Subject: JINDAL MELMOTH IRON ORE MINE PROJECT - DRAFT SCOPING REPORT FOR PUBLIC COMMENT

From: Noluyolo Xorile

Date: 16/02/2022 10:55:42

Notes:

Dear Nkosinathi Zikhali

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and South African BEE partner Mr. Thabang Khomo (Pty) Ltd (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in the KwaZulu-Natal Province.

Jindal is proposing an open cast mine and processing facility to produce iron ore concentrate for export. The Jindal Melmoth Iron Ore Project (MIOP) is proposed in a phased approach and this Mining Right Application (MRA) only includes mining in the south-eastern section of the South Block. Through the MRA Jindal intends to consolidate the Prospecting Rights for the North (PR 10644 - 8 467 ha) and South Blocks (PR 10652 - 11 703 ha) into a single Mining Right.

SLR Consulting South Africa (Pty) Ltd has been appointed by Jindal as the Environmental Assessment Practitioner for the EIA process. Please find attached a hard copy of the Draft Scoping Report (DSR) for the proposed Jindal MIOP for your review. The review period is 30 days, from 16 February 2022 to 18 March 2022. The Scoping Report can also be accessed electronically at the following locations:

- SLR website: <https://www.slrconsulting.com/en/public-documents/JindalMIOP>); and
- It can also be accessed from internet capable mobile phones without data charges (at <https://slrpublicdocs.datafree.co/en/public-documents/JindalMIOP>).

Please send your comments to SLR at the address, telephone/fax numbers or e-mail address shown below by no later than 18 March 2022. All comments received during the review process will be included in the final Scoping Report.

Dear Interested and Affected Party,

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and South African BEE partner Mr. Thabang Khomo (Pty) Ltd (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in the KwaZulu-Natal Province.

Jindal is proposing an open cast mine and processing facility to produce iron ore concentrate for export. The Jindal Melmoth Iron Ore Project (MIOP) is proposed in a phased approach and this Mining Right Application (MRA) only includes mining in the south-eastern section of the South Block. Through the MRA Jindal intends to consolidate the Prospecting Rights for the North (PR 10644 - 8 467 ha) and South Blocks (PR 10652 - 11 703 ha) into a single Mining Right.

SLR Consulting South Africa (Pty) Ltd has been appointed by Jindal as the Environmental Assessment Practitioner for the EIA process.

The Draft Scoping Report (DSR) for the proposed Jindal MIOP has been made available for a public review period of 30 days, from 16 February 2022 to 18 March 2022. The attached Non-Technical Summary (NTS) contains a brief synopsis of the DSR in both English and isiZulu. In addition, hard copies of the full DSR can be found in the following places for review:

- Dlozeyane Primary School
- Entembeni High School
- Entembeni Traditional Court
- Eshowe Library
- Gqokubukhosi Secondary School
- Mehlamasha Primary School
- Melmoth Library
- Mfanefile Primary School
- Mthonjaneni High School
- Mthonjaneni Municipality
- Mxosheni Primary School
- Nkwalini Stores
- Nogajuka Primary School
- Ntandokazi Primary School
- Obuka Traditional Court
- Sinqobile High School
- Siyavuna Primary School
- Yanguye Traditional Court

The Scoping Report can also be accessed electronically at the following locations:

- SLR website: <https://www.slrconsulting.com/en/public-documents/JindalMIOP>; and

- It can also be accessed from internet capable mobile phones without data charges (at <https://slrpublicdocs.datafree.co/en/public-documents/JindalMIOP>).

Please send your comments to SLR at the address, telephone/fax numbers or e-mail address shown below by no later than 18 March 2022. All comments received during the review process will be included in the final Scoping Report.

Subject: JINDAL MELMOTH IRON ORE MINE PROJECT - DRAFT SCOPING REPORT FOR PUBLIC COMMENT

From: Noluyolo Xorile

Date: 16/02/2022 11:14:16

Notes:

Dear Ros Devereux

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and South African BEE partner Mr. Thabang Khomo (Pty) Ltd (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in the KwaZulu-Natal Province.

Jindal is proposing an open cast mine and processing facility to produce iron ore concentrate for export. The Jindal Melmoth Iron Ore Project (MIOP) is proposed in a phased approach and this Mining Right Application (MRA) only includes mining in the south-eastern section of the South Block. Through the MRA Jindal intends to consolidate the Prospecting Rights for the North (PR 10644 - 8 467 ha) and South Blocks (PR 10652 - 11 703 ha) into a single Mining Right.

SLR Consulting South Africa (Pty) Ltd has been appointed by Jindal as the Environmental Assessment Practitioner for the EIA process. Please find attached a hard copy of the Draft Scoping Report (DSR) for the proposed Jindal MIOP for your review. The review period is 30 days, from 16 February 2022 to 18 March 2022. The Scoping Report can also be accessed electronically at the following locations:

- SLR website: <https://www.slrconsulting.com/en/public-documents/JindalMIOP>); and
- It can also be accessed from internet capable mobile phones without data charges (at <https://slrpublicdocs.datafree.co/en/public-documents/JindalMIOP>).

Please send your comments to SLR at the address, telephone/fax numbers or e-mail address shown below by no later than 18 March 2022. All comments received during the review process will be included in the final Scoping Report.

Through the MRA Jindal intends to consolidate the Prospecting Rights for the North (PR 10644 - 8 467 ha) and South Blocks (PR 10652 - 11 703 ha) into a single Mining Right.

SLR Consulting South Africa (Pty) Ltd has been appointed by Jindal as the Environmental Assessment Practitioner for the EIA process. Please find attached a hard copy of the Draft Scoping Report (DSR) for the proposed Jindal MIOP for your review. The review period is 30 days, from 16 February 2022 to 18 March 2022. The Scoping Report can also be accessed electronically at the following locations:

- SLR website: <https://www.slrconsulting.com/en/public-documents/JindalMIOP>); and
- It can also be accessed from internet capable mobile phones without data charges (at <https://slrpublicdocs.datafree.co/en/public-documents/JindalMIOP>).

Please send your comments to SLR at the address, telephone/fax numbers or e-mail address shown below by no later than 18 March 2022. All comments received during the review process will be included in the final Scoping Report.

Subject: JINDAL MELMOTH IRON ORE MINE PROJECT - DRAFT SCOPING REPORT FOR PUBLIC COMMENT

From: Noluyolo Xorile

Date: 16/02/2022 11:09:47

Notes:

Dear Mr Msizi Kunene

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and South African BEE partner Mr. Thabang Khomo (Pty) Ltd (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in the KwaZulu-Natal Province.

Jindal is proposing an open cast mine and processing facility to produce iron ore concentrate for export. The Jindal Melmoth Iron Ore Project (MIOP) is proposed in a phased approach and this Mining Right Application (MRA) only includes mining in the south-eastern section of the South Block. Through the MRA Jindal intends to consolidate the Prospecting Rights for the North (PR 10644 - 8 467 ha) and South Blocks (PR 10652 - 11 703 ha) into a single Mining Right.

SLR Consulting South Africa (Pty) Ltd has been appointed by Jindal as the Environmental Assessment Practitioner for the EIA process. Please find attached a hard copy of the Draft Scoping Report (DSR) for the proposed Jindal MIOP for your review. The review period is 30 days, from 16 February 2022 to 18 March 2022. The Scoping Report can also be accessed electronically at the following locations:

- SLR website: <https://www.slrconsulting.com/en/public-documents/JindalMIOP>); and
- It can also be accessed from internet capable mobile phones without data charges (at <https://slrpublicdocs.datafree.co/en/public-documents/JindalMIOP>).

Please send your comments to SLR at the address, telephone/fax numbers or e-mail address shown below by no later than 18 March 2022. All comments received during the review process will be included in the final Scoping Report.

AMAZWIBELA ENZIWE LULA

Umbiko Oyisandulela Ongakaphothulwa Ozobuyezwa Umphakathi Iphrojekthi Ye-Iron Ore Ye-Jindal E-Melmoth

1. ISETHULO

La mazwibela enziwe aba lula, phecelezi i-Non-Technical Summary (NTS) asinikeza amanqampunqampu oMbiko Oyisandulela Ongakaphothulwa [Draft Scoping Report (DSR)] owenziwe yi-Melmoth Iron Ore Project (MIOP). I-DSR izoyiswa eMnyangweni Wakwa-Zulu-Natal ku-Department of Mineral Resources and Energy (DMRE) ukuze kwaziswe i-Mining Right Application (MRA). I-NTS itholakala ngesiNgisi nangesiZulu futhi isakazwa kubabambiqhaza njengesisekelo sesaziso nokuphawula.

I-Jindal Iron Ore (Pty) Ltd (Jindal), ingeye-Jindal Steel and Power (Mauritius) Limited (74%) nophathina we-BBEE waseNingizimu Afrika u-Mr. Thabang Khomo (Pty) Ltd (26%). I-Jindal inaMalungelo Okumbiwa Phansi (Prospecting Rights) amabili ngaphakathi eMthonjaneni Local Municipality (LM) e-KZN. Ibhulokhi EseNyakatho (PR 10644) ingamahektha angu-8 467 kanti iBhulokhi EseNingizimu (PR 10652) ingamahektha angu-11 703 ubukhulu (Isithombe 1). Ngaphambilini i-Jindal yayicinge izinto ezimbiwa phansi kulezi zindawo ze-PR, kodwa yayiyeka iphrojekthi ngo-2016. Ukusimama kwentengo ye-iron ore sekukhuthaze i-Jindal ukuba iphinde ibheke ukuthuthukiswa kwe-MIOP futhi njengamanje yenza ucwaningo olubizwa ngokuthi yi-Bankable Feasibility Study (BFS).

I-Jindal ihlongoza ukuba kube nemayini evulekile kanye nesikhungo sokusebenza ukuze kukhiqizwe i-iron ore engahluziwe ukuba ithengiswe ngaphandle. I-MIOP ihlongozwa ukuba yenziwe ngezigaba futhi le MRA kuphela ibandakanya ukugubha engxenyeni eseningizimu-mpumalanga yeBhulokhi EseNingizimu (Isithombe 2). Nge-MRA i-Jindal ihlose ukhlanganisa aMalungelo Okumbiwa Phansi ngokuqondene neBhulokhi EseNyakatho NeseNingizimu ibe yiLungelo Lemayini elilodwa.

I-Jindal iqoke i-SLR Consulting (South Africa) ukuba ibe yiSazi Esihlaziya Indawo (Environmental Assessment Practitioner) esizimele ukuze yenze inqubo ebizwa ngokuthi yiNqubo Yokuhlaziya Umthelela Owenzeka Endaweni [(Environmental Impact Assessment (EIA)] kanye nenqubo yokubamba iqhaza komphakathi ehlobeme ebizwa ngokuthi yinqubo yokubamba iqhaza komphakathi, phecelezi i-public participation process (PPP) ukuze kwaziswe i-MRA.

Isithombe 1. Ukubukeka kweBhulokhi EseNingizimu uma usenyakatho

2. WENA UNGABANDAKANYEKA KANJANI?

Njengamanje i-DSR iyatholakala uma umuntu efuna ukuyibheka nokuphawula. I-DRS ichaza inqubo yokwenza umbiko esiyenziwe kuze kube manje kuhlangukanye nokubamba iqhaza komphakathi, inikeza incazelo yePhrojekthi ehlongozwayo, indawo ethintekayo kanye nohlelo locwaningo oluzokwenziwa oluhlaziya indlela le ndawo ezothinteka ngayo.

Ungabandakanyeka ngokwenza okulandelayo:

- Ngokufunda le NTS - ungathola umbiko ogcwele ku-<https://slrpublicdocs.datafree.co/public-documents/JindalMIOP>, etholakala kumaselula akwazi ukusebenza nge-inthanethi ngaphandle kokukhokhiswa idatha.
- Umbiko ogcwele uyatholakala nalapha: <https://slrconsulting.com/public-documents>.
- Amakhophi oqobo e-DSR angatholakala ezindaweni ezilandelayo uma kunomuntu ofuna ukuwabheka (bheka ikhasi lokugcina)
- Ukuthumela ukuphawula, imibuzo noma kukukhathazayo u-SLR eminingwaneni yokuxhumana engezansi.

