APPENDIX C8 COMMENTS & RESPONSES REPORT

PROPOSED DEVELOPMENT OF THE AMPER DAAR SOLAR PV FACILITY, PIXLEY KA SEME DISTRICT MUNICIPALITY, NORTHERN CAPE PROVINCE (DFFE Ref. No.: 14/12/16/3/3/2/2278)

COMMENTS AND RESPONSES REPORT

TABLE OF CONTENTS

| | | 17 | |
|----|-------|---|-----|
| 1. | . CON | AMENTS SUBMITTED ON THE SCOPING REPORT | . 1 |
| | 1.1. | Organs of State | . 1 |
| | 1.2. | Key Stakeholders and Interested & Affected Parties | 36 |
| 2. | . CON | MMENTS RECEIVED DURING THE COMMENCEMENT OF THE SCOPING PHASE OF THE EIA PROCESS | 38 |
| | 2.1. | Organs of State | 38 |
| | 2.2. | Key Stakeholders and Interested & Affected Parties | 42 |

The Scoping phase of the Environmental Impact Assessment (EIA) Process for the Amper Daar Solar Photovoltaic (PV) project located near Phillipstown and Petrusville, Northern Cape Province was announced on Thursday, 30 June 2022. The Background Information Document, which included the information on the cluster of 21 solar PV facilities, was distributed together with a notification letter which served to invite Interested and Affected Parties (I&APs) to register their interest in the project and to submit any comments / queries that they might have on any of the proposed developments. All written comments received during the Scoping Phase of the EIA process to date have been included in the table below and in **Appendix C6** of the Scoping Report.

The Scoping Report was made available for a 30-day review and comment period from **Monday**, **16 January 2023** until **Wednesday**, **15 February 2023**. The Comments and Responses Report (C&RR) has been updated with comments received during the review and comment period and included in **Appendix C6** of the final Scoping Report.

The Environmental Impact Assessment (EIA) Report is being made available for a 30-day review and comment period from **Wednesday**, **31 May 2023** until **Monday**, **03 July 2023**. All written comments received during the 30-day review and comment period of the EIA Report will be included in **Appendix C6** and captured in this Comments and Responses Report (C&RR) which will be submitted to the DFFE with the final EIA Report for decision-making.

The C&RR is included as a separate document to the Scoping Report as Appendix C8.

NOTE:

All comments captured in the C&RR are verbatim and have not been summarised.

PAGE

NOTE:

In terms of Regulation 44(1) of the EIA Regulations 2014, as amended, please note that the comments raised, and responses provided at the various virtual Meetings held during the 30-day review period of the Scoping Report have been attached as **Appendix C7** to the final Scoping Report.

| |
| The Final Scoping Report has been updated to clarify that |
| is the developer's intention to bid the Amper Daar Solar P |
| Facility in terms of a regulated power purchase procuremen |
| process (e.g., the Department of Mineral Resources and |
| Energy's (DMRE's) Renewable Energy Independent Powe |
| Producer Procurement (REIPPP) Programme) to evacuate |

| Comment | Kuiseu by | Kespolise |
|--|--------------------------|--|
| Application form | | |
| • Please note that the Minister is the CA for applications for the | Letter: 10 February 2023 | The Final Scoping Report has been updated to clarify that it |
| development of facilities or infrastructure which relates to the | | is the developer's intention to bid the Amper Daar Solar PV |
| Integrated Resource Plan (IRP) 2010 2030 and any updates | | Facility in terms of a regulated power purchase procurement |
| thereto, for technologies in which the Applicant will bid the | | process (e.g., the Department of Mineral Resources and |
| project in the Department of Minerals Resources and Energy | | Energy's (DMRE's) Renewable Energy Independent Power |
| (DMRE) IPP bidding rounds. It is noted that page 8 of 34 of the | | Producer Procurement (REIPPP) Programme) to evacuate |
| application form mentioned that "it is the developer's | | the generated power into the national grid. |
| intention to bid the Amper Daar Solar PV Facility under the | | |
| Department of Mineral Resources and Energy's (DMRE's) | | |
| Renewable Energy Independent Power Producer | | |
| Procurement (REIPPP) Programme, or similar renewable | | |
| energy programme organized by public or private | | |
| commercial & industrial customers through tenders or bilateral | | |
| consultations, with the aim of evacuating the generated | | |
| power into the national grid". Therefore, you are advised to | | |
| be clear on whether this project will bid as part of the DMRE | | |
| IPP bidding rounds or not. | | |
| • In addition, please ensure that the need and desirability of the | | This has been included in Chapter 6 of the Scoping Report |
| proposed development are aligned to the abovementioned | | (refer specifically to Section 6.4). |
| plan. | | |
| Specific comments | | The project details provided in the report and the |
| • It has been noted that the assessment is focusing on the whole | | issues/impacts identified are specific to the Amper Daar PV |
| Hydra B development, however the projects have been | | project. A project-specific sensitivity map has been |
| submitted separately. You are advised to ensure that each | | compiled and included in the final Scoping Report (refer to |
| report adequately address relevant issues of concern | | Chapter 10). |
| considering the environmental sensitivity on each site (in this | | |
| case Amper Daar Solar PV Facility), the activities that will take | | |
| place and provide relevant mitigation measures in the ElAr. | | |
| Screening report | | The DFFE Screening Report included within the Final Scoping |
| • It has been noted that the screening report for the | | Report has been signed with the Compiler's signature as |
| abovementioned application has been included in the draft | | requested. |

