REFERENCE: 16/3/1/2/B3/28/1006/13
ENQUIRIES: Ms. Arabel McClelland
DATE: 2013-04-23

Municipal Manager
Drakenstein Municipality
P.O. Box 1
PAARL
7620

Attention: Mr. Dawid Delaney

Tel: (021) 807 4800
Fax: (021) 807 4840

Dear Sir

ACKNOWLEDGEMENT OF RECEIPT AND ACCEPTANCE OF THE APPLICATION FORM FOR SCOPING AND ENVIRONMENTAL IMPACT ASSESSMENT ("EIA") REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON ERF 8359, REMAINDER OF ERF 8370, ERF 8378, ERF 8399, ERF 8400, ERF 12628, ERF 12633 AND ERF 33027, PAARL.

1. The abovementioned document dated 10 April 2013, received by the Department on 12 April 2013, refers.
2. This letter serves as an acknowledgement of receipt and acceptance of the aforementioned document by this Department.
3. You are hereby advised that only those activities applied for will be considered for authorisation. Please ensure that all applicable listed activities are included in the application. Failure to do so may invalidate the application.
4. The Department notes that a signed declaration by the independent Environmental Assessment Practitioner ("EAP") was not submitted with the Application Form. Please note that the EAP's signed declaration must be submitted to this Department before the submission of the draft Scoping Report.
5. Please note that all the reports must contain all the information outlined in the relevant regulations of the EIA Regulations, 2010. Omission of information may result in the reports being rejected.
6. It is evident that you do not intend to apply for exemption from any provisions contained in the Environmental Impact Assessment ("EIA") Regulations or National

Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA"). Please note that should you fail to meet a requirement of the Regulations or NEMA and if no exemption from that provision was applied for, your Scoping and EIA Reports may be rejected. You are further advised that Regulation 10(2)(d) requires the applicant to publish a notice of the decision taken by the Department in newspapers. If you did not apply to be exempted from this provision and fail to publish a notice of the decision in the applicable newspapers as required, then that decision may be suspended.

7. Should you therefore still wish to apply for exemption from any provisions of the EIA Regulations, 2010 then you need to complete a separate Exemption Application Form available on the Department's website (http://www.westerncape.gov.za/eng/your_gov/406/services/11537/10199). Please note that the PPP for the exemption application and the Scoping and EIA Reports may be done simultaneously. The exemption application form may be submitted with the Scoping Report and, in accordance with Regulation 52 (2), a combined decision on the exemption application and the environmental authorisation may be issued.
8. Since solid waste removal, effluent discharge, water and electricity supply will be provided by the municipality, you are requested to provide this office with written proof that the municipality has sufficient capacity to provide the necessary services to the proposed development. Confirmation of the availability of services from the service providers must be obtained during the EIA process and submitted with the EIA Report.
9. Please be advised that the PPP to be followed must comply with Regulation 54, unless deviation from the process has been agreed to by the competent authority. You are further advised that according to Regulation 54 (2) *"The person conducting a PPP must take into account any guidelines applicable to public participation."* The Department's Guideline on Public Participation (March 2013) was compiled to provide guidance on the procedure to be followed when conducting the PPP and includes, *inter alia*, notification of I&AP's. In addition to the information required by Regulation 54 (3) to be contained in a notice, notice board or advertisement, the Department's reference number must also be included. Further details on the procedures to be followed when conducting the PPP can be obtained in the Department's Guideline. This guideline forms part of this Department's NEMA EIA Regulations Guideline and Information Document Series which can all be downloaded from the Department's website (available from the web address above).

Please be advised that the draft Scoping Report must **first** be submitted to the Department whereafter it must be made available to the public and all State Departments that administer laws relating to a matter affecting the environment for comment for a period of **40** days. The applicant/Environmental Assessment Practitioner ("EAP") is required to inform this Department in writing upon submission of the draft report to the relevant State Departments. Upon receipt of this confirmation, this Department will in accordance with Section 24 O (2) and (3) of the NEMA inform the relevant State Departments of the commencement date of the 40 day commenting period or 60 days in the case of the Department of Water Affairs for waste management activities which also require a license in terms of the National Water Act, 1998 (Act No. 36 of 1998). Please be further advised that a commenting period of 21 days will apply to all requests for comment on any information,

documentation or reports (including the final Scoping Report) other than the draft Scoping Report, unless an alternative commenting period is specified by this Department.

