

I Mokgosi Khobo would like to publicly dispute the dispute by Sakkie Gerber! I am a member of the Jagersfontein community and Sakkie Gerber is not.

I was part of the build up meeting to the public participation where the Mayor , myself and JDP had a discussion the day before about having the public participation in a community hall regardless of the state it was in. Commitments from all parties were made to make that public participation a success, all the processes were followed and even the municipality was involved in terms of loudalling to the community for the public participation, we cannot be held at ransom by the bitterness of Sakkie Gerber loosing the bid to Mine at Jagersfontein, he lost in court not so long ago on the issues he has with JDP.

As a community member I do not recognize him and my appeal is to sideline such a dispute coming from Sakkie Gerber as I mentioned above that he is not a resident of Jagersfontein.

The day of the public participation the Mayor of Kopanong Local Municipality who is also the councilor opened the meeting officially and after the process he also closed the meeting that day.

There is a relationship established between JDP, the Community and the municipality, people were informed also about the documents for comments which was at the Jagersfontein library.

I urge that the process continue

Mokgosi Khobo
