SIVEST

NOTICE OF ENVIRONMENTAL AUTHORISATION PROCESS

Notice is hereby given of a Public Participation Process (PPP) to be undertaken in terms of the National Environment Act, 1998 (Act No. 107 of 1998), as amended and the Environmental Impact Assessment (EIA) Regulations. DFFE Reference Number: To be allocated upon submission of application.

Nature and Location of Activity: The applicants, Lesaka 1 Solar Energy Facility (Pty) Ltd. and Lesaka 2 Solar Energy Facility (Pty) Ltd are proposing the development of two commercial Solar Energy Facilities (SEF) and associated infrastructure on a site located approximately 35 km North of Locriestontein within the Hantam Local Municipality and the Namakwa District Municipality in the Northern Cape Province. It is proposed that each SEF will comprise of several arrays of PV Panels with the capacity of up to 240 MW per SEF

Applications for Scoping and Environmental Impact Assessment (EIA) processes for the proposed Solar Energy Facilities and associated infrastructure will be submitted to the competent authority, the Department of Forestry, Fisheries and Environment (DFFE), for a

Applicable NEMA Liated Activities: - LN1 GN R327 - 11(i), 12(ii)(a)(c), 14,19, 24(ii), 28(ii), 48 (i) (a)(c), 56(ii) LN2 GN R325 - 1, 15, LN3 GN R324 - 4(g)(ii)(ee), 10(g)(ii)(iii)(ee), 12(g)(ii), 14(ii)(a)(c)(g)(ii)(ff), 18(g)(ii)(ee)(ii) & 23(ii)(a)(c)(g)(ii)(ee).

register as an interested and / or Affected Party (I&AP) and / or to obtain additional information please submit your name, contact details (telephone number, postal address and email address) and the interest which you have in the application to SIVEST as per the details below and please reference the lesake 1 SEF' or 'Lesake 2 SEF' in your correspondence.

LT.O POPIA, you hereby declare and confirm that you, as an i&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

KENNISGEWING VAN DIE OMGEWINGSMAGTIGINGSPROSES

Kennis geskied hiermee van 'n Openbare Deelnameproses (ODP) wat ingevolge die Nasionale Wet op Omgewingsbestuur, 1998 (Wet 107 van 1998) soos gewysig, an die Regulasies op Omgewingsimpakeva-luerings (OIE-regulasies), onderneem moet word. **DBVO-verwysingsnommer:** Moet toegeken word ning van aansoek

Aard en ligging van aktiwiteit: Die applikante, Lesaka 1 Solar Energy Facility (Edms.) Bpk. en Lesaka 2 Solar Energy Facility (Edms.) Bpk. stel die ontwikkeling voor van twee kommersiële Sonkragaanlegte (SKA's) en verwante infrastruktuur op 'n terrein wat sowat 35 km noord van Loeriesfontein in die Hantam Plaaslike Munisspaliteit en die Namakwe Distriksmunsspaliteit in die Noord-Kaapprovinsie geleë is. Daar word voorgestel dat êlke SKA sal bestaan uit verskela reekse FV-panele met 'n vermoë van hoogstens 240 MW per SKA

Aansoeke om Bestekopmane- en Omgewingsimpakevalueringsprosesse (OIE-prosesse) vir die beoogde Sonkrag-aanlegte en verwante infrastruktuur sal by die bevoegde owerheld, synde die Departement van Bosbou, Visserye en die Omgewing (DBVO) ingedien held, synde die De word vir 'n besluit.

Toopaslike NEMA-gelyste aktiwiteite: Lyskennisgewing (LK) 1 Staatskennisgewing (SK) R327 - 11(i), 12(ii)(a)(c), 14,19, 24(ii), 28(ii), 48 (i) (a)(c), 56(ii) LK2 SK R325 - 1, 15. LK3 SK R324 - 4(g)(ii)(ee), 10(g)(ii)(iii)(ee), 12(g)(ii), 14(ii)(a)(c)(g)(ii)(ff), 18(g)(ii)(ee)(ii) & 23(ii)(a)(c)(g)(ii)(ee)

organismeeth, expansion and organism as a contracting many or a Selecting organism o

JONG VROU BOER MET MERINO'S

LENZY CONSTABLE is 'n 25-jarige vrou van Fraserburg wat vir die afgelope twee jaar met skape op Fraserburg se meent boer. Op die oomblik boer sy met 30 merino's. Op ons foto staan by 'n paar van haar wolskape. Lenzy wat sedert haar kinderdae af 'n belangstelling in klienvee boerdery het, moedig jong mense aan om betrokke te raak by boerdery as 'n manier om 'n lewe te maak as entrepreneur.

JAPIE OOR KOPHOU IN 'N VERANDERENDE WERELD

Bakkies tien myl per gelling tot duur produksie van vee

n Mens staan verbaas oor hoe vinnig dinge verander. Of is dit net die mening van iemand wat lank genoeg in die tand is om hierdie veranderinge eerstehands te ervaar? Tog is dit waar dat verandering plaasvind.

Daarmee is op sig self nie iets verkeerd nie. Wie wil vandag nog met 'n bakkie ry waar van die brandstofverbruik 10 myl per gelling is? Laat ons. 16 km, is en een gelling ongeveer 45 liter is. As my som reg is, beteken dit 3.6km. per liter, terwyl vandag se bakkies 10 of selfs meer km. per liter gee.

Die poskantoor was altyd 'n prestige besigheid. Die posmeester was 'n gerekende man op die dorp. Dit bestaan nie meer vandag nie. Indien ons ons daarby kan aanpas (saam met die nuwe tegnolo-gie ontwikkel), is dit eintlik baie geriefliker om korre-spondensie op jou rekenaar

te ontvang. Selfs die dag se koerant is vanaf vyfuur die oggend op alle plekke met internet beskikbaar. Die nous kom nie by ons eers 'n paar dae later aan nie en die koste aan die koerant is minder as 'n derde van wat die gedrukte koerant ons sou kos.

Is dit altyd so dat verandering met 'n positiewe ontwikkeling saamval? Ek dink nie . noodwendig so nie. As 'n mens met kenners gesels, kom ons haas om te sê dat 10 myl jy agter dat kleinveeboerdery onder druk is. Dit is die tyd wanneer oplossings vir hoer produksie gesoek moet word. Om hoër produksie te kan bereik, moet daar navorsing gedoen word. Hierdie navor sing moet aan die boer via 'n voorligtingsaksie oorgedra word. Dit is so dat voorligting gemik op die kommersiele veeboer, bykans tot stilstand gekom het. Lê die oplossing ons ons daarby kan aanpas daarin dat die produkte wat ons bemark self navorsing moet befonds? Dalk sal dit 'n klein prys wees om vir hoer produktiwiteit te betaal.

Toe ek vanoggend by die voordeur uitloop met die vars reuk van reen in die lug. die donderweer wat gedemp dreun en die son wat die kranse van die Hantamberg plek-plek helder verlig, beset ek dat alles nie verander het nie.

Deur die eeue het die berge rondom Calvinia gestaan en het hierdie gebeure homself onveranderd berhaal. Ek het ook onder die indruk gekom van die onveranderlikheid van die Skepper al het ons verstaan van Hom dalk oor tyd verander.

Wanneer ontwikkeling in die wêreld ons soos vreemdelinge laat voel, laat ons vas hou aan dit wat onveranderlik is en laat ons probeer om by te hou en aan te pas by 'n veranderende wêreld.

Groete Janie

(Dalk moet Japie vir ons gaan uitvind hoeveel die gelling petrol destyds gekos het. 'n Vyfliter kannetjie kos nou R115.00 - RN)

HANTAM MUNISIPALITEIT

KENNISGEWING: MM - WK01/2023.

PUBLIEKE VERGADERINGS VIR DIE VUL VAN VAKANTE WYKSKOMITEE POSISIES

Kennis geskied hiermee ingevolge Artikel 73 van die Munisipale Strukture Wet, Wet 117 van 1998 dat die Munisipaliteit van voorneme is om in een (3) van die sewe (7) wyke publieke deelname vergaderings te hou om vakante wykskomitee posisies te vul ingevolge COGHSTA Omsendbrief 29 van 2016.

