By Courier Services

Dear Mr Jansen,

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeneys 1 PV (Pty) Ltd is proposing the establishment of the Aggeneys 1 and Aggeneys 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeneys 1 and Aggeneys 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeneys 1 and Aggeneys 2 solar PV facilities to the Aggeneis Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Organisation's review and written comments, and a CD containing the BARs is included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Organisation's written comment on the BARs before or on the closing date of the review period.

Kind regards

Dear Mr Marubini

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeney 1 PV (Pty) Ltd is proposing the establishment of the Aggeney 1 and Aggeney 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeney 1 and Aggeney 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeney 1 and Aggeney 2 solar PV facilities to the Aggeney Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Department's review and written comments, and a CD containing the BARs is included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Department's written comment on the BARs before or on the closing date of the review period.

By Courier Services

Dear Mr Masipa,

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeney's 1 PV (Pty) Ltd is proposing the establishment of the Aggeney's 1 and Aggeney's 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeney's 1 and Aggeney's 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeney's 1 and Aggeney's 2 solar PV facilities to the Aggeney's Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Department's review and written comments, and a CD containing the BARs is included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Department's written comment on the BARs before or on the closing date of the review period.

Kind regards

Dear Mr Geeringh,

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeney's 1 PV (Pty) Ltd is proposing the establishment of the Aggeney's 1 and Aggeney's 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeney's 1 and Aggeney's 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeney's 1 and Aggeney's 2 solar PV facilities to the Aggeney's Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Company's review and written comments, and a CD containing the BARs is included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Company's written comment on the BARs before or on the closing date of the review period.

Kind regards

Aggeneys 1 Grid Connection

Log in or register to post comments 37 reads

CaseHeader LocationInfo Admin

Status: Closed (Approved)

HeritageAuthority(s): SAHRA
NBKB

Case Type: Section 38 (8) - Statutory Comment Required

Development Type: Infrastructure

ProposalDescription:

The development of grid connection infrastructure for the proposed 100MW solar photovoltaic (PV) facility and associated infrastructure located approximately 11km south-east of Aggeneys in the Northern Cape Province. The grid connection infrastructure is to be known as the Grid Connection Infrastructure for Aggeneys 1 and is situated within the Khâi-Ma Local Municipality of the greater Namakwa District Municipality. The associated infrastructure consists of a collector substation and a single-circuit power line of up to 220kV to connect the PV facility to the national grid. This proposed development will consider feasible alternatives for the power line corridor. The assessment of the grid connection infrastructure will be undertaken within a corridor with a width of up to 1km and a length of up to 17km. The project site is located within Zone 8 of the Renewable Energy Development Zones (REDZ) (also known as the Springbok REDZ), and within the Northern Transmission Corridor. The procedure to be followed in applying for environmental authorisation for a large-scale project in a REDZ was formally gazetted on 18 February 2018 (in GN113 and GN114). As Bloemhoek 1 is located within one of the eight REDZ areas, the project is subject to a Basic Assessment and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

Dear Mr Timothy,

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeney 1 PV (Pty) Ltd is proposing the establishment of the Aggeney 1 and Aggeney 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeney 1 and Aggeney 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeney 1 and Aggeney 2 solar PV facilities to the Aggeney Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Organisation's review and written comments, and a CD containing the BARs is included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Organisation's written comment on the BARs before or on the closing date of the review period.

Kind regards

Dear Ms Abrahams,

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

**GRID CONNECTION INFRASTRUCTURE FOR AGGENEYS 1 AND GRID CONNECTION
INFRASTRUCTURE FOR AGGENEYS 2, NORTHERN CAPE PROVINCE**

NOTICE OF AVAILABILITY OF THE BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

ABO Wind Aggeneys 1 PV (Pty) Ltd is proposing the establishment of the Aggeneys 1 and Aggeneys 2 solar PV facilities to add new capacity to the national electricity grid. The projects are proposed to be part of the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. In order for the Aggeneys 1 and Aggeneys 2 solar PV facilities to evacuate the generated solar power to the national grid, a grid connection solution must be established between each solar PV facility and the Eskom grid connection point.

