ALLEPAD PV1 SOLAR ENERGY GENERATION FACILITY AND ASSOCIATED INFRASTRUCTURE NEAR UPINGTON, NORTHERN CAPE PROVINCE

DEA Ref.No14/12/16/3/3/2/1105

TABLE OF CONTENTS

1.	COMMENTS RECEIVED DURING EIA ANNOUNCEMENT PHASE	1
2.	COMMENTS RECEIVED BY ORGANS OF STATE DURING SCOPING REPORT REVIEW PERIOD	1
3.	WRITTEN COMMENTS RECEIVED AFTER SCOPING REPORT REVIEW AND COMMENT PERIOD	8
4.	COMMENTS RECEIVED BY ORGANS OF STATE AND KEY STAKEHOLDERS DURING IMPACT ASSESSMENT REPORT REVIEW PERIOD	17
5.	COMMENTS RECEIVED BY I&APS DURING IMPACT ASSESSMENT REPORT REVIEW PERIOD	17
6.	GENERAL COMMENTS RECEIVED DURING IMPACT ASSESSMENT REPORT REVIEW PERIOD	17

All written comments received since the announcement of the Environmental Impact Assessment process in October 2018, during the Scoping Report's review and comment period from Friday, 12 October 2018 to Monday, 12 November 2018) are included in this Comments and Responses Report.

Comments raised during the Environmental Impact Assessment Report's review and comment period (**Thursday**, **28 February 2019 to Monday**, **01 April 2019**) will be included in final Environmental Impact Assessment Report.

NOTE:

In terms Regulation 44(1) of the EIA Regulations of December 2014 (as amended on 07 April 2017), please note that the comments raised and responses provided at the various Focus Group Meetings held during the 30-day review period of the Basic Assessment Report have not been captured in this Comments and Responses Report. The notes of the meetings are attached as **Appendix C7**.

1. COMMENTS RECEIVED DURING EIA ANNOUNCEMENT PHASE

No.	Comment	Raised By	Response
No co	lo comments were received during the Announcement Phase		

2. COMMENTS RECEIVED BY ORGANS OF STATE DURING SCOPING REPORT REVIEW PERIOD

No.	Comment	Raised By	Response
1.	The application form and the draft Scoping Report (SR)	Olivia Letlalo	Comment noted, no response required.
	dated October 2018 as received by this Department on	Control Environmental	
	12 October 2018, refer.	Officer: Strategic	
		Infrastructure	
	This Department has the following comments on the	Developments	
	abovementioned application:	DEA	
<u>Activi</u>	ies applied for:		
1.1.	Please ensure that all relevant listed activities linked to the	Letter:	All relevant listed activities linked to the development activity or
	development activity or infrastructure as described in the	02-11-2018	infrastructure as described in the project description have been applied
	project description, are applied for.		for. Listed activities which have been applied for, and their applicability
			to the project is provided in Chapter 6, Table 6.1 of the Final Scoping
			Report.
1.2.	If the activities applied for in the application form differ		Listed Activities applied for in the Application Form submitted to DEA do
	from those mentioned in the final SR, an amended		not differ from those included in the Final Scoping Report (refer to Chapter
	application form must be submitted. Please note that the		6, Table 6.1 of the Final Scoping Report). An amended Application Form is
	Department's application form template has been		therefore not required.
	amended and can be downloaded from the following link		
	https://www.environment.qov.za/documents/forms.		
<u>Descri</u>	ption of identified Alternatives;		
1.3.	It has been noted that the location, design and layout as		No other alternatives in addition to those identified in the Scoping Report
	well as no-go alternatives have been included in the draft		released for public comment are being considered.
	report, taking into consideration the advantages and		
	disadvantages as why the site is believed to be the		
	preferred. Therefore, should there be any other		