Ingevolge Artikel 73(3) van die Munisipale Strukture Wet, Wet 117 van 1998 het 'n munisipale raad die reg om reëls te maak wat die volgende reguleer:

- Die prosedures wat gevolg word om wykskomiteelede te verkies met inagneming van die volgende:
 - Gelyke verteenwoordiging van vroue op 'n wykskomitee;
 - Diversiteit in terme van verteenwoordiging in die wyk (sektorale verteenwoordiging);
 - Die omstandighede waaronder iede se termyn beëindig word; en
 - Hoe gereeld komiteevergaderings gehou word.

Besonderhede van die Wykskomitee Verkiesingsvergaderings is as volg:

DATUM	WYK	DORP	PLEK	TYD	VAKANTE POSISIES
22 Maart 2023	1	Calvinia	Lenie Skippers Gemeenskapsaal	18:00	3
22 Maart 2023	7	Middelpos	Middelpos Gemeenskapsaal	11:00	4
23 Maart 2023	5	Loeriestontein	Loeriesfontein Raadsaal	18:00	3

Nominasievorms sowel as die kriteria vir 'n wykskomiteelid is verkrygbaar by die betrokke wyksraadslid en by die kantoor. Vir navrae tydens kantoor ure (07:30-16:30) skakel gerus Mnr. Garth Mathys / Me. Kelly-Ann Persence by tel: 027 341 8500

SAMANTHA TATAS-TITUS

Waarnemende Munisipale Bestuurder

JONG VROU BOER MET MERINO'S

Lenzy Constable stel 'n voorbeeld

FRASERBURG - Lenzy Constable is 'n 25-jarige jong vrou van die dorp en lid van die Kleinboere Vereniging van Fraserburg.

Lenzy het begin boer op die ouderdom van 23 jaar.

As kind het sy skoolvakansies by familielede se boerderye deurgebring en deelge-neem aan die aktiwiteite op die plaas.

Na sy voor matriek die skool verlaat het weens gesondheidsprobleme het sy begin belangstel in boerdery. Al was sy so jonk en 'n vrou het sy in 2021 met haar pa se ondersteuning begin boer met 5 skape.

Neef Gert se Sêgoed Inflaste klop ly nie met 'n plat hand nie, maar wel met n toe hand.

Lenzy het baie geleer by die Landbou Kleinboere Vereniging waar sy aangesluit het en by ander organisasies wat gestig is vir jong opkomende kleinboere.

Sy moedig jong mense aan om betrokke te raak by kleinvee boerdery, by 'n vereniging aan te sluit en vrae te vra.

Daar is instansies wat finansiële hulp bied. Jongmense het baie om te bied vir die gemeenskap en kan mekaar ondersteun deur werk te skep.

Onlangs is Lenzy verkies as sekretaresse van die Karikama Boere Vereniging en nooi die jeug uit om sessies by te woon waar sy graag vrae sal beantwoord. Sy is ook 'n ad-disonele lid van YARD se be-

stunr. Haar boerdery is op die meent van Fraserburg waar sy met 30 merinoskape boer.

Dear Interested and/or Affected Party

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

• AVAILABILITY OF DRAFT SCOPING REPORTS FOR PUBLIC REVIEW

Please note that SiVEST SA (Pty) Ltd has been appointed by Lesaka 1 Solar Energy Facility (Pty) Ltd and Lesaka 2 Solar Energy Facility (Pty) Ltd as the Environmental Assessment Practitioner (EAP) for the abovementioned projects.

We would like to take this opportunity to inform you that, in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) (as amended), the Draft Scoping Reports (DSRs) for the above-mentioned projects will be available for public comment and review from **10 March 2023 to 12 April 2023** (end of business day).

Should you wish to receive an electronic copy of the DSRs please forward your request in writing to us.

Electronic copy of the DSRs will be uploaded onto a Tablet that can be reviewed at the following public place:

VENUE	STREET ADDRESS	HOURS	CONTACT NO
Hantam Local Municipality – Loeriesfontein Office	13 Long Street, Loeriesfontein, 8185	Monday - Thursday 07h30 - 16:30 Friday 07:30 - 13:00	027 662 8600

The reports as well as the accompanying appendices are also available on SiVEST's website: http://www.sivest.com/za, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Alternatively you can download the documents from wetransfer: https://we.tl/t-oQKxbfbOmE

Attached is an English and Afrikaans letter notifying you of the review period.

SiVEST is committed to complying with the requirements as set out in terms of POPIA.

I.T.O POPIA, you hereby declare and confirm that you, as an I&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

Dear Interested and/or Affected Party (I&AP) / Stakeholder,

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

REMINDER ABOUT COMMENTING PERIOD FOR DRAFT SCOPING REPORTS (DSRs)

Please note that the Draft Scoping Reports (DSRs) for the above-mentioned projects were made available for public review and comment from from 10 March 2023 to 12 April 2023 (end of business day).

The review and comment period for the above-mentioned projects therefore ends on 12 April 2023 (end of business day).

SiVEST therefore wish to remind you to submit comments for the above-mentioned projects before close of business on **12 April 2023**, if you have not done so already.

To access the documents visit SiVEST's website: https://www.sivest.com/za/, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Should you have any comments, please feel free to contact the public participation office at the details below:

SiVEST Environmental

PO Box 2921, RIVONIA, 2128 Phone: (011) 798 0600

E-mail: sivest ppp@sivest.co.za

Fax: (011) 803 7272

We would like to thank you in anticipation of your active and meaningful contribution to the BA and public participation processes.

Kind regards,

Hlengiwe Ntuli
Projects Secretary & PPP Administrator

Subject: 17793 Lesaka Solar Energy Facilities 1 and 2 near Loeriesfontein in Northern Cape: DSR Comment Period

Starting

Dear Interested and/or Affected Party

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

AVAILABILITY OF DRAFT SCOPING REPORTS FOR PUBLIC REVIEW

Please note that SiVEST SA (Pty) Ltd has been appointed by Lesaka 1 Solar Energy Facility (Pty) Ltd and Lesaka 2 Solar Energy Facility (Pty) Ltd as the Environmental Assessment Practitioner (EAP) for the abovementioned projects.

We would like to take this opportunity to inform you that, in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) (as amended), the Draft Scoping Reports (DSRs) for the above-mentioned projects will be available for public comment and review from **10 March 2023 to 12 April 2023** (end of business day).

Should you wish to receive an electronic copy of the DSRs please forward your request in writing to us.

Electronic copy of the DSRs will be uploaded onto a Tablet that can be reviewed at the following public place:

VENUE	STREET ADDRESS	HOURS	CONTACT NO
Hantam Local Municipality –	13 Long Street,	Monday -	027 662 8600
Loeriesfontein Office	Loeriesfontein, 8185	Thursday	
		07h30 - 16:30	
		Friday	
		07:30 - 13:00	

The reports as well as the accompanying appendices are also available on SiVEST's website: http://www.sivest.com/za, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Alternatively you can download the documents from wetransfer: https://www.tl/t-oQKxbfbOmE

Attached is an English and Afrikaans letter notifying you of the review period.

SiVEST is committed to complying with the requirements as set out in terms of POPIA.

I.T.O POPIA, you hereby declare and confirm that you, as an I&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

Kind Regards,

Hlengiwe Ntuli

Dear Interested and/or Affected Party (I&AP) / Stakeholder,

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

REMINDER ABOUT COMMENTING PERIOD FOR DRAFT SCOPING REPORTS (DSRs)

Please note that the Draft Scoping Reports (DSRs) for the above-mentioned projects were made available for public review and comment from from 10 March 2023 to 12 April 2023 (end of business day).

The review and comment period for the above-mentioned projects therefore ends today 12 April 2023 (end of business day).

