

MOTIVATION FOR PERMIT APPLICATION

PROJECT: Submission to the SAHRIS National Heritage Organisation
for Addition or Alterations to Buildings older than 60 years
Section 34 of the NHRA as per referral 1. of CE22120008_1

- Due to a long lack of proper maintenance compared to the age of the building, this reason might have been the cause for the building to need urgent attention by means of a permit since all other alternatives to preserve, refurbish and make good of what is left of the building included minor additions and refurbishments .

This is why Ethekewini Development Applications Assessment dept. has requested that a permit be provided from the NHRA Provincial Statutory body approving the application & compliance.

Hoping this application will meet your favourable consideration for approval

Regards