No.	Comment	Raised By	Response
	alternatives considered, you are required to include the information in the final SR.		
Public	Participation Process:		
1.4.	Please ensure that all issues raised and comments received during the circulation of the SR from registered I&APs and organs of state which have jurisdiction (including this Department's Biodiversity Section) in respect of the proposed activity are adequately addressed in the final SR.		Comments received from I&APs and organs of state during the 30-day public review period are included in Appendix C6 and Appendix C4 of the Final Scoping Report respectively, and have been incorporated into this Comments and Response Report attached as Appendix C8 to the Final Scoping Report. Where applicable, comments received have been utilised in the preparation and finalisation of the Scoping Report. Comment was requested from Mr. Stanley Tshitwamulomoni of the Biodiversity Conservation Section at the Department of Environmental Affairs (refer to Appendix C4 of the Final Scoping Report); however none have been received to date.
1.5.	Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.		Proof of correspondence with various stakeholders is attached in Appendix C4 (organs of state correspondence) and Appendix C5 (stakeholder correspondence) of the Final Scoping Report. Proof of attempts that were made to obtain comments is attached in Appendix C4 (organs of state correspondence) and Appendix C5 (stakeholder correspondence) of the Final Scoping Report.
1.6.	The Public Participation Process must be conducted in terms of Regulations 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended.		The Public Participation Process is being conducted in accordance with Regulations 39, 40 41, 42, 43 and 44 of the 2014 EIA Regulations (GNR 326) as amended. An overview of the Public Participation Process is provided in Chapter 6, Section 6.4.2 of the Final Scoping Report.
Gene	ral information:		
1.7.	You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of Scoping reports in accordance with Appendix 2 and Regulation 21(1) of the EIA Regulations, 2014 as amended.		The Final Scoping Report has been prepared in accordance with the requirements of Appendix 2 of the 2014 EIA Regulations (GNR 326). An overview of where the corresponding information required under Appendix 2 of the 2014 EIA Regulations (GNR 326) is contained within the Final Scoping Report is provided in Chapter 1, Table 1.2 of the Final Scoping Report.
1.8	Further note that in terms of Regulation 45 of the EIA Regulations 2014, this application will lapse if the		The applicant is cognisant of the need to comply with the requirements of Regulation 45 of the 2014 EIA Regulations (GNR 326) with regards to

No.	Comment	Raised By	Response
	applicant fails to meet any of the timeframes prescribed		stipulated timeframes. In accordance with Regulation 21 of the 2014 EIA
	in terms of the these Regulations, unless an extension has		Regulations (GNR 326), an applicant must within 44 days of receipt of the
	been granted in terms of Regulation 3(7).		application by the competent authority submit to the competent authority
			a Scoping Report which has been subjected to a public participation
			process of at least 30 days. The DEA confirmed having received the
			application form and Draft Scoping Report for Allepad PV One on 12
			October 2018. The Final Scoping Report is therefore required to be
			submitted by 26 November 2018.
1.9.	You are hereby reminded of Section 24F of the National		The applicant is cognisant of the need to comply with Section 24F of NEMA
	Environmental Management Act, Act No. 107 of 1998, as		with regards to commencing with listed activities. No activities have or will
	amended, that no activity may commence prior to an		commence on site prior to EA being granted by the DEA.

			is located adjacent to the road reserve and SANRAL's pipeline servitude.
	Do not hesitate to contact the sender should you have		
	any further queries.		

No.	Comment	Raised By	Response
4.	Savannah Environmental (Pty) Ltd has been appointed by ILEnergy Development (Pty) Ltd to conduct an Environmental Authorisation (EA) Application process for the proposed Allepad PV One facility, near Upington, Northern Cape Province. A draft Scoping Report (DSR) has been completed in terms of the National Environmental Management Act, 1998 (NEMA) and the 2017 NEMA Environmental Impact Assessment (EIA) Regulations.	Natasha Higgitt Heritage Officer SAHRA Letter: 08-11-2018	Comment noted, no response required.
	The proposed development will include the construction of an array of PV panels with a generation capacity of up to 100 MW, mounting structures for the PV panels, electrical infrastructure, on-site substation, powerline, cabling, energy storage area, access roads, control building, offices, ablutions, guard house, temporary construction camp and laydown area.		
	CTS Heritage had been appointed to provide heritage input into the EA Application process as per section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA).		
4.1.	Lavin, J. 2018. Heritage Screener. Proposed development of Allepad PV One, a solar PV Facility and associated infrastructure on a site near Upington, in the Northern Cape Province.		Comment noted, no response required.
4.2.	The Heritage Screener showed that the heritage resources in the proposed development area have not been sufficiently recorded, and that an archaeological field assessment be conducted to inform a full Heritage Impact Assessment (HIA). The Heritage Screener indicated that the development area is of low palaeontological		Comment noted, no response required.

