NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

FODERE TITANIUM ZERO WASTE RECOVERY SOLUTION AND ASSOCIATED INFRASTRUCTURE, MPUMALANGA PROVINCE

Applicant: Anglo African Metals (Pty) Ltd

Proposed Activity: The development a disruptive technology for the economic extraction of valuable minerals from mining ore and waste materials which process offers solutions for simultaneously extracting both vanadium and titanium oxides from slag materials. The technology developed will also extract aluminium as aluminium oxide (Al_2O_3), magnesium as magnesium oxide (MgO) and calcium as calcium sulphate/gypsum ($CaSO_4$). The plant will be primarily fuelled by Liquefied Petroleum Gas (LPG) and Sasol gas.

The main infrastructure associated with the facility includes the following:

- » Chemical plant area, where all process chemicals including acid are produced, stored and handled as required by the waste recovery process.
- » Substation and plant utility unit as interface and controlling unit for the electricity utilised by the plant during operation.
- » Slag stockpile.
- » Crushing plant.
- » Mill.
- » Product area for storage of the various products produced through the recovery process.
- » Reagent area, for the storage and handling of reactants utilised in the waste recovery process.
- » A security area.
- » Parking lot.
- » Admin and control room including offices and ablutions for staff.

Location: The waste recovery plant is proposed to be located on Portion 48 of Farm No. 309. The development area is contained within the EVRAZ Highveld Steel and Vanadium property. The site is accessible directly off the R104, from the N4 turnoff near Kwa-Guqa informal settlement, approximately 17km west of eMalahleni within the eMalahleni Local Municipality, Nkangala District Municipality, Mpumalanga Province.

Environmental Impact Assessment Process: In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with Government Notice R324 – R327, as amended, a Scoping and Environmental Impact Assessment (EIA) process is required for the Zero Waste Recovery Solution. Savannah Environmental is undertaking the required environmental assessment and public participation process for the project. An application for the project has been lodged with the Department of Environment, Forestry and Fisheries (DEFF), as the competent authority.

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT, ATMOSPHERIC EMISSION LICENCE & PUBLIC PARTICIPATION PROCESS

PROPOSED DEVELOPMENT OF A ZERO WASTE RECOVERY PLANT AND ASSOCIATED INFRASTRUCTURE NEAR KWA-GUQA, MPUMALANGA PROVINCE

Applicant: Anglo African Metals (Pty) Ltd.

Proposed Activity: The development of a Zero waste recovery plant and associated infrastructure for the extraction of valuable materials from a tailings/slag resource, located within the Highveld Industrial Park near eMalahleni. Associated infrastructure includes a chemical plant area, substation and plant utility unit, slag stockpile, crushing plant, mill, product area for storage of the various products produced, reagent area for the storage and handling of reactants utilised in the waste recovery process, fuel storage area with a fuel storage tank (or tanks, as required) of up to 70m³ for the bulk storage of gas (LPG or similar) utilised in the waste recovery process, a security area, parking lot and admin and control rooms including offices and ablutions for staff.

Location: Remaining Extent of the Farm Highveld Industrial Park Number 1230 JS, approximately 17 km west of eMalahleni town in the eMalahleni Local Municipality (LM) within the Nkangala District Municipality (DM) in Mpumalanga.

Impact Assessment Process: An Integrated Application for Environmental Authorisation (EA) in terms of the National Environmental Management Act (No. 107 of 1998) (NEMA) and a Waste Management License (WML) in terms of the National Environmental Management: Waste Act (No. 59 of 2009) is being undertaken for the project. A full Scoping and Environmental Impact Assessment (S&EIA) process is required in support of this application process. The S&EIA process will also support the future application for an Atmospheric Emission License (AEL) in terms of the National Environmental Management: Air Quality Act (No. 39 of 2004) (NEM:AQA), for subcategory 4:20 – recovery of metallurgical slag. Savannah Environmental is undertaking the required EIA and public participation process for the project.

Environmental Impact Assessment Report available for review: An EIA Report and associated appendices, and Atmospheric Impact Report (in support of the future AEL application) is available for download, view and comment on Savannah Environmental's website at: <https://www.savannahsa.com/public-documents/other/>. The 30-day review and comment period of the report is from **Friday, 16 April 2021** until **Tuesday, 18 May 2021**. The due date for written comment is **Tuesday, 18 May 2021**. To obtain further information, register on the project database and submit comments, please use the contact details below.

Consultation Meetings: Consultation meetings will be held with relevant I&APs and stakeholders via an appropriate forum during the review period. Should you wish to be included in these meetings or receive further information on the project please contact us as per the details below.