SiVEST therefore wish to remind you to submit comments for the above-mentioned projects before close of business on **12 April 2023**, if you have not done so already.

To access the documents visit SiVEST's website: https://www.sivest.com/za/, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Should you have any comments, please feel free to contact the public participation office at the details below:

SiVEST Environmental

PO Box 2921, RIVONIA, 2128 Phone: (011) 798 0600

E-mail: sivest.com

Fax: (011) 803 7272

We would like to thank you in anticipation of your active and meaningful contribution to the BA and public participation processes.

Kind regards,

Hlengiwe Ntuli
Projects Secretary & PPP Administrator

From: sivest_PPP

Subject: 17793 Lesaka Solar Energy Facilities 1 and 2 near Loeriesfontein in Northern Cape: DSR Comment Period

Starting

Dear Interested and/or Affected Party

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

AVAILABILITY OF DRAFT SCOPING REPORTS FOR PUBLIC REVIEW

Please note that SiVEST SA (Pty) Ltd has been appointed by Lesaka 1 Solar Energy Facility (Pty) Ltd and Lesaka 2 Solar Energy Facility (Pty) Ltd as the Environmental Assessment Practitioner (EAP) for the abovementioned projects.

We would like to take this opportunity to inform you that, in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) (as amended), the Draft Scoping Reports (DSRs) for the above-mentioned projects will be available for public comment and review from 10 March 2023 to 12 April 2023 (end of business day).

Should you wish to receive an electronic copy of the DSRs please forward your request in writing to us.

Electronic copy of the DSRs will be uploaded onto a Tablet that can be reviewed at the following public place:

VENUE	STREET ADDRESS	HOURS	CONTACT NO
Hantam Local Municipality –	13 Long Street,	Monday -	027 662 8600
Loeriesfontein Office	Loeriesfontein, 8185	Thursday	
		07h30 - 16:30	
		Friday	
		07:30 - 13:00	

The reports as well as the accompanying appendices are also available on SiVEST's website: http://www.sivest.com/za, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'. Alternatively you can download the documents from wetransfer: https://we.tl/t-oQKxbfbOmE

Attached is an English and Afrikaans letter notifying you of the review period.

SiVEST is committed to complying with the requirements as set out in terms of POPIA.

I.T.O POPIA, you hereby declare and confirm that you, as an I&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

LESAKA 1 SOLAR ENERGY FACILITY (PTY) LTD LESAKA 1 SOLAR ENERGY FACILITY COMMENTS AND RESPONSES REPORT

1. INTRODUCTION

The Public Participation Process forms an integral part of the EIA process. It is a mechanism that aids to identify potential impacts of proposed projects on the biophysical and the human environments. Identified Interested and Affected Parties (I&AP's) are given an opportunity to comment on the proposed project and make recommendations on mitigation requirements.

The process followed in informing I&AP's of the proposed project is outlined in Sections 24(2) (a) and 24(d) of the National Environmental Management Act 107 of 1998 (as amended) and the EIA Regulations 2014 (as amended on 7 April 2017). This report presents comments received from I&AP's and responses provided as part of the Scoping Process.

Description: Proposed Lesaka 1 Solar Energy Facility (SEF)

Revision No.: 1.0

July 2023

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	 Kindly ensure the development footprints (hectares/square metres) and specifications of all proposed infrastructure and associated infrastructure during all phases are included in the final SR. 	The area for each development parameter has been include in the FSR. Refer to Section 5 6 .
	 Kindly take note that when finalising the layout plan the position of all proposed infrastructure and linear activities, which includes but not limited to the following must be illustrated: Solar fields; Construction camp laydown areas; Substations; Internal roads; Battery energy storage systems (BESS); Operation and maintenance buildings; and Power lines. 	The development layout plan will be finalised subsequent to receiving specialist reports/inputs and will be included in the dEIR. The positioning of all proposed infrastructure will be included in the finalised development layout plan.
	The final SR must clearly provide a detailed section which addresses the site sensitivity verification requirements where a specialist assessment is required but no specific assessment protocol has been prescribed, as well as the site sensitivity verification and minimum report content requirements for all specialist assessments undertaken, which were included in the screening tool report.	Refer to Table 17 , under Section 7 of the FSR where the site sensitivity verification requirements have been included.
	 Further to the above take note that a site sensitivity verification report should be included in the final SR which can be undertaken by either an EAP or specialist, which must clearly confirm or dispute the environmental sensitivity as identified in the screening tool report for each theme. 	Refer to Table 17 , under Section 7 of the FSR where the site sensitivity verification requirements have been included. In addition, the relevant site verification specialist reports have been attached as Appendix 6 of the FSR.
	 According to the application form, Critical Biodiversity Area occurs on the site. Therefore, the mitigation hierarchy should be applied in full, and a Biodiversity Offset should be considered to ensure that significant residual impacts of the development are remedied. 	The applicant commissioned a Terrestrial Biodiversity Screening Assessment before they decided to proceed with the project to determine project feasibility. The initial screening assessment identified high-level no-go areas that were then used to determine the preliminary layout. The preliminary layout was based on an avoidance approach in which the development avoids the high sensitivity environments. Once

Date of comment, format	Comment	Response from EAP / Applicant / Specialist
of comment, name of		
organisation / I&AP		
		the detailed in-field investigations were undertaken during the Scoping Phase, additional high sensitivity environments were identified by the specialists and identified as no-go. The proposed layout which is currently being developed for the DEIA phase will avoid all no-go areas identified by the specialists as far as possible to produce a layout that will be taken forward to the DEIA phase.
		The mitigation hierarchy has been followed in that the avoidance of all high sensitivity areas has been implemented from project onset. The layout is being designed as an iterative process in conjunction with a specialist team to avoid impacts as far as possible. All residual impacts will be minimized as far as possible in accordance with a well-designed layout as well as an Environmental Management Programme.
		The development avoids all CBA 1 areas, and while development is being pursued within a CBA 2 area, the aquatic specialist has confirmed that no wetlands were identified within the study area, and thus the criteria for the designated CBA 2 areas within this study area is based solely on the presence of the FEPA catchment of the Rooiberg and Klein Rooiberg river catchments. Given that the proposed development almost exclusively falls outside of the delineated freshwater ecosystems (which will be further amended during the EIA phase) the specialist has confirmed that no change in the Present Ecological State category is deemed likely. They have confirmed that development within the CBA catchment is not deemed an unacceptable land use.
		The terrestrial specialist further confirmed they CBAs are based on aquatic features and not terrestrial features.

Prepared By:

17793

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF)

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	b) Listed Activities • Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure as described in the project description.	As a result of the above, the residual impact is not deemed significant, and an offset is not warranted based on the following: • All CBA 1 areas have been avoided by the PV's • There are no wetlands on site and thus the criteria for the designated CBA 2 areas within this study area is based solely on the presence of the FEPA catchment of the Rooiberg and Klein Rooiberg river catchments. • The development falls almost exclusively outside of all freshwater ecosystems (with additional layout amendments to be made during the EIA Phase) • No change in the Present Ecological State category is deemed likely given the fact there are no wetlands and the Present Ecological State category is deemed likely This is included in Section 13.4 of the FSR. Noted, all relevant listed activities and sub-activities have been applied for.
	 The listed activities represented in the final SR and the application form must be the same and correct. If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. 	The listed activities in the final SR are the same as was included in the application form. Noted, should the listed activities change, an updated application form will be included.
	 Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms. 	Noted, the correct application form has been used.