No.	Comment	Raised By	Response
	sensitivity and therefore no further assessment of palaeontological resources is required.		
Interin	n Comment:		
4.3.	The SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit notes the submitted Heritage Screener and awaits the pending HIA. SAHRA does not accept the recommendation of the Heritage Screener that no further assessment of palaeontological resources is required. The SAHRIS PalaeoSensitivity map shows that the development area is located within an area of moderate palaeontological sensitivity and therefore a desktop assessment of palaeontological resources is required. The assessment of palaeontological resources is required. The assessment must comply with the 2012 SAHRA Minimum Standards: Palaeontological Components of Heritage Impact Assessments and must be compiled by a qualified palaeontologist. The 2012 Minimum Standards makes reference to a Letter of Recommendation for Exemption that may be submitted, should the palaeontologist deem is necessary.		The Heritage Specialist appointed to the project has indicated that a Letter of Recommendation for Exemption will be prepared and submitted by a palaeontologist in accordance with the 2012 SAHRA Minimum Standards: Palaeontological Components of Heritage Impact Assessments.
4.4.	SAHRA awaits the pending HIA inclusive of an archaeological and palaeontological component, that takes into consideration the results of the Visual Impact Assessment and any heritage related comments during the public review periods, along with the Final Scoping report and the draft EIA with associated appendices when available for public review before further comments are issued. Should you have any further queries, please contact the designated official using the case number quoted above		A copy of the HIA will be uploaded to SAHRIS for SAHRA's review and comment as part of the 30-day public review period to be conducted as part of the EIA phase. Comment noted, no response required.
	in the case header.		
1.	This letter is a response to the Draft Scoping Report for all four photovoltaic facilities and associated infrastructure	Selaelo Matlhane SARAO	The confirmation that the proposed Allepad PV projects would not have impact on the SKA SA infrastructure is noted.

No.	Comment	Raised By	Response
	on a site near Upington, in the Northern Cape Province submitted for environmental authorisation in terms of the National Environmental Management Act, 1998.	Letter: 07-11-2018	
	SARAO (Formerly SKA SA) notes that the identified location for the project is approximately 210km away from the nearest SKA infrastructure. We, therefore, do not anticipate any negative impact on the SKA and have no objections on the Draft Scoping Report for all four Allepad PVs.		
	Please note that ATNS is aware of the above mentioned.	Simphiwe Masilela	Comment noted, no response required.
4.1.	The area in which the proposed Allepad PV will be situated falls within the boundaries of the ICAO Annex 14	Obstacle Evaluator	If the need for a glint and glare impact assessment to be conducted in accordance with SACAA's requirements is confirmed, then one will be
	surfaces and Procedures of Air Navigation Services Operations associated with Upington Airport, therefore we	ANTS	conducted accordingly.
	cannot verify whether the proposed will affect the safety of flights, we would have to conduct a formal assessment once the project is ready for construction. You may be required to have a glint and glare impact assessment done as per SACAA requirement (refer to: Obstacle Notice 4/2017 (17/11/2017): Additional Requirements for Solar Project Applications)	Email: 08-11-2018	
4.2.	Please update us should there be any new developments that may affect our interests.		ATNS is a registered stakeholder for the project, and will therefore be kept informed regarding the proposed project.
4.3.	For future projects please forward all queries to ObstacleEvaluators@ats.co.za		All future queries will be forwarded to <u>ObstacleEvaluators@ats.co.za</u> as per ATNS's request.
4.4.	For note for us to carry out a successful assessment we require the following information:		Information pertaining to the location, site / ground elevation and height to top of the proposed development will be provided to ATNS once it is available.
	 LOCATION (Co-ordinates WGS84 system) SITE/GROUND ELEVATION (AMSL) HEIGHT TO TOP OF PROPOSED DEVELOPMENT (in meters) 		

No.	Comment	Raised By	Response
4.5.	Please also note that there is a fee attached to the		The applicant is cognisant of the fee attached to the Obstacle
	Obstacle Evaluations for all formal applications following		Evaluations for all formal applications following the EIA process.
	the EIA process.		