Sicela nithumele ukuphawula kwenu ku:-

Gugu Dhlamini

Ucingo: (011) 467 0945; Cell: 066 082 3687

Referensi ye-DMRE: KZN30/5/1/2/2/10108MR

Ukuphawula kufanele kufike kwa-SLR kungakadluli u-18 Mashi 2022

Isithombe 2: Ukuma Kwe-MIOP Ye-Jindal Ehlongozwayo

4. INCAZELO YEPHROJEKTHI

I-Jindal ihlongoza okulandelayo ngokuqondene ne-MIOP (Isithombe 2):

- Umsebenzi wokugubha umgodi ovulekile engxenyeni eseningizimu-mpulanga yeBhulokhi EliseNingizimu (elibizwa ngokuthi yi-South East Pit).
- Ukugujwa kwamathani angaphezu kuka-800 e-ore phakathi cishe neminyaka engu-25 okuzokhiqiza cishe amathani ayizigidi ezingu-32 ngonyaka (mtpa) e-iron ore.
- Indawo yokulahla amatshe, phecelezi i-waste rock dump (WRD) ukuze kulahlwe amatshe angadingeki.
- Imboni yokusebenza yokugaya nokuhlukanisa uzibuthe ukuze kukhiqizwe cishe u-7 mtpa wokungahluziwe ukuze kuthengiswe (zimbalwa izimakethe zendawo ezikhona).
- Inqala-sizinda esihambisana nalokhu sokusekela imayini zingase zibandakanye lokhu: ilabhorethri, indawo yokuhambisa izinto, imigwaqo engenayo neyamaloli, izintambo zikagesi neziteshi ezincane zikagesi, amapayipi amanzi, inqala-sizinda esebenza ngamanzi emvula, amapayipi okungahluziwe, amahhovisi, izindlu zokushintsha, amawekhishophu nokokubiyela (phakathi kwezinye izinto).
- Udaka oluphuma endaweni yokusebenza luzolahlwa endaweni yokubeka izinsalela (eyingxenywe futhi yesicelo esiseceleni).

Ukwakhekha kwe-MIOP ehlongozwayo ungakubona eSithombeni 2. Isithombe 3 sibonisa idizayini ewumbomo wenqubo. Isakhiwo sokugcina senqala-

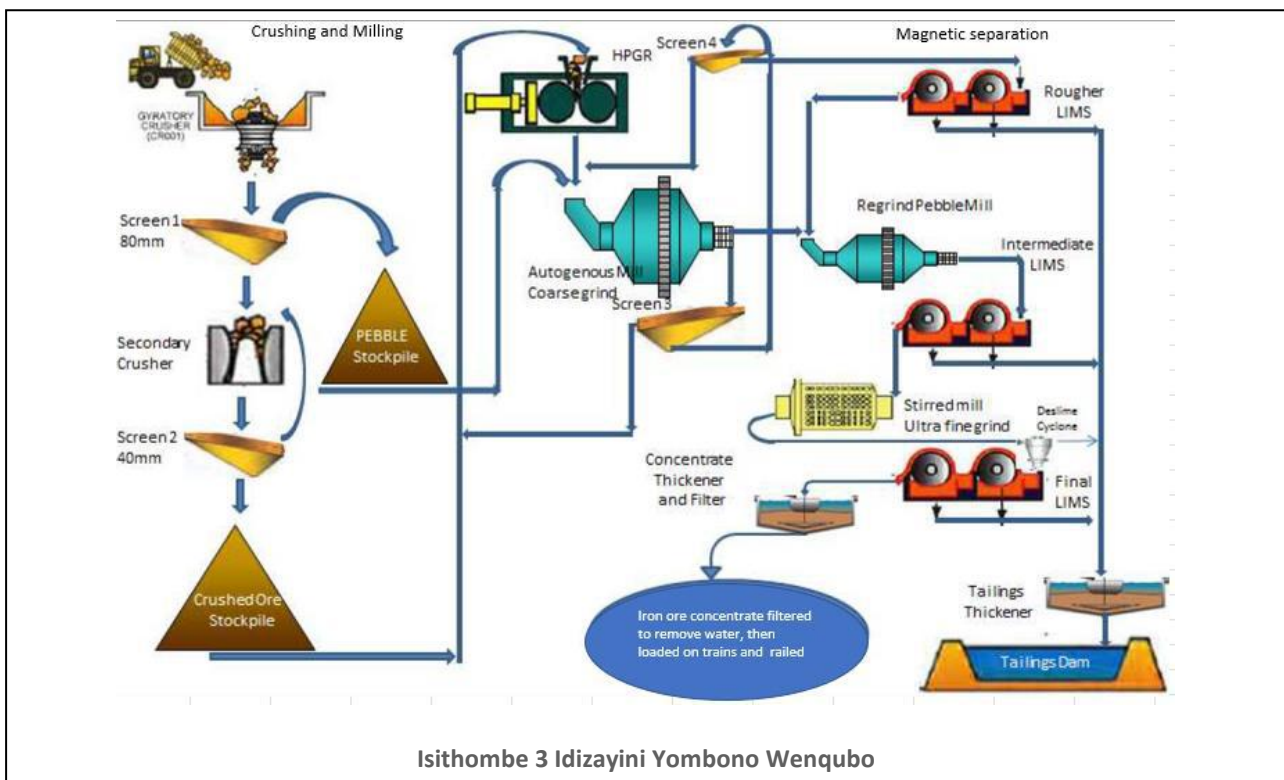

sizinda semayini sizonqunywa yi-BFS, futhi kuzocatshangelwa nemibono evela kule nqubo ye-EIA.

3. INQUBOMGOMO NOMONGO WESISHAYAMTHETHO

Ngaphambi kokuqala kwe-MIOP ye-Jindal ehlongozwayo, kudingeka izimvume Zezemvelo ezivela kuziphathimandla eziqotho:

- I-Mining Right Application evela ku-DMRE ngokuhambisana ne-Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) (MPRDA) kanye neZiqondiso, njengoba kuchibiyelwe.
- Izimvume Zezemvelo ezivela ku-DMRE ngokuhambisana ne-National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), njengoba kuchibiyelwe.
- I-Waste Management Licence (WML) evela ku-DMRE ngokuhambisana ne-National Environmental Management Waste Act, 2008 (Act No. 59 of 2008) (NEM:WA).
- I-Water Use Licence (WUL) evela ku-Department of Water and Sanitation (DWS) ngokuhambisana ne-National Water Act, 1998 (No. 36 of 1998) (NWA).

Inqubo Yombiko Ongakaphothulwa Ne-EIA, eyenziwa ngokuhambisana neZiqondiso Ze-EIA, 2014, iyadingeka ukuze i-DMRE ikwazi ukwenza isinqumo. Umbiko Ongakaphothulwa ucabangela izinkinga ezingase zibe khona ezihlobene ne-MIOP ehlongozwayo futhi ubalula izinkinga okungenzeka ukuthi zinkulu impela. Uchaza nendlela eningilizwe yokuthi i-EIA izosebenza kanjani ngayinye yalezi zinkinga, inikeze nombono

wocwaningo olwengeziwe, kuye ngesidingo.

4. ISIDINGO NOKUFISELEKA KWEPHROJEKTHI

Izici eziyinhloko zeSiqondiso Sesidingo Nokufiseleka yilezi:

Ukuthuthukiswa Kokunakekelwa Kwemvelo Ngokuqhubekayo Nokusetshenziswa Kwezinto Ezivela Emvelweni

Njengxa yesimo samaphrojekthi ezimayini, ngeke sakunqanda lokho okwenzeka emvelweni nasegalelweni lazo endaweni iyonke ehlala abantu, izilwane nezitshalo. Isayithi ye-MIOP ehlongozwayo yisayithi ebizwa ngokuthi yi-'greenfields' futhi imiphumela evela ocwaningweni lwezemvelo iveze ukuthi indawo yephrojekthi ihlobene nezinto ezithile ezikhathazayo ekunakekelweni kwemvelo, pheceleni i-species of conservatin concern (SCC) kanye nokuthintwa kwezindawo ezithile ezibaluleke kakhulu kwezemvelo. Ukuxoxisana okuqhubekayo nababambiqhaza bendawo kanye nokwakhiwa kohlelo lokunakekela indawo enotshani ngokuqhubekayo kuzoba yinto ebucayi kakhulu ekuqinisekiseni ukuthi izindawo ezinotshani zihlala zinjalo futhi azicekeleki phansi. Ngokuhambisana namazinga okunciphisa izinkinga, izindlela ezingase zibe khona zokulungisa umonakalo zizocatshangelwa kuphela njengendlela yokugcina uma zonke ezinye izindlela sezicatshangelwe/sezisetshenzisiwe.

Ngaphezu kwemithelela engase ibe khona emvelweni ehluhahlukene, imisebenzi yasemayini izodinga amanzi ukuze asetshenziswe endaweni, kulawulwe izintuli, ukuze kugezwe izimoto kanye nendawo yokushintsha nokusebenza kwasehhovisi. Kucatshangelwa ukuthi kungase kutholakale amanzi anezelwa kusistimu yamanzi avela kusiphathimandla samanzi amaningi e-KZN. Ukuhlaziywa kokuhlinzeka ngamanzi kuzokwenziwa njengengxenywe yenqubo ye-MIOP ne-EIA ezothola ukuhlinzekwa ngamanzi nesidingo. Izidingo zamanzi cishe zizonciphisa njengoba umgodi ulokhu ujula ngenxa yokusetshenziswa ngokuphindaphindiwe kwamanzi aqoqana khona emgodini.

Ukukhuthaza Ukuthuthukiswa Kwezomnotho Ezinengqondo Nezenhlalo

I-Mining Charter, 2018, yafakwa ephepheni ngo-Septemba 2018 futhi ibhekwa njengethuluzi lokuletha ushintsho embonini yezimayini nokumbiwa phansi. Ngokuyinhloko, i-Mining Charter izimisele ukuqinisekisa ngokuthi umcebo wezwe wezinto ezimbiwa phansi ungowazo zonke izakhamuzi futhi labo abahlala eduze nalezo zindawo ezinamaminerali kufanele bahlomule kwezenhlalo nezomnotho ekugujweni kwawo nasekusetshenzweni kwaleyo ndawo. I-Jindal, njangazo zonke ezinye izinkampani zaseNingizimu Afrika, izobophezeleka ukuba ihambisaa nale Mining Charter.

Ngaphezu kwalokho, i-South African National Development Plan ihlose ukuqeda ukuhlupheka nokunciphisa ukungalingani ngo-2030. I-MIOP ehlongozwayo ingaba negalelo ekuthuthukisweni komnotho nasekwakheni umnotho ozozuzisa wonke umuntu ngokwakha imali nentela kanye nokwakhiwa kwamathuba emisebenzi. Ngokusebenzisa i-Social and Labour Plan (SLP), iphrojekthi ehlongozwayo ingazuzisa kahle ku-Local Economic Development (LED) yeMthonjaneni LM, futhi okungase kuholele ekutheni kuzuze imiphakathi ngokuqondile ethintwa yilokhu kwakhiwa kwephrojekthi.

Okubalulekile futhi ukuthi i-MIOP ehlongozwayo kufanele ithathe izinyathelo zokunciphisa imithelela engemihle ekuthuthukisweni kwezolimo nezokuvakasha, ngoba le mikhakha emibili ibhekwa njengebaluleke kakhulu yomnotho wendawo.

