AMAFA

Dear Bernadette

MOTIVATION RE: WESTON MPOFANA CELL PHONE TOWER WITHIN THE MPOFANA LOCAL MUNICIPALITY

The American Tower Corporation SA propose to construct a new cell phone tower within Ward 5 of the Mpozana Local Municipality. The tower and associated infrastructure will be located in the Mooi River area at the following point location, 29°12'37.61"S; 30°01'5.96"E. The cell phone tower will be a 35m telecommunications mast tower with a total proposed footprint of 64m² (8m x 8m) and will be surrounded by a 2.4m high steel palisade fence.

We would like to motivate that a Heritage Impact Assessment would not be required based on the fact that the site falls within private property which has been transformed due to previously clearing and infilling. The site will have a footprint of 8m x 8m (64m²). No heritage or cultural aspects were noted on site were noted within the immediate area of the site associated with the Weston Mpozana Cell Phone Tower.

Yours Faithfully