Prepared By:

17793

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF)

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	Layout and Sensitivity Maps The final SR must provide coordinate points for the proposed development site (note that if the site has numerous bend points, at each bend point coordinates must be provided) as well as the start, middle and end point of all linear activities.	Noted, all site co-ordinates (including bend point co-ordinates) have been included in Section 5.2 .
	 Please provide a layout map which indicates the following: A clear indication of the envisioned area for the proposed solar fields; Position of the solar panels; Power lines; Internal roads; All supporting onsite infrastructure such as laydown area, guard house and control room etc. (existing and proposed); Substations, transformers, switching stations and inverters; Battery Energy Storage Systems (BESS); Connection routes (including pylon positions) to the distribution/transmission network; All existing infrastructure on the site, especially railway lines and roads; and Buildings. 	A layout map has been included in Appendix 3 of the FSR. The "preliminary layout" includes the proposed infrastructure, as well as the position of the proposed access roads, which will be updated and included in the draft EIA Report.
	 Please provide an environmental sensitivity map which indicates the following: The location of sensitive environmental features identified on site, e.g. CBAs, protected areas, heritage sites, wetlands, drainage lines etc. that will be affected by the facility and its associated infrastructure; Buffer areas; and All "no-go" areas The above layout map must be superimposed (overlain) with the sensitivity map and a cumulative map which shows neighbouring and existing infrastructure. 	A map of the CBA associated with the project is included in Appendix 2. A sensitivity map has been included in Appendix 3. The no-go areas have been identified which include the buffers prescribed by the specialists. A map showing other projects within a 35km radius has been included in Appendix 2.

17793

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF)

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	Google maps will not be accepted.	No google maps have been included.
	 d) Alternatives Please provide a description of any identified alternatives for the 	Alternatives have been discussed in Section 13.1 of the FSR.
	proposed activity that are feasible and reasonable, including the advantages and disadvantages that the proposed activity or alternatives will have on the environment and on the community that may be affected by the activity as per Appendix 2 of GN R.982 of 2014 (as amended).	Alternative locations for the temporary laydown area have been identified and an assessment of such alternatives have been included in Section 13.3.6 of the FSR.
	 Alternatively, you should submit written proof of an investigation and motivation if no reasonable or feasible alternatives exist in terms of Appendix 2. 	Where alternatives have not been provided, a written motivation has been included. Refer Section 13 of the FSR.
	 e) Public Participation Process Comments must be obtained from this Department's Biodiversity 	Noted, comments were obtained from DFFE Biodiversity Conservation Directorate. They are included below and dated
	Conservation Directorate at BCAdmin@dffe.gov.za.	12 April 2023.
	 Please ensure that all issues raised, and comments received during the circulation of the SR from registered I&APs and organs of state which have jurisdiction in respect of the proposed activity are adequately addressed in the final SR, including comments from this Department, and must be incorporated into a Comments and Response Report (CRR). 	All comments have been addressed in the FSR and are included in this Comments and Response Report.
	 Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments. 	Noted, proof of correspondence with the various stakeholders have been included in Appendix 5 of the FSR.
	 The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 and 44 of the EIA Regulations 2014, as amended. 	The Public Participation Process has been conducted in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended.
	 A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Annexure 1 of this comments letter. Please refrain from summarising 	Issues, comments and concerns raised to date have been captured in the C&RR (this document). The C&RR has incorporated all comments for the proposed development received from commencement of the EIA process. The C&RR

Prepared By:

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF) 1.0

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	comments made by I&APs. All comments from I&APs must be copied verbatim and responded to clearly. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.	is a separate document from the main report and is in the table format as requested. All comments have been copied verbatim.
	The final SR must provide evidence that all identified and relevant competent authorities have been given an opportunity to comment on the proposed development particularly the Northern Cape Department of Agriculture, Environmental Affairs, Rural Development and Land Reform, and the District and Local Municipalities.	Noted, all identified and relevant competent authorities have been given an opportunity to comment. The I&AP database (inclusive of the departments stated) and proof of notification has been included in Appendix 5 . The Northern Cape Department of Agriculture, Environmental Affairs, Rural Development and Land Reform have been invited to provide comment as well as the District and Local Municipalities.
	 Minutes and attendance registers (where applicable) of any physical/virtual meetings held by the Environmental Assessment Practitioner (EAP) with Interested and Affected Parties (I&APs) and other role players must be included in the final SR. 	Noted, none have been held to date.
	f) Specialist Assessments • It is noted that the property is affected by numerous watercourses and wetlands, and that activities that may trigger Section 19 and Section 21 of the National Water Act No. 36 of 1998 were applied for/included in the application form. Please note that a separate hydrological impact assessment must be conducted to assess the impacts of the proposed development on the surface hydrology of the area. The terms of reference for the study must include, inter alia the following: o Identification and sensitivity rating of all surface water courses for the impact phase of the proposed development; o Identification, assessment of all potential impacts to the water courses and suggestion of mitigation measures; and, o Recommendations on the preferred placement of the PV Facility and all associated infrastructure and preference must be provided to the avoidance of the watercourses on the property.	There are no wetlands within the study area however there are a number of watercourses that were identified by the Aquatic specialist during the field investigations. A separate hydrological impact assessment will be undertaken to assess the impact of the surface hydrology of the area. This will be included in the DEIAr.

17793

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF)

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	The study area falls within the ambit of the Square Kilometre Array - South Africa. The impacts associated with radio frequency interference on the SKA must form part of the environmental impact assessment. The applicant must liaise with SKA-SA for advice on the terms of reference for possible EMI and RFI detailed specialist studies.	The SKA-SA was contacted at the onset of the project to determine their requirements in terms on the impact of the radio frequency interference of the proposed project. Their comments are included below and dated 13 April 2023. They confirmed that "SARAO has undertaken a high-level impact assessment based on the information provided for the Lesaka 1 Solar Energy Facilities located at central coordinates 30°36'25.55"S 19°28'16.10"E. It was determined that the projects represent a low risk of interference to the nearest SKA radio telescope with a compliance surplus of 36.12 dBm/Hz. As such, we do not have any objection to the proposed developments".
	 Specialist Declaration of Interest forms must be attached to the final SR. The forms are available on Department's website (please use the Department's template). 	All specialists have signed declarations of interest forms which are included along with their respective specialist study in Appendix 6 .
	The EAP must ensure that the terms of reference for all the identified specialist studies include the following: A detailed description of the study's methodology; indication of the locations and descriptions of the development footprint, and all other associated infrastructures that they have assessed and are recommending for authorisation. Provide a detailed description of all limitations to the studies. All specialist studies must be conducted in the right season and providing that as a limitation will not be allowed. Please note that the Department considers a 'no-go' area, as an area where no development of any infrastructure is allowed; therefore, no development of associated infrastructure including access roads is allowed in the 'no-go' areas. Should the specialist definition of 'no-go' area differ from the Department's definition; this must be clearly indicated. The specialist must also indicate the 'no-go' area's buffer if applicable.	Noted, the specified TOR has been included in the specialist assessments. All specialist studies have been conducted taking into account the correct season. All no-go areas provided by the specialist are inclusive of the buffers they have applied and no additional buffer areas are required. In terms of the no-go areas, the specialists have made allowance for linear activities to pass through these areas where it is otherwise unavoidable. In these instances, strict mitigation measures will be implemented during construction to minimize impacts. Birdlife South Africa was requested to comment however they confirmed as per comment dated 13 April 2023 the following:

Prepared By:

Project No.: Description: Revision No.: July 2023 17793

Proposed Lesaka 1 Solar Energy Facility (SEF)

Date of comment, format of comment, name of organisation / I&AP	Comment	Response from EAP / Applicant / Specialist
	 Bird specialist studies must have support from Birdlife South Africa. All specialist studies must be final, and provide detailed/practical mitigation measures for the preferred alternative and recommendations, and must not recommend further studies to be completed post EA. 	"Thank you for following up. We do not have the capacity to comment on the Scoping Reports. We trust that a suitably qualified specialist has been appointed to assess impacts on birds. They are welcome to reach out to us if there any specific bird-related questions or concerns they would like to discuss".
		All specialist studies will be final with detailed mitigation measures for the preferred alternative included. However, the specialist studies may recommend walk-downs and additional management plans that will be included in the Final EMPr prior to construction.
	Should a specialist recommend specific mitigation measures, these must be clearly indicated.	All recommendations/mitigations provided by the specialists have been indicated in the DSR (refer section 13.3). These mitigations are being taken into consideration by the Developer in their proposed layout to be included in the DEIAr phase.
	 Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defendable reasons; and were necessary, include further expertise advice. 	Contradicting specialist recommendations have not been identified. Should the specialists specify contradicting recommendations, the EAP will clearly indicate the most reasonable recommendation and substantiate this with defendable reasons, and where necessary, include further expert advice.
	 Please ensure that all mitigation recommendations are in line with applicable and most recent guidelines. 	All mitigation recommendations are in line with applicable and most recent guidelines.
	It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. "the Protocols"), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal	All specialist assessments have been undertaken in line with the following: The gazetted Environmental Assessment Protocols of the NEMA EIA Regulations (2014, as amended), where applicable (Procedures for the Assessment and Minimum Criteria for Reporting on the Identified Environmental Themes must be in

