ANNEXURE B1

PUBLIC PARTICIPATION

- Details of Public Participation Process Undertaken to Date

THE PUBLIC PARTICIPATION PROCESS

The purpose of this Chapter is to provide an outline of the Public Participation Process, a summary of the process undertaken to date, and the way forward with respect to public participation as part of the EIA Phase of this project.

INTRODUCTION

Consultation with Interested and Affected Parties (I&APs) forms an integral component of an Environmental Impact Assessment (EIA) process (see **Figure 1.2** of the Final Environmental Impact Assessment Report (EIAR)) and enables *inter alia* directly affected landowners, neighbouring landowners, stakeholders, communities and interested parties to identify the issues and concerns relating to the proposed activity, which they feel should be addressed in the process. The approach to this public participation process, summarised in the Plan of Study for EIA (Chapter 5 of the Final Scoping Report (FSR)), has taken cognisance of the Department of Environmental Affairs and Tourism Guideline on Stakeholder Engagement (2002).

Public participation, as required in terms of the EIA Regulations can, in general, be separated into the following phases:

Comment on Draft and Final Reports

During the Scoping and EIA Phases, registered I&APs are provided with an opportunity to comment on draft and final versions of the reports. This is enabled by the lodging of the reports at suitable locations for review and invitations to public meetings/open houses to discuss the content of the relevant report.

Decision and Appeal period

This is the final phase of the public participation process. Once the competent authority has made their decision and issued an Environmental Authorisation, the applicant and I&APs are notified of the decision and have the opportunity to appeal to the national Minister of Water and Environmental Affairs, within the stipulated timeframes.

Progress with respect to these various stages for the current project is discussed in more detail below. It should be noted that the public participation process developed for this investigation meets the minimum requirements of the National Environmental Management Act (Act 107 of 1998) (NEMA).

All public participation related information is included in **Annexure B** of the Draft and Final EIAR.

SUMMARY OF THE PUBLIC PARTICIPATION PROCESS TO DATE

Initiation of the public participation process

The approach adopted for the current investigation was to identify as many I&APs as possible initially, through a suite of activities, as follows:

- Placing advertisements in local newspapers (the Gemsbok);
- Placing a notice board at the site;
- Providing written notice and an Executive Summary to potential I&APs, including surrounding landowners, organs of state, ward councillors and relevant authorities;
- Informing I&APs registered for existing EIAs, being run by Aurecon, in the area about the project and providing them with an opportunity to register for this project as well; and
- Requesting potential I&APs to recommend other potential I&APs to include on the database (chain referral process).

The I&AP database compiled during the 2012 EIA process for PV1 on farm Hoekplaas served as the baseline I&AP register for this EIA process. This database would be augmented via chain referral during the EIA process, and would be continually updated as new I&APs are identified throughout the project lifecycle. The sectors of society represented by I&APs on the database are listed below. The current list of I&APs, comprising approximately 70 individuals and organisations, is included in **Annexure B**. The sectors of society represented by I&APs on the database are listed below.

- National Government;
- Provincial government (Northern Cape);
- Local government (Siyathemba LM and Pixly ka Seme District Municipality);
- Organised agriculture;
- Business/Commerce;
- Industry;
- Scientific and research based organisations;
- Local landowners; and
- Local communities and other community based organisations in the project area.

Advertising in local newspapers

Advertisements for the EIA process appeared in a local newspaper, the Gemsbok, on 26 April 2013. The content of the advertisements are included in **Annexure B**, as well as copies thereof.

Site notices

A site notice was placed on site at the site entrance. The notice provided a description of the proposed activities and EIA process, and invited members of the public to register as I&APs,

and raise any initial issues or concerns. The content as well as photographs of the site notice is included in **Annexure B**.

Public participation related to the Scoping Phase (DSR)

The public participation process was initiated at the Draft Scoping Report Phase and the I&APs were notified of the DSR and associated comment period in the following way:

- Placement of advertisements in a local newspaper, the Gemsbok, notifying the broader public of the initiation of the EIA and inviting them to register as I&APs from 26 April 2013;
- Erection of a site notice at the entrance to Farm Hoekplaas on 25 April 2013;
- Lodging the DSR at Prieska (Elizabeth Vermeulen) Public Library, Ietznietz Guest House in Copperton and on the Aurecon website from 30 April 2013. All registered I&APs were notified of the availability of the DSR by means of a letter sent by fax, post and/or e-mail on 23 April 2013. The notification letters also included a copy of the Executive Summary of the DSR in English and Afrikaans; and
- I&APs had 40 days, until 10 June 2013, to submit their written comments on the DSR;
Cognisance was taken of all comments when compiling the final report, and the comments, together with the project team and proponent's responses thereto, were included in final report.

