Property Description	Comments

  Restitution claim against the above properties.

Attention: Susan van Eeden Email: rietkolproject@gmail.com

Dear Sir/Madam

#### LAND RESTITUTION IN TERMS OF THE RESTITUTION OF LAND RIGHTS ACT NO. 22 OF 1994

I refer to your enquiry, dated 22<sup>nd</sup> March 2018. Please note that a claim for the restitution of land rights has been lodged against the following property:

Property Description	Comments	File number	Claim Status
Province: Mpumalanga District: Nkangala Property:			35
Ptn 31 & 71 Rietkol 237 IR	According to our database there is a land claim against the Farm Rietkol 237 IR, but so far only portion 91 has been affected and settled. Portions 31 and 71 are not affected but we are still doing research.	5398(ptn 91)	

It is not within the powers of the Commission on Restitution of Land Rights to grant or withhold permission for the development or alienation in respect of land being claimed until such a claim has been gazetted, unless such development would constitute an obstruction to the achievement of the aims and objectives of the Restitution of Land Rights Act 22 of 1994. In such instances application can be made in the Land Claims Court in terms of Section 6(3) of the Restitution Act; this can be done at any stage after the claim has been lodged - even before the publishing of such a claim in terms of Section 11 of the Restitution of Land Rights Act 22 of 1994.

While the Regional Land Claims Commission: Mpumalanga has taken reasonable care to ensure the accuracy of the above-mentioned information, the Commission cannot be held accountable if, through the process of further investigation, additional information is found that contradicts this communication.

Kind regards

MR. E.S. NKOSI CHIEF DIRECTOR

See the various facilities above.

It is common cause that my client will suffer loss and damage to its entire business should mining in future take place on the affected property. Noise, air and water pollution will have a serious effect on egg and chicken production.

You are alluded to the fact that my client sells eggs to retailers which have very strict requirements with regard to hygiene and quality control. There are also statutory requirements that my client has to comply with regarding food production for human consumption. The contamination of eggs by silica, and the dust generated by silica mining, will have a serious impact on the egg packing stores, and will render eggs unfit for human consumption, with the consequence that retailers will stop buying eggs from my client. My client will as a result of the aforesaid suffer irreparable loss and damage.

My client also takes notice, with great concern, that Portion 71 of Rietkol falls within the mining area, and is very close to the proposed opencast pit. The relocation of its packing stores will have a very serious financial and logistical impact on its business at large.

My client reserves the right to amplify its concerns and objections once it has been provided with the documents as requested above, as well as the documents that are required in terms of the EIAR and NEMA.

The letter is written without prejudice to my client's rights which are herewith duly reserved.

Kindly acknowledge receipt.