10. You are hereby reminded that a plan of study for EIA, which sets out the approach to the EIA of the application in accordance with Regulation 28 (1) (n) **must** be compiled and submitted **together** with the Scoping Report.
11. Please be advised that the Scoping and EIA phases of the EIA process are two distinctly separate phases each having its own requirements and reports to be submitted. The Department will not accept any Scoping and EIA Reports where the processes or information of the two phases were collapsed into a single process or report.
12. Be advised that in terms of the EIA Regulations, 2010 and NEMA the investigation of alternatives is mandatory. **All alternatives identified must therefore be assessed and must be feasible and reasonable** as the Department may grant authorisation for an alternative as if it has been applied for or may grant authorisation in respect of all or part of the activity applied for as specified in Regulation 25 of GN No. R. 543 of 18 June 2010. Alternatives are not limited to activity alternatives, but include layout, design, operational and technology alternatives. A full explanation must be provided for each alternative with a substantiated motivation as to why the preferred alternative is considered as the most feasible and reasonable alternative for the proposed development. Refer to the Department's Guideline on Alternatives (March 2013) (available from the web address above).

You are hereby reminded that it is mandatory to investigate and assess the option of not proceeding with the proposed activity (i.e. the "no-go" option) in addition to other alternatives identified. Every EIA process must therefore identify and investigate alternatives, with feasible and reasonable alternatives to be comparatively assessed. If, however, after having identified and investigated alternatives, no feasible and reasonable alternatives were found, no comparative assessment of alternatives, beyond the comparative assessment of the preferred alternative and the option of not proceeding, is required during the assessment. What would, however, be required in this instance is that proof of the investigation undertaken and motivation indicating that no reasonable or feasible alternatives other than the preferred option and the no-go option exist must be provided to the Department.

13. In terms of the NEMA EIA Regulations, 2010, when considering an application, the Department must take into account a number of specific considerations including *inter alia*, the need for and desirability of any proposed development. As such, the need for and desirability of the proposed activity must be considered and reported on in the Scoping and EIA Reports. The Scoping and EIA Reports must reflect how the strategic context of the site in relation to the broader surrounding area has been considered in addressing need and desirability. Refer to the Department's Guideline on Need and Desirability (March 2013) (available from the web address above).
14. In addition to the above, you must clearly show how the proposed development complies with the principles contained in Section 2 of the NEMA and must also show how the proposed development meets the requirements of sustainable development.

15. In terms of good environmental practice you are encouraged to engage with State Departments and other Organs of State in the pre-application phase or early in the EIA process to solicit their inputs on any of their requirements to be addressed in the EIA process. In this respect, relating to the List of State Departments to be consulted as provided in the Application Form, it is recommended that the Department of Human Settlements and the Department of Transport and Public Works is also consulted with regards to this application. Please note that this does not replace the requirement of making the draft Scoping Report available to State Departments as stipulated above.
16. The practitioner must record and respond to all comments received. The comments and responses must be captured in a Comments and Responses Report and must also include a description of the PPP followed and this report must also be included in the public participation information to be attached to the final Scoping Report. The final Scoping Report must be made available to registered I&AP's for comment before it is submitted to the Department for consideration.
17. You are advised that in compiling the Scoping Report you must take into account the applicable guidelines developed by the Department. In particular, the guidelines that may be applicable to the proposed development include, *inter alia*, the following:
 - Guideline for Involving Visual and Aesthetic Specialist in the EIA Process, June 2005.
 - Guideline for Involving Biodiversity Specialists in the EIA process, 2005;
 - Guideline for Involving a Heritage Specialist in an EIA Process, 2005;
 - Guideline for Involving Hydrogeologists in the EIA Process, 2005.
 - Guideline for Involving Economists in EIA Processes, 2005;
 - Guideline for the Review of Specialist Input in the EIA process, 2005.