Raised by

| 0. | Comment | Raised by | Response |
|----|---|-------------|--|
| | SR, however, there is no compiler signature on the aforesaid report. Therefore, you are advised to sign the abovementioned report to be submitted with the final SR. | | |
| | Project Description and Listed Activities | | The property on which the project is proposed is clearly |
| | • It has been noted in Section 5 of the application form, on page 8 of 34, that "the exact location of the development area within the project site for the Amper Daar Solar PV Facility is not defined at this stage of the process." Therefore, you are advised to ensure that the project description and the exact location is well defined and clear on what is being proposed in the final SR. | + , , | defined within the application form and the Scoping Report. The specific location of the development footprint within the property will be provided by the applicant in the EIA phase of the process. |
| | It has been noted that the exclusions on the triggered listed activities applied for are not included. Therefore, you are advised to include in the amended application form as well as final SR all the relevant exclusions related to the listed activities applied for. For instance, activity 11 of Listing Notice (LN) 1 have been applied for, however the exclusions have not been quoted in the application form. | | The listed activities applied for have been updated within the application form and the Scoping Report to include the relevant exclusions as listed in the Listing Notices of the EIA Regulations. |
| | It has been noted that the words "may, likely and could" have been used in the description of activities 12, 19, 24 and 56 of Listing Notice (LN) 1, and activities 18 of LN 3. Please refrain from using such word/s, since it creates an uncertainty regarding the applicability of the listed activity applied for, for the proposed development. In addition, please note that the Project Description and Listed Activities are not based on a precautionary approach. | | The wording for the highlighted listed activities have been rectified accordingly within the final Scoping Report and a revised application form has been submitted with the final report. |
| | Activity 15 of LN 2 and 12 of LN 3 for the clearance of an area more than 20ha and 300 square metres, (respectively) of indigenous vegetation are applied for without specifying the total amount of vegetation to be cleared. You are advised to include this information in the amended application form and final SR. | | The expected amount of vegetation to be cleared will be dependent on the proposed facility design, which will be provided in the EIA Phase. Expected amounts have been inserted as requested but may be updated during the EIA Phase following the detailed assessments. |

| No. | Comment | Raised by | Response |
|-----|---|-----------|--|
| | Under activity 56 of LN 1 and 4 of LN 3, the CA acknowledged that the access roads to be widened or upgraded have been provided. However, the length of the aforesaid access roads has not been included in the application form and draft SR to | | The length of said access road will be dependent on the proposed facility design, which will be provided in the EIA Phase. |
| | determine the applicability of the abovementioned activity. You are advised to include the relevant details to determine if the said activity is triggered by the proposed development or not. | | |
| | It has been noted that activities 4,10, 12, 14, and 18 of LN 3 have been applied for. Critical Biodiversity Areas (CBAs) has been indicated as the area to be affected by for the proposed development and the description of the portion of the proposed project to which the applicable listed activity relates indicated as Ecological Support Areas (ESA). However, the listed activities under Listing Notice 3 does not include ESA in order for the development to trigger a listed activity. Therefore, you are requested to explain and provide evidence why the above-mentioned listed activities are triggered for the proposed project must make reference to the systematic biodiversity plans adopted by the CA or in bioregional plans and proof of such must be obtained from the relevant CA and be part of the amended application form and final SR. | | As detailed in the Scoping Report, CBA and ESA areas are present within the study area. The extent of impact on these areas by the project (if any) will be dependent on the proposed facility design, which will be provided in the EIA Phase. Should these areas be impacted, the relevant CA will be consulted to confirm the status of the relevant systematic biodiversity plans and/or bioregional plans. This evidence and confirmation will be included in the EIA Report for the project. |
| | This CA has noted that the description given under activity 4 of LN 3 is that "The project area does not overlap with a NPAES protected area". This is further supported by the statement under section 4 of the Visual Scoping report, which indicate that "there are no formally protected or conservation areas within the study area". However, activity 10 of Listing Notice 3, the sub activity refers to Protected Areas has been applied for. Please clarify this in the final SR. | | The reference of the sub-activity in activity 10 of Listing Notice 3 is clarified within Chapters 8 and 9 in the final Scoping Report which has been submitted together with an amended EA Application Form to the DFFE. |