5. UKUBAMBA IQHAZA KOMPHAKATHI OSEKWEZIWE KUZE KUBE MANJE

Ukubamba iqhaza okulandelayo sekwenziwe kuze kube manje:

- Umhlangano wangaphambi kokufakwa kwesicelo ne-DMRE kanye nokugunyazwa kwe-Stakeholder Engagement Plan.
- Ukuxoxisana njalo ne-Zulu-Entembeni Traditional Authority.
- Idathabheyisi yokusungulwa nokuphawula ngokuqhubekayo kwalabo Abanesifiso Nabathintekayo;
- Izaziso eziya kwabaNesifiso Nabathintekayo, kuhlangukise nabanikazi bemihlaba, iziphathimandla zikahulumeni nabaholi bendabuko;
- Ukuhanjiswa Kwedokhumenti Yolwazi Oluyisisekelo [Distribution of a Background Information Document (BID)], ngesiNgisi nangesiZulu, kusukela ngomhla ka-17 Juni 2021;
- Ukunyatheliswa kwezikhangiso;
 - The Mercury, 15 June 2021, English;
 - Eyethu Baywatch - 16 June 2021, English;
 - Isolezwe - 18 June 2021, isiZulu; and
 - Zululand Observer - 21 June 2021, English
- Amanothi okuqaliswa kwamasayithi ezindaweni ezihluhahlukene e-Melmoth, Eshowe naseBhulokhini EseNingizimu;
- Imihlangano Yomphakathi Yolwazi e-Melmoth (18 Agasti 2021) nakumaThimba e-MS (6 Julayo 2021);
- imihlangano yababambiqhaza abangu-24 nabaholi bendabuko kanye nemiphakathi yabo, abanikazi bamapulazi, amabhizinisi neziphathimandla zendawo (eyaba phakathi kuka-Juni no-Agasti 2021; kanye
- nezikhangiso zomsakazo;
 - Icora 100.40 fm – 15 kuya kuk-19 Juni 2021;
 - Izwi Lomzansi 98.0 fm – 21 kuya ku-23 Juni 2021.

Umbiko Oyisandulela Ongakaphothulwa okwamanje ukhishwe ukuba umphakathi uphawule ngawo inkathi esuka ku-9 Febhuwari kuya ku-10 Mashi 2022.

6. OKUNYE UKUHLAZIYA OKUHLUKILE

Kwenziwa ukuhlaziya ukuze kubhekwe ukuthi kungase kwenziwe umsebenzi wemayini yini eBhulokhini EliseNyakatho noma eliseNingizimu kuqala. Ngenxa yobunzima bokufinyelela iBhulokhi EliseNyakatho umsebenzi omkhulu oyisisekelo kanye nomklamo oningiliziwe wenziwe eBhulokhini EseNingizimu. Ngaphezu kwalokho, iBhulokhi EseNingizimu inemigwaqo engcono esikhona, iseduze nendawo ehlinzeka ngamanzi ukusuka e-Goedertrouw Dam, inezintambo zikagesi esezikhona zika-Eskom ezisendaweni ethandwayo futhi kulula kakhulu ukufika eNkwalini Rail Siding (ehlongozelwa ukuhambisa okungahluziwe kuye e-Richards Bay). Ngakho uhlelo lwamanje ukuqala iSigaba 1 semayini engxenyeni eseningizimu-mpumalanga yeBhulokhi EliseNingizimu.

Ezinye izindlela ezihlukile ezicatshangelwe zibandakanya lezi:

- Umgodi ovulekile (indlela ehlukelele ethandwayo) kunokuya phansi;
- Amazinga angefani okwenza umsebenzi wasemayini: 20, 24, 28 noma 32 mtpa (okuthandwayo);
- Izindlela ezihlukile zokuma kwesayithi akukuningi esingakhetha kukho ngoba kunendawo enezintaba; kanye
- nokunye esingakhetha kukho okubizwa ngokuthi yi-"no-go", okusho ukuthi asinakungena futhi lokho ngeke kuvumele i-MIOP ukuba yenzeke.

Ezinye izincwadi ezivela ocwaningweni lwezazi zizocatshangelwa njengengxenyeni yeSigaba Se-EIA.

7. YIZIPHI IZINTO EZIBUCAYI EZIYINHLOKO EZIPHATHELENE NEZEMVELO NEZENHLALO?

Isimo sezinto (1) eziNgokoqobo, (2) Zemvelo (3) Nezenhlalo zendawo esingase sithintekile sisaphenywa ukuze kuhlaziye imithelela. I-DSR yethula okutholakale ophenyweni olwenziwe kuze kube manje, amazwibela alokhu okutholakele asezingxenyeni ezilandelayo.

7.1 Indawo Engokoqobo

IMthonjaneni LM inesimo sezulu esifudumel futhi kunomswakama, okuyindawo enhle yokutshala kule ndawo. IMthonjaneni LM iba nesilinganiso samazinga okushisa nsuku zonke aphakathi kuka-16°C no-20°C, nesilinganiso semvula esiphakathi kuka-2 000 mm no-2 400 mm ngonyaka.

Ngokuphathelele nesimo sendawo uqobo i-Melmoth ingaphezu kwezinga lolwandle ngo-800 m futhi izungezwe yizintaba ezine-sandstone namathafa e-

mudstone. Indlela indawo emi ngayo yenze ukuthi ube nezinto eziyimvelo ezihlukahlukene, kusukela emathafeni amahle kuya ezindaweni ezingamagquma nezintatshana ezitholakala ngasemathafeni.

Womabili aMabhulokhi AseNyakatho NaseNingizimu analezi zindawo ezinamagquma. Ngokokuchazwa kwalokho indawo engase ikwenze, womabili aMabhulokhi AseNyakatho NaseNingizimu abonisa ukuthi indawo ikahle kakhulu ekufuyeni futhi kunezindawo ezincane ezinendawo ephezulu ekahle ekukhiqizeni izintshalo ezithanda imvula.

Ukulima ngaphakathi kuMabhulokhi AseNyakatho NaseNingizimu kusho ukuthi kunabanikazi bamapulazi abancane abanendawo engaba phakathi kwamahlektha angu-5 nangu-10 futhi bondla kuphela nje umnden. IBhulokhi EseNyakatho noma iBhulokhi EseNingizimu ayikho ngaphansi kwe-High Potential Agricultural Area (HPAA) yize izindawo ezingase zibe phezudlwana zizungeze isayithi ye-MIOP.

Idatha yamanzi aphuma phansi evela ku-DWS National Groundwater Archive phakathi kuka-5 km we-MIOP ibonise ukuthi amazinga amanzi aphuma phansi asuka phakathi kwamamitha angu-2.1 kuya ku-56.4 ngaphansi kwezinga elingaphansi (mbgl). Amazinga amanzi aphuma phansi akalwa nge-Golder (2016) phakathi ne-hydrocensus abonise isilinganiso sezinga lamanzi aphuma phansi esingu-45 mbgl. Amanzi aphuma phansi esifunda atholakala ukuthi asuka entshonalanga aye empumalanga kodwa endaweni kuyahlukahluka ukuhamba kwamanzi.

Ngokuhambisana namanzi angaphezulu iBhulokhi EseNyakatho ingena ngaphansi kokulawulwa kwamanzi ayinhloko (QC) W12B, W12C no-W12D. Ama-QC amathathu angena ngaphansi kwe-Pongola-Mtavuna Water Management Area (WMA) nangaphakathi kwe-Usuthi-Mhlathuze Catchment Management Agency (CMA). Amasistimu okuhamba kwamanzi ayimvelo kulama QC agelezela ngasempumalanga. Indawo eseduze neBhulokhi EseNyakatho ithelelwa uMfula IMfule nemifudlana emincane umfula Imfulazane neNhlozane egelezela ngaseningizimu-mpumalanga ize ihlangane noMfula uMhlathuze.

IBhulokhi EseNingizimu ihamba ize ifike e-QC W12B ne-W12D ewela futhi ngaphansi kwe-Pongola-Mtavuna WMA naphakathi kwe-Usuthi-Mhlathuze CMA. I-QC W12B ithelelwa yimifula iMhlathuze, KwaMazula, Nyawushane ne-Mavungwini. I-QC W12D ithelelwa yimifula iMfule neNtambanana egelezela ngaseningizimu-mpumalanga ize iyongena eMfuleni UMhlathuze.

Usuthi-Mhlathuze CMA inezindawo ezinkulu zokwenza imisebenzi yezolimo ehleliwe nengahleliwe. Le misebenzi yezolimo ithola amanzi eDamini I-Goedertrouw (Isithombe 4) elihlukanisa uMfula UMhlathuze ube yimifula emibili. Idamu I-Goedertrouw

libuye lihlinzeke amanzi eDolobheni Lase-Richards Bay nasezimbonini ezihlukahlukene.

Isithombe 4. IDamu I-Goedertrouw

7. 2 Indawo Yezemvelo

I-Melmoth ingena ngaphansi kwendawo enezimbali ese-Maputoland-Pondoland okungenye yezindawo ezinohle ngezilimo eNingizimu ne-Afrika. Izindawo Zokusekeela ezibizwa ngokuthi yiZindawo Zezemvelo Ezibucayi [Critical Biodiversity (CBA)] ne-Ecological Support Areas (ESA) zikhona ngaphakathi kumaBhulokhi AseNyakatho NaseNingizimu yendawo ecwaningwayo (Isithombe 7).

Ngemva kokuhlolwa kwesayithi kokuqala, kwatholakala imiphakathi emihlanu enezindawo zolimo ezivelele eBhulokhini EseNingizimu, kubandakanye nalezi:

- I-Ngongoni Veld/Eastern Valley Bushveld Open Savannah;
- I-Eastern Valley Bushveld Thicket/Ngongoni Veld Closed Woodland;
- I-Degraded Ngongoni Veld/Eastern Valley Bushveld Open Savannah;
- I-Degraded Eastern Valley Bushveld Thicket/Ngongoni Veld Closed Woodland; kanye ne-
- Secondary Open Savannah/Thicket/Closed Woodland (Isithombe 5).

Isithombe 5 Indawo enohlaza evulekile emuva lapho kuba khona izihlahla eziningi ezicinene ngaphambili (Ibhulokhi EseNingizimu)

Imiphakathi eyengeziwe emihlanu yabonakala kuBhulokhi EseNyakatho, kuhlanguke:

- Ne-Ngongoni Veld/Northern Zululand Sourveld Open Savannah;
- I-Scarp Forest /Northern Zululand Sourveld Thicket/Ngongoni Veld Closed Woodland;

- I-Degraded Ngongoni Veld Closed Woodland/Northern Zululand Sourveld Thicket;
- I-Degraded Ngongoni Veld/Northern Zululand Sourveld Open Savannah; kanye ne-
- Secondary Open Savannah/Thicket/Closed Woodland.

Kwaqinisekiswa ukuthi kunezimbali ze-SCC ezimbili ngaphakathi kudedangendlele wendawo enotshani kuleyo ndawo, ezibizwa ngokuthi yi-*Stangeria eriopus* (Esesimweni esibucayana) ne- *Moraea graminicola* subsp. *graminicola* (Esizoba Sesimweni Esibucayana, Izimila ZaseNingizimu Afrika). Ngaphezu kwalokho, izimbali eziningana ze-SCC ziye zaphawulwa njengezingase zibe khona ngaphakathi kwendawo ecwaningwayo, ngakho kuzodingeka ukuba izazi zenze inhlovo ezinyonini zendawo ethile, izilwane ezincelisayo, amaxoxo, ama-reptile, nezinhlobo zezilwane ezingenawo umgogoda, phecelezi ama-invertebrate.

Ukuhlaziywa kwedeskithophu kwe-Potential Occurrence (POC) kwezimbali nezimila okukhathazekwayo ngazo nakho kwenziwa ngokuqondene nale phrojekthi ukuze kwaziwe isidingo sokunye ukuhlaziywa okuqondile kwezimila ezithile. Njengengxenye yale nqubo, naku okwatholakala:

- Izimali Zendawo: Kwabonaka ezimila zendawo ezimbili ze-SCC esayithini. Kukhona futhi izimila zendawo ezingu-24 ze-SCC ezinamathuba aphezulu noma aphakathi nendawo okuba zibe sesayithini.
- Izilwane (ezikwazi ukuncelisa): Ukunakekela izilwane ezikwazi ukuncelisa (mammals) cishe ngeke kwenzeka ngenxa yokuthi ayikho indawo efanelekayo, yize izinhlobo eziyisishiyagalolunye zezinhlobo zezilwane ezikwazi ukuncelisa zingase zisebenzise indawo enezihlahla eziningi, udedangendlele wendawo onotshani obude notshani ezindaweni ezithile esayithini. Lezi zibandakanya iphiti (Blue duiker) (Esesimweni esibucayi), i-Maquassie Musk Shrew (Esesimweni esibucayi), i-Serval (Engase iphele maduze), i-Water Rat (Engase iphele maduze), i-African Striped Weasel - (Engase iphele maduze), i-Cape Clawless Otter (Engase iphele Maduze), i-Leopard (Esesimweni esibucayi), i-Swamp Musk Shrew (Engase iphele maduze), i-Samango Monkey (Esesimweni esibucayi).
- Izilwane (izinyoni): I-Tawny Eagle (Esesimweni esibucayi), i-African marsh-harrier (Esesimweni esibucayi), i-European Roller (Engase iphele maduze), uHeshe (Lanner Falcon) (Engase iphele maduze), i-Southern Bald Ibis (Engase iphele maduze), uKhozi Isihuhwa (Martial Eagle) (Esesimweni esibucayi), iNtinginono (Secretary bird) (Engase iphele maduze) i-Crowned Eagle (Engase iphele maduze).