Public participation related to the Scoping Phase (FSR)

Based on the comments received on the DSR during the 8 November 2011 to 9 January 2012 public comment period the DSR was updated and called the FSR. The second stage of the PPP involved the lodging of the FSR for review and comment at the same locations as the DSR.

- I&APs were provided with 21 calendar days to comment on the FSR between 23 July 2013 and 12 August 2013.
- Registered I&APs were informed of the FSR public comment period via a letter dated 15 July 2013 which was emailed or posted. An Executive summary together with an update page in English and/or Afrikaans was also emailed or posted to registered I&APs which highlighted the key changes made to the DSR as a result of the 40 day public comment period.

Issues and concerns raised during the scoping phase

Issues were submitted during the DSR comment period from 8 November 2011 until 9 January 2012 and FSR comment period from 18 January 2012 to 7 February 2012. Comments and concerns raised by I&APs (with regards to the proposed activities) have been incorporated into CRR 1 (see **Annexure B** of the FSR) and CRR 2 (see **Annexure B** of the Final EIAR) which summarise all the issues and concerns raised by I&APs during the Scoping Process, and provide the project team and proponent's response thereto. The

issues raised by I&APs to date relates to heritage, water use, the transmission servitude and Square Kilometer Array.

Public participation related to the EIA phase (Draft EIAR)

The Draft EIAR was lodged in Prieska (Elizabeth Vermeulen) Public Library, Ietznietz Guest House in Copperton and on the Aurecon website (www.aurecongroup.com - change "Current Location" to "South Africa" and follow the Public Participation link).

All registered I&APs was notified of the availability of the Draft EIAR by means of a letter sent by post, fax or e-mail on 16 September 2013 (see **Annexure B**). The notification letters also included a copy of the Executive Summary in English and Afrikaans.

I&APs had 40 days, from 16 September 2013 until 29 October 2013, to submit their written comments on the DEIR. Cognisance was taken of all comments in compiling the final report, and the comments, together with the project team and proponent's responses thereto, have been included in the final report. Where appropriate, the report has been updated.

Public participation related to the EIA phase (Final EIAR)

The report has been updated in light of the comments received during the 40 day public comment period on the Draft EIAR and is now called the Final EIAR. Comments were received from the South African Heritage Resource Agency and Eskom (**Annexure B** of the Final EIAR).

The Final EIAR has been made available for review at the same locations as the Draft EIAR for a further 21 day public comment period from **22 November 2013 to 12 December 2013**. Comments received on the Final EIAR will not be included in a Comments and Response Report but will instead be collated and forwarded directly to the Department of Environmental Affairs (DEA).

Please direct all comments to:

Aurecon

P O Box 494, Cape Town, 8000

Tel: (021) 526 6022

Fax: 086 723 1750

Email: Nomvelo.Siwela@aurecongroup.com

REVIEW AND DECISION PERIOD

The Final EIAR will be submitted to DEA for their review and decision-making. DEA must, within 60 days, do one of the following:

- Accept the report;
- Notify the applicant that the report has been referred for specialist review;
- Request amendments to the report; or
- Reject the report if it does not materially comply with regulations.

If the report is accepted, DEA must within 45 days:

- Grant authorisation in respect of all or part of the activity applied for; or
- Refuse authorisation in respect of all or part of the activity.

Once DEA issues their decision on the proposed project, all registered I&APs on the project database will be notified of the outcome of the decision within 12 calendar days of the Environmental Authorisation having been issued. Should anyone (a member of public, registered I&AP or the Applicant) wish to appeal DEA's decision, a Notice of Intention to Appeal in terms of Chapter 7 of the EIA Regulations (GN No. 543) in terms of NEMA must be lodged with the Minister of Water and Environmental Affairs within 20 calendar days of the decision being issued and the substantive Appeal must be lodged within 30 days of the Notice.

BESKIKBAARHEID VAN DIE KONSEP OMGEWINGSINVLOEDBEPALINGVERSLAG VIR KOMMENTAAR

Ons vorige skrywe, gedateer 15 Julie 2013, aangaande die beskikbaarstelling van die Finale Omvangbepalingverslae (OBV) vir die beoogde fotovoltaïese son-energie aanlegte op die plase Klippgats Pan (Gedeelte 4 van Plaas 117) en Hoekplaas (Restant van Plaas 146) naby Copperton in die Noord-Kaap vir kommentaar, het betrekking.