| С | omment | Raised by | Response |
|---|--|-----------|---|
| • | Noting that under activity 10 of Listing Notice 3, the project | | The comment has been acknowledged and the relevant |
| | area is within 3,24km of Platberg-Karoo conservancy, this | | activities have been rectified in the amended EA |
| | information is in contradiction to what is specified in other LN | | Application Form that has been submitted together with the |
| | 3 activities applied for, for example activity 4 of LN 3. | | Final Scoping Report to the DFFE. |
| | Therefore, you are advised to ensure that the correct sub- | | |
| | activities are specified for in all the activities trigger. | | |
| ٠ | Further to the above, you are required to submit with the final | | A Section 50 approval in terms of NEM: PAA will be submitted |
| | report a Section 50 approval in terms of NEM: PAA. This must | | together with the Final EIA Report in the EIA phase to the |
| | be done for all Hydra B projects that trigger these sub- | | DFFE. |
| | activities. | | |
| ٠ | Please ensure that all relevant listed activities are applied for, | | All relevant listed activities have been applied for , and have |
| | are specific and can be linked to the development activity or | | been refined with relevant exact descriptions as required |
| | infrastructure as described in the project description. In | | Where no exact amount/quantity is available at this stage in |
| | addition, the onus is on the applicant and the Environmental | | the process, the applicant will provide said information |
| | Assessment Practitioner (EAP) to ensure that all the applicable | | within the EIA phase. |
| | listed activities are included in the application and the final | | |
| | SR. Failure to do so may result in unnecessary delays in the | | |
| | processing of the application. | | |
| ٠ | If the activities applied for in the application form differ from | | An amended application form has been submitted togethe |
| | those mentioned in the draft SR, an amended application | | with the Final Scoping Report. |
| | form must be submitted with the final SR. Please note that the | | |
| | Department's application form template has been amended | | |
| | and can be downloaded from the following link | | |
| | https://www.environment.gov.za/documents/forms. | | |
| Α | Iternatives | | The final Scoping Report has been updated to reflect that c |
| • | It has been indicated on page 24 of the draft SR that "the | | BESS will form part of the project. |
| | project could include Battery Energy Storage System (BESS). | | |
| | The BESS capacity will depend on technology to be used and | | |
| | total installed capacity of solar, and it is expected to be up to | | |
| | 1MWh per MW of solar PV facility". Please be informed that | | |
| | the above statement shows uncertainty regarding the BESS | | |
| | been part of the proposed development, therefore, it is | | |