- Izilwane ezitholakala kuleyo ndawo (ama-reptile): Kunamathuba amaningi impela okuthi izinhlobo zama-reptile zibe khona phakathi endaweni ecinene yotshani obude esayithini lapho kungase kube nemithelela elinganiselwe yezenzo zomuntu endalweni. Eyodwa yahlaziwa njengase ibe khona esayithini, okungukuthi, iNhlwathi yaseNingizimu Ne-Afrika (Southern African Python) (Esingakhathazekile Ngayo Kakhulu – Evikelwe).
- Izilwane ezitholakala kuleyo ndawo (ezihlala emanzini nangaphandle kwamanzi [ama-amphibian]): Amaxoxo e-SCC amathathu angase abe khona lapha emanzini athile ahlanzekile asesayithini, futhi abandakanya i-Bilbo's Rain Frog (Elingase liphele maduze), i-Natal Cascade Frog (Elingafakiwe ohlwini olubucayi kodwa elisongelwa ukulethwa kwenhlanzi i-trout nokucekelwa phansi kwendawo), ne-Shovel-Nosed Frog (Elingase liphele maduze).
- Izilwane ezitholakala kuleyo ndawo (ezingenawo umgogodla [invertebrates]): Zimbalwa kakhulu izinhlobo ezenziwe kuma-invertebrate endaweni ecwaningwayo. Ukubuyekeza kwamadathabheyisi akhona ku-inthanethi/nakudeskithophu kuveze izinhlobo ezingu-17 ezingase zibe khona ohlazenilolusemiphakathini olusesimweni esihle ngokwemvelo.

Ngokwemthombo yamanzi eseBhulokhini EseNingizimu, ingqikithi yemifula/yemifudlana engu-599 kanye namayunithi angu-22 ezindawo ezingamaxhaphozi yabonakala futhi yafakwa ohlwini endaweni ecwaningwayo. Kubhulokhi EseNyakatho ingqikithi yemifula/yemifudlana engu-331 nezindawo ezingamaxhaphozi ezingu-63 zabonakala futhi zafakwa ohlwini.

Isithombe 6 Isithombe sokufinyelela kwe-Transitional River (South Block)

Umfula onamanzi amaningi nokuhlaziywa kwesimo samanzi ngokuqondene neBhulokhi EseNyakatho kubonisa ukuthi ukuhamba kwamuva koMfula IMfula okudabula iBhulokhi kusesimweni esiyimvelo empeleni kanti i-Ecological Importance and Sensitivity (EIS)

ikubeke njengokuphezulu. Imisebenzi eshiwo engase ibe nomthelela ekuphileni kahle kwesimiso yizindawo zasemaphandleni zokuhlala, ukumila kwezimila ezingafuneki kanye nezindawo zokutshala esezashiywa.

Ukuhlaziywa kwemifula namanzi okwenziwa kuBhulokhi EseNingizimu kufingqwe ngale ndlela engezansi:

- Imifudlana Nezindawo Zamaxhaphozi Entabeni Nemifudlana Esentabeni:
 - Imifudlana esendaweni ecwaningwayo 'Ayikho Engozini Kangako' futhi ayibhekwa njenge-Freshwater Ecosystem Priority Areas (FEPAs). Yonke ibekwe ngokuthi ama-EIS 'aPhansi'.
 - La mayunithi emifudlana awanalo igalelo elibalulekile noma elibucayana ngenxa yokuthi igeleza ngezinkathi ezithile kodwa yona inawo amazinga aphezulu okuxhumana nemifula eminye eyenza ibe ebalulekile ezilwaneni zasendle.
- Imifula Egelezela Olwandle Nengezansi Kwamagquma (Isithombe 6):
 - Le mifula 'Ayikho Engozini Kangako' futhi ayibhekwa njengama-FEPAs futhi yonke ibhekwa njengama-EIS 'aPhakathi nendawo'.
 - Imifudlana ehlale igeleza enezilwane ezihlala kuyo cishe ingase ibe nezinhlobo eziningi zezilwane ezihlala emanzini.
 - I-SASS5 nenhlobo yezinhlanzi iveze ukuthi izilwane ezininigi ezincane ezingenamgogodla nezinhlobo zezinhlanzi zincike kule mifudlana.
 - Le mifula ingase ibe nama-*M. caudisquamatus*, *O. mossambicus* nama-*E. gurneyi* (Esesimweni esibucayi ohlwini lwe-IUCN).
- Umfula Ongagelezi Ngamandla – Mhlatuze
 - Imifula endaweni ecwaningwayo 'Ayikho Engozini Engako' futhi ayibhekwa njengama-FEPAs. Yonke ibalwa njenge-EIS 'ePhezulu'.
 - Amazinga aphezulu okuxhumana kwendawo yokuhlala kubonisa ukuthi umfula UMhlatuze iwusizo olubalulekile ezilwaneni zasendle.
 - Le mifula ine-*M. caudisquamatus*, *O. mossambicus* ne-*E. gurneyi* (Esesimweni esibucayi ohlwini lwe-IUCN). I-*M. caudisquamatus* irekhodwe njengesezimisweni kuphela eziseMhlatuze naseNseleni okwenza lezi zimiso zibe yizindawo zokuhlala ezibalulekile.
 - Umthamo ophezulu wamanzi alezi zimiso usho ukuthi ungakwazi ukusingatha ushintsho oluncane olwenzeka esimweni sokugeleza nekhwalithi yamanzi.

7.3 Isimo Sezenhlalo Nomnotho

Bobabili oMasipala Bendawo baseMthonjaneni naseMlalazi banezimo zomnotho ezincike kakhulu

kwezolimo, ukwakha imikhiqizo nomkhakha wezimayini ukuze kusekelwe ukukhula kwezomnotho. Ukuphumelela kwale mikhakha kusho imisebenzi namathuba phakathi komasipala.

Kulabo masipala ababili abantu abaningi abafuna imisebenzi banomatikuletsheni kanye nemfundo ethile yokwenezela. Izinga labantu abasebenzayo liphezudlwana eMthonjaneni ngo-69.8% uma kuqhathaniswa noMlalazi ongu-59.9%. Nokho, isilinganiso somndeni sanyaka wonke sichazwa njengomkhakha wokuhola ophansi, njengoba iholo ngonyanga lingaphansi kuka-R40 000.

Bobabili omasipala babonisa amathuba okwehla kancane kwabantu eminyakeni engu-30 ezayo okungenzeka kubangelwa ukuthi abantu bayayishiya le ndawo bayofuna amathuba emisebenzi ezindaweni eziseduze njengaseMpangeni nase-Richards Bay. Kunobufakazi bokuthi ukuthuthuka kwamazinga emfundo kube nomphumela wokuthi kube nabantu abafundile abasha abashiya amakhaya abo bayofuna umsebenzi kwenye indawo.

Abantu abaningi (u-55% eMthonjaneni; u-58% eMlalazi) endaweni bawela eminyakeni yobudala yabantu abasebenzayo (15-64). Nokho, lesi sibalo sisephansi futhi senza ukuthi indawo ithwale kanzima. Kubalulekile kulesi simo ukuba kuvele amathuba emisebenzi azosekela imizi enomuntu oyedwa osebenzayo nabantu abaningi abathembele kuye. Umuzi ovamile unabantu abangaphezu kwabangu-4 endlini ngayinye.

Phakathi komasipala ababili, imizi engaphansi kukahhafu inamanzi avela kumasipala. Ukuthola amazinga ayisisekelo okukhuculula kuphansi kakhulu kubo bobabili omasipala futhi cishe uhhafu wemizi awanawo amathoyilethi ashaywayo. Ukuncika kakhulu ezindlini zangasese zomgodi kuyakhathaza ngoba ukungacoceki kahle kungadala izifo. Cishe nje ingxenye eyodwa kwezintathu yemizi iqoqelwa udoti umasipala.

