Project Description and Location

Northam Platinum Limited Mine conducts mining, beneficiation, smelting and base metal removal processes at the Zondereinde Mine under the Zondereinde Mining Rights. Various associated infrastructures exist at the Zondereinde Mine to conduct these processes, all of which have been included in the approved EMP.

Rustenburg Platinum Mines Limited is the holder of the converted mining right (DMR Ref. No.: LP 48 MR), consisting of the sole and exclusive right to mine certain minerals in, on and under certain portions of inter alia the Sale Portion¹ i.e. Amandelbult Mining Right. Northam Platinum Mine and Rustenburg Platinum Mine have concluded a transaction in terms of which will, subject to the necessary approvals being granted, acquire from Rustenburg Platinum Mine the Sale Portion, which is presently held under the Amandelbult Mining Right.

Planned Activities:

- Underground mining is planned, with no surface infrastructure or expansions to existing facilities at the Zondereinde Mine.
 - Northam Platinum Mine plans to preferentially mine the Merensky and access to UG2 Reefs on the sale portion using the same underground infrastructure present at the Zondereinde Mine. The existing conveyor system will transfer the ore and waste from the Sale Portion to the Concentrator Plants and waste facilities respectively.
 - The mine plans to continue Merensky Reef production from the Zondereinde mine and the addition of the Sale Portion will enable the mine to maintain the production for at least 30 years.
 - The sale portion is vital, not as an expansion project, but as an extension project and as means of reducing operational risk.
 - No additional water abstraction will be required for the additional mining activities. Furthermore, no major water bearing fissures will be intersected in the foreseeable future and dewatering is not anticipated to increase due to the Additional mining activities.
- The plan outlined above is expected to provide for at least a 30 years Life of Mine at current production rates.
 - The underground mining activities are situated across the following farm portions:
 - A part of the remainder of farm Elandsfontein 386-KQ
 - A part of Ptn 1 of farm Elandsfontein 386-KQ
 - A part of Ptn 2 of farm Moddergat 389-KQ
 - A part of the remainder of farm Moddergat 389-KQ
 - A part of the remainder of farm Goevernements Plaats 417-KQ
 - A part of the remainder of Ptn 1 of farm Goevernements Plaats 417-KQ
 - A part of Ptn 2 of farm Goevernements Plaats 417-KQ
 - A part of the remainder of Ptn 3 of farm Goevernements Plaats 417-KQ

- Identify I&APs, and notify them of the proposed application, via adverts, notices, BIDs and identify and comments
- I&APs are provided with the opportunity to review documents and comments on these reports. Registered I&APs will be provided with 30 days to comment on the reports.
- Notify all registered I&APs of the Authorisation (positive or negative).

Be an Integral Part of the Environmental Impact Assessment Process

Public involvement is an essential part of any environmental assessment process. All comments will be recorded and presented to the project team and regulatory authorities. You will receive feedback on how your comments have been taken into account and the outcome of the assessment. You will further receive updates on the status of the project.

Dear Commenting Authority,

Attention: Tshepho Makutu (As per Attached Comments Received)

Prism Environmental Management Services (Prism EMS) has been appointed as the independent environmental assessment practitioner to undertake the above mentioned Environmental Authorisation process. As part of this process, the public review of the Draft Scoping Report took place between **15 March 2017 to 18 April 2017**. Copies of the Draft Scoping Report were delivered to your office to facilitate this public participation process.

We have received your request for extension dated 29 March 2017 and will happily provide an extension as we value your input into the process. Unfortunately, in terms of Section 21 of the Environmental Impact Assessment (EIA) Regulations, 2014 (GN 982 of 4 December 2014), Prism EMS **must** submit the Final Scoping Report to the Competent Authority within 44 days of submission of the application.

We can therefore offer a limited extension only.

Please can all comments related to the Draft Scoping Report for the Extension of Mining Right (DMR Ref: LP 30/5/1/3/2/1 (36) EM) be submitted to Ms. Candis Lubbe (candis@prismems.co.za) or Mrs. Vanessa Stippel (vanessa@prismems.co.za) by **Tuesday, 25 April 2017**.

We look forward to receiving your comments. Please feel free to contact me should you require any further information.

