NOTIFICATION OF ENVIRONMENTAL IMPACT  
ASSESSMENT PROCESS

01 October 2018

Dear Stakeholder

---

**ENVIRONMENTAL IMPACT ASSESSMENTS AND PUBLIC PARTICIPATION PROCESSES FOR THE  
DEVELOPMENT OF FOUR 100MW PV PROJECTS NEAR UPINGTON IN THE NORTHERN CAPE:  
ALLEPAD PV ONE, ALLEPAD PV TWO, ALLEPAD PV THREE, AND ALLEPAD PV FOUR**

---

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT (EIA) PROCESSES**

The development of four 100MW Photovoltaic (PV) facilities and associated infrastructure is proposed on the Remaining Extent of Erf 5315 Upington, located approximately 11km north-west of Upington, in the Dawid Kruiper Local Municipality, of the ZF Mgcawu District, in the Northern Cape Province. The projects are to be known as Allepad PV One, Allepad PV Two, Allepad PV Three, and Allepad PV Four. Each of the four Allepad PV projects entails the development of a PV facility and supporting infrastructure.

Each of the proposed projects will have a contracted capacity of up to 100MW, and will make use of photovoltaic (PV) solar technology for the generation of electricity. Each project will comprise of the following key infrastructure and components:

- » Arrays of PV panels with a generation capacity of up to 100MW.
- » Mounting structures to support the PV panels.
- » Combiner boxes, on-site inverters (to convert the power from Direct Current (DC) to Alternating Current (AC)), and power transformers.
- » A 132kV on-site substation up to 1ha in extent to facilitate the connection between the solar energy facility and the Eskom electricity grid.
- » A new 132kV power line approximately 5km in length, between the on-site substation and Eskom grid connection point.
- » Cabling between the project's components (to be laid underground where practical).
- » Meteorological measurement station.
- » Energy storage area of up to 2ha in extent.
- » Access road and internal access road network.
- » On-site buildings and structures, including a control building and office, ablutions and guard house.
- » Perimeter security fencing, access gates and lighting.
- » Temporary construction equipment camp up to 1ha in extent, including temporary site offices, parking and chemical ablation facilities.

- » Temporary laydown area up to 1ha in extent, for the storage of materials during the construction.

All four PV facilities are located on the following affected properties:

**Allepad PV One, Allepad PV Two, Allepad PV Three, and Allepad PV Four PV facilities:**

- » Remaining Extent of Erf 5315 Upington

**Grid connection:**

- » Remaining Extent of Erf 5315 Upington
- » Erf 01 Upington

The projects are intended to form part of the Department of Energy's (DoE's) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. The power generated by the projects will be sold to Eskom and will feed into the national electricity grid. The development of the projects will assist with the achievement of the electricity goals as set out in the Integrated Resources Plan for electricity (IRP) 2010 – 2030 by diversifying South Africa's electricity mix, and positively contributing towards socio-economic, and environmentally sustainable growth

**ENVIRONMENTAL IMPACT ASSESSMENT (EIA) PROCESS**

The development of the four Allepad PV projects each require that application for Environmental Authorisation (EA) be made to the Competent Authority, the National Department of Environmental Affairs (DEA), in consultation with the Local Commenting Authority, the Northern Cape Department of Environment and Nature Conservation (DENC), in accordance with the requirements of the National Environmental Management Act (No. 107 of 1998) (NEMA) and the 2014 Environmental Impact Assessment (EIA) Regulations (GNR 326). Separate applications for EA will be made for each project, and will be supported by full Scoping and EIA processes.

Savannah Environmental (Pty) Ltd has been appointed as the independent Environmental Consultants responsible for managing the applications for EA and supporting Scoping and EIA processes. The purpose of these processes is to identify and assess potential environmental impacts associated with the projects, and propose appropriate mitigation and management measures to be included in the project's Environmental Management Programmes (EMPrs). Interested and / or Affected Parties (I&APs) will be actively involved through the public participation process.