Two (2) corridor alternatives have been assessed for the development of the two proposed grid connection solutions up to 1km in width and up to 17km in length, and extends between the Aggeneys 1 and Aggeneys 2 solar PV facilities to the Aggeneis Main Transmission Substation (MTS). The projects fall within the Khâi-Ma Local Municipality and within the greater Namakwa District Municipality, Northern Cape Province.

The project development corridors are located within the Springbok Renewable Energy Development Zone (REDZ), and within the northern corridor of the Strategic Transmission Corridors. These two (2) projects are subjected to a Basic Assessment process and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

In terms of Regulation 3(4) of the EIA Regulations, 2014, as amended, this letter serves to inform you that the Basic Assessment Reports (BARs) for the two (2) above-mentioned projects are available for your Department's review and written comments, and hard copies of the Reports and a CD containing the BARs are included in this envelope.

Please note that the BARs review period is from **Thursday, 02 May 2019** to **Monday, 03 June 2019** and we are looking forward receiving your Department's written comment on the BARs before or on the closing date of the review period.

Kind regards

Subject: AGGENEYS 1 & AGGENEYS 2 SOLAR PV FACILITIES AND ASSOCIATED GRID CONNECTION SOLUTIONS: BASIC ASSESSMENT PROCESS

Dear Stakeholder,

The development of two separate 100MW solar photovoltaic (PV) facilities and associated infrastructure is proposed on the Remaining Extent of the Farm Bloemhoek 61, located approximately 11km south-east of Aggeneys in the Northern Cape Province. The two solar PV facilities are to be known as Aggeneys 1 and Aggeneys 2, and are situated within the Khâi-Ma Local Municipality, of the greater Namakwa District Municipality.

The project site is located within Zone 8 of the Renewable Energy Development Zones (REDZ) (also known as the Springbok REDZ), and within the Northern Transmission Corridor. The procedure to be followed in applying for environmental authorisation for a large-scale project in a REDZ was formally gazetted on 16 February 2018 (in GN113 and GN114). As Aggeneys 1 and Aggeneys 2 are located within one of the eight REDZ areas, the projects are

Notification of Basic Assessment Process

Sent to all Organs of State on
project database

08 April 2019

Dear Stakeholder,

BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

DEVELOPMENT OF AGGENEYS 1 AND AGGENEYS 2 SOLAR PV FACILITIES AND ASSOCIATED GRID CONNECTION SOLUTIONS NEAR AGGENEYS, NORTHERN CAPE

NOTICE OF BASIC ASSESSMENT PROCESSES

The development of two separate 100MW solar photovoltaic (PV) facilities and associated infrastructure is proposed on the Remaining Extent of the Farm Bloemhoek 61, located approximately 11km south-east of Aggeneys in the Northern Cape Province. The two solar PV facilities are to be known as Aggeneys 1 and Aggeneys 2, and are situated within the Khâi-Ma Local Municipality, of the greater Namakwa District Municipality.

The project site is located within Zone 8 of the Renewable Energy Development Zones (REDZ) (also known as the Springbok REDZ), and within the Northern Transmission Corridor. The procedure to be followed in applying for environmental authorisation for a large-scale project in a REDZ was formally gazetted on 16 February 2018 (in GN113 and GN114). As Aggeneys 1 and Aggeneys 2 are located within one of the eight REDZ areas, the projects are subject to a Basic Assessment and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

Each PV development will also include a grid connection solution and the required grid connection infrastructure which consists of a collector substation and a single-circuit power line up to 220kV to connect the facility to the national grid – these will be known as Bloemhoek 1 and Bloemhoek 2. The construction of the collector substation and the overhead power line will be assessed as part of two separate Basic Assessment processes, which will consider feasible alternatives for the power line routes.

