1.6.1	<p>KW discussed the technical details of the proposed EGI for SEF, discussion key points were as follows:</p> <ul style="list-style-type: none"> • The EGI for the SEF will be subject to its own Basic Assessment process; • The EGI for the SEF will have overhead powerlines as well as the Eskom portion of the onsite substation; • The grid corridor will have a width of approximately 300 m wide and length of approximately 5km; and 	<u>Refer to attached Presentation (slides 19,20 and 21).</u>

	<ul style="list-style-type: none"> There will be an Eskom portion of the onsite substation as well, which will be ceded to Eskom after construction and will be located adjacent to the IPP portion, which is being assessed as part of the SEF application. <p>KW showed a map of the proposed grid corridor.</p>	
1.7	Presentation – Legal Process Required	
1.7.1	<ul style="list-style-type: none"> KW went through the Listed Activities triggered by the proposed projects (slides 23 and 24). Both the SEF and WEF trigger listed activities in Listing Notice (LN) 1,2 and 3, whilst the grid connection project triggers listed activities in LN 1 and 3. KW indicated that the SEF and WEF trigger full Scoping and EIA processes, while Basic Assessment processes will be undertaken for the associated Grid Infrastructure components (on-site substations & 132kV overhead distribution lines / powerlines). KW clarified that there would be four (4) separate applications for EA which will be submitted to the DFFE and she emphasised that this would be in the form of two (2) Scoping reports and two (2) Basic Assessments. 	<u>Refer to attached Presentation (slides 22,23, and 24).</u>
1.8	Presentation – DFFE Screening Tool Results and Specialist Studies	
1.8.1	<p>KW discussed the DFFE screening tool results for the WEF, SEF, EGI for WEF and EGI for SEF.</p> <ul style="list-style-type: none"> KW stated that a specialist studies list was compiled using the DFFE screening tool results as well as the EAP’s previous experience in similar projects. The specialists listed on slide 29 will be included as part of the EIA and Basic Assessment processes. 	<u>Refer to Presentation (slides 25,26,27, 28 and 29).</u>

	<ul style="list-style-type: none"> • KW noted that most of the specialists had been on site. <p>In terms of terrestrial biodiversity, additional assessments for Butterflies as well as the Riverine Rabbit study have been included.</p>		
1.9	Presentation – Public Participation Process		
1.9.1	<p>KW indicated that 4 separate applications would be undertaken:</p> <ul style="list-style-type: none"> • Public participation processes would be combined in the form of site notices and newspaper adverts. KW stated that they proposed to include a newspaper advert for the Scoping and the Impact Assessment phase. • KW added that the following PPP would be undertaken: <ul style="list-style-type: none"> - Written Notifications (to be emailed) to I&AP's; - Site Notices - placed on site and in the town of De Doorns; - Newspaper Advert - Local Newspaper Scoping and Impact Assessment Phase (Worcester Standard); - Circulation of Draft Scoping Reports x2 for 30-day comment period (WEF and SEF) and associated Comments and Response Reports (CRRs); - Circulation of Draft BARs x2 for 30-day comment period (grid) and associated CRRs; - Circulation of Draft EIRs x 2 for 30-day comment period (WEF and SEF) and associated CRRs; - Submission of Final BARs x 2 for DFFE decision; and - Submission of Final EIRs x 2 for DFFE decision. • KW showed the identified stakeholders and key commenting authorities that would be engaged with (see presentation for full list). 	<p>Refer to attached Presentation (slides 30 and 31).</p> <p>ME enquired how SLR plans on notifying I&AP's who want to participate (i.e., are desirous) in the process but may be disadvantaged (lack of access to internet, language etc).</p> <p>ME also stressed that occupiers of the land must be notified as well (not just landowners).</p>	<p>KW noted that SLR will comply with the legislative requirements in terms of Chapter 6 of the EIA Regulations (as amended). Posters/notices would be placed in De Doorns and other public places. Media and site notices would also be in English and Afrikaans.</p> <p>LS and HB confirmed that tablets would be placed at local libraries/municipalities using a data free download site.</p> <p>KW noted that landowner notifications would extend to the occupiers of the land too (communicated through the landowner).</p>