| No. | Comment | Raised by | Response |
|-----|--|--|--|
| | expected that this be clarified in the amended application form and the final SR. | | |
| | • It has been noted on page 27 of the draft SR that three BESS technologies will be considered for the proposed development. You are advised to indicate if the abovementioned technologies would or not trigger any listed activity and ensure the impacts that might be generated by the technologies are adequately assessed in the final report. | ed he ed by rt. he he vi) nal | As detailed in the report, a number of technology alternatives are being investigated for the BESS. The detailed information on the BESS technologies and the preferred option/s will be provided in the EIA phase by the applicant once these have been assessed from a technical perspective. |
| | • You are further required to provide details of the all the alternatives considered for this development and indicate the preferred alternatives as per Appendix 2 (2) (1) (g) (i) (v) (vi) of the NEMA EIA Regulations, 2014, as amended in the final report. | | Detailed of all alternatives identified for the project are provided in Chapter 3 of the Scoping Report. |
| | • Alternatively, you should submit written proof of an investigation and motivation if no reasonable or feasible alternatives exist in terms of Appendix 2. | | Where no reasonable or feasible alternatives exist a motivation in this regard has been included in Chapter 3 of the Scoping Report. |
| | Cumulative Impact | | The purpose of the Scoping phase of the process is to identify |
| | It has been noted on page iii and 1 of the draft SR that the proposed project is one (1) of 9 projects (in-process application submitted) in batch 1, summing up all 3 batches into a total of 21 projects. Further to this there are other similar projects or renewable projects within a 30km radius of the proposed development site, therefore, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following: Assess the cumulative impacts of the proposed (not yet authorised), authorised (not yet constructed) and existing solar energy facilities. | ess ar ne ve cts et ng to pn ar | and evaluate issues associated with the project. Potential cumulative impacts have been identified within the Scoping Report (refer to Section 9.5). This includes an indication of the proposed projects within a 30km radius of the site. These impacts will be assessed within the EIA phase of the process based on the specialist's relevant findings. Distinction will be made between proposed (not yet authorised), authorised (not yet constructed) and existing solar energy facilities as required. |
| | Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in | | The required process flow and proof will be provided within the cumulative assessment to be undertaken in the EIA phase. |

| No. | Comment | Raised by | Response |
|-----|---|-----------|--|
| | the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. | | |
| | The cumulative impacts significance rating must also inform the need and desirability of the proposed development. | | The cumulative impacts significance rating to be defined in the EIA Phase will also inform the need and desirability of the proposed development. |
| | A cumulative impact environmental statement on whether the proposed development must proceed. | | A cumulative impact environmental statement on whether the proposed development must proceed will be included within the EIA report based on the findings of the specialist studies to be undertaken. |
| | Specialist Assessments | | |
| | The specialists' reports submitted makes reference to Hydra B, which is the umbrella body of the entire development, this helps in giving the full scope of what is proposed and associated developments. However, for ease of reference you are advised to make sure that the specialist reports (specifically the findings and conclusion of each development) and maps provided in the reports clearly name and highlight the individual projects. | | Specialist reports make reference to the specific project under consideration. Specific assessments and detailed maps for the project site will be included in the EIA Reports. |
| | • The terrestrial ecology scoping report states on page 18 that "Ecological Support Areas (ESAs) are not essential for meeting biodiversity targets but play an important role in supporting the ecological functioning of Critical Biodiversity Areas and/or in delivering ecosystem services". As such you are expected to elaborate on why the ESA is deemed suitable for this project, since ESAs play an important role in supporting the ecological functioning of the CBAs. In addition, please explain why ESAs are not important for meeting biodiversity targets whereas ESAs play an important role in supporting the ecological functioning of Critical Biodiversity Areas. | | Relevant information pertaining to the ESAs functioning and suitability for the project will be further clarified by the specialists within the EIA phase following detailed fieldwork and assessment of impacts related to the proposed development layout to be provided by the applicant. |

| No. | Comment | Raised by | Response |
|-----|--|-----------|--|
| | It is also noted on figure 5.4 on page 20 of the terrestrial ecology scoping report that the whole site falls within the Platberg-Karoo Conservancy Important Bird Areas (IBA) and on page 19 of the terrestrial ecology scoping report, it is stated that "this IBA is important because it contributes significantly to the conservation of large terrestrial birds as well as raptors. These birds include Blue Crane (Anthropoides paradiseus), Ludwig's Bustard (Neotis Iudwigii), Kori Bustard (Ardeotis kori), Blue Korhaan (Eupodotis caerulescens), Black Stork (Ciconia nigra), Secretarybird (Sagittarius serpentarius), Martial Eagle (Polemaetus bellicosus), Verreaux's Eagle (Aquila verreauxii) and Tawny Eagle (A. rapax) (Birdlife South Africa, 2015)". Based on the above, you are advised to undertake the assessment of the above-mentioned species, cumulative impacts and indicate the practical mitigation measures based on the findings of the specialist. In addition, you are advised to include in the final report the development layout map overlaid by the sensitive features. | | As detailed in the Plan of Study included in the Scoping Report (Chapter 11), an Avifauna Impact Assessment will be undertaken for the project. This will be informed by 2 monitoring surveys of the project site in accordance with the requirements of the BirdLife South Africa Best Practice Guidelines for Solar Developments. |
| | • According to the heritage assessment, there is the potential for the cumulative impact of proposed solar energy facilities to negatively impact the cultural landscape due to a change in the landscape character from rural and mining to semi- industrial. However, due to the density of mining activities in the area, the impact on the experience of the cultural landscape is not foreseen to be significant. You are expected to ensure that this is assessed and included in the final SR. | | The Heritage Impact Assessment to be undertaken within the EIA Phase of the process will include an assessment of impacts on the Cultural Landscape. This has been added to the Plan of Study for EIA In the Final Scoping Report. |
| | According to the screening report, the aquatic, terrestrial biodiversity and landscape themes are very high, palaeontology theme has high sensitivities while agriculture and animal themes have medium sensitivity as well as low sensitivities on archaeological, and cultural heritage, avia, civil aviation, defense, and plant species themes. Therefore, | | A Site sensitivity Verification report was included within the DSR and again with the FSR (refer to Appendix K). Specialist reports include information on site sensitivities based on the desk-top scoping study. Updated Site Sensitivity Verification reports based on field investigations will be included in the EIA Report. |