NOTICES! KENNISGEWINGS

SUBMISSION OF PRE-QUALIFYING COMPANY PROFILES FOR RENDERING OF SERVICES IN THE TRANSPORT OF MAGNETITE ORE FROM EVRAZ HIGHVELD STEEL TO BUSHVELD VANCHEM, eMALAHLENI. (Request no. BVP007/2021)

Interested parties are invited to submit their company profiles and the additional information, as listed below, for consideration by Bushveld Vanchem (Pty) Ltd as part of the scrutinising process in respect of the transportation of ore from Evraz Highveld Steel to Bushveld Vanchem Witbank, eMalahleni.

- The purpose of the project is to transport Magnetite ore from Evraz Highveld Steel to the Bushveld Vanchem plant in Witbank, eMalahleni. The estimated Tons of Ore to be transported per month is between 15,000 – 20,000 tons per month. The total Tons to be transported is 500,000 tons. It needs to be executed safely, adhering to the South African rules and regulations relating to road and vehicle safety and any other governing requirements.
- The ore body to be transported will be with 30T Side Tipper Trucks or 30T Dump Trucks, all to be determined by final adjudication of possible future Tender. Estimated round trip distance is ±40 km.

Requirements:

Companies with the acceptable profiles/credentials, which adhere to the pre-qualification standards as specified below, will be formally invited to participate in a bidding process.

Company profiles must include the following:

- Company history;
- A list of trade references (a minimum of 3);
- Documented Health & Safety Policy and Plan;
- Indication that the company has the required equipment, resources and competencies to render the required services;
- Confirmation of BBBEE status (certificate from an accredited verification agency required).
- Confirmation from registered accountant or auditor, confirming current ownership structure.
- Copies of any affiliations the company is affiliated to, must be included in the documents submitted.
- Valid Tax Clearance certificate.
- Letter of Good standing

PLEASE NOTE THAT SHOULD ANY OF THE ABOVE DOCUMENTATION NOT BE SUBMITTED OR HAS EXPIRED, THE SUBMISSION OF THE PROFILE WILL NOT BE CONSIDERED.

PLEASE NOTE THAT NO PRICES SHOULD BE INCLUDED WITH THIS PRE-QUALIFYING PROCESS. ANY SUPPLIER THAT INCLUDES PRICES WILL BE IMMEDIATELY DISQUALIFIED EVEN IF ALL REQUIRED DOCUMENTATION HAVE BEEN SUBMITTED.

Should the company not comply with all or any of the above requirements, kindly clearly indicate how the above requirements will be met.

Company profiles with the required supporting documents must be submitted in writing, in a sealed envelope, marked with the request name, request number and closing date and time.

The closing date and time for the submission of company profiles is **22 April 2021 at 12:00pm**

Delivery Point: Tender box located at the Main Security Gate of Bushveld Vanchem Pty Ltd, Ferrobank, Van Eck Drive, Witbank, eMalahleni. Please insist on signing the Register at the security gate.

Enquiries: E-mail: procurement@bushveldvanchem.com

ENVIRONMENTAL REGULATORY PROCESS REQUIRED FOR THE PROPOSED DORTSFONTEIN EAST COAL MINE EXPANSION, NORTH-EAST OF KRIEL, EMALAHENI AND GOVAN MBEKI LOCAL MUNICIPALITIES, GERT SIBANDE AND NKANGALA DISTRICT MUNICIPALITIES, MPUMALANGA PROVINCE

Exxaro Coal Central (Pty) Ltd (ECC) operates four mines namely Forzando North Mine, Forzando South Mine, Dorstfontein West Mine, and Dorstfontein East Mine. Dorstfontein East Coal Mine (DECM), the subject of this application, is the only opencast mine while the rest of the operations are all underground mines. DECM is also approved to undertake underground mining of deeper coal reserves.

The current DECM underground mining operation is approved as part of the existing Environmental Management Programme (EMP) (Reference Number: MP 30/5/1/2/3/2/1 (51) MR). Subsequently, additional coal reserves have been identified for mining which are not covered under the existing EMP. ECC therefore intends to further extend the Life-of-Mine of the DECM through the exploitation of these identified additional coal reserves. ECC will utilise underground mining methods to access the coal reserves and access will be through the existing Pit 2 Open Cast Operation. The project also includes additional new surface infrastructure, that will support the proposed underground mining operations.