Die Finale OBVs vir Klippgats Pan en Hoekplaas is onderskeidelik op 21 Augustus en 2 September 2013 deur die Departement van Omgewingsake goedgekeur en dus kan die Omgewingsinvloedbepaling (OIB)-fase voortgaan. Die Konsep OIBs is saamgestel en sal beskikbaar wees vanaf **27 September 2013 tot en met 5 November 2013** vir oorsig en kommentaar. Vir u gerief is afskrifte van die Uitvoerende Opsommings vir u by die skrywe ingesluit.

Let asseblief daarop dat die volgende twee aansoeke teruggetrek is na aanleiding van die bevindinge in die spesialisverslae:

- PV11 op Hoekplaas; en
- PV4 op Klippgats Pan.

Die Konsep OIBs sal beskikbaar wees by die Prieska (Elizabeth Vermeulen) Openbare Biblioteek, die letznietz Gastehuis in Copperton en op Aurecon se webblad (www.aurecongroup.com) – kies "South Africa" as die "Current Location", en volg die "Public Participation"-skakel).

Indien u enige kommentaar wil lig oor die beoogte projekte, kontak asseblief vir **Nomvelo Siwela** of **Franci Gresse** van Aurecon voor of op **5 November 2013**.

**AVAILABILITY OF THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORTS FOR
 COMMENT**

Our correspondence of 15 July 2013 regarding the availability of the Final Scoping Reports (FSRs) for comment for the above mentioned proposed photovoltaic (PV) solar energy facilities on farms Klipgats Pan (Farm No. 117, Portion 4) and Hoekplaas (Remainder of Farm No. 146) near Copperton in the Northern Cape has reference.

The Department of Environmental Affairs (DEA) approved the FSRs on 21 August and 2 September 2013 (respectively for Klipgats Pan and Hoekplaas) and indicated that the projects could proceed to the Environmental Impact Assessment (EIA) Phase. The Draft EIA Reports (EIRs) were compiled and will be available for review and comment from **27 September 2013 to 5 November 2013**. For ease of reference, we have enclosed the Executive Summaries of the Draft EIRs.

Please note that the applications for the following two proposed facilities have been retracted based on the findings of the specialist assessments:

- PV11 on Farm Hoekplaas; and
- PV4 on Farm Klipgats Pan.

The Draft EIRs have been made available at the Prieska (Elizabeth Vermeulen) Public Library, Letznietz Guest House in Copperton and on Aurecon's website (www.aurecongroup.com - change "Current Location" to "South Africa" and follow the Public Participation link).

If you would like to comment on the Draft EIRs, please submit your comments to Nomvelo Siwela or Franci Gresse of Aurecon on or before **5 November 2013**.

AVAILABILITY OF THE FINAL ENVIRONMENTAL IMPACT ASSESSMENT REPORTS FOR PUBLIC COMMENT

Our previous correspondence dated 19 September 2013 informing you of the availability of the Draft Environmental Impact Assessment Reports (EIARs), has reference. This letter serves to notify you of the availability of the Final EIARs for the above-mentioned projects, and to invite you to submit comments or concerns regarding these projects to Aurecon.

The Final EIARs will be available from **22 November 2013 until 12 December 2013** for a 21-day review period at Prieska (Elizabeth Vermeulen) Public Library, Letznietz Guest House in Copperton and on the Aurecon website (www.aurecongroup.com – please change the current location to "South Africa" and follow the "Public Participation"-link).

Enclosed please find the Update Pages highlighting changes made from the Draft to the Final EIARs for your information. If you would like to obtain more information, submit any comments or register as an Interested and Affected Party, please contact **Nomvelo Siwela** or **Franci Gresse** of Aurecon on or before **12 December 2013**.

EIA project team	Nomvelo Siwela	Franci Gresse
Telephone number:	021 526 6025	021 526 6022
Facsimile number:	021 526 9500	021 526 9500
Email address:	nomvelo.siwela@aurecongroup.com	franci.gresse@aurecongroup.com
Postal address:	PO Box 494, Cape Town, 8000	PO Box 494, Cape Town, 8000

If you are the landowner, but not the occupier of the property, please inform the occupier of the land on which the proposed project is located or advise us of their contact details so that we may do so.

Yours sincerely,
 Aurecon

**AVAILABILITY OF THE FINAL ENVIRONMENTAL IMPACT ASSESSMENT REPORTS FOR
COMMENT**

Our previous correspondence, dated 23 September 2013, notifying the Department of the commencement of the comment period on the Draft Environmental Impact Assessment Reports (EIARs) for the above-mentioned projects, has reference. The Final EIARs have been compiled and are available for public comment from **22 November 2013 until 12 December 2013 for a period of 21 days. Please find enclosed one electronic copy for your review.** We respectfully request that you please submit the Department's comments to the undersigned on/ before **12 December 2013.**

Should you require any further information or have any queries please contact the undersigned.

