Current zoning: GENERAL RESIDENTIAL 1		Present use: HOTEL

C. SIGNIFICANCE:

1. Original date of construction/plan approval: Original 1936 / Additions 2009
2. Historical Significance:
The original date of construction can be traced to 1936 after enquiring with Ethekewini Microfilm Division, however the building is not listed. Having analysed the spatial planning of the building, it is assumed the original building was an apartment building or served a residential type application. The building consists of a three-storey Union Period styled structure. There is a newer two-storey structure, constructed circa 2009, that stands at the rear of the site, in the form of two wings, independent of the original architecture. The newer structure is finished in smooth plaster and paint with aluminium windows. The original structure has a red facebrick plinth, with plastered and painted walls, and reveals of windows and doors painted red. Records available show alterations to the existing building circa 2009. Records indicate that there were primarily internal alterations with the external work including the closure of a door/ new door repositioned, closure of 4 windows and the construction of a new walkway from the existing building to the newer structure. Apart from an external door being sealed, there were no changes to the façade of the building. Hence, the aesthetic of the building remains unchanged.

3. Architectural Significance:
The Union Period style architecture of the building features a hipped Marseilles tiled roof, a facebrick plinth, cottage paned windows, panel style balustrade walls, and quoined columns at the corners of the building. Sitting prominently at the fore of the building is the sweeping staircase leading to the main entrance of the structure.

4. Urban Setting & Adjoining Properties:
The site is situated opposite the Gordon Road Girls School after the Rosetta Road intersection. It is surrounded by existing residential developments, mostly consisting of dwelling houses and larger apartment type buildings. The neighbouring properties are of a similar style. The proposed alteration will have no impact on the environment, and neither is the property off any environmental significance.
