Dear Ms. Charlotte Venter,

Thank you very much for responding to the initial notification for the Atoll Modderfontein Prospecting Right Application, and for completing the Interested and Affected Parties (I&APs) Registration Form. Your comments are noted and will be included in the Issues and Responses Report (IRR) that will be submitted to the Department of Mineral Resources (DMR), together with the Basic Assessment Report (BAR). We have added you in the I&AP Database for this project you will be kept informed about this project as it progresses.

Should you have any further issues and/or concerns in this regard, please do not hesitate to contact us.

Kind regards,  
Zizo Siwendu.

EIMS Ref. 1048/BGW/bgw

(GP) 30/5/1/1/2 (10415) PR

**Objection against application for a prospecting right on a portion of portion 1 of the farm**

**Modderfontein 76 IR in the Gauteng Province, by Atoll Metal Recovery (Pty) Ltd.**

Further to your letter dated 27 January 2016, I wish to place the Rynsoord New Modder Residents Association (RANMRA) as an interested and affected party to the abovementioned prospecting rights application.

Please be advised that RANMRA hereby objects to this application based on the following reasons

1) No proper consultation with the community

To date the only consultation done with the community is an e-mail (e-mail is attached) sent to certain community members on your proposed prospecting application. Your company has not even called a community meeting to address us on your future plans for prospecting and mining in this area. Your letter makes mention of a public participation process which you intend to undertake. To date no such process has taken place. It would be safe to say that your public participation has been extremely poor.

It is our understanding that advertising of prospecting should have taken place in national newspapers, advertisements, notices or boards around the area. We have to date not seen any of the above. It would be appreciated if proof of any such advertising of your activities could be made available to us.

It is our view that adequate public participation has not been done. It would be appreciated if this process could be restarted and if sufficient time could be given to us in order to enable us to consider the application and provide our comments.

## 2) Environmental Management Plan

At this point it is not clear as to whether this plan has been drafted. Although at this stage your company is intent on just prospecting, the community does not understand the impact of issues on the environment that will hamper our right to a healthy environment. We need to understand what damage would be done to the environment in terms of environmental degradation, pollution, air quality, noise, water quality, dust and management of chemicals like Radon and your plan to address such matters.

Section 17(1)(C) of the Mineral Petroleum Resources Development Act states that

17(1) Subject to subsection (4) The Minister must grant a prospecting right if

C. The prospecting will not result in unacceptable pollution, ecological degradation or damage to the environment

## 3) Prospecting work program

We have as yet not have sight of your work prospecting work program.

And we remain unclear as to the details of your prospecting activity.

We reserve the right to comment fully once the above documents are made available to us.

## 4) Development of New Modder Extension 4

The proposed development of New Modder extension 4 which is planned to have around 900 homes and a density of 10 000 people would be seriously effected to the point of the development being at risk of taking off if your prospecting and thereafter mining right is agreed to. New Modder extension 4 is situated right next to your envisaged area of prospecting.

Your prospecting and potential mining may make this land uninhabitable for years to come, even though there is a dire need for housing developments in our country.

Should both activities (mining & housing development) take place side by side we would be creating a generation of people marred with health complications as a result of mining.

I would like to take this opportunity to further address concerns that our community have been having with the current activities that Atoll Mining has been engaged in.

1) Blasting

Your current activities have had elements of blasting. Last week Rynsoord was shaken with a huge tremor which in my opinion was related to blasting at your site. Your company does not notify us of when blasting will take place. Blasting has resulted in many homes being faced with walls that have been cracked due to your companies activities. TO date there has been no financial recourse to assist houses with the repair costs of this

2) Ownership of mine

Your current mining area has in the last few years changed ownership from Zimbiwa Dolomite to Group 5 and now to Atoll Mining. It is the same operation just ownership has changed. Initially agreements with Zimbiwa Dolomite and the community of Kingsway and Rynsoord to assist the neighboring areas with various issues were suitable to the community. Atoll mining has not kept to those agreements. At no stage were communities either consulted or informed of changes in ownership.