Yours sincerely

Mulilo Renewable Energy (Pty) Ltd proposes to construct 11 x 75 MW photovoltaic (PV) solar energy plants on the farm Hoekplaas (Farm 146/RE) near Copperton in the Northern Cape. Electricity would be evacuated via a new 132 kV transmission line to the Kronos substation. Associated infrastructure would include, amongst others, boundary fences, substations, internal farm road upgrades and transmission lines.

The Draft Scoping Report (DSR) is available for a 40 day comment period from **30 April 2013 until 10 June 2013** at the Prieska (Elizabeth Vermeulen) Public Library, letznietz Guest House in Copperton and on the Aurecon website (www.aurecongroup.com) - indicate "Current Location" as "South Africa" and follow the Public Participation link).

The proposed project is listed in terms of the National Environment Management Act (NEMA) (No. 107 of 1998). As such authorisation from the competent environmental authority, namely the Department of Environmental Affairs, via the Environmental Impact Assessment (EIA) process (GN No. R544 of 18 June 2010) is necessary. The proposed projects trigger activities in terms of GN No. 544, GN No. 546 and GN No. 545 published in terms of NEMA.

Aurecon (Pty) Ltd (Aurecon) has been appointed to undertake the required EIA process. Notice is hereby given of the commencement of a public participation process in terms of the NEMA EIA Regulations 2010. The applications for the above-mentioned project have been submitted to the competent authority (DEA in terms of these Regulations).

If you would like to receive more information, raise issues or concerns or register as an interested and affected party, please contact Aurecon by **10 June 2013** at:

T (021) 526 6025, F (021) 526 9500

Mulilo Renewable Energy (Pty) Ltd beoog die ontwikkeling van ses (6) 75 MW fotovoltaïese sonenergie-aanlegte op Klippats Pan (Plaas 117/4) wat naby Copperton in die Noord-Kaap geleë is. Elektrisiteit sal by wyse van 'n nuwe 132 kV verbinding na die Kronos-substasie gelei word. Bykomende infrastruktuur sluit in, onder andere, die omheining van die aanlegte, substasies, opgradering van interne plaas paaie en konstruksie van transmissielynne.

Die Konsep Omvangbepalingverslae (OBV) is beskikbaar vir 'n kommentaar periode van 40 dae vanaf **30 April 2013 tot 10 Junie 2013** en kan besigtig word by die Prieska (Elizabeth Vermeulen) Openbare Biblioteek, letznietz Gastehuis te Copperton en op Aurecon se webwerf (www.aurecongroup.com) - dui "Current Location" aan as "Suid-Afrika" en volg die "Public Participation"-skakel).

Die beoogde projek is 'n gelyste bedrywigheid kragtens die Wet op Nasionale Omgewingsbestuur (WNOB) (Nr. 107 van 1998), en verg dus 'n magtiging van die bevoegde owerheid, naamlik die Departement van Omgewingsake, na afloop van 'n Omgewingsinvloedbepalingsproses (OIB) soos uiteengesit in GK Nr. R544 van 18 Junie 2010). Die beoogde projekte het bedrywighede van GK Nr. 544, GK Nr. 545 en GK Nr. 546, soos afgekondig in terme van die WNOB, tot gevolg.

Aurecon (Edms) Bpk (Aurecon) is aangestel om die vereiste OIB-proses uit te voer.

Kennis geskied hiermee van die aanvang van die proses van openbare deelname kragtens die WNOB se OIB-regulasies 2010. Die aansoek vir die bogenoemde projek is in terme van die Regulasies ingedien by die DOS.

Indien u enige verdere inligting verlang, kwessies of kwellinge wil identifiseer of as 'n belanghebbende en geaffekteerde party wil registreer, kan u met Aurecon in verbinding tree teen **10 Junie 2013** by:

Mulilo Renewable Energy (Pty) Ltd beoog die ontwikkeling van 11 x 75 MW fotovoltaïese sonenergie-aanlegte op Hoekplaas (Plaas 146/RE) wat naby Copperton in die Noord-Kaap geleë is. Elektrisiteit sal by wyse van 'n nuwe 132 kV verbinding na die Kronos-substasie gelei word. Bykomende infrastruktuur sluit in, onder andere, die omheining van die aanlegte, substasies, opgradering van interne plaas paaie en konstruksie van transmissielynne.