3. WRITTEN COMMENTS RECEIVED AFTER SCOPING REPORT REVIEW AND COMMENT PERIOD

No.	Comment	Raised By	Response
1.	You may proceed with the EIA process in accordance with the	Olivia Letlalo	
	tasks contemplated in the PoSEIA and the requirements of the	Control Environmental	
	EIA Regulations 2014, as amended. However, you must take	Officer: Strategic	
	note of the following comments from the Department:	Infrastructure	
		Developments	
1.1.	Technical Details of the proposed facility and design	DEA	
1.1.	alternative		
1.1.1.	The ElAr must provide the technical details for the proposed	Letter: 05-12-2018	1.1.1. Table 2.2, Chapter 2 of the Environmental Impact Assessment
1.1.1.	facility in a table format as well as their description and/or		(EIA) Report provides the technical details for the Allepad PV
	dimensions. A sample for the minimum information required is		One solar energy facility, including their description and/or
	listed under point 2 of the EIA information required for PV		dimensions.
	facilities below.		
1.1.2.	Further, the ElAr must include the design alternative for the proposed 100MW PV facility.		1.1.2. Chapter 3 of the EIA Report provides a description of the various alternatives considered for Allepad PV One. The design alternative proposed for Allepad PV One is considered to be the most reasonable and feasible alternative for the development considering technical and environmental constraints, and therefore no design alternatives were identified or assessed.
1.2.	Application for re-zoning		
	The EIAr must include proof indicating that an application for		An application for rezoning has been submitted to the Dawid Kruiper
	the re-zoning has been lodged with the relevant authority as		Local Municipality. The municipality informed the applicant that an
	the proposed development will take place on land currently		application can only be processed once the project has received EA.
	zoned for agricultural land uses.		Proof of correspondence with the municipality has been included in
			Appendix L of the EIA Report. A rezoning application will be undertaken

		as a separate process by the developer once the project has been selected as a preferred bidder project in the Department of Energy's Renewable Energy Independent Power Producer Procurement (REIPPP) Programme.
1.3.	The EIAr must also provide the following:	
1.3.1.	Provide a clear indication of the proposed development footprint of the PV solar facility as well as the all associated infrastructure; i.e. placement of photovoltaic (PV) panels.	The project footprint has been included in Chapter 2, Section 2.1.1 of the EIA Report and consist of footprint of the facility and all associated infrastructure.
1.3.2.	Clear description of all associated infrastructure. This description must include, but not limited to the following: • Power lines;	The Allepad PV One and all associated infrastructure has been described in Chapter 2 of the EIA Report.
	 Internal roads infrastructure; All supporting onsite infrastructure such as laydown area, guard house and control room etc. All necessary details regarding all possible locations and sizes of the proposed satellite substation and the main substation. Information on services required on the site, e.g. sewage, refuse removal, water and electricity, agreements with suppliers and confirmation of capacity been obtained must be provided. 	Information on services required on the site, e.g. sewage, refuse removal, water and electricity, agreements with suppliers and confirmation of capacity been requested from the municipality but not confirmation has been received to date. Proof of the requests have been included in Appendix L2 of the EIA Report.
1.4.	Need and Desirability of the proposed development	
1.4.1.	The Department has noted that there are other projects of similar nature in the area, therefore; your ElAr must provide detailed description of the need and desirability taking into account cumulative impacts of the proposed development in the area.	The need and desirability of the project has been described in detail in Chapter 5 of the EIA Report which considers other projects operating and under construction in the area. Chapter 9 of the EIA Report assesses the potential for cumulative impacts associated with the project and other projects in the area.
1.5.	A copy of the final site layout map and alternatives.	
1.5.1.	All available biodiversity information must be used in the finalisation of the layout map.	A copy of the final site layout map which indicates the information requested by DEA in its Acceptance of Scoping is provided in Appendix
	The layout map must indicate the following:	M of the EIA Report.
	• PV positions and its numbering as well as the associated infrastructure;	

	Permanent laydown area footprint;	
	 Internal roads indicating width (construction period width) 	
	and operation period width) and with numbered sections between the other site elements which they serve (to make	
	commenting on sections possible);	
	 Wetlands, drainage lines, rivers, stream and water crossing 	
	of roads and cables indicating the type of bridging	
	structures that will be used;	
	• The location of sensitive environmental features on site e.g.	
	CBAs, heritage sites, wetlands, drainage lines etc. that will	
	be affected by the facility and its associated infrastructure;	
	• Substation(s) and/or transformer(s) sites including their	
	entire footprint;	
	• Connection lutes (including pylon positions) to the	
	distribution/transmission network;	
	All existing infrastructure on the site, especially roads;	
	Buffer areas;	
	Buildings, including accommodation; and	
	All "no-go" areas.	
1.6.	Topographical and sensitive Maps	
1.6.1.	An environmental sensitivity map indicating environmental	An A3 environmental sensitivity map is provided in Appendix M of the EIA
	sensitive areas and features identified during the EIA process	Report.
	must be on an A3 page and must have a clear legend.	
1.6.2.	A topographical map combining the final layout map	A layout map overlain by environmental sensitivities identified within the
	superimposed (overlain) on the environmental sensitivity map	project site and 300m power line corridor is provided in Appendix M to
	must be submitted with the final EIAr.	the EIA Report.

