C. SIGNIFICANCE:

1.	Original date of construction	approx... 1946
2.	Historical Significance:	
<p>The building has no historical significance. The original building application was approved by the City of Durban in December 1947. It is assumed construction of the building was completed within the subsequent annual period. Therefore the building is approximately 77 years old.</p>		
<p>The building has gone through additional alterations & additions over time in the same style as the original design, consisting of Plastered and painted walls, Red facebrick plinth, Timber windows painted white, and Terracotta roof tiles. The granny flat over the garage has adopted aluminium window and door frames externally.</p>

3.	Architectural Significance:
<p>There are no significant or noteworthy architectural characteristics and coupled with the extensive alterations over its time, there would be no historical significance to maintain.</p>	
References	

4.	Urban Setting & Adjoining Properties:
<p>The building is a domestic dwelling in a suburban context set behind solid brick (facebrick and plastered panels on road front) boundary walls. The area is surrounded by several similar homes that have been re-worked and extended in various styles over time. There is no strong relevant architectural language in terms of the urban context to relate to.</p>

2. Motivation for proposed work (Please motivate fully – on a separate sheet if necessary)

<p>The building is currently a family home which requires remodelling and maintenance as the family has matured over time. The home currently is served by 3 bedrooms & 2 bathrooms, with the intention to create a forth bedroom / play room by reducing the size of the bathrooms. The living spaces are intended to become one open-plan arrangement by demolishing all the internal walls, and remodelling the kitchen to suit. These are all internal alterations. The biggest extensions are planned to better activate the 'back' garden which includes, a larger veranda with wide stairs leading onto the garden and new pool area. This is merely a lightweight lean-to structure attached to the existing / original dwelling structure.</p> <p>Although a pool was approved to be built under previous application, it was never constructed. This application seeks approval for a pool as well, but in a different position.</p>

3. Detail the alterations/additions/restorations proposed (Briefly outline the proposal)

<p>The proposed addition is to match the existing home internally. The new light-weight external clip-on element aims to read as a more contemporary addition, while continuing to utilise the red facebrick to match the existing buildings plinth surround.</p> <p>The proposal is to also reuse the existing timber windows where possible, while additional doors and windows will be aluminium ones which are less prone to element damage, requiring less maintenance. The colour of these will adopt a darker anthracite grey to emphasis a contrast between new/contemporary and the old original.</p> <p>In light of the above, we look forward to receiving a favourable response and Amafa's approval of this proposal.</p>