Die Konsep Omvangbepalingverslae (OBV) is beskikbaar vir 'n kommentaar periode van 40 dae vanaf **30 April 2013 tot 10 Junie 2013** en kan besigtig word by die Prieska (Elizabeth Vermeulen) Openbare Biblioteek, letznietz Gastehuis te Copperton en op Aurecon se webwerf (www.aurecongroup.com) - dui "Current Location" aan as "Suid-Afrika" en volg die "Public Participation"-skakel).

Die beoogde projek is 'n gelyste bedrywigheid kragtens die Wet op Nasionale Omgewingsbestuur (WNOB) (Nr. 107 van 1998), en verg dus 'n magtiging van die bevoegde owerheid, naamlik die Departement van Omgewingsake, na afloop van 'n Omgewingsinvloedbepalingsproses (OIB) soos uiteengesit in GK Nr. R544 van 18 Junie 2010). Die beoogde projekte het bedrywighede van GK Nr. 544, GK Nr. 545 en GK Nr. 546, soos afgekondig in terme van die WNOB, tot gevolg.

Aurecon (Edms) Bpk (Aurecon) is aangestel om die vereiste OIB-proses uit te voer.

Mulilo Renewable Energy (Pty) Ltd proposes to construct 11 x 75 MW photovoltaic (PV) solar energy plants on the farm Hoekplaas (Farm 146/RE) near Copperton in the Northern Cape. Electricity would be evacuated via a new 132 kV transmission line to the Kronos substation. Associated infrastructure would include, amongst others, boundary fences, substations, internal farm road upgrades and transmission lines.

The Draft Scoping Report (DSR) is available for a 40 day comment period from **30 April 2013 until 10 June 2013** at the Prieska (Elizabeth Vermeulen) Public Library, Ietzniets Guest House in Copperton and on the Aurecon website (www.aurecongroup.com) - indicate "Current Location" as "South Africa" and follow the Public Participation link).

The proposed project is listed in terms of the National Environment Management Act (NEMA) (No. 107 of 1998). As such authorisation from the competent environmental authority, namely the Department of Environmental Affairs, via the Environmental Impact Assessment (EIA) process (GN No. R544 of 18 June 2010) is necessary. The proposed projects trigger activities in terms of GN No. 544, GN No. 546 and GN No. 545 published in terms of NEMA.

Aurecon (Pty) Ltd (Aurecon) has been appointed to undertake the required EIA process. Notice is hereby given of the commencement of a public participation process in terms of the NEMA EIA Regulations 2010. The applications for the above-mentioned project have been submitted to the competent authority (DEA in terms of these Regulations).

If you would like to receive more information, raise issues or concerns or register as an interested and affected party, please contact Aurecon by **10 June 2013** at:

1.	Kathryn Smuts SAHRA	Thank you for submitting the Final Scoping Report for this project. SAHRA notes that our request that a full Heritage Impact Assessment, inclusive of an Archaeological and Palaeontological Impact Assessment, be undertaken during the EIA phase is reflected in this report. We look forward to receiving these reports and will provide comment on them once they have been reviewed.	Copies of the archaeological and palaeontological impact assessments will be submitted to SAHRA for consideration during the Environmental Impact Assessment (EIA) phase. The findings and recommendations of these assessments will also be included in the EIA Report and Life-cycle Environmental Management Plan (LEMP).

PUBLIC PARTICIPATION PROCESS			
<i>Comments and Responses</i>			
No.	Name	Issue	Response
1.	John Geeringh, Eskom	<p>Eskom has long term plans for a possible second 400kV power line from Hydra to Kronos and from Kronos to Aries substation. Eskom is also busy with a study for a 765kV power line from Perseus substation at Dealesville to Kronos substation and then on to Aries substation to limit the risk of passing through the SKA area of concern. The 765kV line must go all the way down to Cape Town.</p> <p>These future plans must be taken into consideration during the planning of the layouts for the various PV developments at Klipgats Pan. The current layout is right next to the Kronos substation and makes any future expansion of the substation and line connections to the substation quite a challenge to Eskom. This may also however impact on Independent Power Producer (IPP) connections due to limited space and opportunity for evacuation of power.</p>	<p>The applicant, Mulilo Renewable Energies (Pty) Ltd (Mulilo) had a meeting with Eskom in May 2013 to discuss Eskom's expansion strategy and potential impacts on IPP connections.</p> <p>At this meeting it was confirmed that additional space had been allowed for in the project designs around the Eskom substation and existing servitudes. Further "buffer" contingencies were also allowed for in the layout sizes which would enable Mulilo to easily accommodate further alterations over the planned footprints should it be required</p>