The assessment of the grid connection infrastructure will be undertaken within a corridor with a width of up to 1.5km and a length of up to 17km. Seven properties may be traversed by the development of Bloemhoek 1 and Bloemhoek 2, and these include:

- » Remaining Extent of the Farm Bloemhoek 61
- » Portion 1 of Bloemhoek 61
- » Portion 2 of Bloemhoek 61
- » Portion 3 of Bloemhoek 61
- » Portion 1 of the Farm Aggeneys 56
- » Portion 2 of the Farm Aggeneys 56
- » Remaining Extent of the Farm Aggeneys 56

Infrastructure associated with each solar PV facility will include:

- » Arrays of PV panels with a contracted capacity of up to 100MW.
- » Mounting structures to support the PV panels.
- » Cabling between the project components, to be laid underground where practical.
- » On-site inverters to convert the power from a direct current (DC) to an alternating current (AC).
- » An on-site substation to facilitate the connection between the solar PV facility and the Eskom electricity grid.
- » Site offices and maintenance buildings, including workshop areas for maintenance and storage.
- » Temporary laydown areas.
- » Internal access roads and fencing around the project site.

A collector substation and an overhead single-circuit power line with a transmission capacity of up to 220kV connecting each facility to the Aggeneis Main Transmission Substation (MTS) is assessed separately.

Each of the solar PV facility projects will be constructed as a separate stand-alone project, with a separate project development company (or Special Purpose Vehicle (SPV)) as the Applicant for each project. The details are:

Applicant:	Project Name:	Capacity:
ABO Wind Aggeneys 1 PV (Pty) Ltd	Aggeneys 1 (solar PV facility) Bloemhoek 1 (grid connection infrastructure for Aggeneys 1)	100MW (contracted capacity) Up to 220kV
ABO Wind Aggeneys 2 PV (Pty) Ltd	Aggeneys 2 (solar PV facility) Bloemhoek 2 (grid connection infrastructure for Aggeneys 2)	100MW (contracted capacity) Up to 220kV

Site-specific studies and assessments will be undertaken through the BA process in order to delineate areas of potential sensitivity within the broader areas and the identified study area.

It is the Developer's intention to bid each solar PV facility under the Department of Energy's (DoE) Renewable Energy Independent Power Producer Procurement Programme (REIPPPP). The power generated from each solar PV facility is intended to be sold to Eskom and fed into the national electricity grid. The development of the facilities and grid connection infrastructure will also assist with achieving the energy mix as set out in the Integrated Resources Plan (IRP).

BASIC ASSESSMENT PROCESS

As per the EIA Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the applicant will require authorisation from the National Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department

of Environment and Nature Conservation (DENC)) for the undertaking of the projects. Due to the location of the project site within the REDZ and within the northern corridor of the Strategic Transmission Corridors, a Basic Assessment (BA) process is required to be undertaken for the Aggeneys 1, Aggeneys 2, Bloemhoek 1 and Bloemhoek 2 projects in accordance with GN113 and GN114, as formally gazetted on 16 February 2018. An application will be submitted for each project.

The applications are required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

ABO Wind Aggeneys 1 PV (Pty) Ltd and ABO Wind Aggeneys 2 PV (Pty) Ltd appointed Savannah Environmental, as the independent environmental consultant, to undertake the four Basic Assessments to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programmes (EMPRs). The public participation processes for the projects will be undertaken concurrently, providing the public with an opportunity to understand and comment on all four (4) projects. As part of the environmental studies, Interested and Affected Parties (I&APs) will be actively involved through the public involvement process being undertaken by Savannah Environmental.

The department and/or the organisation which you represent has been identified as a commenting authority for the proposed projects as described above. In this regard, please can you provide us with the name and contact details of the relevant contact person at your department who we would liaise with regarding this project. A background information document, which provides further information on the BA process as well as the nature and extent of the proposed developments, is attached to this letter and is also available for download from the Savannah Environmental website (<https://www.savannahsa.com/public-documents/energy-generation/>). By registering on the project database, your Department will receive all information relating to the project and will be provided with an opportunity to provide comment and input into the BA process.