1.7.	Shapefile of the preferred Development layout	Shapefiles of the preferred development layout / footprint will be
	A shapefile of the preferred development layout/footprint	submitted to the DEA with a copy of the final EIA Report.
	must be submitted to this Department. The shapefile must be	
	created using the Hartebeesthoek 94 Datum and the data	
	should be in Decimal Degree Format using the WGS 84	
	Spheroid. The shapefile must include at a minimum the	
	following extensions i.eshp; .shx; .dbf; .prj; and, .xml	
	(Metadata file). If specific symbology was assigned to the file,	
	then the .avl and/or the .lyr file must also be included. Data	
	must be mapped at a scale of 1:10 000 (please specify if an	
	alternative scale was used). The metadata must include a	
	description of the base data used for digitizing. The shapefile	
	must be submitted in a zip file using the EIA application	
	reference number as the title.	
	The shape file must be submitted to:	
	Postal Address:	
	Department of Environmental Affairs	
	Private Bag X447, Pretoria 0001	
	Physical address: Environment House, 73 Steve Biko Road, Pretoria	
	For Attention:	
	Muhammad Essop	
	Integrated Environmental Authorisations Strategic Infrastructure Developments	
	Telephone Number: (012) 399 9406	
	Email Address: MEssoot6environment.aov.za	
1.8.	The Environmental Management Programme (EMPr)	
	The EMPr to be submitted as part of the EIAr must include the	
	following:	
1.8.1.	All recommendations and mitigation measures recorded in	The Environmental Management Programme (EMPr) prepared for the
	the EIAr and the specialist studies conducted.	project is attached as Appendix I to the EIA Report, copies of which
		have been submitted to DEA for its review and comment. The EMPr
		contains all recommendations and mitigation measures recorded in the

		EIA Report and the specialist studies conducted (refer to Appendix D to
		Appendix H of the EIA Report).
1.8.2.	A good quality final site layout map with clear legend.	A copy of the final site layout map is included in Appendix A of the EMPr
		prepared for the project and attached as Appendix I to the EIA Report.
1.8.3.	Measures as dictated by the final site layout map and micro-	Measures as dictated by the final site layout map are included in the
	siting.	EMPr, prepared for the project and attached as Appendix I to this EIA
		Report.
1.8.4.	An environmental sensitivity map indicating environmental	A copy of the environmental sensitivity map of the project site and 300m
	sensitive areas and features identified during the EIA process.	power line corridor is included in Appendix A of the EMPr prepared for
		the project and attached as Appendix I to the EIA Report.
1.8.5.	A map combining the final layout map superimposed	A map which superimposes the layout of Allepad PV One over the
	(overlain) on the environmental sensitivity map.	environmental sensitivity map is included in Appendix A of the EMPr
		prepared for the project and attached as Appendix I to the EIA Report.
1.8.6.	An alien invasive management plan to be implemented	An alien invasive management plan has been prepared for the project,
	during construction and operation of the facility. The plan must	and is included in Appendix C of the EMPr prepared for the project, and
	include mitigation measures to reduce the invasion of alien	attached as Appendix I to the EIA Report.
	species and ensure that the continuous monitoring and	
	removal of alien species is undertaken.	
1.8.7.	A plant rescue and protection plan which allows for the	A plant rescue and protection plan has been prepared by a vegetation
	maximum transplant of conservation important species from	specialist familiar with the site and is included in Appendix D of the EMPr
	areas to be transformed. This plan must be compiled by a	prepared for the project, and attached as Appendix I to the EIA Report.
	vegetation specialist familiar with the site and be	
	implemented prior to commencement of the construction	
	phase.	
1.8.8.	A re-vegetation and habitat rehabilitation plan to be	A re-vegetation and habitat rehabilitation plan has been prepared for
	implemented during the construction and operation of the	the project, and is included in Appendix E of the EMPr prepared for the
	facility. Restoration must be undertaken as soon as possible	project, and attached as Appendix I to the EIA Report.
	after completion of construction activities to reduce the	
	amount of habitat converted at any one time and to speed	
	up the recovery to natural habitats.	
1.8.9.	A traffic management plan for the site access roads to ensure	A traffic management plan has been prepared for the project, and is
	that no hazards would result from the increased truck traffic	included in Appendix I of the EMPr prepared for the project, and
	and that traffic flow would not be adversely impacted. This	attached as Appendix I to the EIA Report.