COMMENTS AND RESPONSE REPORT 2

PUBLIC PARTICIPATION PROCESS			
<i>Comments and Responses</i>			
No.	Name	Issue	Response
		A 400kV servitude requires 55m width of land and a 765kV servitude requires 80m width. I do suggest that we set up a meeting between yourselves, Eskom's project managers working on the future planned projects, the developer and the Eskom planners, to ensure that all information is taken into consideration and to ensure Eskom's capabilities are not constrained in future. We would like to see an amiable solution for all parties involved. Please advice.	by Eskom. Mulilo requested that Eskom review the proposed layouts for PV2-7 and raise any comments or concerns that they may have on the proposed projects. Eskom was also asked to indicate if they foresee the need for additional servitudes in the future and provide any drawings or GIS data that could be incorporated early on in Mulilo's planning to avoid conflicts in the future.
2.	Jenna Lavin SAHRA	In January 2013, Environmental Authorisation was granted for the 100MW Hoekplaas PV1 Facility. The above studies were submitted in support of an additional 10 75MW PV facilities. Each proposed facility will consist of PV arrays, a 132kV transmission line, an onsite 132kV substation and a boundary fence. The proposed 10 PV facilities will share a central 132kV substation, access roads, water supply infrastructure, storm water infrastructure and buildings. An alternative of three PV facilities each with a capacity of 225MW, 290MW and 500MW respectively has also been proposed, known as Alternative 2. The above Heritage Impact Assessment (HIA) assessed all areas affected by Alternative 1, however not all of Alternative 2 was	Please note that the summarised description of the infrastructure requirements for the proposed PV facilities is somewhat inaccurate. Please refer to Section 3.1.1 of the EIAR (draft and final) for a detailed description of these components. For additional information on potential impacts on heritage and palaeontological resources see Section 5.6 of the EIAR. The HIA and PIA are available in Annexure C.

		4. The LSA site situated in the lay-down area must not be impacted by the proposed development. If this is not possible, the site must be mitigated as per the recommendations in the HIA.	The LSA site would be demarcated and treated as a no-go area. However, should it be found during construction that the site cannot be avoided the mitigation measures identified by the HIA will be implemented to address potential risks to the site (see Section 5.6 and Annexure C of the EIAR).
		5. The PV4 development area closest to the HKP2011/002 MSA site must be mitigation by means of test excavations. A permit from SAHRA in terms of Section 35 of the NHRA is required for this action	Noted. This is in accordance with the mitigation measures proposed in Section 5.6.3 of the Final EIAR. A permit would also be applied for from SAHRA in terms of Section 35 of the NHRA.
		6. Once the final layouts of the power lines and access roads have been established, it must be determined whether or not significant heritage resources will be impacted by the development. If significant sites are impacted, these must be mitigated as per the recommendations in the HIA.	A survey would be undertaken by the heritage specialist prior to construction once the final layouts for transmission lines and additional internal access roads have been determined. These layouts would also take into consideration all sensitive heritage features identified by the HIA. Should impacts on these features be unavoidable, mitigation

Proposed Construction of 10 PV plants on Hoekplaas Farm (Remainder of Farm No. 146), Copperton, Northern Cape

Thank you for submitting the Final Scoping Report for this project. SAHRA notes that our request that a full Heritage Impact Assessment, inclusive of an Archaeological and Palaeontological Impact Assessment, be undertaken during the EIA phase is reflected in this report.

We look forward to receiving these reports and will provide comment on them once they have been reviewed.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

To: Simon Clark; Nomvelo Siwela
Subject: FW: MULILO Developments at Kronos substation

Hi Simon and Nomvelo

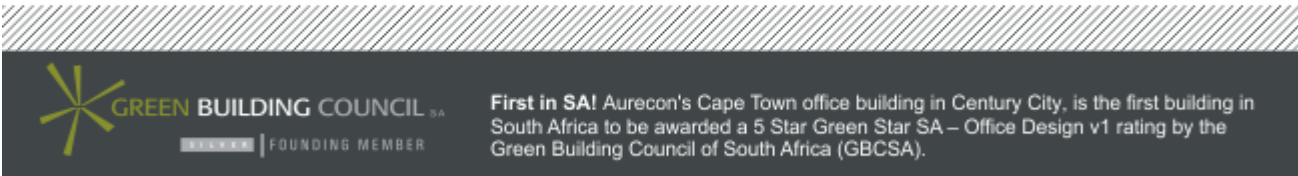

Please see the comment below from Eskom. We can include this in the Final EIAR's CRR. Please save in the correct file. Also, Warren has indicated that he will respond directly to Eskom, so we're waiting for his response.