| No. | Comment | Raised by | Response |
|-----|--|-----------|--|
| | you are advised to submit a site verification report and motivation for the exclusions of any specialist studies identified by the screening tool. | | |
| | In addition to the above, you are hereby drawn to the following: > Specialist Declaration of interest forms must be attached for all specialist studies to be conducted in the final SR. The forms are available on Department's website (please use the Department's template). | | All specialist declaration of interest forms for specialist studies conducted have been included in Appendix M of the FSR. |
| | Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of proposed rehabilitation, and all other proposed structures that they have assessed and are recommending for authorisations. | | Specialist EIA reports will include this information. |
| | The specialist studies must also provide a detailed description of all limitations to their studies. All specialist studies must be conducted in the right season and providing that as a limitation, will not be accepted. | | Specialist EIA reports will include this information. |
| | Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defendable reasons; and where necessary, include further expertise advice. | | The comment is noted and will be actioned accordingly as relevant in the EIA Phase of the process. |
| | Ensure that specialist studies as identified in the screening tool, comply with the requirements of GN 320 of 20 March 2020 and GN 1150 of 30 October 2020, unless proof is provided that indicates that the specialist study was commissioned within 50 days after the date of gazetting of the notice i.e., 20 Mach 2020 and was commissioned prior to 30 October 2020 respectively. Failure to comply with the abovementioned notices presents a risk to this application. | | Specialist studies to be undertaken in the EIA Phase of the process will comply with the requirements of all protocols, guidelines and regulations, as applicable. |

| No. | Comment | Raised by | Response |
|-----|--|-----------|---|
| | Please note further that the protocols require certain specialists' to be registered with SACNASP. Refer to the relevant protocols in this regard. | | Where relevant, Specialists are registered with SACNASP. |
| | Please include a table in the final SR summarising the specialist studies required by the Screening Tool, a column indicating whether these studies will be conducted or not, and a column with motivation for any studies that will not be undertaken. Please note that if any of the specialists' studies and requirements recommended in the Department's Screening Tool are not commissioned, motivation for such must be provided in the report, as per the requirements of the Protocols. | | Table 7.4 and Table 7.5 provide the details of the screening tool requirements as well as the specialist studies identified for the project. Table 11.1 provides further details of the specialist studies to be undertaken in the EIA Phase of the process. |
| | Please also ensure that the final SR includes the Site Verification Report as required by the relevant environmental themes and assessments. | | A Site sensitivity Verification report was included within the DSR and again with the FSR (refer to Appendix K). Specialist reports include information on site sensitivities based on the desk-top scoping study. Updated Site Sensitivity Verification reports based on field investigations will be included in the EIA Report. |
| | Should it be determined that there is a need for additional specialist studies to be undertaken based on the outcome of public participation, these must be commissioned and be included in the draft EIA reports for public comment. | | No additional specialist studies have been identified as being required at this stage in the process. Should any additional studies be identified, these will be included in the EIA Report. |
| | Layout & Sensitivity Maps Figure 5.12 on page 28 of the terrestrial ecology scoping report shows the respective farm portions in consideration of the ecological features. However, this refers to Hydra B project and projects are not named making difficult to identify projects individually. You are advised make sure that individual Hydra B developments are named while making sure that the specific development (Amper Daar PV) is highlighted preferably in a different colour to other proposed PVs that form part of Hydra B. | | Sensitivity information presented within the specialist scoping reports is based largely on desktop data and is therefore presented at a broader scale in order to adequately identify potential issues. Site-specific sensitivity data per project will be presented in the EIA Phase as requested. |