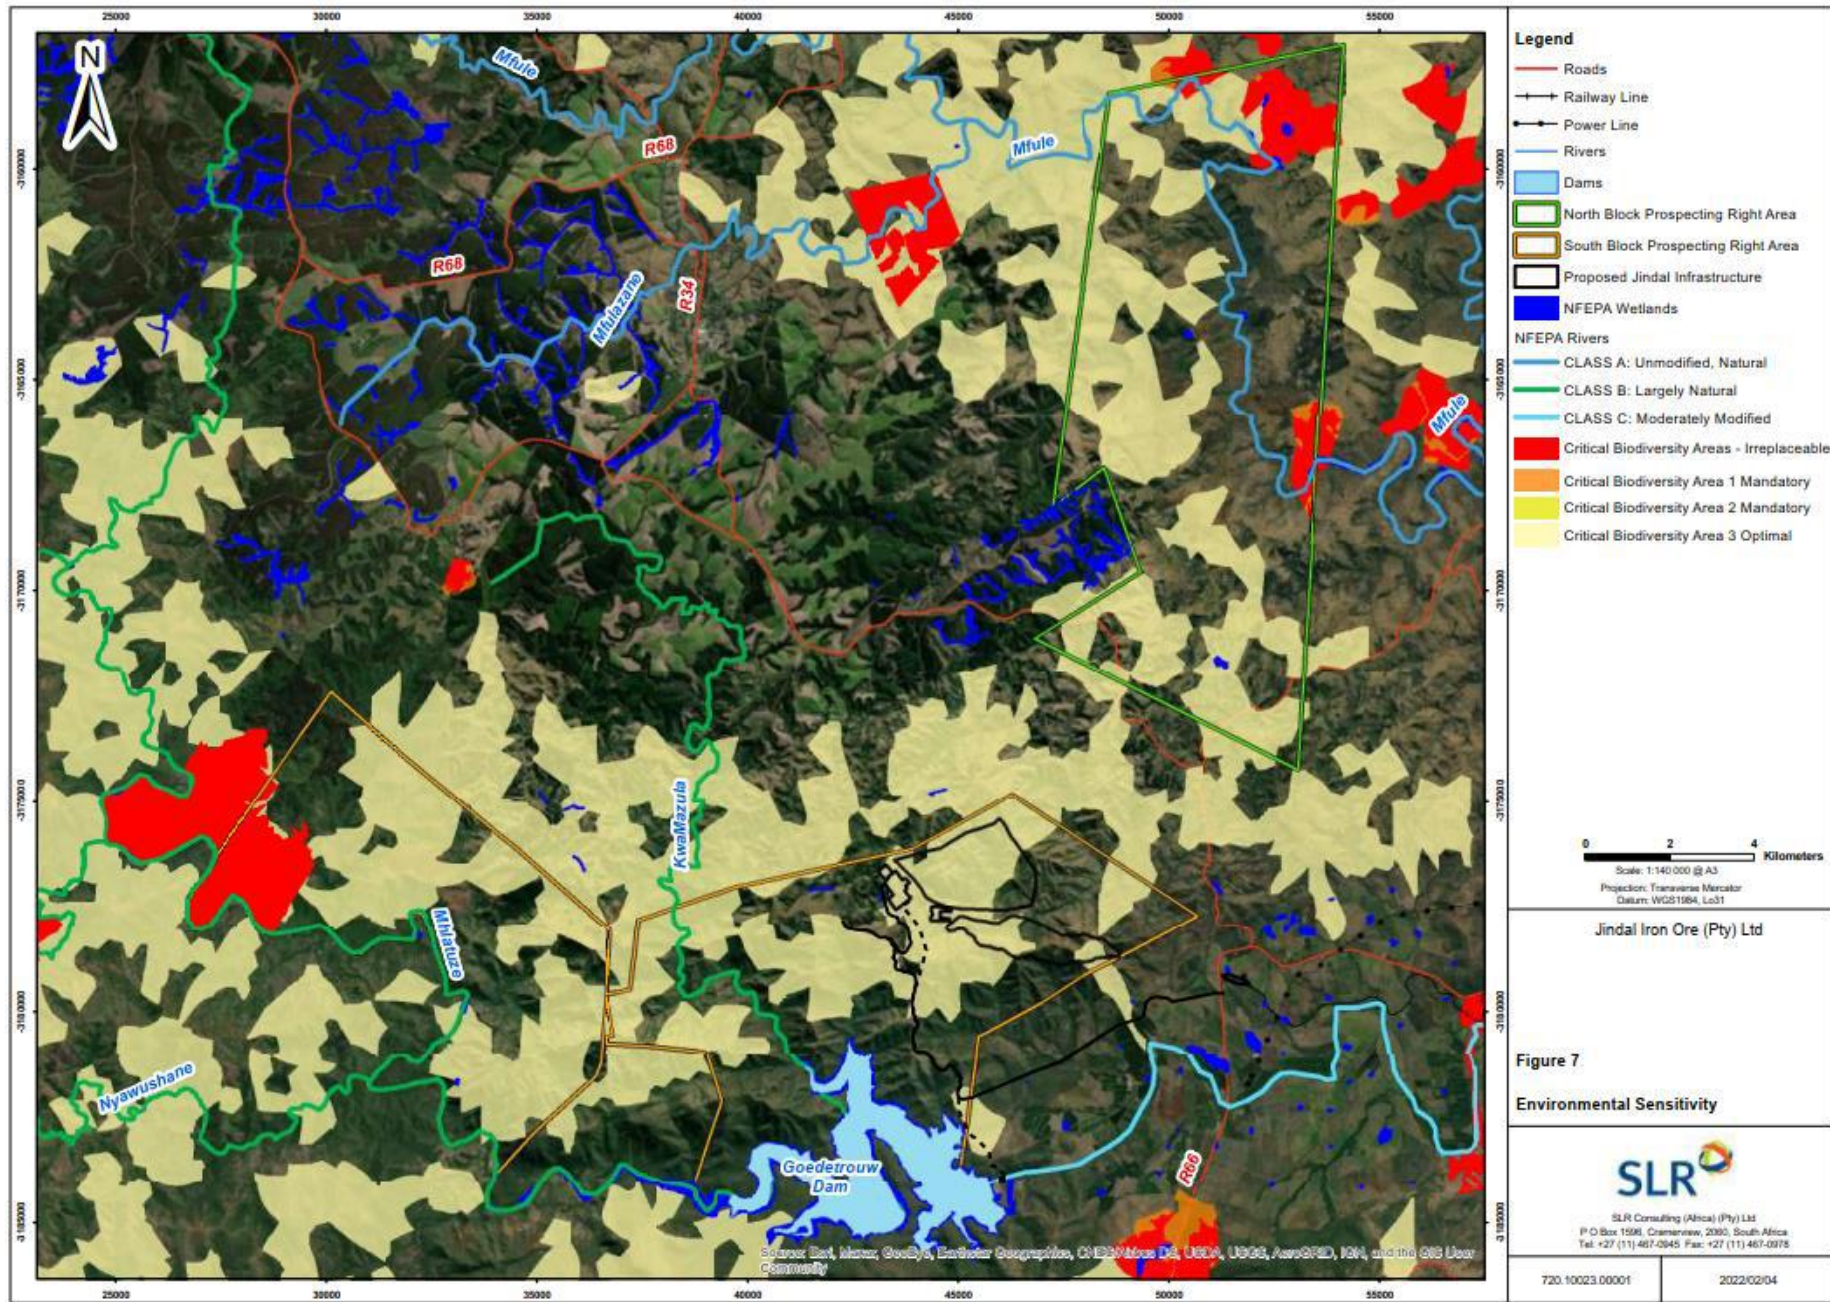

Abantu abangaphansi kuka-20% banogesi emizini yabo. Eminye imizi isebenzisa upharafini ukuze ipheke futhi ikhanyise.

Abantu abangamaZulu sebehlale kule ndawo yase-Melmoth iminyaka engaba ngu-200. Ziningi izindawo zamathuna, nemithombo yezamagugu namasiko futhi amasiko asathandwa kakhulu yizakhamuzi futhi izinhlaka zemiphakathi yezenhlalo zisaqinile impela. Imizi isihlale emindenini iminyaka eminingi futhi idluliselwa ezizukulwaneni ezilandelayo kanti nezakhamuzi eziningi zinamathele kakhulu endaweni yazo. Kuhlelwa uCwaningo Lwamagugu Namasiko olugcwele lapho kuzoxoxwa khona nemizi engase ithinteke futhi wonke amathuna nezici zendabuko kuzobhalwa phansi.

Indawo ezungeze i-MIOP ehlongozwayo ichazwa njengendawo yasemakhaya/engelona idolobha ngokugcwele, enomhlaba ongu-70.8% ongaphansi kweziphathimandla zesizwe/zendabuko. Okuwukuphela kwendawo eyidolobha engaphakathi kwendawo ecwaningwayo yi-Melmoth (emaphakathi nentshonalanga yale ndawo ecwaningwayo), cishe engu-15 km ukuya enyakatho-ntshonalanga ye-MIOP ehlongozwayo.

Ebhulokweni EliseNyakatho nakumaBhulokhi AseNingizimu kunamapulazi amancane amaningana (aphakathi kwamahektha angu-5 no-10) futhi abanikazi bawasebenzisela ukondla imizi yabo ngokuyinhloko. Azikho izindawo ezinezitshalo ezincika emvuleni noma okutshaliwe phakathi kuBholokhi EseNingizimu. Ibhulokhi EseNingizimu inendawo esesilinganisweni semfuyo.

Amahlathi namasimu omoba agcwele endaweni eseningizimu ye-Melmoth kanye namathafa anoMfula UMhlatuze River ogelezela edamini futhi ngasemifudlaneni kugcwele ama-citrus nomoba. Endaweni ecwaningwayo eseningizimu ekujana, kunamasimu omoba.

Isithombe 7 Imephu yezindawo ezibucayana ze-Jindal MIOP

10. IMITHELELA EBONAKELE ENGASE IBE KHONA ENDAWENI NASENHLALWENI YABANTU NOHLELO LOCWANINGO

Le ngxenye inohlu lwemithelela yezinga eliphezulu ebonakele ezicini ezingokoqobo, emasikweni namagugu, ezenhlalo nezomnotho ngokuqondene nazo zonke izenzo/imisebenzi yephrojekthi eyinhloko nezinqubo zezigaba ngazinye zephrojekthi. Ukuhlaziya okugcwele nokukalwa kwale mithlelela kuzokwenziwa phakathi nesigaba ne-EIA futhi kuzofakwa inyathelo zokunciphisa ku-Environmental Management Programme (EMPr).

1. INTRODUCTION

This Non-Technical Summary (NTS) provides a synopsis of the Draft Scoping Report (DSR) prepared for the Melmoth Iron Ore Project (MIOP). The DSR will be submitted to the KwaZulu-Natal Department of Mineral Resources and Energy (DMRE) to inform the Mining Right Application (MRA). The NTS is available in English and isiZulu and is being distributed to stakeholders as a basis for notification and comment.

Jindal Iron Ore (Pty) Ltd (Jindal), is owned by Jindal Steel and Power (Mauritius) Limited (74%) and a South African BBEE partner, Mr. Thabang Khomo (Pty) Ltd (26%). Jindal holds two Prospecting Rights within the Mthonjaneni Local Municipality (LM) in KZN. The North Block (PR 10644) is 8 467 ha and the South Block (PR 10652) is 11 703 ha in extent (Figure 1). Jindal had previously prospected in these PR areas, but suspended the project in 2016. The recovery of the iron ore price has encouraged Jindal to relook at the development of the MIOP and is currently undertaking a Bankable Feasibility Study (BFS).

Jindal is proposing an open cast mine and processing facility to produce iron ore concentrate for export. The MIOP is proposed in a phased approach and this MRA only includes mining in the south-eastern section of the South Block (Figure 2). Through the MRA Jindal intends to consolidate the Prospecting Rights for the North and South Blocks into a single Mining Right.

Jindal has appointed SLR Consulting (South Africa) as the independent Environmental Assessment Practitioner to undertake an Environmental Impact Assessment (EIA) Process and associated public participation process (PPP) to inform the MRA.

Figure 1. View of the South Block from the north

2. MRA AFFECTED PROPERTIES

The following properties form part of the MRA:

North Block

- Portion 3 and 4 of the Farm Reserve No. 11 15831
- Portion 0 of the Farm Ntembeni 16921

South Block

- Remaining Extent, Portions 1, 2, 3, and 4 of the Farm Black Eyes 13385
- Remaining Extent, Portions 1, 2, and 3 of the Farm Goedgeloof 6106
- Remaining Extent of the Farm Kromdraai 6110
- Portion 3, 4, 5, 6, 7, 8, 12, 13, 14, 15, and 16 of the Farm Wilderness 6107
- Portion 0 of the Farm Vergelegen 6104
- Goedertrow 89 No. 7806
- Portion of Rem of Reserve No. 11 No. 15831

3. HOW CAN YOU GET INVOLVED?

The DSR is currently available for review and comment. The DSR outlines the scoping process undertaken to date including public participation, provides a description of the proposed Project, the affected environment and the plan of study for the impact assessment to be undertaken.

You can be involved by reviewing the NTS or Report:

Available at the following locations:

- The full report at <https://slrpublicdocs.datafree.co/public-documents/JindalMIOP>, accessible from internet-capable mobile phones without data charges.
- The full report is also available at: <https://slrconsulting.com/public-documents>.
- Hard copies available at the following locations:

4. PROJECT DESCRIPTION

Jindal is proposing the following for the MIOP (Figure 2):

- An open pit mining operation in the south east section of the South Block (named the South East Pit).
- Mining of >800 million tonnes of ore over approximately 25 years generating approximately 32 million tonnes per annum (mtpa) of iron ore.
- A waste rock dump (WRD) for disposal of waste rock.
- A processing plant for milling and magnetic separation to produce approximately 7.5 mtpa of concentrate for export (there are limited local markets).
- Associated infrastructure to support the mine would include: a laboratory, rail loading facility, access and haul roads, electrical transmission line and sub-stations, water pipelines, stormwater management infrastructure, concentrate pipelines, offices, change house, workshops and perimeter fencing (amongst others).
- Slurry generated from the processing plant would be disposed of to a tailings storage facility (also part of a separate application).

The proposed MIOP layout can be seen in Figure 2. Figure 3 shows the conceptual design of the process. The final layout of the mine infrastructure will be determined by the BFS, with inputs from this EIA process.

5. POLICY AND LEGISLATIVE CONTEXT

Prior to the commencement of the proposed Jindal MIOP, Environmental Authorisations are required from the following competent authorities:

- Mining Right Application from the DMRE in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002) (MPRDA) and Regulations, as amended.
- Environmental Authorisation from the DMRE in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), as amended.
- A Waste Management Licence (WML) from the DMRE in terms of the National Environmental Management Waste Act, 2008 (Act No. 59 of 2008) (NEM:WA).
- A Water Use Licence (WUL) from the Department of Water and Sanitation (DWS) in terms of the National Water Act, 1998 (No. 36 of 1998) (NWA).

A Scoping and EIA process, conducted in terms of the EIA Regulations, 2014, is required to inform the DMRE's decision making. The Scoping Report considers the potential issues relating to the proposed MIOP and identifies issues which are potentially significant. It also outlines how the EIA will deal with each of the issues, providing the scope for further studies, as required.