Thanks
Franci

Subject: MULILO Developments at Kronos substation

KLIPGATS PAN DEVELOPMENTS PV 2- PV 7
DEA REFERENCE NUMBERS 14/12/16/3/3/2/486-491 HAS REFERENCE:

Eskom has long term plans for a possible second 400kV power line from Hydra to Kronos and from Kronos to Aries substation. Eskom is also busy with a study for a 765kV power line from Perseus substation at Dealesville to Kronos substation and then on to Aries substation to limit the risk of passing through the SKA area of concern. The 765kV line must go all the way down to Cape Town. These future plans must be taken into consideration during the planning of the layouts for the various PV developments at Klipgats Pan. The current layout is right next to the Kronos substation and makes any future expansion of the substation and line connections to the substation quite a challenge to Eskom. This may also however impact on IPP connections due to limited space and opportunity for evacuation of power. A 400kV servitude requires 55m width of land and a 765kV servitude requires 80m width. I do suggest that we set up a meeting between yourselves, Eskom's project managers working on the future planned projects, the developer and the Eskom planners, to ensure that all information is taken into consideration and to ensure Eskom's capabilities are not constrained in future. We would like to see an amiable solution for all parties involved. Please advise.

Final Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Aurecon - Cape Town
1 Century City Drive, Waterford Precinct, Century City
P.O Box 1347, Cape Town 8000

Proposed Construction of 10 PV plants on Hoekplaas Farm (Remainder of Farm No. 146), Copperton, Northern Cape

Orton, J. and Webley, L. October 2013. *Heritage Impact Assessment for multiple Proposed Solar Energy Facilities on Farm Hoekplaas 146*

Almond, J. July 2013. *Palaeontological Specialist Assessment: Combined Desktop & Field Assessment Study for multiple Proposed Solar Energy Facilities on Farm Hoekplaas 146*

In January 2013, Environmental Authorisation was granted for the 100MW Hoekplaas PV1 Facility. The above studies were submitted in support of an additional 10 75MW PV facilities. Each proposed facility will consist of PV arrays, a 132kV transmission line, an onsite 132kV substation and a boundary fence. The proposed 10 PV facilities will share a central 132kV substation, access roads, water supply infrastructure, storm water infrastructure and buildings. An alternative of three PV facilities each with a capacity of 225MW, 290MW and 500MW respectively has also been proposed, known as Alternative 2.

The above HIA assessed all areas affected by Alternative 1, however not all of Alternative 2 was assessed due to dense vegetation cover. According to the HIA, archaeological resources were widespread across the study area with higher densities of archaeological material associated with the margins of pans and hills. Earlier, Middle and Later Stone Age material was identified, including a number of handaxes, however most of the background scatter is Middle Stone Age in origin. One significant Middle Stone Age site was identified at the Borrow Pit. This site has been excluded from the proposed layouts. Historical sites were absent from the project area except for two small fragments of glass and ceramic. No structures or graves were identified in the study area. In addition, the study area is essentially unmodified except for a few gum trees that are indicative of human intervention. The proposed development area straddles the R357, however the visual impact of the proposed development is low as this road does not have a heavy traffic load and therefore visual receptors are at a minimum.

According to the HIA, the well-defined pans have a 90m buffer zone of no development. The archaeological sites identified along the margins of the pans will therefore not be impacted by the proposed development. A number of archaeological sites were identified along an ephemeral watercourse in the PV3 project area. One Later Stone Age site was identified in a proposed lay-down area and a very dense background archaeological scatter was identified in the PV11 project area. In addition, construction in the northern-most section of the PV4 project area will likely impact on the Middle Stone Age site identified as (HKP 2011/002). Some of the identified sites fall within the proposed corridors identified for linear infrastructure. Finalisation of the layouts of

an agency of the
Department of Arts and Culture

powerlines and roads will determine if these sites will be impacted.

According to the palaeontological impact assessment, the study area is largely underlain by Permo-Carboniferous glacial sediments of the Dwyka Group that overlie Precambrian granitoid basement rocks of the Namaqua-Natal Metamorphic Province. Upper Dwyka bedrocks in the study area are poorly exposed and do not contain trace fossil assemblages, petrified wood or other fossil material. Important fossil remains have been recorded from Bundu Pan in the vicinity of the proposed development area. According to the PIA, if these remains are present, they are likely sparsely distributed. Based on this information, it is unlikely that the proposed development will impact on significant palaeontological material.