Should you have an interest in the project, please register yourself as an I&AP by completing and returning the attached registration and comment form. By registering on the project database, you will be kept informed of the BA process being undertaken for the projects and will be provided with an opportunity to provide comment and input.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Nicolene Venter

PER EMAIL / MAIL

Dear Sir/Madam

ACKNOWLEDGEMENT OF RECEIPT OF THE NEW APPLICATION FOR ENVIRONMENTAL AUTHORISATION AND DRAFT BASIC ASSESSMENT REPORT (BAR) FOR THE PROPOSED GRID CONNECTION INFRASTRUCTURE FOR THE AGGENEYS 1 SOLAR PV FACILITY, NORTHERN CAPE PROVINCE.

The Department confirms having received the Application for Environmental Authorisation and draft Basic Assessment Report (BAR) for the abovementioned project on 30 April 2019. You have submitted these documents to comply with the Environmental Impact Assessment (EIA) Regulations, 2014, as amended.

You are hereby informed that the Basic Assessment Report (BAR) template was removed from the Departmental website and that the submission of a BAR in the form of a template will no longer be accepted by the Department. You are hereby informed that the Draft BAR submitted with your Application for Environmental Authorisation will be accepted as is. However, all future Basic Assessment Process applications must comply with the requirements contained in Regulation 19 and Annexure 1 of GN R982 of the EIA Regulations, 2014, as amended.

Please take note of Regulation 40(3) of the EIA Regulations, 2014, as amended, which states that potential Interested & Affected Parties, including the Competent Authority, may be provided with an opportunity to comment on reports and plans contemplated in Regulation 40(1) of the EIA Regulations, 2014, as amended, prior to the submission of an application but must be provided an opportunity to comment on such reports once an application has been submitted to the Competent Authority.

All documentation delivered to the physical address contained in this form must be delivered during the official Departmental Office Hours which is visible on the Departmental gate. EIA related documents (includes application forms, reports or any EIA related submissions) that are faxed; emailed; delivered to Security or placed in the Departmental Tender Box will not be accepted.

Note that in terms of Regulation 45 of the EIA Regulations, 2014, as amended, this application will lapse if the applicant fails to meet any of the time-frames prescribed in terms of these Regulations, unless an extension has been granted by the Department in terms of Regulation 3(7) of the EIA Regulations, 2014, as amended.

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.

Kindly quote the abovementioned reference number in any future correspondence in respect of the application.

Yours sincerely

Mr Sabelo Malaza

Chief Director: Integrated Environmental Authorisations

Subject: AGGENEYS 1 & AGGENEYS 2 SOLAR PV FACILITIES AND ASSOCIATED GRID CONNECTION SOLUTIONS: BASIC ASSESSMENT PROCESS

Dear Stakeholder,

The development of two separate 100MW solar photovoltaic (PV) facilities and associated infrastructure is proposed on the Remaining Extent of the Farm Bloemhoek 61, located approximately 11km south-east of Aggeneys in the Northern Cape Province. The two solar PV facilities are to be known as Aggeneys 1 and Aggeneys 2, and are situated within the Khâi-Ma Local Municipality, of the greater Namakwa District Municipality.

The project site is located within Zone 8 of the Renewable Energy Development Zones (REDZ) (also known as the Springbok REDZ), and within the Northern Transmission Corridor. The procedure to be followed in applying for environmental authorisation for a large-scale project in a REDZ was formally gazetted on 16 February 2018 (in GN113 and GN114). As Aggeneys 1 and Aggeneys 2 are located within one of the eight REDZ areas, the projects are

subject to a Basic Assessment and not a full EIA process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation.

Savannah Environmental has been appointed to undertake the Basic Assessment Process for the Aggeneys 1 and Aggeneys 2 Solar PV Facilities and Associated Grid Connection Solutions.

Kindly refer to the attached Notification letter, Registration Form and Background Information Document for further information regarding the proposed projects.

Please do not hesitate to contact us if you have any queries in this regard.

Kind regards,

Virus-free. www.avast.com

Cc: Mabel Quinisile; 'nicolene@savannahsa.com'
Subject: Aggeneys Projects (PVs & Grid Connections): Release Codes

Dear Busang,

Thank you for your call a few minutes ago.