Furthermore, you are hereby advised that the Department, in March 2013, formally published the following EIA Guidelines in terms of Section 24J of the National Environmental Management Amendment Act (Act No. 62 of 2008):

- Guideline on Transitional Arrangements (March 2013);
 - Guideline on Appeals (March 2013);
 - Guideline on Alternatives (March 2013);
 - Guideline on Public Participation (March 2013);
 - Guideline on Exemption Applications (March 2013);
 - Guideline on Need and Desirability (March 2013);
 - Guideline on Generic Terms of Reference for EAPs and Project Schedules (March 2013).
18. One of the objectives of the Western Cape Provincial Spatial Development Framework published by this Department is to minimise the consumption of scarce environmental resources such as water, fuel, building materials, mineral resources, electricity and land. To this effect and as part of the efforts to reduce the effects of climate change, you must as part of the Environmental Impact Assessment ("EIA") process identify energy efficient technologies (e.g. the use of low voltage or compact fluorescent lights instead of incandescent globes, maximising the use of solar heating, etc.) that could be implemented for the proposed development.

Considering that South Africa is a water scarce country and that many catchments in the Western Cape are already water stressed, you must also consider implementing

the use of water saving devices and technologies (e.g. dual flush toilets, low-flow shower heads and taps, etc.) for the proposed development.

This Department further wishes to inform you that consideration must be given to ways to minimise waste and wastage in the design, construction and operational phase of the proposed development. Your attention is therefore drawn to the Department's Waste Minimization Guideline for Environmental Impact Assessment Reviews (May 2003), available from the Department on request. The Guideline raises awareness to waste minimization issues and highlights waste and wastage minimization practices. In particular, it is recommended that Part B be considered as it covers general waste and wastage minimization and general construction activities. It is important to remember that a recycling programme must adopt the cradle-to-grave approach. Any recycled material must be disposed of at a recycling facility and not be disposed of as general household waste at a landfill site.

19. Be advised that should the information requested above not be included in your EIA Report, it may be rejected.
20. The Department awaits the submission of the Scoping Report and plan of study for EIA as prescribed by the EIA Regulations, GN No. R. 543 of 18 June 2010. In accordance with Regulation 67 of GN No. R. 543 of 18 June 2010 the Scoping Report must be submitted to this Department within a period of six months from the date of this letter.
21. If you, however, have been complying with the requirements of the Regulations and have progressed with the application process, but for some reason will not be able to submit the Scoping Report within the six month period, you must inform the Department as such before the end of the six month period. You will be required to submit a concise motivation why the Scoping Report will not be submitted within the six month period. The motivation must include the tasks that have been performed to date, the reasons for the delay in submission and an indication when the Scoping Report will be submitted to the Department. Such motivation must reach the Department before the end of the six month period. The Department will consider your motivation and inform you of its decision whether or not to continue with the processing of the current application. Should no motivation be provided, your file will be closed for administrative purposes. As such, a new application process will have to be initiated with a new Application Form to be submitted if you wish to again pursue your proposed development.
22. Please note that three printed copies, as well as two electronic copies (saved on CD's/DVD's) of the Scoping Report must be submitted to the Department.
23. Kindly quote the abovementioned reference number in any future correspondence in respect of the application.
24. Please note that the activity may not commence prior to an environmental authorisation being granted by the Department. It is an offence in terms of Section 24F of the NEMA for a person to commence with a listed activity unless the competent authority has granted an environmental authorisation for the undertaking of the activity. Failure to comply with the requirements of Section 24F of the NEMA will result in the matter being referred to the Environmental Governance Directorate of this Department. A person convicted of an offence in terms of the above is liable to a

fine not exceeding R5 million or to imprisonment for a period not exceeding 10 years, or to both such fine and imprisonment.

25. The Department reserves the right to revise initial comments and request further information based on the information received.