Final Comment

Alternative 1 is the preferred alternative. Based on the submitted information, SAHRA has no objection to the proposed development on condition that;

1. The 90m buffer zone around the pans is enforced.
2. PV 11 is not developed as it will negatively impact on significant archaeological resources. If this is not possible, the applicant must liaise with SAHRA as to the best way forward.
3. The two archaeological sites associated with the ephemeral watercourse in the PV3 development area must not be impacted by the proposed development. If this is not possible, the site must be mitigated as per the recommendations in the HIA.
4. The Later Stone Age site situated in the lay-down area must not be impacted by the proposed development. If this is not possible, the site must be mitigated as per the recommendations in the HIA.
5. The PV4 development area closest to the HKP2011/002 MSA site must be mitigation by means of test excavations. A permit from SAHRA in terms of Section 35 of the NHRA is required for this action.
6. Once the final layouts of the power lines and access roads have been established, it must be determined whether or not significant heritage resources will be impacted by the development. If significant sites are impacted, these must be mitigated as per the recommendations in the HIA.
7. Should any evidence of archaeological sites or remains (e.g., remnants of stone-made structures, indigenous ceramics, bones, **stone artefacts**, **ostrich eggshell fragments**, marine shell and charcoal/ash concentrations), unmarked human burials, **fossils** or other categories of heritage resources are found during the proposed activities, SAHRA APM Unit (Jenna Lavin/Colette Scheermeyer 021 462 4502) must be alerted immediately, and a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contacted as soon as possible to inspect the findings. If the newly discovered heritage resources prove to be of archaeological or palaeontological significance a Phase 2 rescue operation might be necessary.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Nomvelo Siwela
PO Box 494
CAPETOWN
8000

Attention: Mr. N. Siwela

The proposed project involves the construction of photovoltaic energy plants and associated infrastructure on the farms Hoekplaas and Klipgats Pan near Copperton in the Northern Cape.

The Department of Agriculture, Land Reform and Rural Development is guided by Act 43 of 1983.

With the development of the abovementioned activities the developer must comply with Act 43 of 1983 and also take care of the following:

Article 7.(3)b of Regulation 9238: CONSERVATION OF AGRICULTURE RESOURCES, 1983 (Act 43 of 1983)

Utilisation and protection of vleys, marshes, water sponges and water courses

7.(1) "..... no land user shall utilize the vegetation in a vlei, marsh or water sponge or within the flood area of a water course or within 10 meters horizontally outside such flood area in a manner that causes or may cause the deterioration of or damage to the natural agriculture resources."

(3)(b) "cultivate any land on his farm unit within the flood area of a water course or within 10 meters horizontally outside the flood area of a water course"

Take also care of the following: who is the current landowner, will it be a subdivision of land or a lease contract between the developer and the landowner?

Rezoning will also be applicable because the land use will change from the current agricultural status.

The Department of Agriculture, Land Reform and Rural Development foreseen no problems in the development as mentioned above as long as the developer adheres to the articles of Act 43 of 1983

Please contact the undersigned if any additional information is required.

Thank you

Dear Ms Gresse,

**Re: Development of PV2 – PV11 Photovoltaic Solar Energy Plants on the farm Hoekplaas, near
Copperton**

A high level risk assessment was conducted for the above mentioned photovoltaic electricity generation facilities, based on the distance to the nearest SKA station and information currently available on detailed designed of PV facilities. The results of the assessment show that the integrated risk posed by multiple PV facilities that are in close proximity could result in a medium to high detrimental risk to the SKA project. Furthermore, the SKA project office in a letter sent to Aurecon South Africa (Pty) Ltd aimed at communicating these results suggest that an Electromagnetic Interference (EMI) study be conducted in order to scientifically validate the impact these PV facilities could have on the SKA project and also to assist with setting up the required mitigation measures.

Mulilo Renewable Energy in the Response to Comment: Report 1 of the final environmental impact assessment report have committed themselves to finding mitigation solutions to ensure that both projects succeed. They have not, however, explicitly committed themselves to conducting EMI studies prior to commencement of any development. Nor have the explicitly committed themselves to complying with the protection requirements of the SKA, but instead only commit to working with the SKA. EMI studies need to be conducted prior to construction so as to inform the detailed design of the facility to ensure that appropriate mitigation measures that meet SKA requirements in terms of EMI emission level are set in place. EMI studies can conducted and modelled based on similar existing facilities.

The SKA Project Office requires a firm commitment from Mulilo Renewable Energy stating that once the detailed design of the facility is finalised and the projects are awarded preferred bidder status, they will in consultation

SKA SOUTH AFRICA
SQUARE KILOMETRE ARRAY

with SKA project office conduct EMI studies prior to any construction taking place. Furthermore, the SKA Project Office requires that all protection requirements for the SKA will be complied with by Mulilo Renewable Energy should construction take place, regardless of the outcomes of the EMI studies. This could either form part of the Environmental Management Plan, or the Environmental Authorisation.

Regards,

Dr. Adrian Tiplady
