

Annexure B
Landowner Identification

Landowner Identification Process

According to Section 39 of the 2014 Environmental Impact Assessment (EIA) Regulations (GN R982 of 2014) (as amended) pursuant to the National Environmental Management Act (Act 107 of 1998), the proposal of linear infrastructure is excluded from requiring written landowner consent. However, ongoing landowner consultation is critical for the successful implementation of the proposed Grid Connection infrastructure, provided the necessary legal requirements are met. With linear infrastructure, the refusal of one landowner (on a large portion of land) could have significant impact on the alignment.

Red Cap and Aurecon have therefore undertaken an extensive exercise of identifying and contacting more than 500 portions covered by the 2km corridor assessed for the Grid Connection; with Red Cap engaging directly with the landowners most likely affected. Identification of the adjacent landowners to this corridor have further added to the database. Furthermore, notification of landowners and occupiers of land to inform them of the application for environmental authorisation for the development proposed on that land, is an important part of the EIA process.

The following steps have been taken to identify landowners along the proposed development corridor:

- Red Cap have identified a potential preferred alignment within the corridor and have been engaging with these landowners since 2017, on an ongoing basis.
- Aurecon and Red Cap have undertaken extensive WinDeed searches and interaction with the Deeds Office and Surveyor General to obtain property information.
- Aurecon have engaged with farmers' and relevant agricultural associations to identify areas of limited information and have requested that they pass on the EIA notifications to their mailing lists and networks, asking farmers to register as interested and affected parties.
- Aurecon have contacted landowners and asked for any contact detail that they might have for their neighbours.
- A pre-application public comment period was undertaken (further detailed in Appendix C: Public Participation Report) which included three open house/ public meetings in August 2018 which presented an opportunity to engage with affected landowners. Subsequently Three public meetings were held during the Draft BAR comment period in May 2019, which presented an opportunity to engage with affected and adjacent landowners. The notification of this comment period included advertisements in a local and regional newspaper, as well as 12 site notices placed at various locations along the corridor.

Kindly note that all landowner and property details will be updated through the 30-day public comment period for the revised Draft Basic Assessment Report for the Grid Connection. The pages that follow, provide a table with a summary of the affected portions and owning entities followed by a range of zoomed in maps of the Grid Connection corridor with cadastral references. Should you wish to query property details or have any additional information that could assist in identifying the correct landowners for the listed properties, we request that you contact Mr. Charles Norman at Aurecon on 044 805 5433 or ppp@aurecongroup.com / Charles.Norman@aurecongroup.com .
