

## Exhaustive search for headmaster sees expat return to home soil

Colleen Dardagan

Trains would be available every three to five minutes from 2015.

will have completed six years of the programme.

Production of the trains is set to start in 2014. – Sapa

## ACCUSED DEALT FATAL BLOW

# Rosselloty co

The 64-year-old man and the 58-year-old women were asleep at their Extension Three home

grandchildren, the men drew weapons and shot the man in the head and chest.

### NOTICE OF ENVIRONMENTAL ASSESSMENT PROCESS AND PUBLIC MEETING:

**PROPOSED PHASE 4 OF THE NORTHERN AQUEDUCT – DUFFS ROAD LINK TO PHOENIX 2 RESERVOIR, ETHEKWINI MUNICIPALITY, KWAZULU NATAL**  
EIA NO: DM/0065/2012

*Knight Piésold*  
CONSULTING

**Applicant:** EThekweni Municipality Water & Sanitation (EWS).

**Proposed Development:** EThekweni Water & Sanitation (EWS) have been awarded a Record of Decision (RoD) from the Department of Agriculture, Environmental Affairs and Rural Development (DAEARD) to undertake the construction of the Northern Aqueduct (NA) from Emachobeni to Umhlanga, supplying areas in northern Durban with gravity-fed potable water. A new pipeline link to the NA is now being proposed between the existing bulk water distribution system and Phase 1 of the NA project. This pipeline will form Phase 4 of the NA project and is required to be commissioned at the same time as NA Phase 1, i.e. 2014. Once completed, Phase 1 of the NAA will provide an important link between the existing distribution system and new developments in the north. The existing system however is presently operating close to its maximum capacity and does not have spare capacity to supply these developments. The most severe bottleneck in the existing system occurs in the section of trunk mains between Duffs Road and Phoenix 2 Reservoir (linking the existing system to the NA Phase 1). As a result of this bottleneck, a new link is currently being proposed between Duffs Road and Phoenix 2 Reservoir (NA Ph 4) so that Cornubia and other developments north of Durban can be provided with water within the next 18 months. Phase 4 consists of a 1.2m diameter pipe which is to be laid in parallel with the existing trunk mains between Duffs Road and Phoenix 2.

The large volume of water being transferred requires that a full EIA be undertaken, but permission to undertake a Basic Environmental Assessment has been obtained from the DAEARD.

**To Comment:** To register as an interested and/or affected party, & obtain further information, please submit your name, contact information and interest in the project before the 30 January 2013 to:

Duyaze Environmental Consulting (Sam Manqele) PO Box 252, Luxmi, 3207, South Africa. Tel: 033 391 5094, Fax: 086 614 2081, e-mail: duyaze@telkomsa.net.

For technical enquiries or route concerns, please contact: Knight Piésold Consulting (Michelle Lotz), PO Box 383, Westville 3630. Tel: 031 276 4660, Fax: 031 262 2950, e-mail: mlotz@knightpiesold.com