	plan must include measures to minimize impacts on local	
	commuters e.g. limiting construction vehicles travelling on	
	public roadways during the morning and late afternoon	
	commute time and avoid using roads through densely	
	populated built-up areas so as not to disturb existing retail and	
	commercial operations.	
1.8.10.	A storm water management plan to be implemented during	A storm water management plan has been prepared for the project,
	the construction and operation of the facility. The plan must	and is included in Appendix G of the EMPr, prepared for the project and
	ensure compliance with applicable regulations and prevent	attached as Appendix I to the EIA Report. The plan includes appropriate
	off-site migration of contaminated stormwater or increased soil	design measures that allow surface and subsurface movement of water
	erosion. The plan must include the construction of appropriate	along drainage lines.
	design measures that allow surface and subsurface	
	movement of water along drainage lines so as not to impede	
	natural surface and subsurface flows. Drainage measures must	
	promote the dissipation of storm water run-off.	
1.8.11.	A fire management plan to be implemented during the	A fire management plan has been prepared for the project, and is
	construction and operation of the facility.	included in Appendix J of the EMPr, prepared for the project and
		attached as Appendix I to the EIA Report.
1.8.12.	Measures to protect archaeological sites, artefacts,	Measures to protect archaeological sites, artefacts, paleontological
	paleontological fossils or graves from construction and	fossils or graves have been identified and are included in Objective 16
	operational impacts	of the EMPr.
1.8.13.	The EAP must provide detailed motivation if any of the above	Where there are deviation from DEA's requirements stipulated in the
	requirements is not required by the proposed development	Acceptance of Scoping, a motivation has been provided with the EIA
	and not included in the EMPr.	Report for Allepad PV One.
1.8.14.	You are hereby reminded that should the EIAr fail to comply	Savannah Environmental is cognisant of the requirements stipulated in
	with the requirements of this acceptance letter, the proposed	the Acceptance of Scoping and have addressed these in the EIA Report
	100MW Allepad Two PV Facility project will be refused in terms	(as detailed within Table 6.3).
	of the EIA Regulations 2014, as amended.	
1.9.	Public Participation	
1.9.1.	Ensure that all relevant stakeholders' comments (including	Comments received to date from all relevant stakeholders, have been
	original comments) are submitted to the Department with the	included within this Comments and Responses Report. Proof of
	final ElAr. This includes but is not limited to the Department of	correspondence to and from these stakeholders are included in
	Environmental Affairs: Biodiversity and Conservation	Appendix C5 and Appendix C6 of the EIA Report.

	Directorate, the Department of Agriculture, Forestry and Fisheries (DAFF), Department of Environment and Nature Conservation, the South African Civil Aviation Authority (SACAA), the Department of Transport, The David Kruiper Local Municipality, Department of Water and Sanitation (DWS), the South African National Roads Agency Limited (SANRAL), the South African Heritage Resources Agency (SAHRA), the Endangered Wildlife Trust (EWT), Department of Mineral Resources, National Energy Regulator of South Africa(NERSA), National Department of Energy, Eskom, Cape Nature and Birdlife South Africa.	
1.9.2.	Proof of all correspondence must be included in the ElAr. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.	All comments received to date have been included within this Comments and Responses Report. Where comments haven not been obtained, proof that attempts were made to obtain comments have been included in Appendix C4 (organs of state correspondence) and Appendix C5 (stakeholder correspondence). A distribution list for the EIA Report has been drafted and will be updated with the waybill numbers and the proof of follow-up for written comments. This document will be included in Appendix C5 in the final EIA Report. The database with the registered I&APs are included as Appendix C1 in
		the EIA Report.
1.9.3.	The applicant is hereby reminded to comply with the requirements of Regulation 45 with regard to the time period allowed for complying with the requirements of the	Savannah Environmental is cognisant of the need to comply with Regulations 43, 44 and 45 of the 2014 EIA Regulations (GNR 326).
	Regulations, and Regulations 43 and 44 with regard to the	» Regulation 43 (GNR 326):
	allowance of a comment period for interested and affected	This EIA Report has been made available for a 30-day public review
	parties on all reports submitted to the competent authority for decision-making. The reports referred to are listed in Regulation	period from 28 February 2019 to 01 April 2019 . The EIA Report has been distributed to relevant Organs of State and a copy has been made
	43(1).	available at the Dawid Kruiper Public Library, corner of Mark and Mutual
		Streets, Upington. The EIA Report which has been submitted to the
		national DEA, the Northern Cape DENC, and relevant Organs of State is

