NEMA ENVIRONMENTAL AUTHORISATION APPLICATION – THE PROPOSED POSTMASBURG WASTE WATER TREATMENT WORKS AND SEWER LINE

Notice is hereby given to you, as land owner of Erf 127, Postmasburg of the proposed Postmasburg Waste Water Treatment Works and Sewer line.

Application for authorisation in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998), (the Act) and the Environmental Impact Assessment Regulations, 2010, will be submitted to the Department of Environment and Nature Conservation, and will be undertaken by the Tsantsabane Municipality (Applicant).

It is proposed that a new Waste Water Treatment Works be constructed on Farm Olynfontein No.475 Portion 3, Postmasburg to accommodate the growing population of Postmasburg and the growing costs of operating the existing waste water treatment works.

To convey these flows, a new main outfall sewer of at least 600mm diameter is required. Such a sewer will run at 80% capacity for a flow of 100 liters per second providing some space for future runoff. It is planned that this new sewer will be extended from the current position of Postmasburg Pump Station No.1 in a southerly direction following the run of the Groenwater Spruit to a point approximately 1 300m downstream of the town where the pipe will daylight at a gradient of 1 in 200. It is proposed that the sewer line be located on the following properties in Postmasburg:

Erf 1, Erf 123, Erf 125, Erf 126, Erf 127, Erf 764, Erf 779, Erf 1504.

As such, you may participate in the public participation process and will be notified in writing of the availability of any reports for public comment in due course.

Should you have any further queries, please do not hesitate to contact us.

Yours sincerely