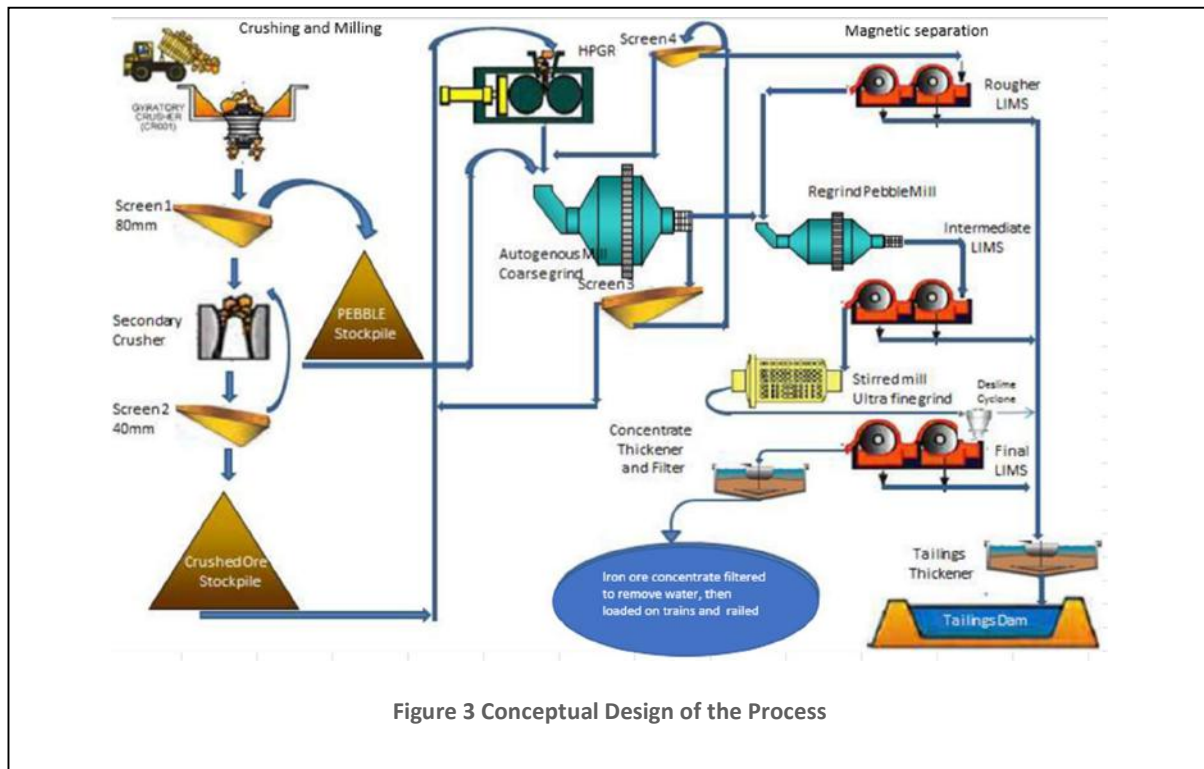

Figure 3 Conceptual Design of the Process

6. NEED & DESIRABILITY OF THE PROJECT

The key components of the Need and Desirability Guideline are:

Ecological Sustainable Development and Use of Natural Resources

Due to the nature of mining projects, impacts on biodiversity and the role that it plays in the ecosystem are inevitable. The proposed MIOP site is a 'greenfield' site and outcomes from biodiversity studies have indicated that the project area is associated with some species of conservation concern (SCC) as well as intersecting some areas of very high ecological importance. However, given the nature of the grazing across the sub-region these grasslands could to some extent already be degraded/ transformed. Ongoing engagement with local stakeholders and the development of a sustainable grassland management programme will be critical in ensuring that remaining intact primary grassland is not further degraded through increased anthropogenic pressures such as grazing and too frequent burning. In accordance with the mitigation hierarchy the potential for biodiversity offsets will only be considered as a last resort once all other options have been considered/applied.

In addition to the potential impacts on biodiversity, the mining operations will require water for the processing plant, dust control, for vehicle wash down and for the change house and office use. It is currently anticipated that makeup water would be acquired from the KZN bulk water supply authority. A water supply analysis will be undertaken as part of the MIOP and EIA process which will determine water supply and demand. Water requirements are likely to reduce as the pit deepens due to the reuse of water that collects within the pit.

Promoting Justifiable Economic and Social Development

The Mining Charter, 2018, was gazetted in September 2018 and is envisaged as a tool for driving transformation of the mining and minerals industry. At its core, the Mining Charter is premised on the conviction that the mineral wealth of the country belongs to all citizens and those that are located close to the mineral resources should derive socio-economic benefit from extraction and processing. Jindal, as with all other mining companies in South Africa, will be bound to compliance with this Mining Charter.

In addition, the South African National Development Plan aims to eliminate poverty and reduce inequality by 2030. The proposed MIOP can contribute towards the realisation of economic development and inclusive growth through revenue and tax generation and the creation of employment opportunities. Through the implementation of the Social and Labour Plan (SLP), the proposed project can positively contribute to the Local Economic Development (LED) of the Mthonjaneni LM,

which in turn should deliver benefit to the communities directly affected by the establishment of the project.

The Jindal MIOP will potentially be one the largest direct foreign investment projects in South Africa in recent years with the estimated direct and indirect capital cost in the order of R28 billion. The mine will create direct job opportunities for 820 people and indirect jobs for 1 640 people using a multiplier effect of 2. The South African Government, provincial and local municipalities will gain an additional income stream from mining royalties, taxes, permits and fees.

Importantly, the proposed MIOP must take measures to limit any negative impacts on agriculture and tourism development, as these are both considered vital sectors of the municipal economy.

7. PUBLIC PARTICIPATION UNDERTAKEN TO DATE

The following public participation has been undertaken so far:

- Pre-application meeting with the DMRE and approval of a Stakeholder Engagement Plan.
- Regular engagement with the Zulu-Entembeni Traditional Authority.
- Development and continuous update of an Interested and Affected Party (I&AP) database;
- Notification to I&APs, including landowners, government and traditional authorities;
- Distribution of a Background Information Document (BID), in English and isiZulu, since 17 June 2021;
- Publication of advertisements;
 - The Mercury, 15 June 2021, English;
 - Eyethu Baywatch - 16 June 2021, English;
 - Isolezwe - 18 June 2021, isiZulu; and
 - Zululand Observer - 21 June 2021, English
- Erection of site notices at various locations in Melmoth, Eshowe and the South Block;
- Public Information Meetings in Melmoth (18 August 2021) and on MS Teams (6 July 2021);
- 24 stakeholder meetings with traditional leaders and their communities, farmers, local business and authorities (held between June and August 2021; and
- Radio advertisements:
 - Icora 100.40 fm – 15 to 19 June 2021; and
 - Izwi Lomzansi 98.0 fm – 21 to 23 June 2021.

The Draft Scoping Report is currently out for the regulated 30 day public comment period from 16 February to 18 March 2022

8. ALTERNATIVES ANALYSIS

An assessment was undertaken to determine the viability of mining the North vs the South Block first. Due to difficulties with access to the North Block significantly more baseline work and detailed design has been done

for the South Block. In addition, the South Block has better established access roads, is closer for water supply from the Goedertrouw Dam, has existing Eskom power lines adjacent to the preferred plant area and is the most accessible to the Nkwalini Rail Siding (proposed for concentrate transport to Richards Bay). The current plan is therefore to undertake Phase 1 mining in the south-eastern section of the South Block.

Other alternatives that have been considered include:

- Open pit (preferred alternative) vs underground;
- Different scales of mining: 20, 24, 28 or 32 mtpa (preferred);
- Site layout alternatives (options are restricted due to the mountainous terrain); and
- The “no-go” alternative, which would result in no development of the MIOP.

Additional recommendations from specialist studies will be considered as part of the EIA Phase.

9. WHAT ARE THE KEY ENVIRONMENTAL AND SOCIAL SENSITIVITIES?

The (1) Physical, (2) Biological and (3) Social status of the potentially affected environment is being investigated in order to assess impacts. The DSR presents the findings of the investigations undertaken to date, a summary of these findings is in the following sections.

9.1 Physical Environment

The Mthonjaneni LM has a warm and humid subtropical climate, which is favourable for the extensive agricultural activity in the region. Mthonjaneni LM experiences average daily temperatures of between 16°C and 20°C, and average rainfall of between 2 000 mm and 2 400 mm per annum.

In terms of topography Melmoth is 800 m above sea level and is surrounded by low sandstone mountains and mudstone valleys. The regional geology of the area has given rise to a considerable diversity of relief, from gently rolling slopes to hilly and severely incised slopes found along valleys.

Both the North and South Blocks consists of hilly terrain. The land capability classification for both the North and South Blocks indicates that the land is best suited to livestock grazing with only small areas having higher land capability that is suitable for rainfed crop production.

The agricultural production within the North and South Blocks is limited to subsistence farming with fields between 5 and 10 ha and is mainly for household consumption. Neither the North Block or the South Block falls within a High Potential Agricultural Area (HPAA) although higher potential areas surround the MIOP site.

Groundwater data from the DWS National Groundwater Archive within 5 km of the MIOP showed that

groundwater levels range between 2.1 to 56.4 metres below ground level (mbgl). Groundwater levels measured by Golder (2016) during a hydrocensus showed an average groundwater level of 45 mbgl. The regional groundwater movement was found to be from west to east but locally the movement could vary.

In terms of surface water the North Block falls between quaternary catchments (QC) W12B, W12C and W12D. These three QCs fall within the Pongola-Mtavuna Water Management Area (WMA) and within the Usuthi-Mhlathuze Catchment Management Agency (CMA). The natural drainage systems in these QCs flow in an eastern direction. The area around North Block is drained by the perennial Mfule River and its tributaries Mfulazane and the Nhlozane rivers flowing in a southeast direction to join the Mhlathuze River.

The South Block spans over QC W12B and W12D which also falls within the Pongola-Mtavuna WMA and within the Usuthi-Mhlathuze CMA. QC W12B is drained by the perennial Mhlathuze, KwaMazula, Nyawushane and Mavungwini rivers. QC W12D is drained by the Mfule and Ntambanana rivers flowing in a south-east direction to join the Mhlathuze River.

The Usuthi-Mhlathuze CMA is characterised by quite large areas of formal and informal agricultural practices. These agricultural activities obtain water from the Goedertrouw Dam (Figure 4) which divides the Mhlathuze River into two. The Goudertrouw Dam also supplies water to the Richards Bay Town and various industries.

Figure 4. The Goedertrouw Dam

9.2 Biological Environment

Melmoth falls within the Maputoland-Pondoland floristic region which is one of the richest floristic regions in Southern Africa. Areas of Critical Biodiversity (CBA) and Ecological Support Areas (ESA) are present within the North and South Blocks of the study area (Figure 7).

Following the initial site inspection five distinct terrestrial vegetation communities were identified in the South Block, including:

- Ngongoni Veld/Eastern Valley Bushveld Open Savannah;
- Eastern Valley Bushveld Thicket/Ngongoni Veld Closed Woodland;

- Degraded Ngongoni Veld/Eastern Valley Bushveld Open Savannah;
- Degraded Eastern Valley Bushveld Thicket/Ngongoni Veld Closed Woodland; and
- Secondary Open Savannah/Thicket/Closed Woodland (Figure 5).

Figure 5 Open savannah vegetation in the background which transitions into thicket/closed woodland vegetation in the foreground (South Block)

An additional five vegetation communities were identified for the North Block, including:

- Ngongoni Veld/Northern Zululand Sourveld Open Savannah;
- Scarp Forest /Northern Zululand Sourveld Thicket/Ngongoni Veld Closed Woodland;
- Degraded Ngongoni Veld Closed Woodland/Northern Zululand Sourveld Thicket;
- Degraded Ngongoni Veld/Northern Zululand Sourveld Open Savannah; and
- Secondary Open Savannah/Thicket/Closed Woodland.

Two floral SCC were confirmed to occur within open savannah/grassland vegetation on-site, namely *Stangeria eriopus* (Vulnerable) and *Moraea graminicola* subsp. *graminicola* (Near Threatened, South African Endemic). In addition, several faunal SCC have been flagged as potentially occurring within the study area and therefore faunal surveys by appropriately qualified specialists for avifauna, mammal, frog, reptile, and invertebrate species will need to be conducted.

A desktop Potential Occurrence (POC) assessment of flora and fauna of conservation concern was also undertaken for the project in order to inform the need for any further species-specific assessments. As part of this process the following were identified:

- Flora: Two floral SCC were identified on site. An additional 24 floral SCC either have a high or moderate possibility of occurring on site.
- Fauna (mammals): Conservation important mammal species are unlikely to occur given the lack of suitable habitat, although nine mammal species may potentially utilise the more intact thicket/closed woodland, open savannah and grassland patches on site. These include the Blue duiker (Vulnerable), Maquassie Musk Shrew

(Vulnerable), Serval (Near Threatened), Water Rat (Near Threatened), African Striped Weasel - (Near Threatened), Cape Clawless Otter (Near Threatened), Leopard (Vulnerable), Swamp Musk Shrew (Near Threatened), Samango Monkey (Endangered).