1.10	<u>Presentation – Discussion and Questions</u>		
1.10.1.	KW concluded the presentation and opened for discussion and questions.	Muhammad Essop (ME) enquired if SLR had any questions or if they required specific clarification from the DFFE.	KW noted that SLR had listed the following as points for clarification: <ol style="list-style-type: none"> 1. Confirmation at submitting four (4) separate applications. 2. If there were any specific requirements from DFFE in terms of report writing. 3. If DFFE agreed with combining the PPP process for the proposed developments in terms of newspaper adverts and site notices. 4. DFFE to confirm whether they are in agreement with proposed specialist studies and approach.
		ME also confirmed if the intention for this project would be to bid it for the Renewable Independent Power Producer Procurement Programme (REIPPPP).	LJVV confirmed it would be (hence DFFE is the Competent Authority (CA)) but that Mainstream may consider private offtake at a later stage.
1.10.2	<ol style="list-style-type: none"> 1. Confirmation at submitting 4 separate applications; and 2. Specific requirements in terms of report writing. 	CE added that whilst it was acceptable to submit four (4) separate applications, SLR must try and align the projects in some respects (i.e., the WEF/SEF application must talk to the relevant Grid application).	KW confirmed that the Draft BARs for the grids would be circulated for public comment simultaneously with the Draft EIRs and that the interlinkages would be discussed briefly in the reports as well as in terms of the cumulative impact assessment.
		ME added that generic Environmental Management Programmes (EMPr) must be	KW agreed and noted that the generic EMPrs for the substation and the powerline would be included in the DEIRs and DBARs.

		compiled for the substations and powerlines.	
1.10.3	3. If DFFE agreed with combining the PPP for the proposed developments in terms of newspaper adverts and site notices.	ME and TR indicated that they have no concerns with combining certain portions of the PPP but stressed that the Comments and Response Reports (CRRs) must be specific for each project.	KW noted that they would ensure I&APs provide comment on each specific project (i.e., Ezelsjacht WEF/Ezelsjacht SEF and Ezelsjacht WEF Grid/Ezelsjacht SEF Grid) so that CRRs can be submitted for each project.
1.10.4	4. DFFE to confirm whether they are in agreement with proposed specialist studies and approach.	<p>ME asked KW how the specialists' studies to be undertaken for the proposed projects were determined.</p> <p>ME stressed that he would like to see a section in the DSR's and the DBAR listing all the required specialists' studies, their associated sensitivities and verification of these based on the site visit.</p>	<p>KW explained that specialists' studies to be undertaken were informed by the environmental sensitivities and results generated from the National DFFE Screening Tool.</p> <p>KW indicated that the current approach was to have desktop sensitivities where certain specialists had not been to site during the Scoping phase. LJV enquired if the site visit was a mandatory requirement in terms of compiling a Site Sensitivity Verification Report (SSVR) in instances where specialists can based on experience indicate the sensitivity of the area. ME requested the EAP to respond. HB confirmed that the SSVR had to be undertaken by either a specialist <u>or an EAP</u>.</p> <p>KW added that there may be a concern on timing since some specialist may not get to site but that SLR would discuss this with Mainstream and the specialists.</p> <p>It was agreed that SSVRs would be submitted as part of the DSR circulations.</p>

		<p>KW also enquired regarding the BESS triggers and noted that previous experience was to include the BESS activities even if at this stage Mainstream was not sure on the technology. (Noting that Lithium-ion often didn't trigger LNs, and Redox flow did).</p>	<p>ME stressed that as long as the potential impacts are assessed and an activity is not just added for the sake of adding it, this would be fine.</p>
<p>1.11</p>	<p>Way Forward and Closure</p> <p>KW closed the meeting and stressed that the team would obtain input in terms of SSVRs from the relevant specialists.</p> <p>Meeting ended at 11:55am</p>