| No. | Comment | Raised by | Response |
|-----|---|-----------|--|
| | • You are advised to submit a layout map that indicates the | | The layout map for Amper Daar is not yet available. The |
| | following (but not limited to the below, however, the findings | | layout will be defined by the applicant considering the |

| | alternatives that are preferred based on the findings of their study. | | |
| | ✓ All specialist studies must be final, and provide detailed/practical mitigation measures for the preferred alternative and recommendations, and must not recommend further studies to be completed post EA. | | Findings of the specialist studies, including conclusions in terms of alternatives considered (where relevant) have been included in Chapter 6 and 7 of this EIA Report. |
| | f) <u>Cumulative Impact Assessment</u> It has been noted on page iii and 1 of the final SR that the proposed project is one (1) of 9 projects (in process application submitted) in batch 1, summing up all 3 batches into a total of 21 projects. Further to this there are other similar projects or renewable projects within a 30km radius of the proposed development site, therefore, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following: Assess the cumulative impacts of the proposed (not yet authorised), authorised (not yet constructed) and existing solar energy facilities. | | An assessment of cumulative impacts is included in Chapter 6 of this EIA Report as well as within the specialist reports included in Appendix D-K . |
| | Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. | | The cumulative impact significance rating is considered in the overall conclusion on the need and desirability of the project and the impact statement for the project included in Chapter 7 of this EIA Report. |
| | The cumulative impacts significance rating must also inform the need and desirability of the proposed development. | | The cumulative impact significance rating is considered in the overall conclusion on the need and desirability of the project and the impact statement for the project included in Chapter 7 of this EIA Report. |

| Mr Vivian Groenewald must be contracted at telephone number 081 362 6738. Two (2) weeks prior to commencement of proposed work. It's important that all services are shown on site before construction starts. | | |
| Approval of the proposed route is valid for six months. If construction has not yet commenced within this period, then the file must be resubmitted for approval. Any changes / deviations from the original planning during or prior to construction must immediately be communicated to this office. | | The applicant has been advised of this requirement. |
| Please notify this office and forward an as built plan, within 30 days of completion of construction. Mr Vivian Groenewald must be contacted at 054 338 6501 /081 362 6738. Two weeks prior to commencement of proposed work. It's important that all services are shown on site before construction starts. | | The applicant has been advised of this requirement. |

2. COMMENTS RECEIVED DURING THE COMMENCEMENT OF THE SCOPING PHASE OF THE EIA PROCESS

2.1. Organs of State

| No. | Co | mment | Raised by | Response |
|-----|----------|---|--|---|
| 7. | 1. 2. | The biggest concern is that the project falls in an Important Bird Areas and proper avifauna surveys must be conducted in order to mitigate the impacts on birds, as there is already a lot of power lines in the area. Please incorporate into the assessment the ESKOM maintenance roads under power line(s) for maintenance | N Uys and E Swart Scientific Manager GR B: Environmental Research & Development Letter: 07 July 2022 | An Avifaunal Impact Assessment will be undertaken by a suitably qualified Avifaunal Specialist. The Assessment will identify impacts associated with the proposed development and relevant mitigation measures will be formulated. Furthermore, Birdlife SA will be contacted to provide recommendations as per the latest protocols. The Eskom requirements will be assessed and if required will be included in the Generic EMPrs in the EIA Phase of the process. |
| | 3. | and fire breaks (there is specific sizes for specific line sizes). Please note the area is also an arid landscape and temporary roads leave scars in the landscape for years. | | Noted. Where possible existing roads will be used for temporary road access. |
| | 4. | Please include under cumulative impacts assessed other developments such as agriculture and mining. Also include in the assessment the other renewable energy projects in the area and their associated power lines, especially the Kudu Solar PV and EGI that is located adjacent to this development. | | An in-depth assessment of other developments within the areas will be conducted during the EIA Phase of the S&EIA Phase. |
| | 5. | This is a massive project and the cumulative impact of the project size should also be assessed. | | The potential cumulative impacts of the proposed project have been included in Section 9.5 of the Draft Scoping Report. An in-depth assessment will be further conducted during the EIA Phase of the S&EIA Process. |
| | 6. | It is recommended that all Environmental Authorisations for Renewable Energy (RE) projects as well as power lines must be re-evaluated if there are any changes in the way RE projects are approved for the De Aar area. | | During the S&EIA Phase, the DFFE link for renewable projects database: <u>https://egis.environment.gov.za</u> will be utilised to assess Renewable Energy Projects in the area to assess the cumulative impacts of the proposed development. |
| | 7. | Fauna and flora permits will be needed for removal of flora and fauna for both the power line(s) and the renewable energy facilities. | | Any required permits will be obtained from relevant authorities prior to any commencement of construction activities. |

| No. | Comment | Raised by | Response |
|-----|--|------------------------------|--|
| 8. | With reference to your above-mentioned application, I hereby | Mantwa Gabaitumele | The approval is noted. No further response is required. |
| | inform you that our Client (OPENSERVE) approves the proposed | Mvelaphande Trading | |
| | work indicated on your drawings in terms Section 29 of the | (OpenServe Service Provider) | |
| | Electronic Communications Act 36 of 2005 as amended. | | |
| | | Letter: 14 July 2022 | |
| | Any changes/deviations from the original planning during or | Ref.: CPLT0414-22 | |
| | prior to construction must immediately be communicated to | | |
| | this office. | | |
| | Our Client (OPENSERVE)'s infrastructure is affected by this | | Noted. The details as contained in the correspondence have |
| | proposal and the routes are marked in PINK on attached sketch | | been provided to the Applicant for further action, as may be |
| | as accurately as possible. We did our utmost to ensure that we | | required. |
| | indicate our route as accurate as possible and should you | | |
| | discover any of our cables that are not on the sketch please | | |
| | stop and contact us immediately to arrange a site meeting. | | |
| | Please make use of pilot holes in order not to damage our | | |
| | infrastructure. Therefore, any damages occurred during | | |
| | construction of work will be repaired at the customer's | | |
| | account. Consequently, the following conditions apply: | | |
| | Aerial Plant - At points of crossing, the overhead power lines | | |
| | should cross above the communications lines in accordance | | |
| | with and clearances stipulated in the Occupational Health and | | |
| | safety Act no 85 of 1993, Machinery regulations 20 – Crossings, | | |
| | and Electrical Machinery Regulations 15 – Clearance of Power | | |
| | Lines. If the specifications could not be met, all deviation costs | | |
| | will be for the applicant's account. We also refer to section 25 | | |
| | of Electronic Communication Act 36 of 2005. | | |
| | Sketch included in Appendix C6: Comments Received of the | | |
| | Scoping Report | | |

| No. | Comment | Raised by | Response |
|-----|--|-----------|----------|
| | At points of crossing, the overhead power line should cross over | | |
| | the overhead communication lines with a minimum vertical | | |
| | separation of 0.8 meters. | | |
| | Suitable protection as laid down in section 5 of the Code of | | |
| | Practice should be provided at all important crossings. | | |
| | The crossing of supply lines or overhead service mains directly | | |
| | above or adjacent to communication poles must be avoided | | |
| | if possible. If not clearance of 3 meters must be provided. | | |
| | In order to minimize noise induction into the telecommunication | | |
| | systems, the angle of crossing between the overhead power | | |
| | line and all communication lines, should be as near to a right | | |
| | angle as possible – the following deviation from the right angle | | |
| | being permitted at: | | |
| | Power voltage of 48 kV and higher - 30 degrees | | |
| | Power voltage of lower than 48 kV - 45 degrees | | |
| | SWER must be as near as 90 degrees as possible | | |
| | Approved on condition that, should it later be found necessary | | |
| | to deviate the existing communication line due to existing noise | | |
| | interference or any other reason whatsoever, the cost of such | | |
| | remedial action shall be repayable. | | |
| | Paragraph 2.4.1 of the Code of Practice stipulates the minimum | | |
| | acceptable horizontal separation between power and the | | |
| | communication lines and where this cannot be met, the design | | |
| | of the power line is also stipulated. This could apply between | | |
| | the attached plans and these requirements should strictly be | | |
| | adhered to. | | |
| | In cases where an underground power cable will run parallel | | |
| | with an existing underground communication cable, a | | |
| | separation as great as possible should be maintained with a | | |
| | minimum separation of 600mm. should the separation be less | | |
| | than 600mm and the power cable are not enclosed in a | | |
| | suitable pipe, a concrete slab must be provided immediately | | |

Page 40

| lo. | Comment | Raised by | Response |
|-----|---|-----------|----------|
| | above the power cable for the length of parallelism. If the | | |
| | separation is less than 300mm, additional protection is required | | |
| | by placing concrete slabs between our Client (OPENSERVE) | | |
| | cables/pipes and the power cables. | | |
| | Underground Crossings - At the points where our Client | | |
| | (OPENSERVE)'s existing underground communication cable will | | |
| | be crossed by an underground cable; the latter should be laid | | |
| | a depth of at least 300mm below the communication cable - | | |
| | normally laid at a depth of 600mm. If the power cable is not | | |
| | enclosed in a suitable pipe, protection in the form of a | | |
| | concrete slab should be provided immediately above the | | |
| | power cable for a minimum of 2 (Two) metres on either side of | | |
| | crossing. | | |
| | Calculations have shown that an earth fault on the high | | |
| | voltage Power lines will induce excessive low frequency | | |
| | induction into the Communication lines. As a result of this, the | | |
| | cost to deviate / alter the communication lines to prevent this | | |
| | induction will be for the power provider. | - | |
| | Relocations of our Client (OPENSERVE) plant will be done at | | |
| | customer's request and will be a repayable project. | | |
| | Please notify the office within 21 working days from date of this | | |
| | letter of acceptance and if any alternative proposal is | | |
| | available of if a recoverable work should commence, the | | |
| | liaison officer is Mantwa Gabaitumele at tel. no. 0825216813. | | |
| | As important cables are affected, Mr Vivian Groenewald must | | |
| | be contacted at 054 338 6501 /081 362 6738, (2) two weeks' | | |
| | prior of commencement on construction work. It would be | | |
| | appreciated if this office can be notified within 30 days on | | |
| | completion of construction work. Confirmation is required on | | |
| | completion of construction as per agreed requirements. | 4 | |
| | On completion of this project please certify that all | | |
| | requirements as stipulated in this letter have been met. Please | | |

|-----|---|-----------|----------|
| | note that should any of our Client (OPENSERVE) infrastructure | | |
| | has to be relocated or altered as a result of your activities the | | |
| | cost for such alterations or relocations will be for your account | | |
| | in terms of section 25 of the Electronic Communications Act. | | |
| | This approval is valid for 6 months only, after which re- | | |
| | application must be made if the work has not been completed. | | |
| | Should our Client (OPENSERVE) infrastructure be damaged | | |
| | while work is undertaken, kindly call the Toll-free number | | |
| | 0800203951 immediately. | | |
| | All of our Client (OPENSERVE) rights remain reserved. | | |
| | Mr Vivian Groenewald must be contacted at 054 338 6501 /081 | | |
| | 362 6738, Two weeks before any commencement of proposed work. | | |

2.2. Key Stakeholders and Interested & Affected Parties

| No. | Comment | Raised by | Response |
|-----|---|--------------------------------|---|
| 1. | The Haumann Family Trust is in favour of the relevant | Eduard Haumann | The positive comment submitted is acknowledged. |
| | developments proposed. | Landowner | |
| | | Reg&Comm Form: 01 July 2022 | |
| 2. | Ek besit eiendom naasliggend in die ge-affekteerde areas van | Kobus de Villiers | The location of the landowner's property is acknowledged, |
| | Fase 1, 2 & 3. | Landowner | and the property details were requested to determine the |
| | | | locality of his property in relation to the proposed |
| | Translation: | Reg&Comm Form: 23 July | developments. |
| | I own properties adjacent to the affected area of Phase 1, 2 & 3. | 2022 | |

| We are aware of proposed Hydra B Cluster of Renewable Energy | Rohaida Abed | Please receive herewith confirmation that you and Ms Hele |
|---|-----------------------------|---|
| Facilities near Philipstown in the Northern Cape (21 Solar PV | Senior Environmental | Antonopoulos have been registered on the above project |
| Facilities). | Assessment Practitioner | database. |
| | CSIR | |
| The Environmental Management Services (EMS) group of the CSIR | | Savannah Environmental's registration on the Kudu Sol |
| is also undertaking Environmental Assessment processes for the | E-mail: 02 September 2022 @ | Facility cluster is acknowledged. |
| proposed Kudu Solar Facility cluster in the vicinity. Here is a link to | 09h21 | |
| the Background Information Document for additional | | A Request was lodged for the .kmz file for the Kudu Sol |
| information: | | Facility. |
| Would it be possible to please register myself and Helen | | |
| Antonopoulos on the project database of I&APs? | | |
| Please see our email addresses below: | | |