The department and / or organisation which you represent has been identified as a commenting authority for the four Allepad PV projects. **In this regard, please can you provide us with the name and contact details of the relevant contact person at your Department who we would liaise with regarding these projects.** A Background Information Document (BID) which provides further information on the nature and extent of the proposed projects and the EIA processes being undertaken is attached to this letter, and is also available for download on Savannah Environmental's website ([www.savannahsa.com](http://www.savannahsa.com)). By registering on the project's database, you will be kept informed of the EIA processes being undertaken for the projects and will be provided with an opportunity to provide comment and input on the projects.

Please do not hesitate to contact us should you require additional information and / or clarification regarding the projects. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards

Please be informed that the solid yellow line on the locality map is the 300m wide power line corridor (for environmental assessment purposes).

In terms of your request for the number appearing on the nearest blue km marker board along the N10, this will be forwarded as soon as it is available.

Also, we herewith confirm that you are registered as a Key Stakeholder on the above-mentioned projects’ databases.

Dear Nicolene

The above listed project bears reference.

I would hereby wish to register as an I&AP for this particular project.

The South African National Roads Agency SOC Limited (SANRAL) has received background information and a site layout plan for this project and based on the proximity of the pipeline in relation to the National Road N10, it appears that SANRAL could be impacted by this development.

Could you also indicate the number appearing on the nearest blue km marker board on N10.

If services need to be constructed over or under the national road, (in this case the N10 ) or within 60m measured from the road reserve fence, the service owner must apply for a written permission from SANRAL, before any work may be carried out. Attached please find an application form for the proposed encroachment.

Do not hesitate to contact the sender should you have any further queries.

I trust that you will find the above in order.

Regards

Dear Interested and Affected Party,

---

**ENVIRONMENTAL IMPACT ASSESSMENTS AND PUBLIC PARTICIPATION PROCESSES FOR THE  
DEVELOPMENT OF FOUR 100MW PV PROJECTS NEAR UPINGTON IN THE NORTHERN CAPE:  
ALLEPAD PV ONE, ALLEPAD PV TWO, ALLEPAD PV THREE, AND ALLEPAD PV FOUR**

---

**NOTICE OF AVAILABILITY OF ENVIRONMENTAL IMPACT ASSESSMENT REPORTS FOR REVIEW AND  
COMMENTS**

As you may recall, the Allepad PV projects proposed by ILEnergy Development (Pty) Ltd, proposes the development of four 100MW Photovoltaic (PV) facilities and associated infrastructure on the Remaining Extent of Erf 5315 Upington, located approximately 11 km north-west of Upington, in the Dawid Kruiper Local Municipality, ZF Mgcawu District Municipality, Northern Cape Province. The projects are known as Allepad PV One, Allepad PV Two, Allepad PV Three, and Allepad PV Four.

The development of Allepad PV One, Allepad PV Two, Allepad PV Three, and Allepad PV Four each require that application for Environmental Authorisation (EA) be made to the Competent Authority, the Department of Environmental Affairs (DEA), in consultation with the Local Commenting Authority, the Northern Cape Department of Environment and Nature Conservation (DENC), in accordance with the requirements of the National Environmental Management Act (No. 107 of 1998) (NEMA) and the 2014 Environmental Impact Assessment (EIA) Regulations (GNR 326). Separate applications for EA have been made for each project.

This letter serves to inform you, as a registered Interested and Affected Party (I&AP), that the Environmental Impact Assessment Reports (EIARs) are available for your review and comment. The reports can be viewed at the Upington Public Library (cnr of Mark & Mutual Streets, Upington) from **Thursday, 28 February 2019 to Monday, 01 April 2019**. The reports are also available for download on Savannah Environmental's website: <http://www.savannahsa.com/public-documents/energy-generation/>.

You are kindly requested to please submit your written comment/s on the Environmental Impact Assessment Reports by **Monday, 01 April 2019** via fax, post or email to the contact person below.

All comments received during this 30-day review period will be recorded and included in the Final Environmental Impact Assessment Reports for submission to the Department of Environmental Affairs in line with Regulation 44 of the 2014 NEMA EIA Regulations, as amended (GN R326).

Please do not hesitate to contact us should you require additional information and / or clarification regarding the projects. Our team welcomes your participation and looks forward to your involvement throughout this process.

Kind regards