 Regulation 44 (GNR 326): Comments from I&APs received to date are included in the Comments and Response (C&R) Report attached as Appendix C8 to this EIA Report. Regulation 45 (GNR 326): Acceptance of Scoping was received from DEA on 05 December 2018. In accordance with Regulation 23(1)(a) (GNR 326) the applicant must within 106 days of the acceptance of the Scoping Report submit to the grutherity on EIA Depart inclusion of any provide reports and an EMDr
authority an EIA Report inclusive of any specialist reports, and an EMPr, which must have been subjected to a public participation process of at least 30-days and which includes the incorporation of comments received, including any comments of the competent authority. The EIA Report has been released for a 30-day public review period from 28 February 2019 to 01 April 2019 . Comments received during this 30-day public review period will be incorporated into the C&R Report to be attached as Appendix C8 to the Final EIA Report. The Final EIA Report inclusive of specialist studies and an EMPr is due to be submitted by 13 April 2019 ¹ .

¹ This date has been calculated excluding the period of 15 December to 05 January in accordance with the requirements of Regulation 3(2) of the 2014 EIA Regulations (GNR 326).

	Furthermore, it must be reiterated that, should an application for Environmental Authorisation be subject to the provisions of Chapter II, Section 38 of the National Heritage Resources Act, Act25 of 1999, then this Department will not be able to make nor issue a decision in terms of your application for Environmental Authorisation pending a letter from the pertinent heritage authority categorically stating that the application fulfils the requirements of the relevant heritage recourses authority as described in Chapter II, Section 38(8) of the National Heritage Resources Act, Act 25 of 1999. Comments from SAHRA and/or the provincial department of heritage must be provided in the ElAr.		Savannah Environmental acknowledges that should the application be subject to Section 38 of the National Heritage Resources Act, Act 25 of 1999, the Department will require a letter from the pertinent heritage authority categorically stating that the application fulfils the requirements of the relevant heritage resources authority. Comments from SAHRA and/or the provincial department of heritage have been requested and will be included in the final EIA Report. Communication with the Provincial Heritage Resources Agent: Northern Cape Province is included in Appendix C4 and the EIA Report has been uploaded on SAHRIS, the official website for all EA Applications and Heritage Reports. The Provincial Authority has also been provided with an electronic copy of the EIA Report and proof of the delivery is included in Appendix C4 .
2.	The Directorate: Biodiversity Conservation reviewed and evaluated the above-mentioned report including its specialist's studies and it's satisfied with the information provided. The following recommendations must be considered during the final scoping phase:	Stanley Tshitwamulomoni Acting Director: Biodiversity Conservation	
2.1.	A detailed Terrestrial Ecological Impact Assessment Report must be compiled and submitted for review;	DEA Letter: 16-11-2018	A detailed Ecology Impact Assessment including fauna and flora has been compiled for the Allepad PV One project and has been included in the EIA Report for public review as Appendix D .
2.2.	A Wetland Delineation must be undertaken in order to properly determine the boundaries of channels and riparian areas on site; and		The development footprint for Allepad PV One avoids all drainage systems and small washes located within the project site. The Ecologist has drafted a motivation letter as to why a wetland delineation is not required for this project and has been included as Appendix L3 of the EIA Report for public review.
2.3.	A detailed Avifaunal Impact Assessment Report must be compiled and submitted for review.		A detailed Avifauna Impact Assessment has been compiled for the Allepad PV One project, including associated infrastructure and is included as Appendix E of the EIA Report for public review.
2.4.	The overall biodiversity objective is to minimize loss to biodiversity as possible. In order to achieve this objective		The need for the minimisation of loss to biodiversity is acknowledged. The recommendations made by DEA: Biodiversity Conservation in order to achieve the objective of minimised loss is noted and has been

the above mentioned recommendations must be adhered	considered and addressed in the EIA Report where necessary as per the
to.	responses included under points 2.1 – 2.4 above.