Importance: High

Good day Candis,

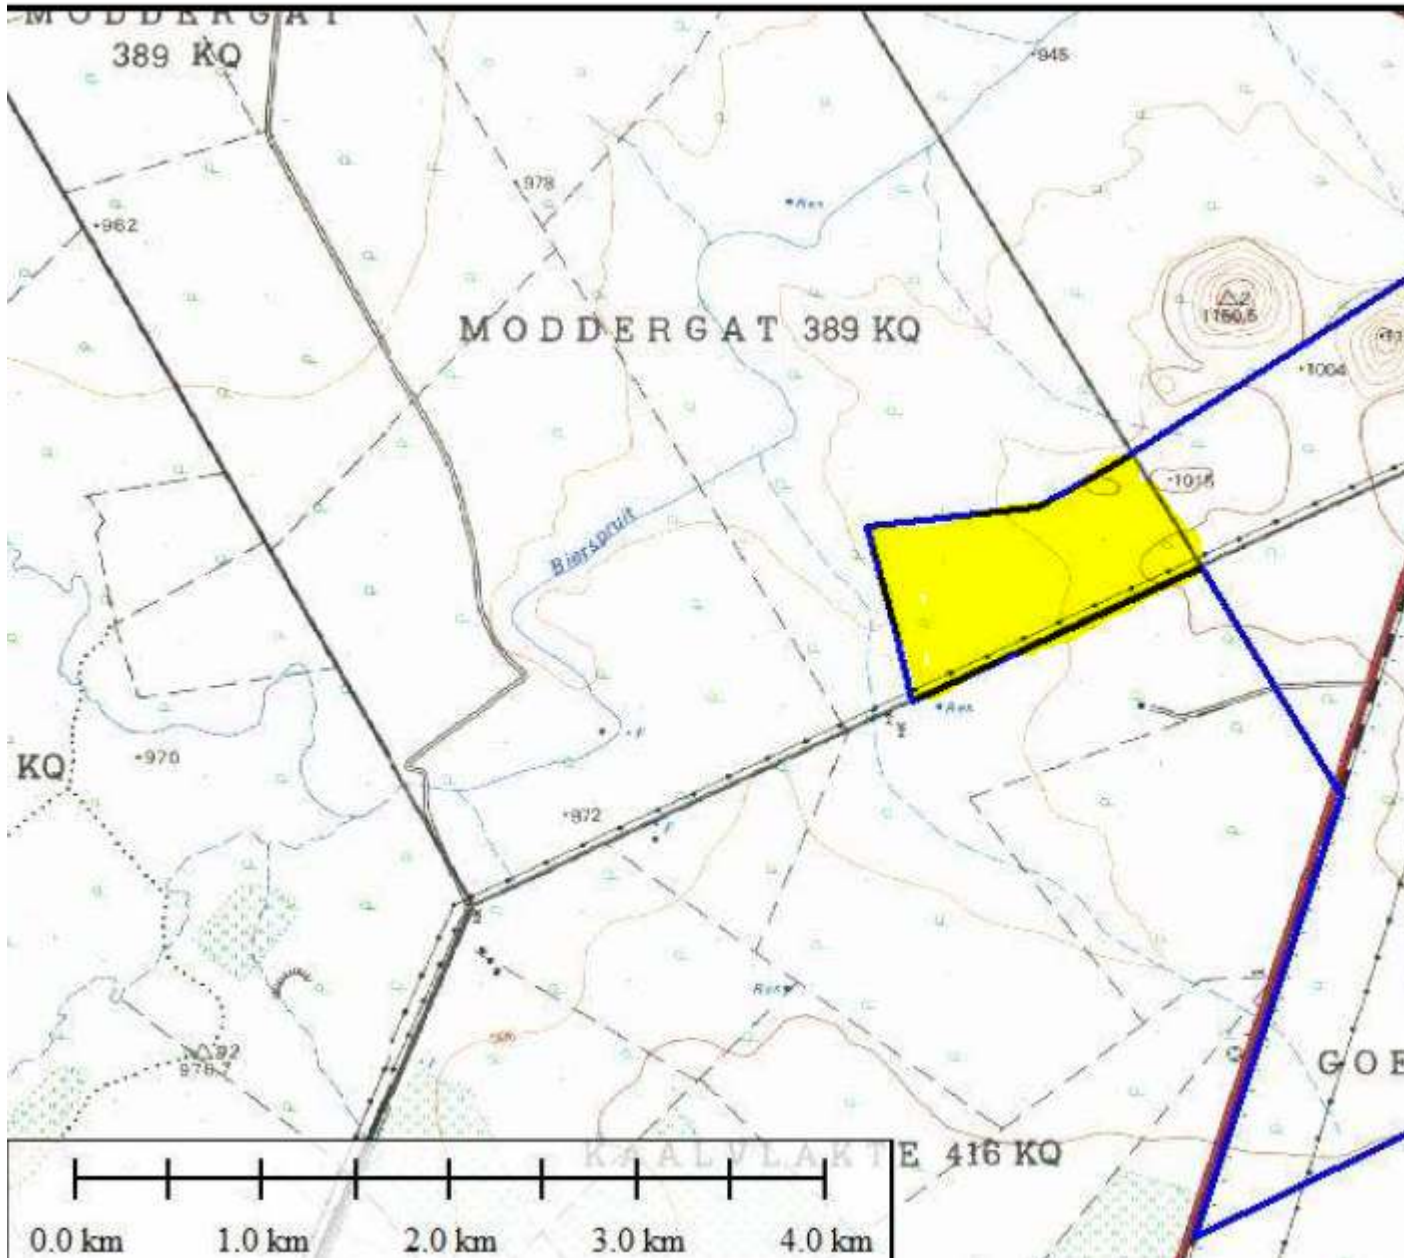

CRONIMET Mining Group would like to inform you about the ownership of the farm Moddergat 389KQ. CRONIMET Chrome Properties Ltd. is owner of the farm.

We would like to understand, if Northam Platinum is planning underground mining in the yellow area in the following screenshot?

CRONIMET has a processing plant approved on this farm and we want to make sure that Northam's mining activity is not influencing our farm from a geotechnical point of view.

Thanks for providing additional information.

Thanks!