- Fauna (birds): Tawny Eagle (Endangered), African marsh-harrier (Endangered), European Roller (Near Threatened), Lanner Falcon (Vulnerable), Southern Bald Ibis (Vulnerable), Martial Eagle (Endangered), Secretary bird (Vulnerable) Crowned Eagle (Vulnerable).
- Fauna (reptiles): There is a strong possibility that reptile species occur within the more intact open savannah/grassland and thicket habitat on site where anthropogenic impacts are limited. One was assessed as being potentially present on site, namely, the Southern African Python (Least Concern – Protected).
- Fauna (amphibians): Three frog SCC may occur within specific freshwater habitats on site, they include Bilbo's Rain Frog (Vulnerable), the Natal Cascade Frog (Not red-listed but threatened by introduced trout and habitat destruction), and the Shovel-Nosed Frog (Vulnerable).
- Fauna (invertebrates): Very few formal surveys of invertebrates have been carried out in the study area. A review of available online/desktop databases highlighted 17 species that could potentially occur in vegetation communities that are in good ecological condition.

In terms of watercourses in the South Block, a total of 599 river/ stream units and 22 wetland units were identified and classified in the study area. In the North Block a total of 331 river/ stream units and 63 wetland units were identified and classified.

Figure 6 Downstream photo of a reach of a Transitional River (South Block)

A high level river and aquatic health assessment for the North Block indicates that the sub-quaternary reach of the Mfule River that runs through the Block is largely in a natural condition with Ecological Importance and

Sensitivity (EIS) rated as high. The activities highlighted as potentially impacting the health of the system are rural settlements, invasive alien plant encroachment and abandoned agricultural lands.

A river and aquatic health assessment undertaken for the South Block is summarised below:

- Mountain Headwater Stream and Mountain Streams:
 - Streams in the study area are 'Least Threatened' and are not considered Freshwater Ecosystem Priority Areas (FEPAs). All are rated as being of 'Low' EIS.
 - These stream units do not host important or sensitive taxa due to their seasonal flow but do have relatively high levels of connectivity with the downstream watercourses making them important wildlife corridors.
- Transitional and Upper foothill Rivers (Figure 6):
 - These rivers are 'Least Threatened' and not considered FEPAs and are all rated as being of 'Moderate' EIS.
 - The perennial flow with a diversity of instream habitat and are likely to host a range of aquatic fauna.
 - The SASS5 and fish surveys revealed that several intolerant macro-invertebrate and fish species rely on these river systems.
 - These river systems have the potential to host *M. caudisquamatus*, *O. mossambicus* and *E. gurneyi* (Endangered on the IUCN List).
- Lowland River – Mhlatuze
 - Rivers in the study area are 'Least Threatened' and are not considered FEPAs. All are rated as being of 'High' EIS.
 - High levels of connectivity of habitat suggesting that the Mhlatuze River serves as an important wildlife corridor.
 - This river systems hosts *M. caudisquamatus*, *O. mossambicus* and *E. gurneyi* (Endangered on the IUCN List). *M. caudisquamatus* is recorded as being limited to only the Mhlatuze and Nseleni river systems making these systems important habitat.
 - The high flow volume of the system means it can buffer minor changes in flow condition and water quality.

9.3 Socio-economic Environment

Both the Mthonjaneni and uMlalazi Local Municipalities have economies that are currently strongly dependent on the agriculture, manufacturing and mining sectors to support economic growth. The success of these sectors determines the job security and opportunity within the municipalities.

In these two municipalities the majority of job seekers have a matric and some secondary education. Employment rate is higher in Mthonjaneni at 69.8%

compared to uMlalazi at 59.9%. However, the average annual household is classified as a low income category, with an annual income of less than R40 000.

Both municipalities show a slight potential decrease in population over the next 30 years which is likely due to people leaving the area in search of job opportunities in nearby urban areas, such as Empangeni and Richards Bay. There is evidence that the improving education levels has resulted in young professionals leaving the family home to find work elsewhere.

The bulk of the population (55% Mthonjaneni; 58% uMlalazi) in the area falls within the working age (15-64). However, this is still a low ratio and creates a significant dependency burden in the area. It is important in this scenario that job opportunities are available that will support households with a single breadwinner and many dependents. The average household is more than 4 people per house.

Within the two municipalities, less than half of the households have access to municipal water. Access to basic levels of sanitation is also poor in both municipalities with almost half of the households not having access to flushing toilets. The high dependency on pit latrines is a concern as poor sanitation can be a vector for disease. Just over one third of households has access to refuse removal services supplied by the municipality.