Prepared By:

	species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols.	terms of Sections 24(5)(A) and (H) and 44 of the National Environmental Management Act, 1998.), when applying for Environmental Authorisation, which were promulgated in Government Notice No.320 of 20 March 2020 (i.e. "the Protocols"), and in Government Notice No. 1150 of 30 October 2020.
		Where a specialist assessment is required and no specific environmental theme protocol has been prescribed, the required level of assessment has been based on the findings of the site sensitivity verification and complies with Appendix 6 of the EIA Regulations any relevant legislation and guidelines deemed necessary.
	 As such, the Specialist Declaration of Interest forms must also indicate the scientific organisation registration/member number and status of registration/membership for each specialist. 	Noted, this was taken into account when the required specialists were appointed. The declarations including their scientific organisation registration/member number and status of registration/membership are included in Appendix 6 .
	 Please also ensure that the final SR includes the Site Verification Report as required by the relevant environmental themes and assessments. 	The Site Verification Reports are included in the respective specialist reports in Appendix 6 .
	 Please note further that the protocols, if applicable, require certain specialists' to be SACNASP registered. Please ensure that the relevant specialist certificates are attached to the relevant reports. 	Noted, this was taken into account when the required specialists were appointed. The specialist certifications are included in the specialist reports.
	We note that the screening tool indicates that thirteen specialist studies need to be undertaken or conducted. We note that the SR does not include thirteen specialist reports. Please kindly peruse the protocols and provide in the SR site sensitivity reports for each theme/study listed, as well as compliance statements for assessments not needed to be conducted based on your site sensitivity verification.	In terms of the protocol, all specialist studies have been taken into account. The separate biodiversity and avifaunal reports include reporting on more than one theme i.e., the animal species theme, avian theme, plant species theme and terrestrial biodiversity theme.

		Separate reports are provided for the following themes: agricultural, aquatic, archaeological, cultural, and palaeontological.
		Other specialist reports include social, geotechnical, traffic and risk.
		Defence and civil aviation are both low and no additional assessments are required.
		The RFI theme was identified as high as a result of the project being identified within the SKA however the South African Radio Astronomy Observatory were contacted, and they confirmed the following: "It was determined that the projects represent a low risk of interference to the nearest SKA radio telescope with a compliance surplus of 36.12 dBm/Hz. As such, we do not have any objection to the proposed developments". No further assessment in this regard is therefore required.
	Gumulative Assessment If there are any other similar facilities within a 30km radius of the proposed development site, a cumulative impact assessment must be conducted for all identified and assessed impacts which must indicate the following: Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e. hectares of cumulatively transformed land. Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.	There are a number of solar and wind projects within 30km of the proposed development site. Cumulative impacts have been considered in the DSR (refer section 13.3.5). A full Cumulative Impact Assessment will be conducted during the EIA Phase and included in the DEIAr.

organisation / tear	 The cumulative impacts significance rating must also inform the need and desirability of the proposed development. A cumulative impact environmental statement on whether the proposed development must proceed. 	
	h) General You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a scoping report which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority"	Noted, the Final Scoping Report will be submitted to the Department by the 23 rd of April 2023.
	You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of scoping reports in accordance with Appendix 2 and Regulation 21(1) of the EIA Regulations 2014, as amended.	The EAP can confirm that the FSR complies with all the requirements in terms of the scope of assessment and content of Scoping reports in accordance with Appendix 2 and Regulation 21(1) of the EIA Regulations 2014, as amended. This has been tabulated in Table 1 in Section 1.2 of the FSR.
	Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).	Noted, the prescribed timeframes will be met.
	You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.	Noted, the developer is aware that no activity should commence prior to the Environmental Authorisation being granted.

12 April 2023 Department of Forestry, Fisheries and Environment (DFFE): Biodiversity Conservation Directorate (Seoka Lekota)	PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEF) AN ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE. The Directorate: Biodiversity Conservation has reviewed and evaluated the draft Scoping Report and the Plan of Study for EIA. The final Scoping Report must comply with the procedures for the assessment and minimum criteria for reporting on identified environmental themes in terms of sections 24(5)(A) and (H) and 44 of the National Environmental Management Act, 1998.	Noted, the final Scoping Report complies with the procedures for the assessment and minimum criteria for reporting on identified environmental themes in terms of sections 24(5)(A) and (H) and 44 of the National Environmental Management Act, 1998.
	All requirements as outlined in the Environmental Impact Assessment (EIA) guideline for renewable energy projects and the Best Practice for Birds and Solar Energy for assessing and monitoring the impact of solar energy facilities on birds in Southern Africa must be adhered to.	Noted, these guidelines will be adhered to. A specialist was appointed to undertake the required monitoring. The proposed study area is classified as a Regime 2. The duration, in terms of data collection for this study was 1 reconnaissance and 2 peak season visits of 3 days.
	All Public Participation Process documents related to Biodiversity EIA for review and queries should be submitted to the Directorate: Biodiversity Conservation at Email: BCAdmin@dffe.gov.za for the attention of Mr. Seoka Lekota.	Noted, all documents will be submitted to the email address listed.
13 April 2023 South African Radio Astronomy Observatory (SARAO)	RE: Development of Lesaka 1 and 2 Solar Energy Facilities located about 40km north of the town of Loeriesfontein in the Northern Cape Province. This letter is in response to the proposed solar energy facilities and their possible	Comment noted. No response required and no further requirements in terms of SARAO.
(Selaelo Matlhane)	impact on the Square Kilometre Array radio telescopes. SARAO has undertaken a high-level impact assessment based on the information provided for the Lesaka 1 and 2 Solar Energy Facilities located at central coordinates 30°36'25.55"S 19°28'16.10"E. It was determined that the projects represent a low risk of interference to the nearest SKA radio telescope with a compliance surplus of 36.12 dBm/Hz. As such, we do not have any objection to the proposed developments.

It cern that no alternatives were considered during the study. Thus, it is ed that the mitigation hierarchy has not been filly applied yet.	project to determine project feasibility. The initial screening assessment identified high-level no-go areas that were then used to determine the preliminary layout. The preliminary layout was based on an avoidance approach in which the development avoids the high sensitivity environments. Once the detailed in field investigations were undertaken during the Scoping Phase, additional high sensitivity environments were identified by the specialists and identified as no-go. The proposed layout, which is currently being developed for the DEIA phase, will avoid all no-go areas identified by the specialists as far as possible to produce a layout that will be taken forward to the DEIA phase. All I&APs will be afforded the opportunity to comment on the updated layout. The mitigation hierarchy has been followed in that the avoidance of all high sensitivity areas has been implemented from project onset. The layout is being designed as an iterative process in conjunction with a specialist team to avoid impacts as far as possible. All residual impacts will be minimized as far as possible in accordance with a well-designed layout as well
		as possible in accordance with a well-designed layout as well as an Environmental Management Programme.

		The development will avoid all CBA 1 areas, and while
		development is being pursued within a CBA 2 area, the aquatic
		specialist has confirmed that no wetlands were identified within
		the study area, and thus the criteria for the designated CBA 2
		areas within this study area is based solely on the presence of
		the FEPA catchment of the Rooiberg and Klein Rooiberg river
		catchments. Given that the proposed development almost
		exclusively falls outside of the delineated freshwater
		ecosystems (which will be further amended during the EIA
		phase) the specialist has confirmed that no change in the
		Present Ecological State category is deemed likely. They have
		confirmed that development within the CBA catchment is not
		deemed an unacceptable land use.
		The terrestrial specialist further confirmed the CBAs are based
		on aquatic features and not terrestrial features.
		Site layouts will not necessarily be comparatively assessed but
		rather a single layout will be refined as additional information
		becomes available throughout the EIA process (e.g. specialist
		input, additional site surveys, and ongoing stakeholder
		engagement). For example, Buildable Area 3 has been
		identified within an avifaunal sensitive area and therefore
		needs to be removed/amended to avoid these areas. The final
		layouts, taking into account all sensitivities, will be amended
	DAFRI assessment that are contacted as sight and set of the TORO	and assessed during the EIR phase.
	DAERL recommends that any protected, specially protected (including TOPS	Noted, this will be included as a requirement in the draft EMPr

•	The listed activities represented in the EIAr and the application form must be the same and correct. If the activities applied for in the application form differ from those mentioned in the draft EIAr, an amended application form must be submitted.	If required, the application form will be updated and included in the final submission.
•	Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.	The most up to date template has been used.
•	The EIAr must provide an assessment of the impacts and mitigation measures for each of the listed activities applied for.	All impacts associated with the listed activities have been assessed.
(b) Publ	lic Participation	The advert and site notice has been placed in both English
•	Please ensure the language used to inform potential I&APs in the newspaper advertisement is not only communicated in the language English but should also utilise other dominant languages spoken in the study area. The EAP must ensure that the newspaper medium adequately caters for all potential I&APs in the study area. This should also apply to any site notification boards	and Afrikaans. The advert has been placed in the Noordwester which is widely distributed throughout the area.
	as well.	
•	Please ensure that comments from all relevant stakeholders are submitted to the Department with the EIAr. This includes but is not limited to the Northern Cape Department of Agriculture, Environmental Affairs, Rural Development	Noted, all listed stakeholders are on the project database and comment has been/will be requested in the PPP.

Prepared By:

17793

Project No.: Description: Revision No.: July 2023 Proposed Lesaka 1 Solar Energy Facility (SEF) 1.0

and Land Reform, the Hantam Local Municipality, the Namakwa District Municipality, the Department of Water and Sanitation (DWS), the provincial Department of Agriculture, the South African Heritage Resources Agency (SAHRA), the Endangered Wildlife Trust (EWT), BirdLife SA, the Department of Mineral Resources, the Department of Rural Development and Land Reform, and the Department of Forestry, Fisheries and the Environment: Directorate Biodiversity and Conservation.	
 Please ensure that all issues raised and comments received during the circulation of the draft SR and draft EIAr from registered I&APs and organs of state which have jurisdiction in respect of the proposed activity are adequately addressed in the final EIAr. 	Noted, all comments will be adequately addressed and submitted with the Final EIAr.
 Proof of correspondence with the various stakeholders must be included in the final EIAr. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments. 	All proof of correspondence will be included in the Final EIAr.
• A Comments and Response trail report (C&R) must be submitted with the final EIAr. The C&R report must incorporate all comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Appendix 1 of this comments letter. Please refrain from summarizing comments made by I&Aps. All comments from I&Aps must be copied verbatim and responded to clearly. Please note that a response such as "noted" is not regarded as an adequate response to I&AP's comments.	The updated CRR containing all comments received throughout the process will be included in the final EIA report. All comments are included verbatim.
 Comments from I&APs must not be split and arranged into categories. Comments from each submission must be responded to individually. 	Noted, all comments will be responded to individually.
The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 and 44 of the EIA Regulations, 2014, as amended.	Noted, the PPP is being undertaken with Regulations 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended.
(c) Layout & Sensitivity Maps The EIAr must provide coordinate points for the proposed development site and all proposed infrastructure (note that if the site has numerous bend points, at each bend point coordinates must be provided) as well as the start, middle and end point of all linear activities.	Noted, all site co-ordinates (including bend point co-ordinates) have been included in Section 5.2.

Project No.: Description: Revision No.: July 2023 17793

Proposed Lesaka 1 Solar Energy Facility (SEF) 1.0

Proposed Lesaka 1 Solar Energy Facility (SEF) 1.0

 The EAP must identify and provide a map which shows this development and its associated infrastructure in relation to the other proposed facilities in the area. The co-ordinates in the EIAr must be specific to each activity and infrastructure that is proposed on the site. The co-ordinates for each corner of the solar fields, the substation, BESS, power line route, and laydown areas must be included in the EIAr, i.e., we require that you provide us with the specific development footprints for each development parameter, and not an 	All similar renewable energy facilities within a 35km radius have been assessed as part of the cumulative assessment. All maps are included in Appendix 2 and 3 of the DEIAr and includes the required information. Noted, all site co-ordinates (including bend point co-ordinates for the solar fields, substation, BESS and laydown areas) have been included in Section 5.2. The specific development footprints for each development parameter have been included in the DEIAr.
 area outlining the entire site. Please provide a concise, but complete, summary and bullet list of the project description and associated infrastructure (or project scope) to be included in the decision (or as it should appear in the decision), should a positive Environmental Authorisation be granted. This must include a list of all development components and associated infrastructure. 	Noted, this is included under key project information at the beginning of the report as well as contained within the report itself.
 (g) General The EIAr must provide the technical details for the proposed facility in a table format as well as their description and/or dimensions. A sample for the minimum information required is listed under Annexure 2 below. 	All technical details have been included in a table format.
 The EAP must provide landowner consent for all farm portions affected by the proposed project i.e., all farm portions where the solar field and associated infrastructure are to be located. A construction and operational phase EMPr that includes mitigation and monitoring measures must be submitted with the final EIAr, including the Generic EMPr for substations and powerlines. 	Landowner consent has been obtained and included in the application form. The application form will be updated (if required) and included in the final submission. Both a generic EMPr for the substation as well as a construction and operational phase EMPr for the SEF will be drafted and included in the draft EIAr.
 When submitting the EIAr and future documents kindly name each of the documents and attachments according to the information it contains. E.g., instead of only naming it Appendix A, it must be Appendix A: Maps, Appendix B: EAP Declaration etc. 	Noted, the name conventions requested will be implemented.
The applicant is hereby reminded to comply with the requirements of Regulation 45 of GN R982 of 04 December 2014, as amendment, with regard to the time period allowed for complying with the requirements of the Regulations.	Noted, all timeframes as stipulated in the regulations will be adhered to.

Subject: RE: 17793 Lesaka Solar Energy Facilities 1 and 2 near Loeriesfontein in Northern Cape: DSR

Comment Period Starting

Hi Marina

I hope you are well!

Please see responses from the client below:

- If any new services or level crossings are planned to cross the railway line. 2 existing crossings are proposed to be used. Upgrades will made as required before construction commences. Please clarify the process regarding the Wayleaves in the Northern Cape. Drawings will be submitted before construction for approval. Please share Transnet standard designs if possible.
- If the Transnet service road will be utilised during the construction period or for normal day to day
 operation of the facilities. The Transnet service road will be used to gain access to the site during
 construction and operation. The use of the service road during construction and operation may have a small
 impact on the road conditions. During construction several heavy load vehicles will make use of this road
 daily, thereafter during operation several standard sized vehicles will use the road frequently. Please advise
 as to the current state of the road and potential upgrades that would be required once the proposed project
 reaches construction phase.
- Any other impact on Transnet owned land or infrastructure. None anticipated.
- Any new crossings or the use of the Transnet service road must be approved by TFR and covered by agreements. Understood.
- When will the project start? Construction is set to commence in 2025.

Thank you.

Kind Regards,

Michelle Guy

Period Starting

Hi Michelle

Not sure if you will be the contact person to speak to for this application – please see below notes from our Property side – please come back to me if any of this will happen as we need to proceed with Level crossings applications and also permission if the Transnet Road will be used – last question by when will the project start?

Thanks

M

Subject: FW: 17793 Lesaka Solar Energy Facilities 1 and 2 near Loeriesfontein in Northern Cape: DSR Comment

Period Starting

Hi Marina

Below notifications are for your further attention.

Note that it appears that the Lesaka 1 Solar Energy facility will be located directly adjacent to the Ore Line @ ±349,7km (between Loop 7 & Loop 8).

The Lesaka 2 Solar facility will not be affecting the Ore line directly.

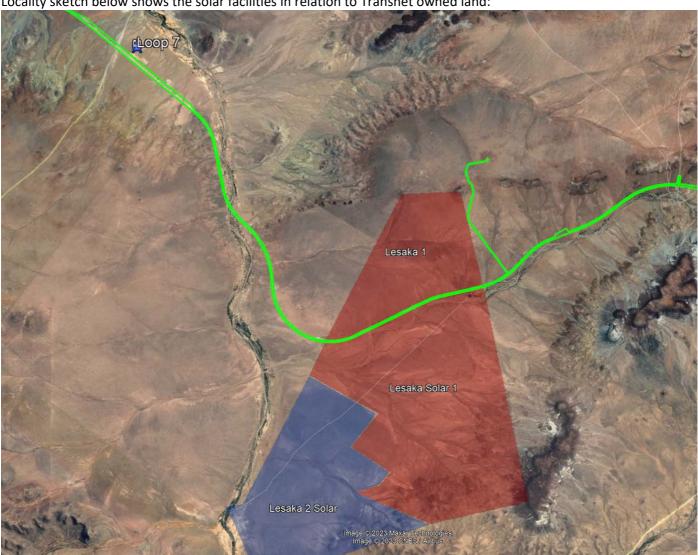

In order to comment further, we require more detailed information depicting details around:

If any new services or level crossings are planned to cross the railway line.

- If the Transnet service road will be utilised during the construction period or for normal day to day operation of the facilities.
- Any other impact on Transnet owned land or infrastructure.

Any new crossings or the use of the Transnet service road must be approved by TFR and covered by agreements.

Locality sketch below shows the solar facilities in relation to Transnet owned land:

Dear Interested and/or Affected Party

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

AVAILABILITY OF DRAFT SCOPING REPORTS FOR PUBLIC REVIEW

Please note that SiVEST SA (Pty) Ltd has been appointed by Lesaka 1 Solar Energy Facility (Pty) Ltd and Lesaka 2 Solar Energy Facility (Pty) Ltd as the Environmental Assessment Practitioner (EAP) for the abovementioned projects.

We would like to take this opportunity to inform you that, in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) (as amended), the Draft Scoping Reports (DSRs) for the above-mentioned projects will be available for public comment and review from **10** March 2023 to 12 April 2023 (end of business day).

Should you wish to receive an electronic copy of the DSRs please forward your request in writing to us.

Electronic copy of the DSRs will be uploaded onto a Tablet that can be reviewed at the following public place:

VENUE	STREET ADDRESS	HOURS	CONTACT NO
Hantam Local Municipality –	13 Long	Monday -	027 662 8600
Loeriesfontein Office	Street, Loeriesfontein,	Thursday	
	8185	07h30 - 16:30	
		Friday	
		07:30 - 13:00	

The reports as well as the accompanying appendices are also available on SiVEST's website: http://www.sivest.com/za, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Alternatively you can download the documents from wetransfer: https://we.tl/t-oQKxbfbOmE

Attached is an English and Afrikaans letter notifying you of the review period.

SiVEST is committed to complying with the requirements as set out in terms of POPIA.

I.T.O POPIA, you hereby declare and confirm that you, as an I&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

Kind Regards,

Established 1952

PER E-MAIL

Dear Ms Guy

COMMENTS ON THE DRAFT SCOPING REPORT FOR THE PROPOSED 350MW LESAKA 1 SOLAR ENERGY FACILITY (SEF) AND THE ASSOCIATED INFRASTRUCTURE NORTH OF THE TOWN OF LOERIESFONTEIN WITHIN THE HANTAM LOCAL MUNICIPALITY IN THE NORTHERN CAPE PROVINCE

The Application for Environmental Authorisation and the draft Scoping Report (SR) dated March 2023 and received by the Department on 10 March 2023, refer.

This letter serves to inform you that the following information must be included to the final SR:

(a) Specific Comments

- (i) The co-ordinates in the SR must be specific to each activity and infrastructure that is proposed on the site. The co-ordinates for each corner of the solar fields, substations and battery energy storage systems (BESS) must be included in the report, i.e., we require that you provide us with the specific development footprints for each development parameter, and not an area outlining the entire site.
- (ii) Please provide a concise, but complete, summary and bullet list of the project description and associated infrastructure (or project scope). This must include a list of all development components and associated infrastructure.
- (iii) Kindly ensure the development footprints (hectares/square metres) and specifications of all proposed infrastructure and associated infrastructure during all phases are included in the final SR.
- (iv) Kindly take note that when finalising the layout plan the position of all proposed infrastructure and linear activities, which includes but not limited to the following must be illustrated:
 - > Solar fields:
 - > Construction camp laydown areas;
 - > Substations:
 - > Internal roads:
 - ➤ Battery energy storage systems (BESS);
 - > Operation and maintenance buildings; and
 - > Power lines.

- (v) The final SR must clearly provide a detailed section which addresses the site sensitivity verification requirements where a specialist assessment is required but no specific assessment protocol has been prescribed, as well as the site sensitivity verification and minimum report content requirements for all specialist assessments undertaken, which were included in the screening tool report.
- (vi) Further to the above take note that a site sensitivity verification report should be included in the final SR which can be undertaken by either an EAP or specialist, which must clearly confirm or dispute the environmental sensitivity as identified in the screening tool report for each theme.
- (vii) According to the application form, Critical Biodiversity Area occurs on the site. Therefore, the mitigation hierarchy should be applied in full, and a Biodiversity Offset should be considered to ensure that significant residual impacts of the development are remedied.

(b) Listed Activities

- (i) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure as described in the project description.
- (ii) The listed activities represented in the final SR and the application form must be the same and correct.
- (iii) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted.
- (iv) Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.

(c) Layout & Sensitivity Maps

- (i) The final SR must provide coordinate points for the proposed development site (note that if the site has numerous bend points, at each bend point coordinates must be provided) as well as the start, middle and end point of all linear activities.
- (ii) Please provide a layout map which indicates the following:
 - a) A clear indication of the envisioned area for the proposed solar fields;
 - b) Position of the solar panels;
 - c) Power lines;
 - d) Internal roads:
 - e) All supporting onsite infrastructure such as laydown area, guard house and control room etc. (existing and proposed);
 - f) Substations, transformers, switching stations and inverters;
 - g) Battery Energy Storage Systems (BESS);
 - h) Connection routes (including pylon positions) to the distribution/transmission network;
 - i) All existing infrastructure on the site, especially railway lines and roads; and
 - i) Buildings.
- (iii) Please provide an environmental sensitivity map which indicates the following:
 - a) The location of sensitive environmental features identified on site, e.g. CBAs, protected areas, heritage sites, wetlands, drainage lines etc. that will be affected by the facility and its associated infrastructure:
 - b) Buffer areas: and
 - c) All "no-go" areas.
- (iv) The above layout map must be superimposed (overlain) with the sensitivity map and a cumulative map which shows neighbouring and existing infrastructure.
- (v) Google maps will not be accepted.

(d) Alternatives

- (i) Please provide a description of any identified alternatives for the proposed activity that are feasible and reasonable, including the advantages and disadvantages that the proposed activity or alternatives will have on the environment and on the community that may be affected by the activity as per Appendix 2 of GN R.982 of 2014 (as amended).
- (ii) Alternatively, you should submit written proof of an investigation and motivation if no reasonable or feasible alternatives exist in terms of Appendix 2.