Yours faithfully

HEAD OF DEPARTMENT

Dear Sir

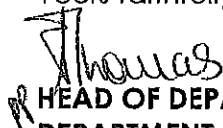

ACKNOWLEDGEMENT OF RECEIPT OF THE ENVIRONMENTAL ASSESSMENT PRACTITIONER SIGNED DECLARATION FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON ERF 8359, REMAINDER OF ERF 8370, ERF 8378, ERF 8399, ERF 8400, ERF 12628, ERF 12633 AND ERF 33027, PAARL.

1. The Application Form for the abovementioned proposal, dated 10 April 2013 and received by the Department on 12 April 2013, the Department's acknowledgement of receipt and acceptance thereof, dated 23 April 2013, and the abovementioned document dated 2 May 2013 and received by the Department on 3 May 2013, refer.
2. This letter serves as an acknowledgement of receipt and acceptance of the aforementioned document by the Directorate: Land Management (Region 1) (hereinafter referred to as "this Directorate").
3. The Directorate notes, however, that although the Environmental Assessment Practitioner's signed declaration was submitted in response to a request by this Directorate in our last correspondence, dated 23 April 2013, **the supporting documentation (cover letter containing a project description) submitted along with the declaration does not pertain to this application nor does the Departmental reference number and project title correspond with the reference number previously issued.** It is requested that care is taken to ensure the appropriate reference number is quoted in all future correspondence in respect of this application.
4. Please note that the activity may not commence prior to an environmental authorisation being granted by the Department. It is an offence in terms of Section 24F of the NEMA for a person to commence with a listed activity unless the

competent authority has granted an environmental authorisation for the undertaking of the activity. Failure to comply with the requirements of Section 24F of the NEMA will result in the matter being referred to the Environmental Governance Directorate of this Department. A person convicted of an offence in terms of the above is liable to a fine not exceeding R5 million or to imprisonment for a period not exceeding 10 years, or to both such fine and imprisonment.

5. The Department reserves the right to revise or withdraw comments or request further information based on any information received.

Yours faithfully

Dear Sir

ACCEPTANCE OF THE FINAL SCOPING REPORT AND PLAN OF STUDY FOR AN ENVIRONMENTAL IMPACT ASSESSMENT ("EIA") FOR THE FINAL SCOPING REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON ERF 8359, REMAINDER OF ERF 8370, ERF 8378, ERF 8399, ERF 8400, ERF 12628, ERF 12633 AND ERF 33027, PAARL.

1. The abovementioned document dated November 2013, as received by this Department on 5 November 2013, the Department's correspondence dated 18 November 2013, and the additional information dated 6 December 2013, received by the Department on the same day, refer.
2. This letter serves to inform you that the abovementioned document has been accepted by the Department.
3. Furthermore, the Department acknowledges receipt and acceptance of the amended Application Form and notes the additional activity applied for, namely Activity 12 of Government Notice No. R.546. Please note that only activities which are applied for will be considered for authorisation. Should additional applicable listed activities be identified during the EIA phase at a later date, please ensure an amended Application Form is submitted to the Department. Failure to do so may invalidate the application.
4. You are hereby advised that the EIA Report must contain all the information outlined in Regulation 31 (2) of the EIA Regulations 2010. Omission of information may result in the EIA Report being rejected.

