Town/Local Municipality: ETHEKWINI MUNICIPALITY		District Municipality:
Current zoning: SPECIAL RESIDENTIAL 900		Present use: PRIVATE DWELLING HOUSE

C. SIGNIFICANCE:

1. Original date of construction/plan approval: 1944
2. Historical Significance: There is no historical significance to the existing remnants of the house. The neighbourhood has evolved and residents have developed their individual homes to suit their own personal requirements. The result is a beautiful dichotomy of many architectural styles. Therefore there is no evidence of any historical significance to the homes adjacent to the property. The building in question has no architectural historical significance as it has been under many additions and alterations. The building is now dilapidated and roofless.
References

3. Architectural Significance:
The surrounding homes in the Bluff including the existing house on the property has been added onto and altered - hence there is a mix of styles within the area - as compared to a set style of architecture which could inform designs of the future. The house in question has been altered by previous owners without recorded council submission approvals. These alterations have caused the house to become highly unstable structurally due to the lack of any engineers input. The current remnants of what was once the house, is not salvageable.
References

4. Urban Setting & Adjoining Properties:
The urban setting of the suburb has no distinct historical architectural style. There is no common style in the design of houses along Marine Drive and surroundings. The area follows no specific architectural style and this has allowed residents to construct architecture within an array of different architectural styles - some economic, some extravagant.
All homes tend to face ocean side and this takes advantage of the natural light north easterly breezes and the north westerly breezes.