3) Labour

At this point your company does not benefit the Rynsoord area at all. There is not one person employed at your mine from this community. Being an area so close to your activities, this hardly seems reasonable. The Mineral Petroleum Resources Development Act makes mention of a Social and Labour Plan that would assist areas around the mining operation. It would be appreciated if your company could send us a copy of this plan.

4) Trucks

Trucks from your company have been driving through Mc Alpine street whose roads are limited to under 4 tons. This has caused damage to road infrastructure. Your trucks are operating without tarpaulin covers, hence dropping aggregate rocks, stones and sand on the road surfaces around our area. Due to no law enforcement on this matter, residents are hard done by with regards to costs for broken windscreens and accidents.

5) Security

Your mining area has not been secured with a fence. This has significantly increased our security efforts in that criminals have been coming through your mining area into our residential area and commit horrendous crimes. Once crimes are committed, these criminals run back into your mining area making our security efforts difficult and treacherous in pursuing the suspects.

6) Noise

Your company has continued to operate 24 hours day and night. There is a droning sound emanating from your machinery which is troubling residents particularly in the early hours of the morning. Please can we get clarity on whether your mining right permit allows your company to operate for 24 hours a day. It would be appreciated if you could provide us with written proof of your approval to operate 24 hours a day.

#### 7) RADON

The radioactive gas called Radon emits from areas where mining is taking place. Recent reports around the high levels of Radon in the East Rand is a significant cause of concern to our community. A recent report by the South African Atomic agency has stated that levels of Radon in the east rand is significantly higher than other parts of the country. Your company has to date not engaged, advised or assessed the level of Radon gas on your mining area which is right next to our residential area. Our concern is that pending a successful prospecting right application, your company would continue to mine and not be concerned around the health levels of the surrounding areas.

#### 8) Slimes dam

Our concern relates also to the rehabilitation of slimes dam next to your mining area. We are further concerned that should your rights be granted your company may further exacerbate the extent of the slimes dams next to your mining area, leaving our vulnerable residential area exposed to the negative impacts slimes dams that offer.

#### 9) Acid mine drainage

With the current problem of acid mine drainage in the east rand affecting ground water

We are of the opinion that should your rights be granted; your operations would further negatively affect the east rand.

We are of the further opinion that all mining activity on the east rand should be ceased pending a consolidated approach to the problem of acid mine drainage.

#### 10) Environment Impact Assessment

It would be appreciated if the EIA for your current activities be made available to our community. It would be further appreciated if we could understand what measures have been taken by your company in mitigating the issues identified in the EIA.

It is our view that granting of the application at this stage will be premature and we request the regional manager of the DMR not to grant the prospecting right application at this stage until such time that we have had an opportunity to fully investigate the application and to consult the residents directly.

In conclusion, I would like to state that the area of Rynsoord is a peaceful area that has been in existence for more than 50 years. We have been inundated with mining operations and the negative effects of mining for a long time. Companies have mined and then have neglected to rehabilitate areas that have been mined and thereafter disappear.

Good morning Mr. Esop,

Thank you for your comment in respect of the Atoll Modderfontein Prospecting Right application, and for completing the attached I&APs Registration Form. Questionnaire . With regard to your comment, please be advised that no invasive prospecting activities are planned for this project. As such, there are no predicted impacts on Health and Housing.

Should you have any further issues and/or concerns in this regard, please do not hesitate to contact EIMS.

Sincerely,  
Zizo Siwendu.

Hi John,

Thank you for your response in respect of the Atoll Modderfontein Prospecting Right Application. Please note that due to the fact that no invasive prospecting activities are planned, the only activity on site would be topographical and/or geotechnical surveys which would be undertaken on foot. As such, there are no predicted impacts on service infrastructure. I have attached a google earth kml of the application area as per your request.

Please kindly advise should you still wish for us to send you a copy of the available documentation on a CD and we will gladly do so.

Sincerely,  
Zizo Siwendu.