2nd Floor, 1 Dorp Street, Cape Town, 8001

Tel: +27 21 483 2660 Fax: +27 21 483 3633

E-mail: Arabel.McClelland@westerncape.gov.za

Private Bag X9086, Cape Town, 8000

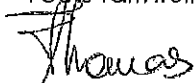

www.westerncape.gov.za/eadp

5. You are hereby reminded that the PPP to be followed in the EIA phase must also comply with Regulation 54 of the EIA Regulations 2010, as well as this Department's Guideline on Public Participation (March 2013).
6. Please be advised that the draft EIA Report must be made available to the public and all State Departments that administer laws relating to a matter affecting the environment for comment for a period of 40 days. The applicant/Environmental Assessment Practitioner is required to inform this Department in writing upon submission of the draft report to the relevant State Departments. Upon receipt of this confirmation, this Department will in accordance with Section 24 (O) (2) and (3) of the National Environmental Management Act, 1998 (Act 107 of 1998) ("NEMA") (as amended) inform the relevant State Departments of the commencement date of the 40 day commenting period. Please be further advised that a commenting period of 21 days will apply to all requests for comment on any information, documentation or reports other than the draft EIA Report, unless an alternative commenting period is specified by this Department.
7. The Department would like to remind you of the Departmental Circular: 02/2013 with regards to the Western Cape Government: Protocol for the administration of EIA and Waste Management Licence ("WML") applications during the festive period 2013/14, which states that in compliance with Regulation 1(3) of the NEMA EIA Regulations, 2010 and to facilitate a transparent PPP, applicants and/or environmental assessment practitioners ("EAP's") must not conduct PPP over the festive period, i.e. between Friday, 13 December 2013 and Thursday, 2 January 2014.
8. Please ensure that comments from all the relevant Organs of State are submitted with the EIA Report.
9. You are hereby advised that a draft Environmental Management Programme ("EMP") that complies with Regulation 33 of the EIA Regulations 2010 must be compiled that addresses the potential environmental impacts of the activity on the environment throughout the project life cycle, i.e. the EMP must address impacts in respect of the planning and design, pre-construction and construction activities, operation of the activity, rehabilitation of the environment and closure/decommissioning (if applicable). The Department would like to advise that in compiling the EMP the Department's Guideline for Environmental Management Programmes (available from the Department's website (http://www.westerncape.gov.za/eng/your_gov/406/services/11537/10199) must be taken into account.
10. Please note that this Directorate's Town Planning component advises with regards to the proposed Alternative 3, which includes a cemetery, that in terms of the National Health Act, 2003 (Act 61 of 2003) Regulations relating to the Management of Human Remains (published in Government Notice No. 363 of 22 May 2013), a burial site may not be located within 500m from the nearest habitable building. This prescription would thus render the proposed Alternative 3 implausible.
11. The Department awaits the submission of the EIA Report as prescribed by the EIA Regulations, GN No. R. 543 of 18 June 2010. In accordance with Regulation 67 of GN

No. R. 543 of 18 June 2010 the EIA Report must be submitted to this Department within a period of six months from the date of this letter.

12. If you, however, have been complying with the requirements of the Regulations and have progressed with the application process, but for some reason will not be able to submit the EIA Report within the six month period, you must inform the Department as such before the end of the six month period. You will be required to submit a concise motivation why the EIA Report will not be submitted within the six month period. The motivation must include the tasks that have been performed to date, the reasons for the delay in submission and an indication when the EIA Report will be submitted to the Department. Such motivation must reach the Department before the end of the six month period. The Department will consider your motivation and inform you of its decision whether or not to continue with the processing of the current application. Should no motivation be provided, your file will be closed for administrative purposes. As such, a new application process will have to be initiated with a new Application Form to be submitted if you wish to again pursue your proposed development.
13. You must now proceed with the EIA process in accordance with the tasks outlined in the plan of study for the EIA.
14. Be advised that should the information requested above not be included in your EIA Report, your EIA Report will be rejected.
15. Kindly quote the abovementioned reference number in any future correspondence in respect of the application.
16. Please note that the proposed development may not commence prior to an environmental authorisation being granted by the Department. It is an offence in terms of Section 24F of the NEMA for a person to commence with a listed activity unless the competent authority has granted an environmental authorisation for the undertaking of the activity. Failure to comply with the requirements of Section 24F of the NEMA, 1998 will result in the matter being referred to the Directorate: Environmental Governance of this Department for prosecution. A person convicted of an offence in terms of the above is liable to a fine not exceeding R5 million or imprisonment for a period not exceeding ten years, or to both such fine and imprisonment.
17. This Department reserves the right to revise or withdraw comments or request further information from you based on any information that might be received.

Yours faithfully