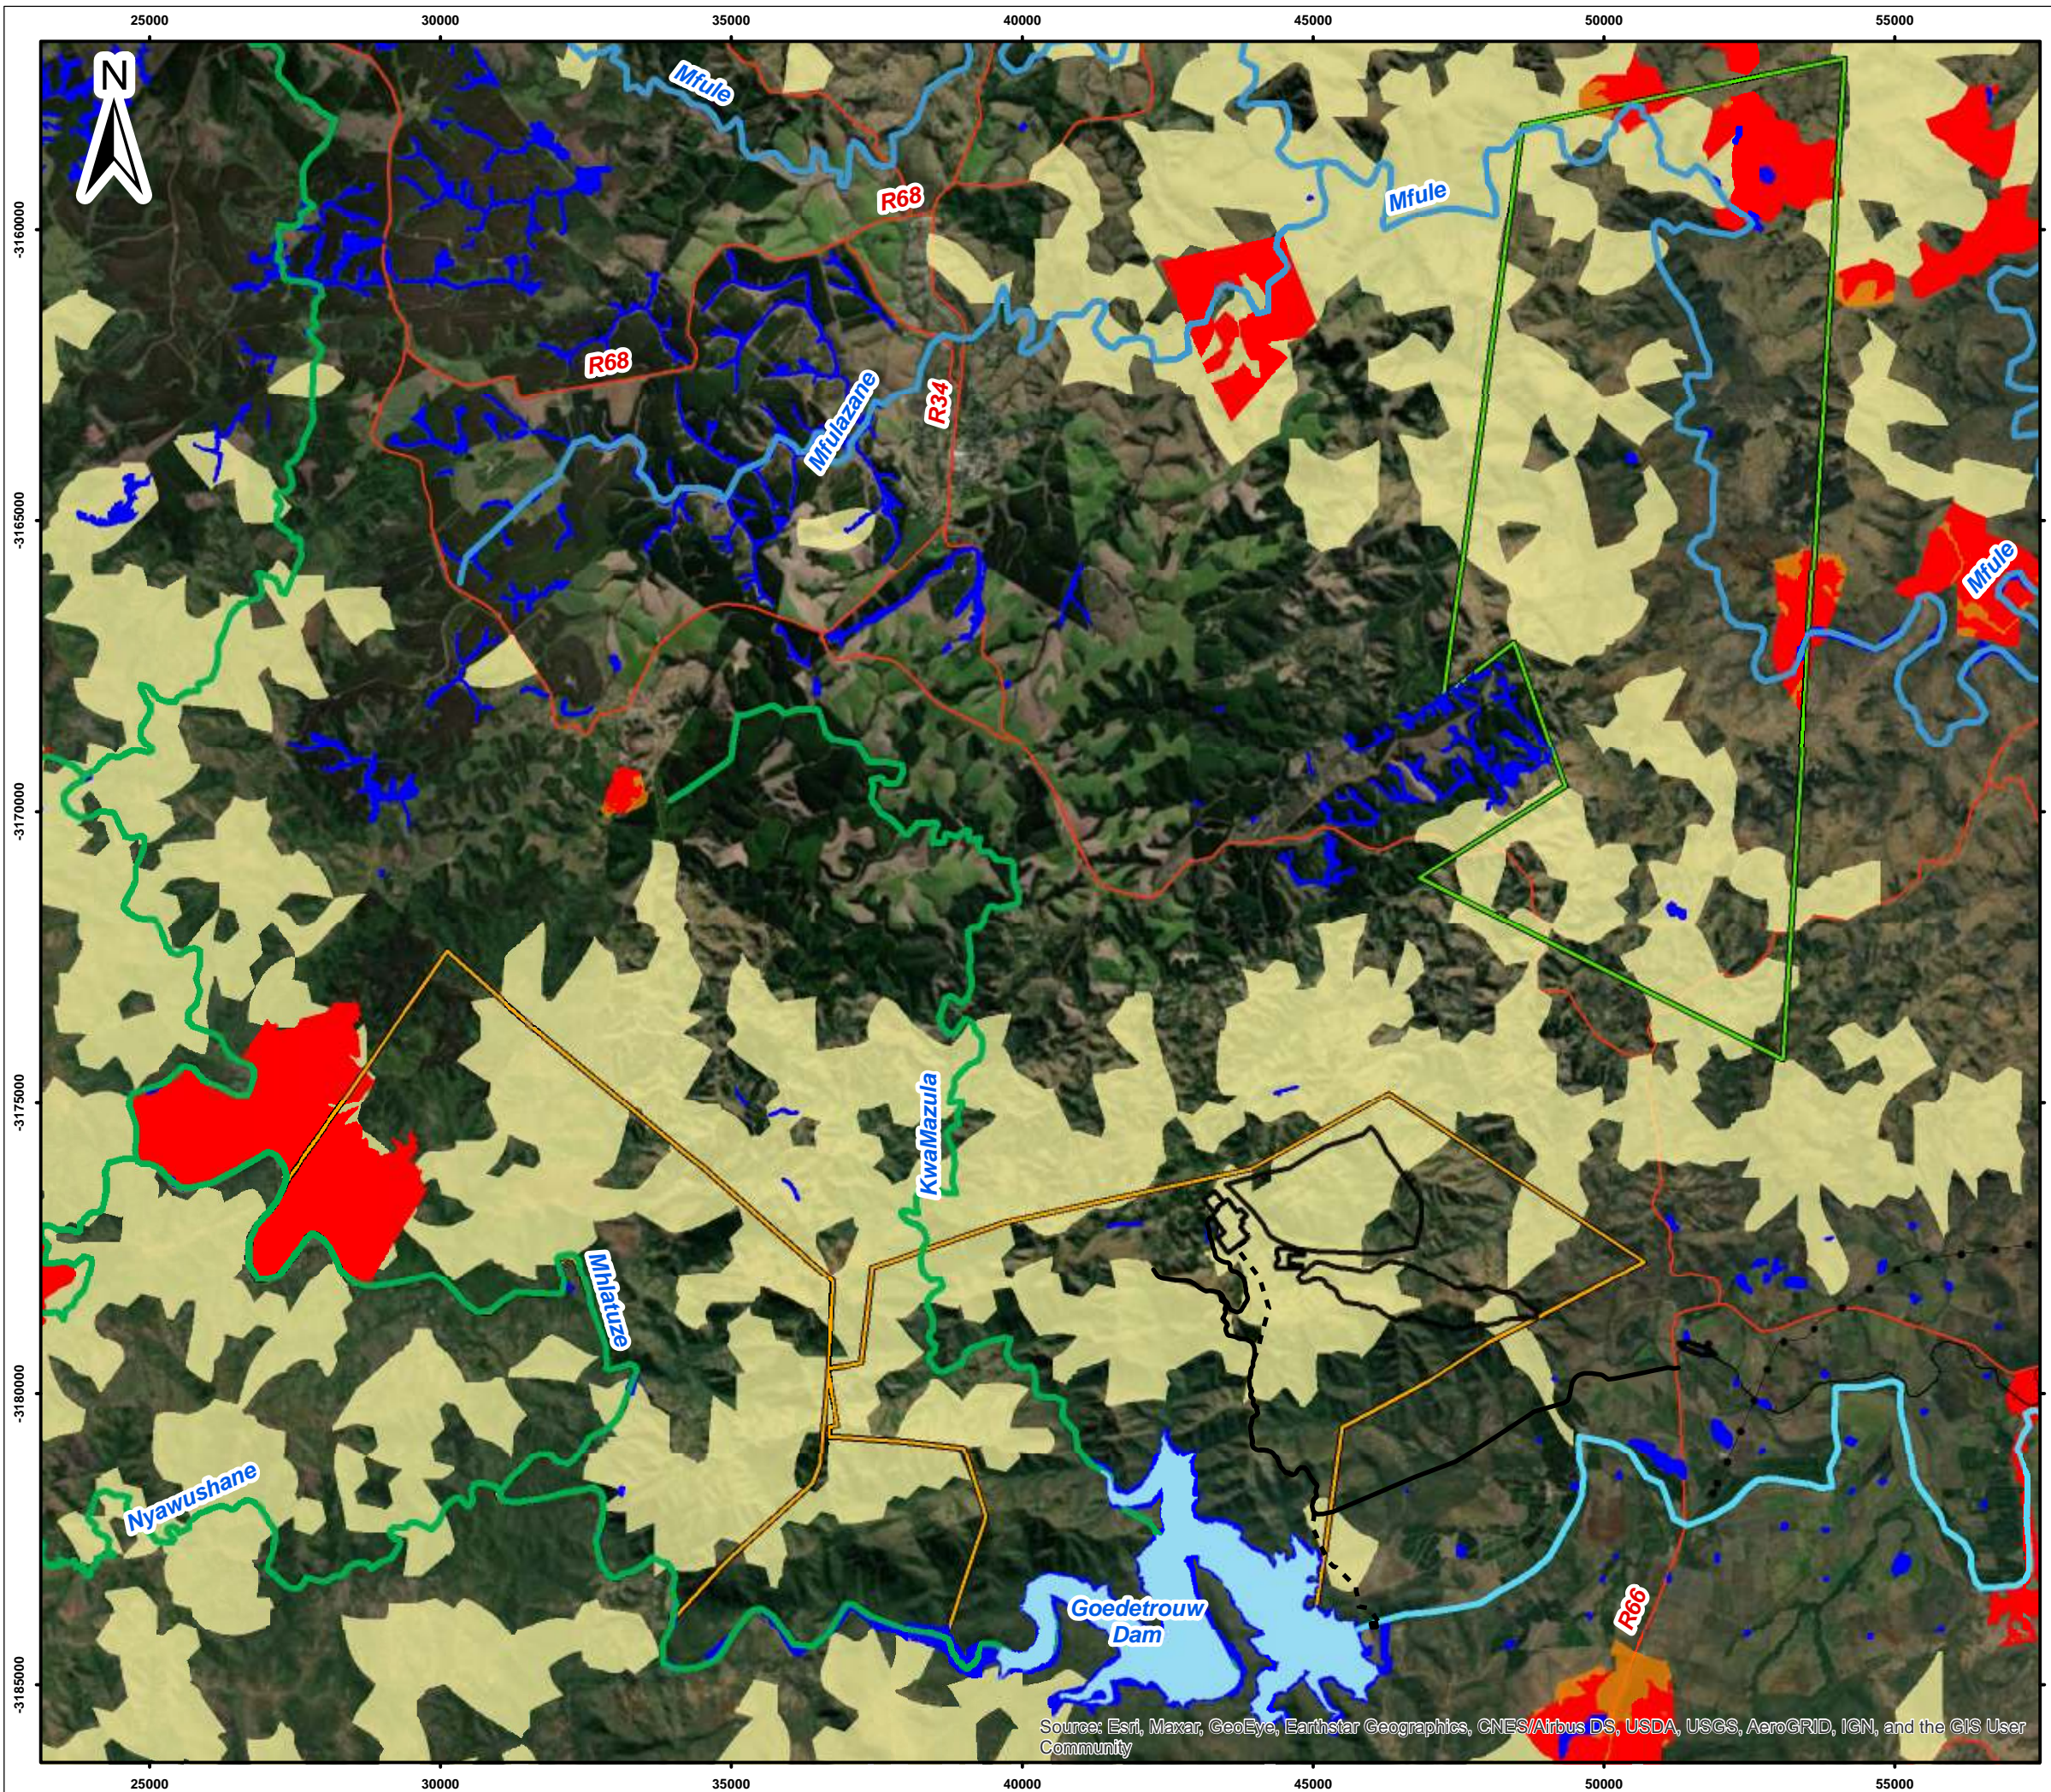

Less than 20% of the population has access to electricity within their households. The remaining households rely on paraffin for cooking and lighting.

Zulu people have occupied the Melmoth region for some 200 years. Grave sites, artefacts and cultural heritage resources abound and traditional culture is still observed by many residents and community social structures remain strong. Homesteads have remained within families for many generations and many residents have strong ties to the land. A full Heritage Study is planned whereby all potentially affected homesteads will be consulted and all graves and heritage features documented.

The area surrounding the proposed MIOP is classified as fully rural/ non-urban, with 70.8% of the land under tribal/ traditional authority administration. The only urban development within the study area is Melmoth (central west of the study area), which is approximately 15 km to the north west of the proposed MIOP.

In the North Block and South Blocks there are numerous small scale (between 5 and 10 ha) subsistence farms where the output is primarily for home consumption. There are no areas with rainfed annual crops or planted pasture within the South Block. The South Block has a moderate capacity for grazing.

Forestry and sugarcane fields dominate the area south of Melmoth with the Mhlatuze River valley downstream of the dam dominated by citrus and sugar cane. In the far south of the study area, sugar cane fields have been cultivated.

8. POTENTIAL ENVIRONMENTAL & SOCIAL IMPACTS IDENTIFIED AND PLAN OF STUDY

This section provides a list of high level potential impacts on the biophysical, heritage/cultural and socio-economic aspects that have been identified in respect of each of the main project actions/activities and processes for each of the project phases. A full assessment and rating of these impacts will be undertaken during the EIA phase and mitigation measures will be included to feed into the Environmental Management Programme (EMPr).

Table 1. Potential identified Impacts and Associated Specialist Input

Potential Impact	Proposed Specialist Study	Specialist Details
Impacts to the local geology.	Vibrations and Blasting Assessment	Blast Management & Consulting
Reduced groundwater quality due to contamination from project related activities.	Groundwater Study	SLR Consulting (Pty) Ltd
Reduced groundwater quantity due to pit dewatering – impact on 3 rd party groundwater users		
Reduced surface water quantity through abstraction for water supply, dewatering activities and altering drainage patterns.	Surface Water Study	SLR Consulting (Pty) Ltd
Flooding of surface infrastructure through infrastructure placement and stormwater controls.		
Reduced surface water quality due to contamination from project related activities.		
Direct impact on biodiversity due to vegetation clearing.	Terrestrial Biodiversity Study	Eco-Pulse Environmental Consulting Services
Loss of species of conservation concern due to poor management practices. These impacts include: <ul style="list-style-type: none"> Impact on vegetation structure and plant species composition; Impact on populations of species of special concern; Impact on targets for threatened ecosystems; Impact on ecological processes and functionality of ecosystems; Impact on species and ecosystem diversity; and Impact on ecological connectivity. 		
Loss of species diversity due to modification of freshwater habitat. These impacts include: <ul style="list-style-type: none"> Alteration of hydrological and geomorphological processes; Impacts to water quality; and Impacts to ecological connectivity and/or ecological disturbance. 	Aquatic Biodiversity and Hydropedology Studies	Eco-Pulse Environmental Consulting Services
Loss of wetland functionality.		Groundwater Consulting Services.
Loss of soils and land capability through contamination from project related activities.	Agricultural Agro-ecosystem Study	TerraAfrica Consult CC
Loss of soils and land capability through erosion and compaction from project related activities.		
Increase in disturbing noise levels from project related activities.	Noise Study	WKC Group
Reduced air quality due to emissions from project related activities.	Air Quality Study	
Impact on existing roads and traffic due to project related traffic.	Traffic Study	Siyazi Thula Transportation Planning (Pty) Ltd

Potential Impact	Proposed Specialist Study	Specialist Details
Negative visual impacts due to mining activities.	Visual Impact Study	Graham Young Landscape Architect
<p>Positive Socio-economic Impacts</p> <ul style="list-style-type: none"> Impact on community development due to skills development through training and capacity building; Impact on community due to employment creation and income generation; and Impact on business community through stimulation of entrepreneurship and business activities in the value chain. 	<p>Socio-economic Study Resettlement Policy Framework</p> <p>Resettlement planning will be undertaken as a separate process whereby communities will be engaged in transparent and ethical negotiations to understand needs, desires, fears and anxieties and to determine fair compensation to those that need to be resettled, or who have the burial sites of their ancestors exhumed and relocated.</p>	Urban-Econ Development and Economists (Pty) Ltd
<p>Negative Socio-economic Impacts</p> <ul style="list-style-type: none"> Impact on communities due to in-migration of jobseekers; Impact on communities due to changes in family dynamics; Impact on agriculture due to changes in air and water quality; Impact on culture and heritage due to exhumation and relocation of burial sites; Impact on customary and religious practices due to resettlement; Impact on communities due to disruption in social dynamics; Impact on communities through misrepresentation by traditional authorities; Impact on tourism sector due to mine activities; Impact on communities due to increased incidents of crime and increased burden on police services; Impact on communities due to fear and uncertainty about the future (can potentially be positive in terms of bringing hope for the future in terms of job opportunities etc.); Impact on country's citizens, communities and businesses due to increased demand on services, water and electricity; and Impact on service delivery and the national fiscus due to corruption, fraud and political interference. 		
<p>Impacts with both a positive and negative dimension</p> <ul style="list-style-type: none"> Overall impact of the project (positive and negative); Impacts on community lifestyle (positive and negative); Impact on health of communities; and Impact on community due to population displacement and resettlement - potential positive due to improved housing conditions, services schools and roads. 		
Loss of or damage to heritage and/or palaeontological resources.	Cultural Heritage Study	Ethembeni Cultural Heritage
Impact on climate change. The impacts of the local demographics, nearby available infrastructure, the current state of the environment and the employment and education of local communities, in light of the vulnerability of the project's operations, value chain of the project, as well as the impact on the social and natural environments.	Climate Change Impact Assessment	Promethium Carbon

ATTENTION: INTERESTED AND AFFECTED PARTY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be

undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR will be consulting with stakeholders through a variety of engagements. Public information meetings have been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021 at 3 pm	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

ATTENTION: COMMENTING AUTHORITY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potential commenting authority, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal’s intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you/your Department may have an interest in, or be a commenting authority on, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the ‘Melmoth Iron Ore Project’ page.

SLR will be consulting with stakeholders through a variety of engagements. Meetings will be arranged with commenting authorities. Public information meetings have been arranged, as below.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

ATTENTION: Ms Gugu Dhlamini

Subject: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT
Attachments: 2021-07-27_MelmothIronOreProject-BID-Final-isiZuluV1_.pdf; 2021-07-27_Melmoth Iron Ore Project-BID-Finalv1_.pdf

ATTENTION: REGULATORY AUTHORITY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The updated BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR is in the process of consulting stakeholders through a variety of engagements. In that regard, a public information meeting has been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
18 August 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR. Organisations/businesses are encouraged to please limit the number of their representatives to one.

Please note that this is the rescheduling of the initial public meeting that was intended to take place on 30 June 2021 at 3pm but was postponed due to the implementation of the adjusted Alert Level 4 Restrictions (from the 28th of June 2021 to the 25th of July 2021) which prohibited gatherings to address, prevent and combat the spread of COVID-19.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end of August 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

ATTENTION: Ms Gugu Dhlamini
 Email: gdhlamini@slrconsulting.com Telephone: 011 467 0945
 Post: PO Box 1596. Cramerview, 2060 Cell phone: 066 082 3687
(Note: If using post, please also contact us telephonically to notify us of your submission)

Please feel free to pass this document on to any other persons whom you believe may be interested in this project. We welcome any comment or questions.

Yours faithfully

M. Hemming

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The updated BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR is in the process of consulting stakeholders through a variety of engagements. In that regard, a public information meeting has been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
18 August 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR. Organisations/businesses are encouraged to please limit the number of their representatives to one.

Please note that this is the rescheduling of the initial public meeting that was intended to take place on 30 June 2021 at 3pm but was postponed due to the implementation of the adjusted Alert Level 4 Restrictions (from the 28th of June 2021 to the 25th of July 2021) which prohibited gatherings to address, prevent and combat the spread of COVID-19.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end of August 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:
