DSR for review and the Public Meeting to be held on 9 November 2017. Proof of fax notification is shown overleaf.

2.1.4 SMS

SMS notification went out to all Identified I&APs on the Matla Database informing them of the availability of the DSR for review and the Public Meeting to be held on 9 November 2017. Proof of SMS notification is shown overleaf.

NOTICES

GCS Ref. No: 16-1208

DMR Ref. No: MP 35/5/1/2/3/2/1 (327) EM

The Matla Coal Mine, owned and operated by Exxaro Matla Coal (Pty) Ltd (Matla), is an existing underground coal mining operation located near Leandra within eMalahleni and Govan Mbeki Local Municipalities (MP312 & 307) in the Nkangala and Gert Sibande District Municipalities (DC30 & DC31), Mpumalanga Province. Matla has an approved EMP for all current mining activities within its Mining Rights Area (MRA) (Ref No. MP 35/5/1/2/3/2/1 (327) EM).

Matla propose to conduct stooping activities within areas of their underground mine workings and to also consolidate the Mine's various Environmental Management Programmes (EMPs) into one document. Accordingly, approval of the amended and consolidated EMP is required from the Department of Mineral Resources (DMR) in terms of Mineral and Petroleum Resource Development Act (Act No. 28 of 2002 as amended). In addition, a Water Use License Application (WULA) will be compiled and submitted to the Department of Water Affairs and Sanitation (DWS) in terms of Section 21 of the NWA. Water uses that may be applied for include Section 21(c), (g) and (i).

GCS (Pty) Ltd, as independent environmental consultants and environmental assessment practitioners (EAP), has been appointed by Matla to compile the EMP amendment and consolidation, and the IWULA process, as well as to conduct the associated Environmental Assessment and Public Participation Processes.

You are invited to participate in the Public Participation Process by registering as an Interested and Affected Party (I&AP), as well as to provide any comments on the Draft Scoping Report in writing. The Draft Scoping Report will be available on the GCS Website (www.gcs-sa.biz) from 26 October to 27 November. Should you be interested or affected by the proposed project, you are also invited to attend a Public Scoping Meeting to be held as follows:

Date: 09 November 2017

Time: 16:30

Venue: Kriel Golf Club

Should you wish to register and comment, please forward your details and comments to the GCS contact person as indicated below, or attend the Public Scoping Meeting:

INVITATION FOR EXPRESSION OF INTEREST

eMalahleni Housing Company is a non-profit company that is responsible for the management of low cost rental units in the eMalahleni Local Municipal area. Currently the institution is managing 1307 rental units in eMalahleni.

The institution is required to appoint a service provider to conduct external audit services and would like to invite proposals from reputable accounting and audit firms to cover the following scope:

- Evaluating the appropriateness of accounting policies.
- Examining on a test basis, evidence supporting the amounts and disclosures in the financial statements.
- Assessing the reasonableness of significant estimates.
- Considering the fairness of the overall financial statement presentation.
- Evaluation of the effectiveness of internal control structures.
- Auditing of draft financial statements.
- Audit to be conducted in accordance with International Standards on Auditing.
- Provision of reasonable assurance of detecting errors in irregularities that are material to the financial statements.

Proposals are to include the following supporting documentation:

- Company profile
- Company registration documents
- Cost estimates
- Tax clearance certificate
- B-BBEE Certificate

Proposals may be deposited in the tender box located at eMalahleni Housing Company's reception area at 7 Beatty Avenue, eMalahleni, 1035.

Further information can be obtained from:

Only short-listed Candidates will be contacted

GCS Ref. No: 16-1208

DMR Ref. No: MP 35/5/1/2/3/2/1 (327) EM

NOTIFICATION OF AN ENVIRONMENTAL MANAGEMENT PROGRAMME (EMP) AMENDMENT AND CONSOLIDATION PROCESS IN TERMS OF THE MINERAL AND PETROLEUM RESOURCE DEVELOPMENT ACT (ACT NO. 28 OF 2002) FOR MATLA COAL MINE, MPUMALANGA.

The Matla Coal Mine, owned and operated by Exxaro Matla Coal (Pty) Ltd (Matla), is an existing underground coal mining operation located near Leandra within eMalahleni and Govan Mbeki Local Municipalities (MP312 & 307) in the Nkangala and Gert Sibande District Municipalities (DC30 & DC31), Mpumalanga Province. Matla has an approved EMP for all current mining activities within its Mining Rights Area (MRA) (Ref No. MP 35/5/1/2/3/2/1 (327) EM).

Matla propose to conduct stooping activities within areas of their underground mine workings and to also consolidate the Mine's various Environmental Management Programmes (EMPs) into one document. Accordingly, approval of the amended and consolidated EMP is required from the Department of Mineral Resources (DMR) in terms of Mineral and Petroleum Resource Development Act (Act No. 28 of 2002 as amended). In addition, a Water Use License Application (WULA) will be compiled and submitted to the Department of Water Affairs and Sanitation (DWS) in terms of Section 21 of the NWA. Water uses that may be applied for include Section 21(c), (g) and (i).

GCS (Pty) Ltd, as independent environmental consultants and environmental assessment practitioners (EAP), has been appointed by Matla to compile the EMP amendment and consolidation, and the IWULA process, as well as to conduct the associated Environmental Assessment and Public Participation Processes.

You are invited to participate in the Public Participation Process by registering as an Interested and Affected Party (I&AP), as well as to provide any comments on the Draft Scoping Report in writing. The proposed project and/or environmental process in writing. Should you be interested or affected by the proposed project, you are also invited to attend a Public Scoping Meeting to be held as follows:

Date: 09 November 2017

Time: 16:30

Venue: Kriel Golf Club

Original message:

Dear I&AP. Please take note of the new venue for the Eloff Public Meeting as follows: LAERSKOOL ELOFF (317 Taylor St, Eloff). The new venue is 1 block from the Eloff Hall which is not available as it is being used to house members of the community who lost their homes during the storms a few weeks back. Please notify anyone who you know might be interested in attending. Thank you for your understanding in this regard. See you at 11:00 on Saturday.  
Regards, GCS

## **2.2 Public Meeting**

A Public meeting was held at the Kriel Golf Club on Thursday, 9 November 2017. The Scoping Phase Public meeting was held to introduce the Public to the proposed project and afford all I&APs to raise concerns and issues regarding the proposed project.

The meeting presentation, Attendance register and Meeting minutes are attached overleaf.

---

# Matla Stooing and Consolidation Project

## Public Meeting - Scoping Phase

16/11/2017

# Meeting Protocols

- Please switch all cell phones to silent
- Please ensure that you have signed the attendance register and provided all your details
- Please keep all questions until the end
- Only ask one question at a time
- Be respectful and allow every person the opportunity to raise their issues and have their issues addressed

# Agenda

---

- Welcome and Introduction
- Project location
- Current Licences and Authorisations
- Existing and proposed infrastructure
- Consolidation of EMPs and IWULs
- Inclusion of Stooping
- Specialist studies
- Potential impacts
- Current project status
- Question/Discussion Session
- In closing

# Welcome and Introduction

## Exxaro Matla Project Team

- Stephen Badenhorst
- Risimati Chauke
- Mervyn Geduldt
- Vinny Moodley
- Simphiwe Mthiyane

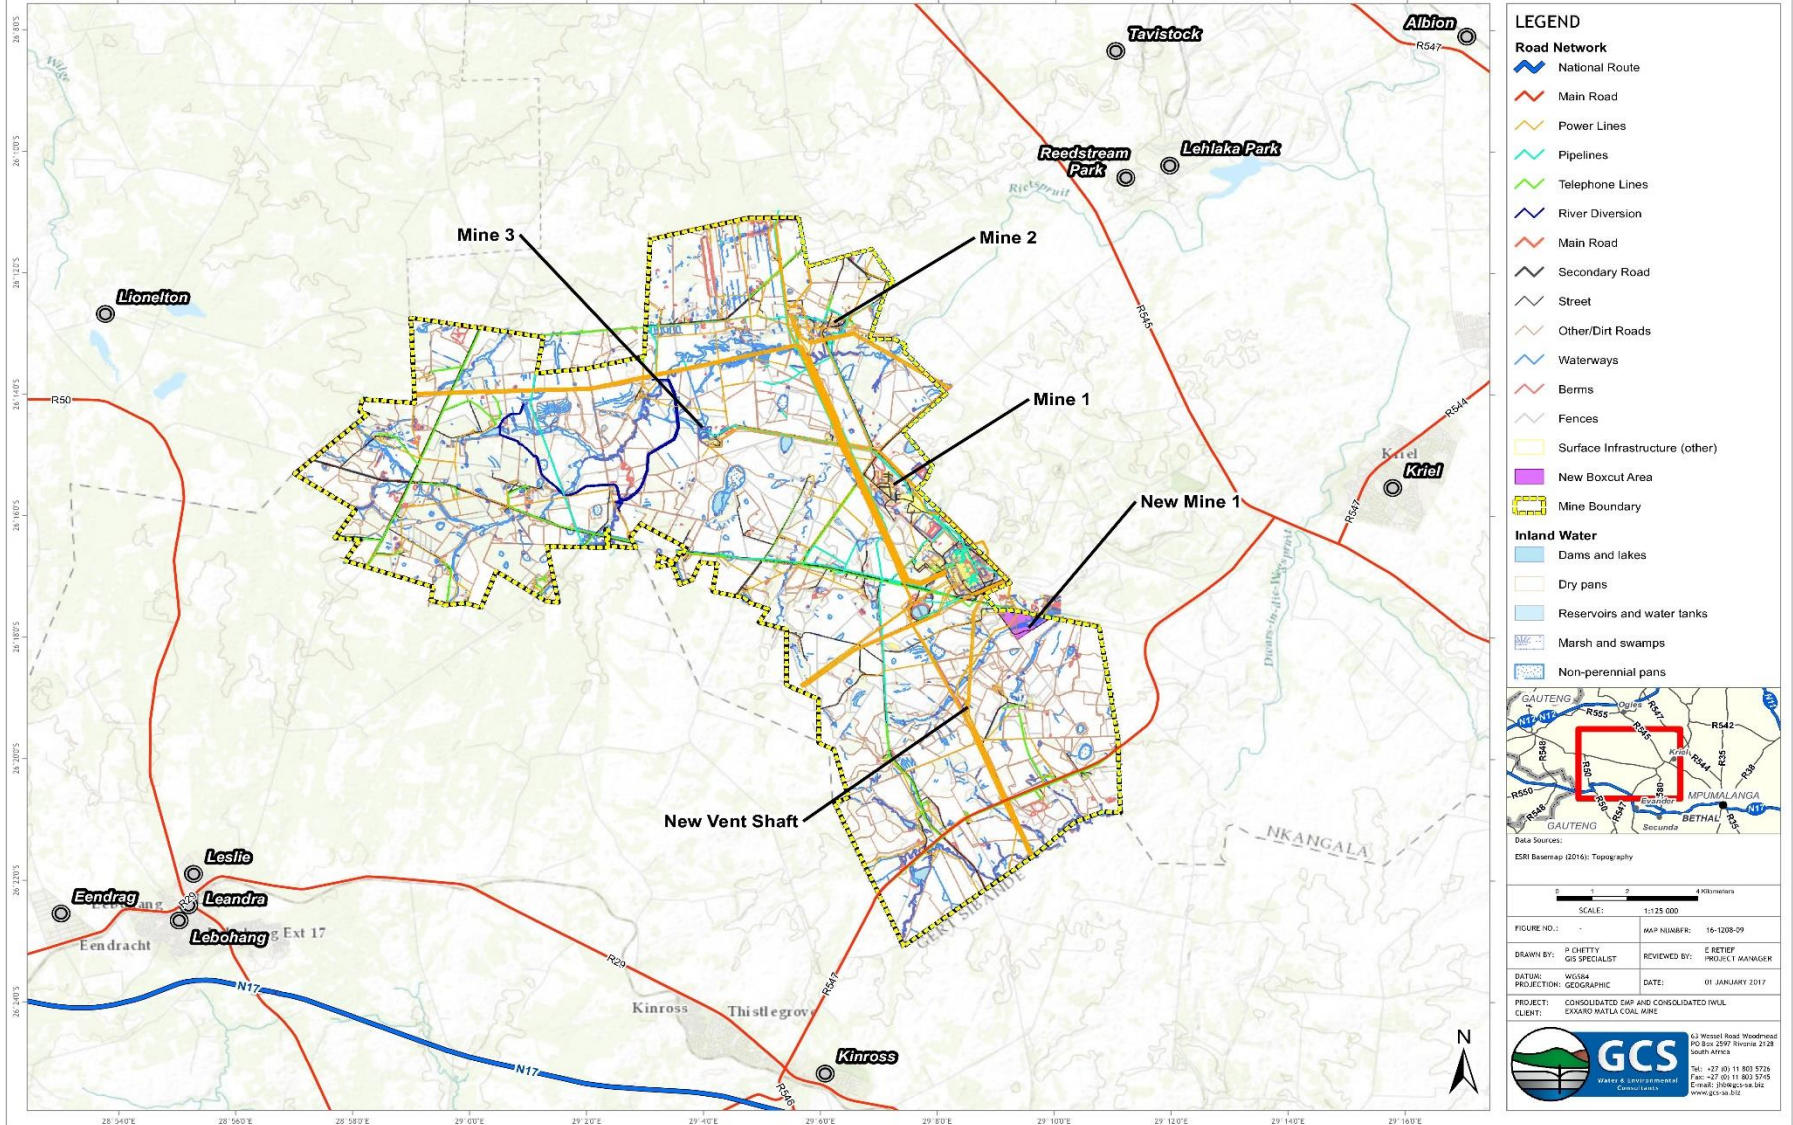

## GCS - Independent Consultant

- Riana Panaino (Environmental Consultant)
- Renee Janse van Rensburg (Unit Manager)

# Project Location - Matla Mining Rights Area

## MATLA COAL MINE CONSOLIDATED EMP & IWUL - REGIONAL SURFACE INFRASTRUCTURE LAYOUT

# Current Authorisations and Licences

| Licence                      | Date | Legislation  | Operation                                             |
|------------------------------|------|--------------|-------------------------------------------------------|
| Mining Licence: 9/94         | 1994 | Minerals Act | Mine 1, Mine 2, Mine 3 and E'Tingweni                 |
| MP30/5/1/2//3/2/1/(327)MR    | 2009 | MPRDA        | Mine 1                                                |
| MP30/5/1/2//3/2/1/(327)MR    | 2013 | MPRDA        | Water Treatment Plant and Brine Ponds                 |

| 17/2/3N-70                   | 2012 | NEMA         | Water Treatment Plant and Brine Ponds                 |
| Licence 24084303             | 2017 | NWA          | River diversion                                       |
| Licence 24084303             | 2010 | NWA          | Section 21(a), (b), (f), (g), (j) water uses on Matla |
| Licence 04/B11E/ABCFGIJ/2446 | 2014 | NWA          | Water Treatment Plant                                 |
| Licence 04/B11E/ACFGIJ/3734  | 2015 | NWA          | New Mine 1 Shaft                                      |
| Waste Licence 12/9/11/L649/6 | 2013 | NEMWA        | Water Treatment Plant and Brine Ponds                 |

# Existing Infrastructure - Mine 1

- Pollution Control Dams
- Plant
- Workshop
- Administration and other buildings
- Shaft complex (not in operation)
- Stockpile
- Waste Rock Dump

# Existing Infrastructure - Mine 2

- Sewage treatment plant
- Pollution Control Dams
- Workshops
- Shaft complex

# Existing Infrastructure - Mine 3

- Sewage treatment plant
- Pollution Control Dams
- Workshops
- Shaft complex
- [River diversion](#)

# Proposed Infrastructure - Mine 1 New Shaft

Proposed construction of

- New access shaft complex
- Overland conveyor
- Ventilation shaft
- Overhead power lines

*This has been approved but has not commenced*

# Water Treatment Plant

- Reverse Osmosis Water Treatment Plant;
- Brine Ponds;
- Storm water dams;
- Workshop
- Administration and other buildings
- Sewage package plant (Septic Tank)

*Currently in operation*

# Current Consolidation Project

The Matla Management Team has decided to consolidate all environmental authorisations (EMPs and IWULs) in order to achieve the following:

- Better management of the various legal requirements set out in each authorisation
- Improvement in the management of the costs associated with the implementation of the legal requirements
- To avoid duplications in compliance related matters and ensure all reporting requirements are met

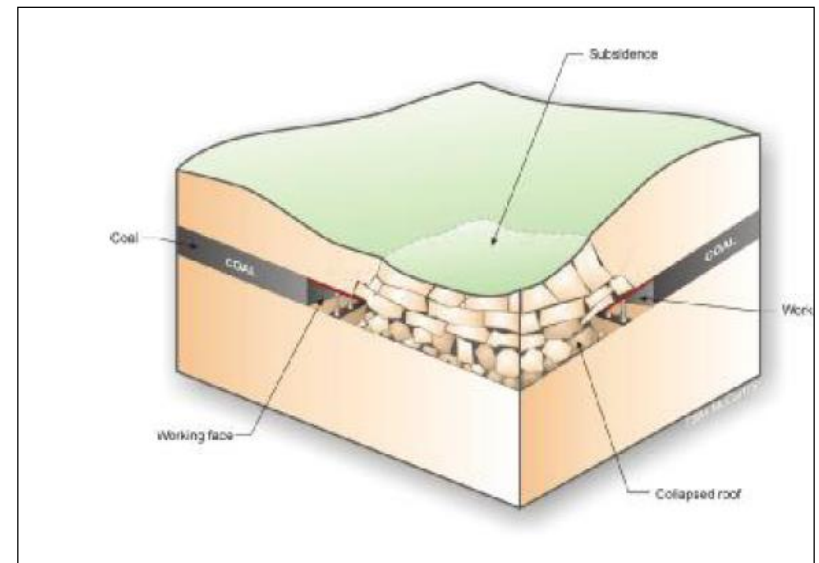

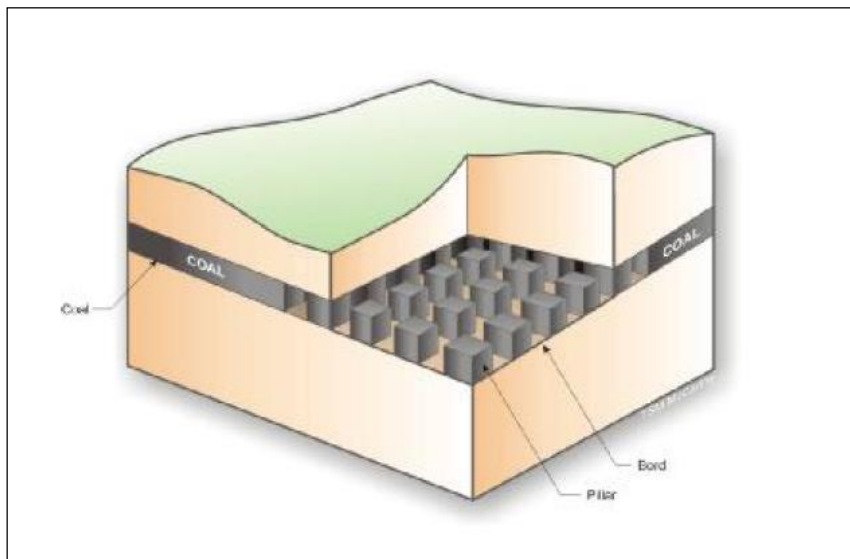

The purpose of the EMPr for the proposed consolidation of all existing Matla EMPs would be:

- To describe how potential negative environmental impacts will be managed through appropriate mitigation measures
- To improve on management actions that have not been effective
- To describe actions that could be taken to rehabilitate the affected areas
- To prescribe monitoring actions that will ensure that the environmental management programme is adhered to
- To describe how potential positive environmental impacts will be maximised

# Inclusion of Stooeping

Stooeping involves removing the pillars that were left behind during bord and pillar mining, retreating back towards the mine's entrance. After the pillars are removed, the roof is allowed to collapse behind the mining area.

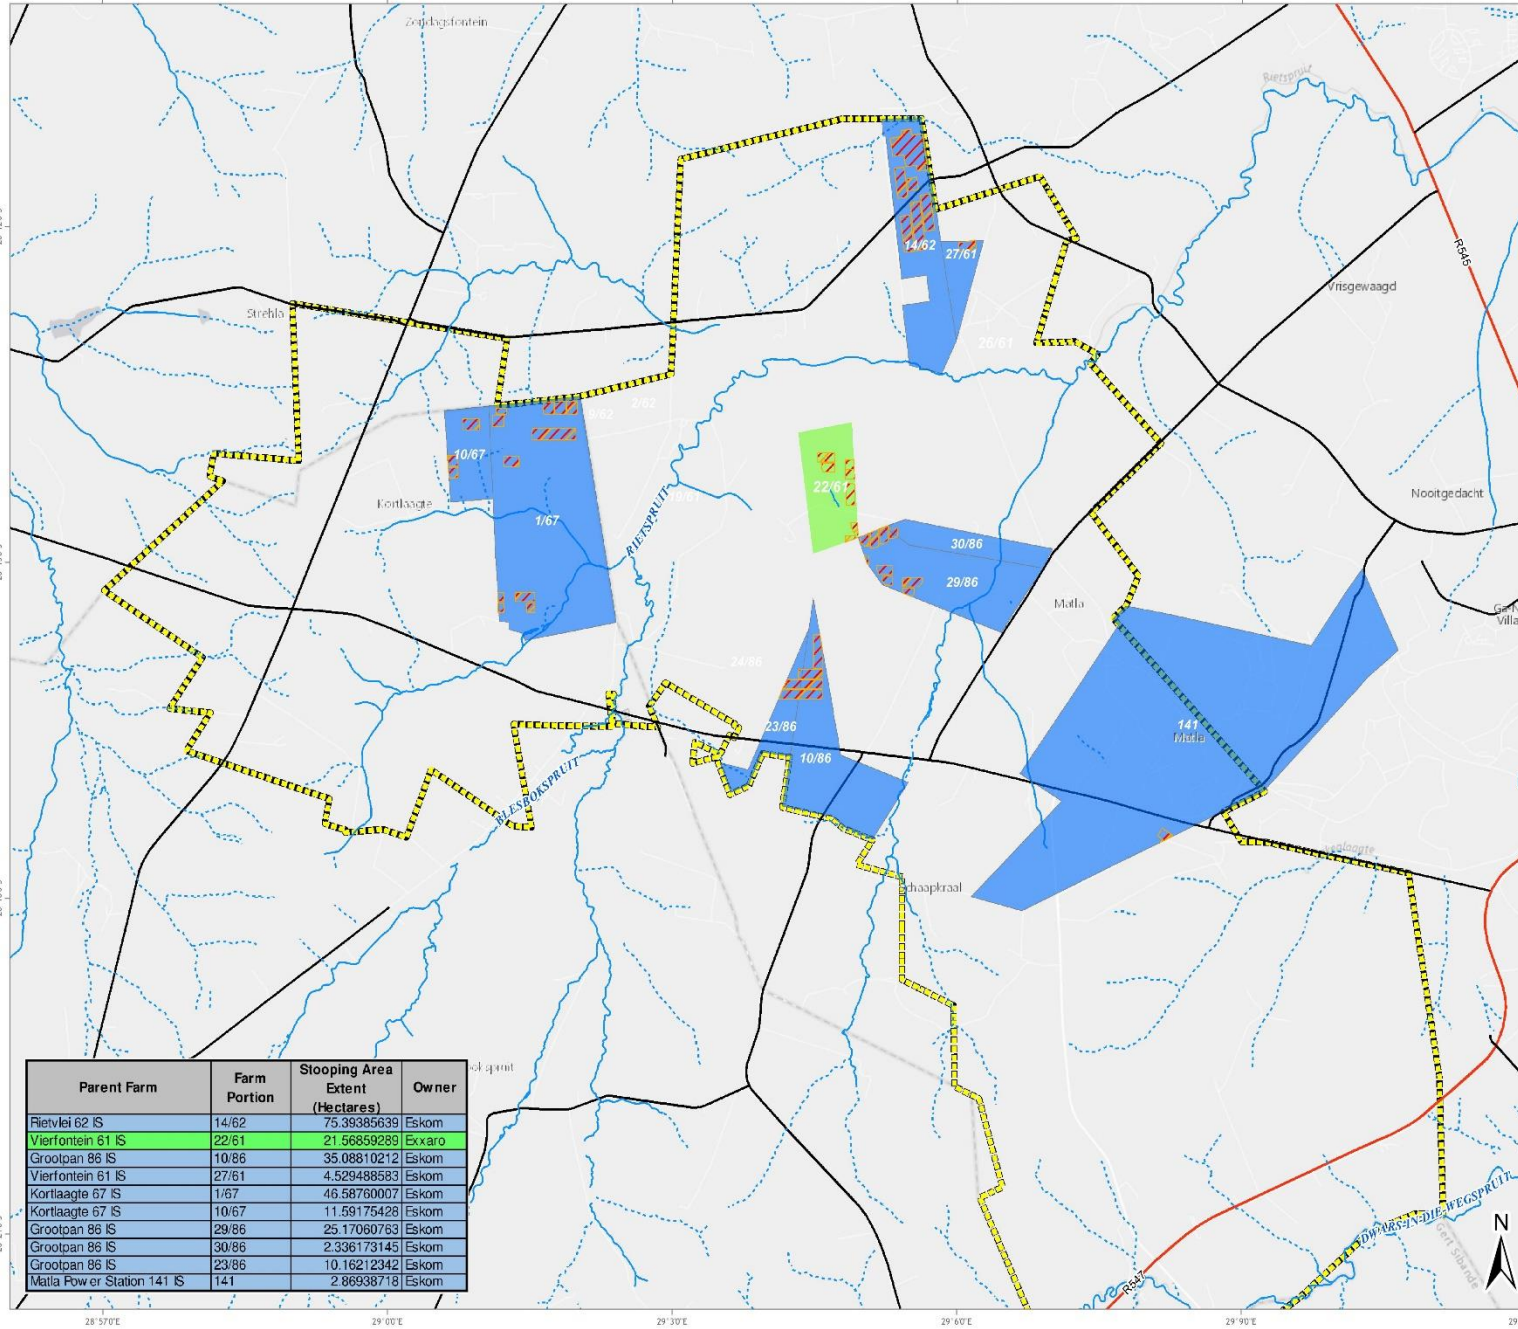

# Inclusion of Stooping

The proposed stooping project will result in extension of the life of mine with additional six (6) years.

The additional coal resources will supply Eskom with coal for power generation.

The activity will also impact positively on the local as well as regional economy.

| Direct impact: change in land capability                                    | M                              | M                             |
| Ponding as a result of subsidence due to stooing of underground pillars     | M                              | L                             |
| Indirect impact: groundwater quality                                        | M                              | L                             |
| Direct impact: disruption to faunal and floral communities                  | M                              | L                             |
| Direct impact: re-establishment of faunal and floral communities            | L                              | H                             |
| Direct impact: fugitive dust emissions                                      | M                              | L                             |
| Direct impact: vehicle entrained dust                                       | L                              | L                             |
| Indirect impact: wind-blown dust off rehabilitated areas                    | M                              | L                             |
| Direct impact: removal of surface infrastructure                            | M                              | L                             |
| Direct impact: rehabilitation equipment and demolition activities           | M                              | L                             |
| Direct impact: noise from rehabilitation activities                         | M                              | M                             |
| Direct impact: reduction in noise                                           | L                              | M                             |
| Direct impact: loss of jobs                                                 | H                              | H                             |
| Change to Land Use Capability of the surface area as a result of subsidence | M                              | M                             |
| Indirect impact: water quality deterioration                                | L                              | L                             |

# Current Project Status

Application submission - 20 October 2017

Draft Scoping Report submission - 27 October 2017

Final Scoping Report submission - 1 December 2017

Approval/Rejection of Scoping Report - 5 February 2018

Draft EIA/EMP submission - 12 February 2018

Final EIA submission - April 2018

# Question/Discussion Session

Please raise your hand when you have a question

When called upon:

- Please stand
- State your name
- State your number (provided to you at the registration table)
- Only ask one question at a time
- Be respectful and allow every person the opportunity to raise their issues and have their issues addressed

# Closing

Thank you for your attendance!

Please come and discuss any further issues with the GCS/Exxaro representatives after the meeting if necessary.

## Public Meeting Minutes

**Subject:** Matla Stopping and Consolidation Public Meeting

**Venue:** Kriel Golf Club  
Farm Driefontein, Ogies Rd, Kriel, 2271

**Date:** 2017/11/09

**Time:** 16:30

**Attendance & Distribution:** Environmental Assessment Practitioners:  
Renee Janse van Rensburg (RJvR)  
Riana Panaino (RP)  
Marica Swart (MS)

Matla Representatives:

- |                             |                                        |
|-----------------------------|----------------------------------------|
| 16. Barry Young (BY)        | 30. Risimati Chauke (RC)               |
| 31. Simphiwe Mkhayae (SM)   | 32. Vinny Moodley (VM)                 |
| 33. Stephen Badenhorst (SB) | 34. Mbedsi Edward (ME)                 |
| 36. Mervyn Geduldt (MG)     | 42. Mamatsha Legodi (NB <sub>1</sub> ) |

Interested and Affected Parties:

- |                             |                                         |
|-----------------------------|-----------------------------------------|
| 3. Thozamile Ndaba (TN)     | 8. Tsepiso Maboja (TM)                  |
| 9. Zacharia Khanye (ZK)     | 13. Lebogang Maboja (LM)                |
| 15. Hannes Erib (HE)        | 17. Hans Jacobs(HJ)                     |

| DG: Questioned how the condition of the groundwater will change, and will there be any seepage of polluted water. He also stated that they have problems with boreholes drying up with the mining taking place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| RP: Explained that the groundwater study will look at what the current status of the groundwater is. She stated that after mining, the groundwater should return to normal levels and that the groundwater study will also look at how long it will take for the groundwater to return to the normal groundwater level. She stated further that the specialist will be able to tell how far the pollution plume will migrate, if any, and how long this will take to reach a steady state after mining. Also, she mentioned that Matla is undertaking groundwater monitoring which is usually done quarterly as a minimum. The data recorded from the monitoring will be included in the reports and made available to you so that you can see what the trends were for the past 4 years. Further she stated that with stooing there will not be an increased discharge or abstraction from the mine and that it is just a continuation of what is currently happening. |
| AB: Queried the location of the new shaft.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| RP: Stated that it will be in the South-East area of the mine (pointing it out on the screen)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| AB: Wanted to know when the shaft will be built.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| SB: They wanted to start building the shaft 5 years ago, but it will cost R 1.8 billion to establish the shaft and all other infrastructure. SB said that they are in a captive agreement with Eskom, so they are waiting for Eskom to provide the funding for the shaft's construction. He stated that Eskom has already approved it, but it is delayed because the Minister of Public Enterprises still has to approve it. He concluded that they will start with construction of the shaft when the money is there, but they don't know when that will be.                                                                                                                                                                                                                                                                                                                                                                                                           |
| AB: Raised his concern about where the people are going to live during the construction of the shaft and how they will get to work, because he is worried that the construction workers will trespass or settle on his property during the construction phase of the shaft.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| SB: Explained that before construction starts, there will be a site establishment the area will be fenced and guarded by security. There will be strict access control.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| NB <sub>2</sub> : Stated that she is concerned about where the workers, during the shaft's construction, will live, and that she is worried they will build houses nearby and then                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## ITEM

trespass on her property and also dump garbage on her property. She also wanted to know if there is going to be a noise impact study because they already have a problem with noise.

RP: Explained that with regards to noise pollution, the application for the new shaft was already done and was completed, so we are just consolidating everything in one document. Thus, the noise impact was already assessed and we are just putting together all the studies into one document. She stated further that in terms of the stooing, we have not included noise studies because this activity takes place underground.

RJvR: Responded by stating that Matla will have to appoint an ECO (whether internal or external) to manage construction. In terms of the original Environmental Management Plan (EMP) that was done there would be certain activities identified to be undertaken during construction phase. There would be demarcation of the area, then land clearance and after that the construction will start. So the ECO has a legal duty in terms of the National Environmental Management Act (NEMA) to make sure that all of those issues and the decisions made and agreed to within that construction plan is implemented on site. She explained that one of their responsibilities is exactly one of your concerns around where people are staying. It is up to the ECO to determine that people are not staying on the neighbouring farms without permission. The ECO has to do monthly audits through to the Department when they are doing the construction, and this is in terms of NEMA and the Mineral and Petroleum Resources Development Act (MPRDA), both being managed by the Department of Mineral Resources (DMR). It is important to understand who the ECO is at the time of construction, and that that person has to communicate with every person in the area that is affected. The ECO has to be on site every day during the time of construction which is usually a 12 month to a 2 year process. You as the public would then report any issues to that person and he/she will then report on the issues to the department. Usually noise monitoring will be more from a health and safety perspective, but it also includes some of the environmental acoustic noise. She said that she hasn't seen that EMP, however she would assume there will be some noise monitoring that would take place.

NB<sub>2</sub>: Sated that she doesn't see any rehabilitation being undertaken. She complained about dust from the ash dumps when there are strong winds, which is so bad that she can't see where she is driving. She stated that she would like to know how the rehabilitation will take place.

RJvR: Responded by stating that the consolidation report addresses all of the impacts currently on site in terms of all the activities. So it would look at the rehabilitation of the water treatment plant, it would look at the rehabilitation of the entire plant area. She

## ITEM

explained further that the consolidation is trying to take all of the bits and pieces from the various authorisations and putting them into one document so that it makes it easier for the mine to manage their commitments. The mine has multiple rights, so to audit each one separately they easily start losing track of what's going on. The whole aim of what we are doing is to bring that into one process so that the mine has a better understanding of what the requirements are of them, and better controls can be put into place to be able to manage it.

In terms of the rehabilitation, it is a long term process. Rehabilitation on average is up to 3 years depending on what you rehabilitate. The problem with the ash dumps are something that should be taken up with Eskom as it is on their properties.

From Matla's perspective, through doing this consolidation, they will be able to put in a monitoring plan for the entire site. Matla does monitoring already, it's now just a matter of streamlining it and making sure that everything is addressed.

Legally the new requirements under NEMA requires an annual or 2 year audit depending on what the department says of the entire mining right area, in terms of that EMP. Those audits now need to be released to the public. You will have the same information at hand as what Matla does. You will be able to see where the issues lie, and you have the opportunity to hold them accountable to that. Changes in legislation in the last 2 years have empowered the I&AP's. The new EMP will fall under that process.

AB: Stated that he is concerned about people walking over his land. He also queried how the shaft is going to be constructed? Will there be any blasting because his house is quite old.

SB: Stated that it is an incline shaft that will be developed, so essentially you will dig until you find solid ground using normal excavators and then once you get to solid ground there will be blasting taking place but it will go underground. So with the blasting there will be the necessary monitoring equipment to monitor the blasting underground and the air blast. There are two things that might impact on infrastructure, the air blast and the vibration, and both those two things will be monitored.

TN: Wanted to know if the land is currently vacant where the blasting is going to take place and are there any people residing nearby and is there a plan if the blasting will indeed affect those people?

RP: Asks VM if the mine is looking at relocation plans and if there are indeed people that live close to the areas to be blasted.

| ITEM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>VM: Answered that there aren't any people living in the vicinity of those areas to their knowledge. He also stated that it is Eskom property and they have a land manager that manages leases on all properties and they have given Matla the go-ahead to those areas. He concluded that if there are indeed relocation, it would be on Eskom's side, as they are the land-owner.</p>                                                                                                                     |
| <p>RP: Indicated on the screen that all the stooing areas will be underground, and that those pillars will be excavated and not blasted. She stated that there won't be blasting for mining and that blasting will only be for the new shaft.</p>                                                                                                                                                                                                                                                            |
| <p>RJvR and RP: Explained that the stooing areas were chosen in areas where it will not affect surface infrastructure, or communities. It will also not be directly under rivers and streams.</p>                                                                                                                                                                                                                                                                                                            |
| <p>DG: Wanted to know about the remaining areas and if they will also be subject to stooing.</p>                                                                                                                                                                                                                                                                                                                                                                                                             |
| <p>SB: Explained that the mine is very old, and that it started in 1978. He stated that since stooing is a very technical mining method, you cannot go back to old areas. It is an extensive process where they would first assess the stability before certain pillars can be stooed. If you stoo old pillars, it may pose a safety risk to the workers.</p>                                                                                                                                                |
| <p><b><u>Questions after the meeting was adjourned</u></b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <p>Unidentified I&amp;AP: Wanted to know how she can give her comments to be included in the document.</p>                                                                                                                                                                                                                                                                                                                                                                                                   |
| <p>RP: Answered that if she received the invitation via sms, then she can reply with her comments on the sms and we will receive it, and then include the comments in the comments register.</p>                                                                                                                                                                                                                                                                                                             |
| <p>TN: asked if the mine will appoint local people to construct the new shaft, and how will the local people know about it.</p>                                                                                                                                                                                                                                                                                                                                                                              |
| <p>RP: answered that it does form part of the mine's Social and Labour Plan (SLP), to first look at employing local people and making use of local small business' to contract for work.</p> <p>It is the mine's responsibility to identify all the possible candidates within the local community before appointing anyone. There will be some type of forum where people will be able to apply for jobs, and the mine will also have the database from this Public Participation Process to work from.</p> |
| <p>ERW requested that GCS run through the presentation with her as she arrived late.</p> <p>RJvR delivered the presentation.</p>                                                                                                                                                                                                                                                                                                                                                                             |

**ITEM**

ERW stated that her property was Grootpan, Portion 86 and that she ran a guest house on the property called “Pa se Huis”, and that she was concerned that any stooing operations would result in significant amounts of water referring to her property as she was at the lowest point in the area and she had previously been told by a consultant that any activities near her property would result in her property being flooded. ERW was concerned that any activities would result in a concentration of water at the low point of her property which would result in flooding. RJvR said that she would request the appointed specialists to consider this statement and address any such issues in their reports.

ERW stated that a representative, Faith, from another mining company, Blue Nightingale, had approached her as the identified owner of Haasfontein, portion 6, stating that they had been awarded a Mining Right (MR) over the property. ERW stated that she was not the owner of Haasfontein portion 6, but in fact of Grootpan portion 86. ERW queried with the representative of the mining company how a MR had been approved if Matla had a MR over the area, and the representative replied that it was because they were going to be mining a different coal seam. ERW stated that the same representative indicated sometime thereafter that the process had been placed on hold until further notice. ERW provided RJvR with the contact details of the representative in order for GCS to request copies of the specialist assessments undertaken by them. RJvR thanked ERW for the information provided and said that GCS would investigate the situation further.

### 3 Appendix B-3: Issues trail

Throughout the public consultation phase completed to date, issues have been raised. It should be noted that the stakeholder engagement process is an ongoing process and will therefore be updated as comments and responses from the authorities and public are received.

Issues and comments on the Matla project received to date are listed in the table overleaf.

| 2  | Eskom is not a commenting authority rather an interested and affected party. Please change this on the front page of the scooping report. • On the second page the subject line states “ Scooping report for listed activities associated with Mining Right and/or Bulk sampling activities including trenching in cases of Alluvial Diamond Prospecting” Is this not supposed to be for coal mining instead of diamond? | Shumani Mavhungu | Email,<br>14/11/2017                 | Comment noted, and the EAP also informed the IAP that the template was a standard template used, and therefore the title on the Page.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3  | Questioned how the condition of the groundwater will change, and will there be any seepage of polluted water. He also stated that they have problems with boreholes drying up with the mining taking place.                                                                                                                                                                                                              | Dirk Grobler     | Scoping public meetng,<br>09/11/2017 | Explained that the groundwater study will look at what the current status of the groundwater is. She stated that after mining, the groundwater should return to normal levels and that the groundwater study will also look at how long it will take for the groundwater to return to the normal groundwater level. She stated further that the specialist will be able to tell how far the pollution plume will migrate, if any, and how long this will take to reach a steady state after mining. Also, she mentioned that Matla is undertaking groundwater monitoring which is usually done quarterly as a minimum. The data recorded from the monitoring will be included in the reports and made available to you so that you can see what the trends were for the past 4 years. Further she stated that with stooping there will not be an increased discharge or abstraction from the mine and that it is just a continuation of what is currently happening. |
| 4  | Queried the location of the new shaft.                                                                                                                                                                                                                                                                                                                                                                                   | A. Boshoff       | Scoping public meetng,<br>09/11/2017 | Stated that it will be in the South-East area of the mine (pointing it out on the screen)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 5  | Wanted to know when the shaft will be built                                                                                                                                                                                                                                                                                                                                                                              | A. Boshoff       | Scoping public meetng,<br>09/11/2017 | They wanted to start building the shaft 5 years ago, but it will cost R 1.8 billion to establish the shaft and all other infrastructure. SB said that they are in a captive agreement with Eskom, so they are waiting for Eskom to provide the funding for the shaft's construction. He stated that Eskom has already approved it, but it is delayed because the Minister of Public Enterprises still has to approve it. He concluded that they will start with construction of the shaft when the money is there, but they don't know when that will be.                                                                                                                                                                                                                                                                                                                                                                                                            |

| No | Comment Raised                                                                                                                                                                                                                                                                                                                                        | By Whom    | Where and Date                        | Response by EAP                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 6  | Raised his concern about where the people are going to live during the construction of the shaft and how they will get to work, because he is worried that the construction workers will trespass or settle on his property during the construction phase of the shaft.                                                                               | A. Boshoff | Scoping public meeting,<br>09/11/2017 | Explained that before construction starts, there will be a site establishment the area will be fenced and guarded by security. There will be strict access control.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 7  | Stated that she is concerned about where the workers, during the shaft's construction, will live, and that she is worried they will build houses nearby and then trespass on her property and also dump garbage on her property. She also wanted to know if there is going to be a noise impact study because they already have a problem with noise. | N. Boshoff | Scoping public meeting,<br>09/11/2017 | <p>Explained that with regards to noise pollution, the application for the new shaft was already done and was completed, so we are just consolidating everything in one document. Thus, the noise impact was already assessed and we are just putting together all the studies into one document. She stated further that in terms of the scoping, we have not included noise studies because this activity takes place underground.</p> <p>RJvR: Responded by stating that Matla will have to appoint an ECO (whether internal or external) to manage construction. In terms of the original Environmental Management Plan (EMP) that was done there would be certain activities identified to be undertaken during construction phase. There would be demarcation of the area, then land clearance and after that the construction will start. So the ECO has a legal duty in terms of the National Environmental Management Act (NEMA) to make sure that all of those issues and the decisions made and agreed to within that construction plan is implemented on site. She explained that one of their responsibilities is exactly one of your concerns around where people are staying. It is up to the ECO to determine that people are not staying on the neighbouring farms without permission. The ECO has to do monthly audits through to the Department when they are doing the construction, and this is in terms of NEMA and the Mineral and Petroleum Resources Development Act (MPRDA), both being managed by the Department of Mineral Resources (DMR). It is important to understand who the ECO is at the time of construction, and that that person has to communicate with every person in the area that is affected. The ECO has to be on site every day during the time of construction which is usually a 12 month to a 2 year process. You as the public would then report any issues to that person and he/she will then report on the issues to the department. Usually noise monitoring will be more from a health and safety perspective, but it also includes some of the environmental</p> |

She said that she hasn't seen that EMP, however she would assume there will be some noise monitoring that would take place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 8  | Sated that she doesn't see any rehabilitation being undertaken. She complained about dust from the ash dumps when there are strong winds, which is so bad that she can't see where she is driving. She stated that she would like to know how the rehabilitation will take place. | N. Boshoff | Scoping public meetitng, 09/11/2017 | <p>Responded by stating that the consolidation report addresses all of the impacts currently on site in terms of all the activities. So it would look at the rehabilitation of the water treatment plant, it would look at the rehabilitation of the entire plant area. She explained further that the consolidation is trying to take all of the bits and pieces from the various authorisations and putting them into one document so that it makes it easier for the mine to manage their commitments. The mine has multiple rights, so to audit each one separately they easily start losing track of what's going on. The whole aim of what we are doing is to bring that into one process so that the mine has a better understanding of what the requirements are of them, and better controls can be put into place to be able to manage it.</p> <p>In terms of the rehabilitation, it is a long term process. Rehabilitation on average is up to 3 years depending on what you rehabilitate. The problem with the ash dumps are something that should be taken up with Eskom as it is on their properties.</p> <p>From Matla's perspective, through doing this consolidation, they will be able to put in a monitoring plan for the entire site. Matla does monitoring already, it's now just a matter of streamlining it and making sure that everything is addressed.</p> <p>Legally the new requirements under NEMA requires an annual or 2 year audit depending on what the department says of the entire mining right area, in terms of that EMP. Those audits now need to be released to the public. You will have the same information at hand as what Matla does. You will be able to see where the issues lie, and you have the opportunity to hold them accountable to that. Changes in legislation in the last 2 years have empowered the I&amp;AP's. The new EMP will fall under that process.</p> |
| 9  | Stated that he is concerned about people walking over his land. He also queried how the shaft is going to be                                                                                                                                                                      | A. Boshoff | Scoping public meetitng, 09/11/2017 | Stated that it is an incline shaft that will be developed, so essentially you will dig until you find solid ground using normal excavators and then once you get to solid ground there will be blasting taking place                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|    | constructed? Will there be any blasting because his house is quite old.                                                                                                                                |                 |                                     | but it will go underground. So with the blasting there will be the necessary monitoring equipment to monitor the blasting underground and the air blast. There are two things that might impact on infrastructure, the air blast and the vibration, and both those two things will be monitored.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 10 | Wanted to know if the land is currently vacant where the blasting is going to take place and are there any people residing nearby and is there a plan if the blasting will indeed affect those people? | Thozamile Ndaba | Scoping public meetitng, 09/11/2017 | <p>there aren't any people living in the vicinity of those areas to their knowledge. He also stated that it is Eskom property and they have a land manager that manages leases on all properties and they have given Matla the go-ahead to those areas. He concluded that if there are indeed relocation, it would be on Eskom's side, as they are the land-owner.</p> <p>Indicated on the screen that all the stooping areas will be underground, and that those pillars will be excavated and not blasted. She stated that there won't be blasting for mining and that blasting will only be for the new shaft.</p> <p>Explained that the stooping areas were chosen in areas where it will not affect surface infrastructure, or communities. It will also not be directly under rivers and streams.</p> |
| 11 | Wanted to know about the remaining areas and if they will also be subject to stooping                                                                                                                  | Dirk Grobler    | Scoping public meetitng, 09/11/2017 | Explained that the mine is very old, and that it started in 1978. He stated that since stooping is a very technical mining method, you cannot go back to old areas. It is an extensive process where they would first assess the stability before certain pillars can be stooped. If you stoop old pillars, it may pose a safety risk to the workers.                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 12 | Wanted to know how she can give her comments to be included in the document.                                                                                                                           |                 | Scoping public meetitng, 09/11/2017 | Answered that if she received the invitation via sms, then she can reply with her comments on the sms and we will receive it, and then include the comments in the comments register.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 13 | asked if the mine will appoint local people to construct the new shaft, and how will the local people know about it.                                                                                   | Thozamile Ndaba | Scoping public meetitng, 09/11/2017 | <p>answered that it does form part of the mine's Social and Labour Plan (SLP), to first look at employing local people and making use of local small business' to contract for work.</p> <p>It is the mine's responsibility to identify all the possible candidates within the local community before appointing anyone. There will be some type of forum where people will be able to apply for jobs, and the mine will also have the database from this Public Participation Process to work from.</p>                                                                                                                                                                                                                                                                                                    |

| No | Comment Raised                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | By Whom             | Where and Date                      | Response by EAP                                                                                         |

| 14 | <p>requested that GCS run through the presentation with her as she arrived late.</p> <p>stated that her property was Grootpan, Portion 86 and that she ran a guest house on the property called “Pa se Huis”, and that she was concerned that any stooing operations would result in significant amounts of water referring to her property as she was at the lowest point in the area and she had previously been told by a consultant that any activities near her property would result in her property being flooded. ERW was concerned that any activities would result in a concentration of water at the low point of her property which would result in flooding. RJvR said that she would request the appointed specialists to consider this statement and address any such issues in their reports.</p> <p>Stated that a representative, Faith, from another mining company, Blue Nightingale, had approached her as the identified owner of Haasfontein, portion 6, stating that they had been awarded a Mining Right (MR) over the property. ERW stated that she was not the owner of Haasfontein portion 6, but in fact of Grootpan portion 86. ERW queried with the representative of the mining company how a MR had been approved if Matla had a MR over the area, and the representative replied that it was because they were going to be mining a different coal seam. ERW stated that the same representative indicated sometime thereafter that the process had been placed on hold until further notice. ERW provided RJvR with the contact details of the representative in order for GCS to request copies of the specialist assessments undertaken by them.</p> | E. Robertson-Walker | Scoping public meetitng, 09/11/2017 | GCS thanked her for the information provided and said that GCS would investigate the situation further. |

#### 4 Appendix B-4: Authority Consultation

Meetings were held with the competent Authorities (DWS - 23 November 2016 and DMR - 6 December 2016) prior to submission of the application form, in order to confirm the listed activities and process going forward with regards to the consolidation of the EMP's and the IWUL's. Another meeting will be scheduled by the time of submission of the final EIA/EMP.

The meeting presentations and attendance registers are shown overleaf.

| <p><b>1. Purpose of Meeting</b></p> <p>1.1. Discuss the Matla Integrated Water Use Licence (IWUL) Consolidation project with the Department of Water and Sanitation's (DWS) official; Mr. Isaac Tlagadi (IT).</p> <p>1.2. To discuss the potential of including new water uses identified in terms of Section 21(g) and the stooping uses in terms of Section 21(c) and (i) of the National Water Act, 1998 (Act No. 36 of 1998) (NWA)</p> <p>1.3. To discuss the way forward and determine any outstanding information requirements</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | N/A      | N/A    |
| <p><b>2. Matters Arising</b></p> <p>2.1. Linda Sheppard (LS) introduced the project and presented the Matla Consolidation background (see presentation attached).</p> <p>2.2. The current Integrated Water Use Licences (IWULs) that have been issued by the DWS, in terms of Section 21 of the NWA, to Matla were briefly discussed.</p> <p>2.3. The locations and a brief overview of the various Mining areas was presented.</p> <p>2.4. A brief overview of the current project and the Matla IWUL consolidation, was presented. The main purpose of the meeting was to determine a way forward and ascertain the desired approach for the consolidation from the DWS.</p> <p>2.5. LS presented the proposed potential new uses for the Matla project. Uses in terms of Section 21(g) of the NWA included the cleaning of the surface areas for Mine 1 (New Shaft), 2 and 3 as well as dust suppression around the stockpile area with water from the Pollution Control Dam (PCD).</p> <p>2.5.1. Vinny Moodley (VM) explained that currently dust suppression and the cleaning of the various surfaces at Mines 1, 2 and 3 is undertaken using clean water. During a site visit by DWS officials, it was recommended that cleaning of these surface areas be undertaken using the dirty water from the PCD, which would need to be applied for as a Section 21(g) water use. Using PCD water for cleaning purposes would aid in water conservation and ensure that water is</p> | N/A      | N/A    |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                       |                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| <p>recycled where possible. The water will remain in the dirty water area and be channelled back to the PCD after cleaning. No discharge in this regard will take place.</p> <p>2.5.2. VM indicated that the dust suppression will be for the stockpile area. VM further explained that the water in the PCD comes from the surface runoff at the Mine. The water is then sent from the PCD to the Water Treatment Plant for discharge.</p> <p>2.5.3. Kate Langlands (KL) queried if the cleaning of the surface areas at the mines with the water from the PCD would in fact trigger a water uses in terms of Section 21(g) of the NWA due to the fact the PCD is already a licensed facility.</p> <p>2.5.4. IT confirmed that the cleaning of these areas with PCD water will <b><u>not trigger</u></b> a water use in terms of Section 21(g) and therefore need not be applied for as new uses. The cleaning activities will however be required to be included in the Water Balance as well as the Integrated Water and Waste Management Plan (IWWMP) for the consolidation project. IT did confirm that the dust suppression of the stockpile <b><u>will trigger</u></b> a water uses in terms of Section 21(g) and must be applied for in the consolidation process.</p> <p>2.6. Water uses in terms of Section 21(c) and (i) for the Matla stooping project were also raised. IT indicated that, due to the fact that the stopping uses have already been presented and meetings have been held, these water uses must be included into the consolidation project in order for DWS to issue Matla with one license only. Site visits by DWS with IT and Mr. Paul Meulenbeld have already been undertaken and as such meetings in this regard will not be necessary.</p> <p>2.7. LS queried the desired way forward and the approach required from DWS. IT explained that the consolidation application should be one Integrated Water Use licence Application (IWULA) report that will present the following:</p> <p>2.7.1. The current issued licences should be incorporated into one;</p> | <p>N/A</p> <p>N/A</p> | <p>N/A</p> <p>N/A</p> |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|
| <p>2.7.2. Application for the new water uses in terms of Section 21(c), (g) and (i);</p> <p>2.7.3. The new uses will require signed licence application forms;</p> <p>2.7.4. KL confirmed with IT that <u>one</u> IWULA (to include the new uses as discussed as well as summarise the licensed water uses as per the issued IWULs) and <u>one</u> IWWMP providing for all the operations of Matla is required;</p> <p>2.7.5. KL explained that an impact assessment will be conducted for the new uses;</p> <p>2.7.6. VM enquired about the required amendments to the current IWULs in terms of coordinates and relevance to the Matla operations. IT indicated that the corrections required for the current IWULs should be included into the consolidation IWULA, so that one correct licence can be issued. VM indicated that Exxaro will provide GCS with a summary of the required corrections for the current IWULs;</p> <p>2.7.7. IT indicated that the consolidated licence, once issued, will supersede all the IWULs that have previously been issued for the Matla Mine</p> |     |     |
| <p>2.8. Renee Janse van Rensburg (RJvR) enquired about the water balance in terms of specialist requirements and what DWS would require. IT indicated that one consolidated water balance that provides for all the operations and linkages of water at Matla should be undertaken.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | N/A | N/A |
| <p>2.9. LS and RJvR explained that the specialist studies (hydrology, Hydrogeology, Ecology etc.) are currently being consolidated and updated where applicable and will provide for all the operations. IT indicated that he was satisfied with this approach.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | N/A | N/A |
| <p>2.10. RJvR explained that the new water uses will be included in the Public Consultation to be undertaken for the Environmental Management Plan (EMP) Consolidation. IT indicated that this will satisfy the requirements for public consultation in terms of the NWA and DWS's requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | N/A | N/A |
| <p>2.10.1. IT indicated that a public review period of 30 days would be sufficient due to the fact that Matla is an</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |     |     |

|                                                                                                                                                                                                                                                                                                     |     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----|
| <p>existing mine. IT indicated that if significant interest is shown in the project then the review period can be extended to 60 days to accommodate the necessary stakeholders. Malusi Buthelezi (MB) emphasised the need to ensure that the required review period is undertaken.</p>             |     |     |
| <p>2.11. RJvR enquired about any further information requirements. IT indicated that he was satisfied with what had been discussed and did not require any further information requirements as long as the NWA requirements for the IWULA had been met.</p>                                         | N/A | N/A |
| <p>2.12. LS enquired about the hardcopies and printing of the consolidated IWULA and IWWMP reports. IT indicated that three (3) hardcopies of the finalised reports and one (1) electronic copy (memory stick) will be required upon submission.</p>                                                | N/A | N/A |
| <p>2.12.1. IT indicated that a meeting upon submission will be required.</p>                                                                                                                                                                                                                        |     |     |
| <p>2.12.2. IT explained that the GCS consultants will be required to be present at the meeting at DWS for the stooing uses in terms of Section 21(c) and (i) after submission.</p>                                                                                                                  |     |     |
| <p>2.13. IT enquired about the expected submission date. RJvR indicated that the submission would be during the first quarter of 2017.</p>                                                                                                                                                          |     |     |
| <p>2.13.1. RJvR explained that there have been delays with regards to the Matla stooing application from the Department of Mineral Resources (DMR). The consolidation application is aimed to be aligned with the DMR, EMP process in terms of specialists, public consultation and timeframes.</p> | N/A | N/A |
| <p>2.13.2. VM explained that the delays were due to the Mining Works Programme requirements and enquired about the potential of submitting the consolidation IWULA before the EMP process is complete.</p>                                                                                          |     |     |
| <p>2.13.3. IT explained that the consolidated IWUL will not be issued until the DMR requirements are satisfied. IT further explained that the public consultation requirements need to be met.</p>                                                                                                  |     |     |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                            |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|-----|
| 2.13.4. IT explained that the IWUL can be submitted earlier if the NWA requirements have been met, however it would be preferable to align the processes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                            |     |
| 2.14. LS concluded the meeting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | N/A                                                        | N/A |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                            |     |
| <p><b>3. Deliverables</b></p> <p>3.1. Specialist studies to be consolidated and updated where applicable to provide for the new uses as discussed and agreed upon in the meeting</p> <p>3.2. The required corrections and amendments are to be provided to GCS in order to incorporate these changes into the consolidation reports.</p> <p>3.3. Alignment of the processes, in terms of the EMP and IWUL consolidations, should be achieved. In the event that this cannot be achieved this will be communicated with DWS and DMR.</p> <p>3.4. GCS to compile one IWULA and one IWWMP that will provide for the new uses as well as the consolidated uses that have already been licensed.</p> | <p>GCS</p> <p>Exxaro</p> <p>Exxaro &amp; GCS</p> <p>LS</p> |     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                            |     |

Exxaro Matla IWUL Consolidation Project  
Pre-Application Meeting with DWS  
2016/12/06

## Discussion points

---

- Welcome and Introduction;
- Current Licences in terms of NWA;
- Project location;
- Existing infrastructure;
- Current project status;
- Project way forward; and
- Section 21 uses proposed to be included in consolidation.

## Welcome and Introduction

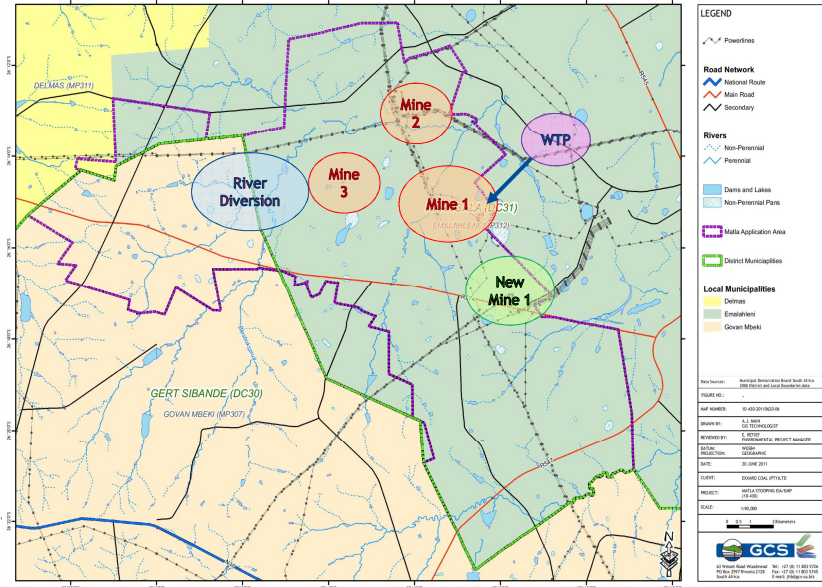

- **Exxaro & Matla project team**
  - Vinny Moodley
- **GCS - Independent Environmental Assessment Practitioners (EAP)**
  - Renee Janse van Rensburg (Environmental Authorisation and Assessment Unit Manager)
  - Kate Langlands (Water Authorisations Unit Manager)
  - Linda Sheppard (WULA Consultant)
- **Department of Water and Sanitation**
  - Isaac Tlagadi

## Current Licences in terms of the NWA

- **Current Integrated Water Use Licences in terms of Section 21 of the National Water Act, 1998 (Act No.36 of 1998) (NWA):**
  - Licence No. 24084303:
    - Dated 16 July 2007
    - River Diversion - Section 21(c) and (i)
  - Licence No. 24084303:
    - Dated 1 October 2010
    - Mines 1, 2 and 3 - Sections 21(a), (b), (f), (g) and (j)
  - Licence No. 04/B11E/ABCFGIJ/2446:
    - Dated 17 March 2014
    - Water Treatment Plant - Sections 21(a), (b), (c), (f), (g), (i) and (j)
  - Licence No. 04/B11E/ACFGIJ/3734:
    - Dated 16 July 2015
    - Mine 1 Shaft - Sections 21 (a), (c), (f), (g), (i) and (j)

## Project Location - Matla Mining Rights Area

MATLA STOOPING EIA/EMP: LOCAL AND DISTRICT MUNICIPALITIES

## Mine 1

- Settling ponds
- Evaporation dams
- Plant
- Workshop
- Administration and other buildings
- **Shaft complex (not in operation)**
- Stockpiles
- Waste Rock Dumps

## Mine 2

- Sewage treatment plant
- Evaporation dam
- Workshops
- Shaft complex

## Mine 3

- Sewage treatment plant
- Settling dams
- Workshops
- Shaft complex
- River diversion

## Mine 1 New Shaft

### Proposed construction of

- New access shaft complex
- Overland conveyor
- Three ventilation shafts
- Overhead power lines

## Water Treatment Plant

- Reverse Osmosis Water Treatment Plant;
- Brine Ponds;
- Workshop;
- Security office;
- Changes houses;
- Storage/ware houses;
- Storm water dams;
- Landfill/waste storage area; and
- Sewage package plant.

## Current Consolidation Project

- Project initiated on 31<sup>st</sup> October 2016;
- Information gap analysis has been conducted;
- DWS meeting required for IWUL consolidation;
- Section 21 uses proposed to be Included in consolidation:
  - Additional Section 21(g) water uses:
    - Use of dirty water for cleaning purposes of parking lot and stockpile areas for Mine1, 2 and 3; and
    - Dust suppression at stockpile area with dirty water.
  - Matla Stooing:
    - Section 21(c) and (i) uses

## Discussion points

### Process going forward - consolidation

- Way forward for authorisation process to be determined (how should the licenses be consolidated?);
- Determine exact information requirements from DWS; and
- Determine any further studies required.

### Process going forward -S21(g)

- How should the new activities to be licenced?

Can stooing activities be included into the consolidation process?

**Exxaro Matla IWUL Consolidation Project**

Pre-Application Meeting with DMR

29/11/2017

# Discussion points

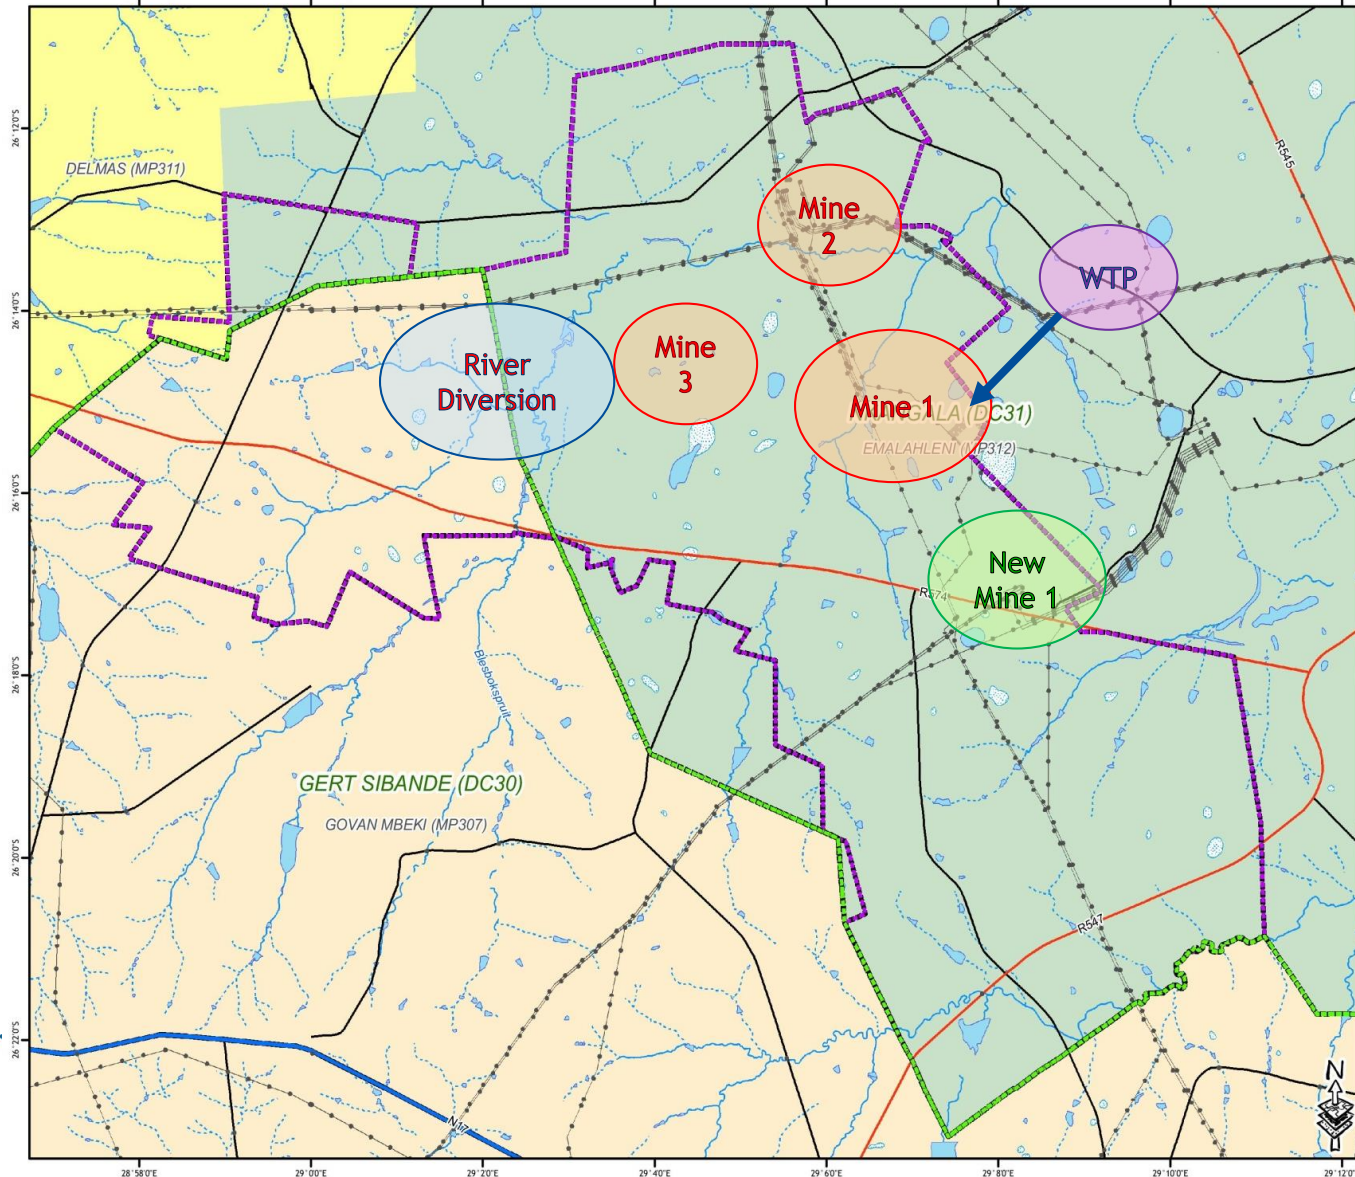

- **Welcome and Introduction;**
- **Current Licences in terms of NWA;**
- **Project location;**
- **Existing infrastructure;**
- **Current project status;**
- **Project way forward; and**
- **Section 21 uses proposed to be included in consolidation.**

# Welcome and Introduction

- **Exxaro & Matla project team**
  - Vinny Moodley
- **GCS - Independent Environmental Assessment Practitioner (EAP)**
  - Estie Retief (Environmental Authorisation and Assessment Project Manager)
- **Department of Mineral Resources**
  - Mushudu Mutengwe

# Project Location - Matla Mining Rights Area

## MATLA STOOPING EIA/EMP: LOCAL AND DISTRICT MUNICIPALITIES

# Mine 1

- Settling ponds
- Evaporation dams
- Plant
- Workshop
- Administration and other buildings
- **Shaft complex (not in operation)**
- Stockpiles
- Waste Rock Dumps

# Mine 2

---

- Sewage treatment plant
- Evaporation dam
- Workshops
- Shaft complex

# Mine 3

---

- Sewage treatment plant
- Settling dams
- Workshops
- Shaft complex
- River diversion

# Mine 1 New Shaft

---

## Proposed construction of

- New access shaft complex
- Overland conveyer
- Three ventilation shafts
- Overhead power lines

# Water Treatment Plant

- Reverse Osmosis Water Treatment Plant;
- Brine Ponds;
- Workshop;
- Security office;
- Changes houses;
- Storage/ware houses;
- Storm water dams;
- Landfill/waste storage area; and
- Sewage package plant.

# Current Consolidation Project

- **Project initiated on 31<sup>st</sup> October 2016;**
- **Information gap analysis has been conducted;**
- **Consolidation of Specialist studies currently underway;**
- **DWS meeting for IWUL consolidation completed on 23 November 2016 (with Isaac Tlagadi).**

# Discussion points

## Process going forward - consolidation

- Way forward for authorisation process to be determined (how should the licenses be consolidated?);
- Determine exact information requirements from DMR; and
- Determine any further studies required.

## Process going forward - Stooing Project

- How should the new activities to be licenced?

**Can stooing activities be included into the consolidation process?**

## Public Meeting Minutes

**Subject:** DMR Meeting

**Venue:** Mine Managers Boardroom (Arnot)

**Date:** 6 December 2016

**Time:** 13:15

**Attendance:** (DMR) Matshilele Ratsela  
(DMR) Mashudu Mutengwe  
(Exxaro) Vinny Moodley  
(Exxaro) Malusi Buthelezi  
(GCS) Estie Retief

**Distribution:** As above

| <p><b>1. Purpose of Meeting</b></p> <p>1.1. The purpose of the meeting is to gain the DMR's insight into the approach to authorise the Matla Stooing Project which requires a NEMA and MPRDA authorisation, and to align it to the Matla MPRDA Consolidation Process.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |          |        |
| <p><b>2. Presentation</b></p> <p>2.1. GCS presented the PowerPoint slides (Annexure B)</p> <p>2.2. GCS enquired how the DMR suggest the Matla Consolidation and Matla Stooing processes be aligned in order to facilitate authority and public review of the documents.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |          |        |
| <p><b>3. Matters Arising</b></p> <p>3.1. The DMR asked if new activities are triggered</p> <p>3.2. GCS stated that NEMA listed activities will be triggered for the stooing application</p> <p>3.3. Exxaro stated that the mine will not do total extraction, and will only remove 60% of the pillars, the rest of the pillar will be left behind.</p> <p>3.4. The DMR enquired if a Section 102 will be required.</p> <p>3.5. GCS stated that a Section 102 process is required for both the Matla Stooing and Matla Consolidation Projects.</p> <p>3.6. Exxaro stated that the Mining Works Programme (MWP) will be updated.</p> <p>3.7. DMR stated that if two (2) separate Section 102 processes are followed, the one process would swallow the other.</p> <p>3.8. The DMR stated that the NEMA application must be made for the listed activities, but it must be made clear that the consolidation process is also discussed and will run parallel to the NEMA Application.</p> <p>3.9. The DMR stated that the Environmental Scoping Report (ESR) should mention the entire project</p> <p>3.10. GCS confirmed with the DMR that one Section 102 process may be followed for amendment of the MWP, thereafter the NEMA application will be submitted for the new listed activities. GCS confirmed that the ESR and the EIA/EMP will mention the entire Matla project, and be clear on what has been authorised previously, and what the new activities to be assessed are.</p> <p>3.11. The DMR stated the new activities must be clearly stated, so that the official appointed for the project is clear on the distinctions between existing/approved and new activities.</p> |          |        |

| ITEM                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | DEADLINE | ACTION |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|--------|
| <p>3.12. GCS stated that Exxaro is in the process to appoint a consultant to do the closure assessments in terms of the new MPRDA Regulations. However, for the Matla consolidation process, only the Final closure and rehabilitation report will be compiled and submitted along with the EIA/EMP.</p> <p>3.13. Exxaro stated that the closure summary will be included as a summary in the EIA/EMP report, and that GCS is upfront on what to expect.</p> <p>3.14. GCS stated that the closure report will be clear on the scope of appointment and the limitations of the document.</p> <p>3.15. The DMR stated that they are in agreement with the methodology.</p> |          |        |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |          |        |
| <p><b>4. Deliverables</b></p> <p>4.1. Exxaro thanked the DMR for their time</p> <p>4.2. GCS thanked the DMR and Exxaro and the meeting was concluded at 13:30.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |          |        |

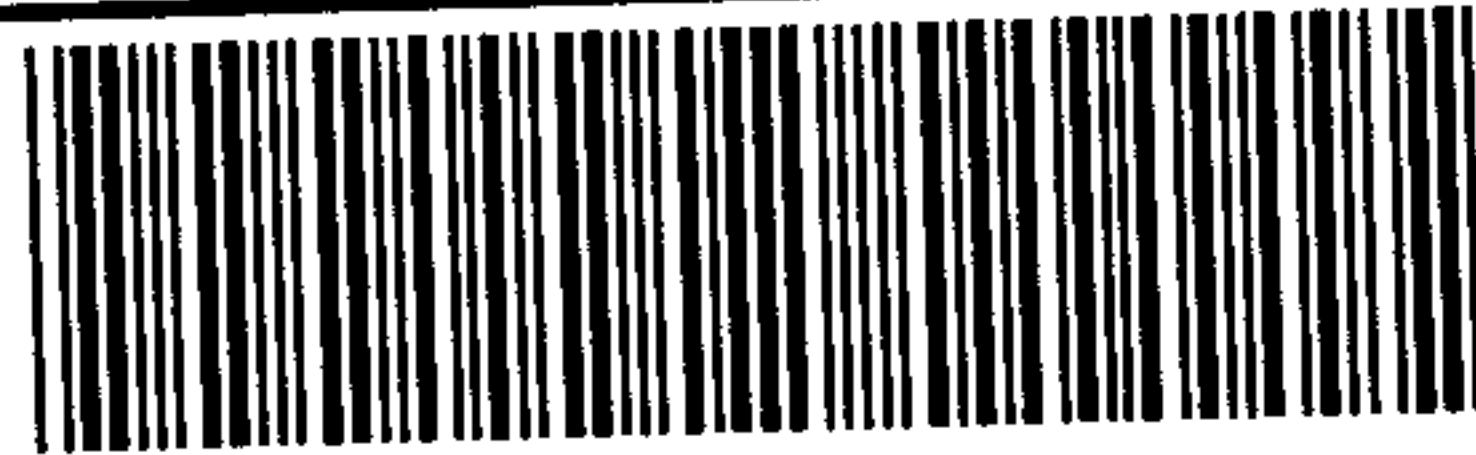

## 5 Appendix B-5: Proof of submission of Scoping report to commenting authorities

The Draft Scoping report and Draft EIR was submitted for comment to the following authorities:

- Nkangala DM
- Gert Sibande DM
- eMalahleni LM
- Govan Mbeki LM
- DWS
- MTPA
- DARDLEA
- Eskom
- SAHRA

## 6 Appendix B-6: EIA phase

### 6.1 Availability of Draft Environmental Impact Report

Identified I&AP's were notified of the availability of the Draft Environmental Impact Report for public review for the period 27 July 2018 to 27 August 2018, as well as the Public Meeting via Advertisements, Email, Fax and Sms.

#### 6.1.1 Advertisements

Advertisements, according to Regulation 41 of NEMA regarding the project background, the assessment process being followed, the availability of the draft Environmental Impact Report (DEIR) for public comment and a public meeting were placed on 27 July 2018 in both the Witbank News and the Ridge Times (proof to be provided in final EIR).

#### 6.1.2 Email

An email notification will be sent to all Identified I&APs on the Matla Database informing them of the availability of the DEIR for review and the Public Meeting to be held on 16 August 2018. Proof of email notification will be provided in the Final EIR.

#### 6.1.3 Fax

Fax notification will be sent to all Identified I&APs on the Matla Database informing them of the availability of the DEIR for review and the Public Meeting to be held on 16 August 2018. Proof of fax notification will be provided in the Final EIR.

#### 6.1.4 SMS

SMS notification will be sent to all Identified I&APs on the Matla Database informing them of the availability of the DEIR for review and the Public Meeting to be held on 16 August 2018. Proof of sms notification will be provided in the Final EIR.

### 6.2 Public Meeting

A Public meeting will be held at the Kriel Golf Club on Thursday, 16 August 2018.

The meeting presentation, Attendance register and Meeting minutes will be provided in the final EIR.