ECC appointed Digby Wells Environmental (Digby Wells) to independently facilitate the environmental-legal applications relevant to the proposed Project. Digby Wells will undertake an Environmental Authorisation Application comprising a Scoping and Environmental Impact Assessment (EIA) process and Water Use Licence Application (WULA) to comply with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA); and the National Water Act, 1998 (Act No. 36 of 1998) (NWA).

Digby Wells hereby informs Interested and Affected parties (I&APs) that the Draft Scoping Report will be available for public comment for a 30-day legislated period. **Due to the COVID-19 national lock down, the Draft Scoping Report will be released electronically. To access the report (free of charge / data-free); please click on the following link <http://view.datafree.co/PublicDocuments/> or copy the link onto your URL to download the Report for your review and comment from Friday 13 November 2020 to Monday 14 December 2020.**

NOTICE OF AN ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

Notice is given in terms of Regulation 41(c) (i) of the regulations published in Government Notice No. R.982 under chapter 6 of the National Environmental Management Act (Act No.107 of 1998) of intent to carry out the following activities as a Basic Assessment Report Process required in terms of the Environmental Impact Assessment Regulation, 2014.

- Description of proposed activities: Proposed additional of petroleum storage tanks refueling of fuel trucks and Blending plant at Cnr Moses Kotane & Einstein Street, Ferrobank, Witbank Mpumalanga Province.
- Location: The project will be build at the existing Depot Cnr Moses Kotane & Einstein Street.
- Name of Applicant: JD Trading Project (Pty) Ltd.
- Name of contacts/consultants: Tshikabo Projects (Pty) Ltd, Contact Tshikabo, Email: tshikaboprojects@gmail.com

Further information will be made available through the above contact details or at in the event of sufficient and significant interest further public interactions will take place.

- Date of original publication of advertisement in newspaper is 13 November 2020.
- Date of original publication of advertisement in name of Newspaper Date Witbank news

Should you wish to be identified as an interested and/or affected party please submit your name, contact information and interest in the matter to the contact persons given above by the end of 11 December 2020.

GLENCORE

GOEDGEVONDEN COLLIERY JOINT VENTURE: ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE APPLICATIONS ASSOCIATED WITH THE PROPOSED SOUTH WITBANK PIPELINE NEAR OGIES IN THE MPUMALANGA PROVINCE

INVITATION TO REGISTER AS INTERESTED AND AFFECTED PARTY, AND TO COMMENT ON THE DRAFT BASIC ASSESSMENT REPORT AND EMRP

Notice is hereby given that Glencore Operations South Africa (Pty) Ltd (GOSA), particularly its Goedgevonden Colliery (GGV) Joint Venture (JV), is applying for an environmental authorisation (EA) and a water use licence (WUL) for pumping mine affected water from GGV to the South Witbank Colliery (SWC) (Tweefontein South) underground workings via a pipeline for storage and treatment.

GGV is an existing coal mining operation situated in the west of the Nkangala District, approximately 50 km south-west of eMalaheni (Witbank). The town of Ogies is situated directly north of GGV.

The total remaining storage capacity for excess mine affected water at GGV has severely decreased. The recent water balance at GGV has predicted the overall storage capacity moving towards negative if GGV does not implement an alternative solution. The proposed solution is to pump excess water stored in the existing return water dam at the tailings storage facility through a new pipeline to the SWC (Tweefontein South) underground workings for storage and treatment.

The pipeline will be buried, approximately 12 km long and follow existing roads. The proposed pipeline will require an EA in terms of the Environmental Impact Assessment (EIA) Regulations (GN R. 326) published under the National Environmental Management Act, 1998 (Act 107 of 1998) (as amended) (NEMA). The application will need to be supported by a Basic Assessment (BA) process in terms of GN R.326. The competent authority for the BA process is the Department of Mineral Resources and Energy (DMRE).

Since the proposed pipeline will cross a watercourse(s), an application for a WUL in terms of the National Water Act, 1998 (Act 36 of 1998) (NWA) will also be required. The WUL application will be submitted to the Department of Water and Sanitation (DWS).

GGV JV has appointed Golder Associates Africa (Pty) Ltd (Golder), an independent environmental assessment practitioner (EAP), to conduct the EA and WUL application processes.

PUBLIC COMMENT INVITED

We would like to draw I&APs' attention to the following comment periods:

- Draft Basic Assessment Report: **13 November to 14 December 2020** (30-day comment period).
- Water Use Licence Application: **13 November 2020 to 04 February 2021** (60-day comment period).

Printed copies of the draft BA Report are available at the public places listed below. The background information letter and draft report can be downloaded from the following website: <https://www.golder.com/global-locations/africa/south-africa-public-documents/>.