Herewith the Release Codes for:

- Aggeneys PV1 Solar: **3(qTp"+4**
- Aggeneys PV2 Solar: **gU"/<4sx**
- Aggeneys 1 Grid Connection: **<S'@2r2f**
- Aggeneys 2 Grid Connection: **+ev(3yMk**

As per our discussion, should SARAo submit comments on the Aggeneys PV1 and PV2 Solar BARs, we will forward it to the DEA as these Reports were submitted on Monday.

We are submitted Aggeneys 1 and 2 Grid Connections' BARs to the DEA tomorrow morning, and if SARAo will be submitting comments, it would be appreciated if we can receive it as soon as possible today.

Kind regards,

Nicolene Venter

Dear Mr Mathlane,

As per our telephone discussions a few minutes ago, please see the e-mail trail below in which the Department of Environmental Affairs request information from the Environmental Assessment Practitioner.

To comply with our regulated timeframes (as per the EIA Regulations), we are submitting the final Basic Assessment Reports tomorrow morning.

It would be preferred to have the SARAO's responses / comments captured before the submissions.

Looking forward to hear from you.

Importance: High

BASIC ASSESSMENT REPORTS - AGGENNEYS 1 SOLAR PV AND AGGENNEYS 2 SOLAR PV FACILITIES, NORTHERN CAPE PROVINCE

- **Aggeneys 1 Solar PV - DEA Ref.No.: 14/12/16/3/3/1/2019**
- **Aggeneys 2 Solar PV - DEA Ref.No.: 14/12/16/3/3/1/2020**

Dear Dr Tiplady and Mr Sethole,

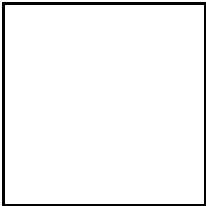

With reference to our e-mail notification announcing the availability of the two Basic Assessment Reports (BARs) and as per attached signed waybill (proof of delivery) for the delivery of the Reports to your Offices, we kindly request confirmation on whether SARAO will still be submitting written comments on these Reports.

In support of our enquiry, we received comments from the Department of Environmental Affairs (DEA) that we need SARAO's response / inputs on as per below extract from the letter:

- You are requested to indicate the applicability of the Astronomy Geographic Advantage Act, Act No. 21 of 2007 to the proposed project and its location in terms of astronomy advantage areas.
 - The project area is listed as "Very High Combined Sensitivity" in terms of RFI (*according to the National Web Based Environmental Screening Tool*). As a result, an Electromagnetic Interference (EMI) and Radio Frequency Interference (RFI) detailed study must be conducted by a suitably qualified and accredited professional. The South African SKA Project Office must be kept regularly informed of the progress and be consulted on the details of the studies required.
 - The EMI and RFI study must also assess cumulative impacts from other Renewable Energy Facilities in the area.
 - Comments on the EMI and RFI study must be obtained from the South African SKA Project Office.
 - Outcomes of this study (including comments received) must be included and assessed in the final BAR.

SARAO's response to the DEA's request would also be appreciated.

Kind regards,

Dear Khensani

For this specific proposed project, we don't think it will have any impact whatsoever with astronomy at Sutherland (it is too far). It really is not necessary to keep us up to date with the project.

Anyway, I am Head of Telescope Operations (not director) at SAAO.

Regards
Ramotholo

Dear Johan,

We are in the process of updating our database for the above-mentioned projects and especially in terms of the correct representative for Sentech who will be commenting on the Basic Assessment Reports.

Can you confirm that you are the relevant person to whom we need to send the Reports to and that we have your correct details on our database:

Mr Joha Koegelenberg; Manager: GIS & Measurements - Network Planning; Sender Technology Park, Octave Road, Honeydew, 2040; Telephone 011-471-4400. Would you mind sharing your mobile number with us, should we need to send a SMS regarding the proposed projects.

Also, from previous correspondence, Mr Marius Venter, Head: Network Planning, signed a letter with Sentech's conditions. Do we need to add Mr Venter to the project database and if so, please provide us with his contact details.

Looking forward to hear from you.

Kind regards,

Nicolene Venter