(e) Public Participation Process

- (i) Comments must be obtained from this Department's Biodiversity Conservation Directorate at BCAdmin@dffe.gov.za.
- (ii) Please ensure that all issues raised, and comments received during the circulation of the SR from registered I&APs and organs of state which have jurisdiction in respect of the proposed activity are adequately addressed in the final SR, including comments from this Department, and must be incorporated into a Comments and Response Report (CRR).
- (iii) Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.
- (iv) The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 and 44 of the EIA Regulations 2014, as amended.
- (v) A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Annexure 1 of this comments letter. Please refrain from summarising comments made by I&APs. All comments from I&APs must be copied verbatim and responded to clearly. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.
- (vi) The final SR must provide evidence that all identified and relevant competent authorities have been given an opportunity to comment on the proposed development particularly the Northern Cape Department of Agriculture, Environmental Affairs, Rural Development and Land Reform, and the District and Local Municipalities.
- (vii) Minutes and attendance registers (where applicable) of any physical/virtual meetings held by the Environmental Assessment Practitioner (EAP) with Interested and Affected Parties (I&APs) and other role players must be included in the final SR.

(f) Specialist Assessments

- (i) It is noted that the property is affected by numerous watercourses and wetlands, and that activities that may trigger Section 19 and Section 21 of the National Water Act No. 36 of 1998 were applied for/included in the application form. Please note that a separate hydrological impact assessment must be conducted to assess the impacts of the proposed development on the surface hydrology of the area. The terms of reference for the study must include, *inter alia* the following:
 - a) Identification and sensitivity rating of all surface water courses for the impact phase of the proposed development;
 - b) Identification, assessment of all potential impacts to the water courses and suggestion of mitigation measures; and,
 - c) Recommendations on the preferred placement of the PV Facility and all associated infrastructure and preference must be provided to the avoidance of the watercourses on the property.
- (ii) The study area falls within the ambit of the Square Kilometre Array South Africa. The impacts associated with radio frequency interference on the SKA must form part of the environmental impact

1CA

- assessment. The applicant must liaise with SKA-SA for advice on the terms of reference for possible EMI and RFI detailed specialist studies.
- (iii) Specialist Declaration of Interest forms must be attached to the final SR. The forms are available on Department's website (please use the Department's template).
- (iv) The EAP must ensure that the terms of reference for all the identified specialist studies include the following:
 - a) A detailed description of the study's methodology; indication of the locations and descriptions of the development footprint, and all other associated infrastructures that they have assessed and are recommending for authorisation.
 - b) Provide a detailed description of all limitations to the studies. All specialist studies must be conducted in the right season and providing that as a limitation will not be allowed.
 - c) Please note that the Department considers a 'no-go' area, as an area where no development of any infrastructure is allowed; therefore, no development of associated infrastructure including access roads is allowed in the 'no-go' areas.
 - d) Should the specialist definition of 'no-go' area differ from the Department's definition; this must be clearly indicated. The specialist must also indicate the 'no-go' area's buffer if applicable.
 - e) Bird specialist studies must have support from Birdlife South Africa.
 - f) All specialist studies must be final, and provide detailed/practical mitigation measures for the preferred alternative and recommendations, and must not recommend further studies to be completed post EA.
- (v) Should a specialist recommend specific mitigation measures, these must be clearly indicated.
- (vi) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defendable reasons; and were necessary, include further expertise advice.
- (vii) Please ensure that all mitigation recommendations are in line with applicable and most recent quidelines.
- (viii) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. "the Protocols"), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols.
- (ix) As such, the Specialist Declaration of Interest forms must also indicate the scientific organisation registration/member number and status of registration/membership for each specialist.
- (x) Please also ensure that the final SR includes the <u>Site Verification Report</u> as required by the relevant environmental themes and assessments.
- (xi) Please note further that the protocols, if applicable, require certain specialists' to be SACNASP registered. Please ensure that the relevant specialist certificates are attached to the relevant reports.
- (xii) We note that the screening tool indicates that thirteen specialist studies need to be undertaken or conducted. We note that the SR does not include thirteen specialist reports. Please kindly peruse the protocols and provide in the SR site sensitivity reports for each theme/study listed, as well as compliance statements for assessments not needed to be conducted based on your site sensitivity verification.

(g) Cumulative Assessment

- (i) If there are any other similar facilities within a 30km radius of the proposed development site, a cumulative impact assessment must be conducted for all identified and assessed impacts which must indicate the following:
 - a) Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e. hectares of cumulatively transformed land.

- b) Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.
- c) The cumulative impacts significance rating must also inform the need and desirability of the proposed development.
- d) A cumulative impact environmental statement on whether the proposed development must proceed.

(h) General

You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a scoping report which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority"

You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of scoping reports in accordance with Appendix 2 and Regulation 21(1) of the EIA Regulations 2014, as amended.

Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.

Yours sincerely

Ms Millicent Solomons

Subject: [CAUTION:EXTERNAL EMAIL] RE: 17793 Lesaka Solar Energy Facilities 1 and 2 near Loeriesfontein in Northern Cape: DSR Comment Period Ending

Dear Interested and/or Affected Party (I&AP) / Stakeholder,

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

REMINDER ABOUT COMMENTING PERIOD FOR DRAFT SCOPING REPORTS (DSRs)

Please note that the Draft Scoping Reports (DSRs) for the above-mentioned projects were made available for public review and comment from from 10 March 2023 to 12 April 2023 (end of business day).

The review and comment period for the above-mentioned projects therefore ends on 12 April 2023 (end of business day).

SIVEST therefore wish to remind you to submit comments for the above-mentioned projects before close of business on 12 April 2023, if you have not done so already.

To access the documents visit SiVEST's website: https://www.sivest.com/za/, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Should you have any comments, please feel free to contact the public participation office at the details below:

SiVEST Environmental

PO Box 2921, RIVONIA, 2128 Phone: (011) 798 0600 E-mail: sivest_ppp@sivest.co.za Fax: (011) 803 7272

We would like to thank you in anticipation of your active and meaningful contribution to the BA and public participation processes.

Kind regards,

Hlengiwe Ntuli

Projects Secretary & PPP Administrator

Dear Interested and/or Affected Party

NOTICE OF THE ENVIRONMENTAL IMPACT ASSESSMENTS (EIAs) FOR THE PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITIES (SEFs) AND ASSOCIATED INFRASTRUCTURE NEAR LOERIESFONTEIN IN THE NORTHERN CAPE PROVINCE (DFFE Reference No: To be announced)

AVAILABILITY OF DRAFT SCOPING REPORTS FOR PUBLIC REVIEW

Please note that SiVEST SA (Pty) Ltd has been appointed by Lesaka 1 Solar Energy Facility (Pty) Ltd and Lesaka 2 Solar Energy Facility (Pty) Ltd as the Environmental Assessment Practitioner (EAP) for the abovementioned projects.

We would like to take this opportunity to inform you that, in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) (as amended), the Draft Scoping Reports (DSRs) for the above-mentioned projects will be available for public comment and review from 10 March 2023 to 12 April 2023 (end of business day).

Should you wish to receive an electronic copy of the DSRs please forward your request in writing to us.

Electronic copy of the DSRs will be uploaded onto a Tablet that can be reviewed at the following public place:

VENUE		STREET ADDRESS	HOURS	CONTACT NO
Hantam Local	Municipality -	13 Long Street, Loeriesfontein, 8185	Monday - Thursday	027 662 8600
Loeriesfontein Office			07h30 - 16:30	
			Friday	
			07:30 - 13:00	

The reports as well as the accompanying appendices are also available on SiVEST's website: http://www.sivest.com/za, click on Downloads, then browse to the folder '17793 Lesaka 1 and 2 Solar Energy Facilities'.

Alternatively you can download the documents from wetransfer: https://we.tl/t-oOKxbfbOmE

Attached is an English and Afrikaans letter notifying you of the review period.

SiVEST is committed to complying with the requirements as set out in terms of POPIA.

I.T.O POPIA, you hereby declare and confirm that you, as an I&AP providing information, consent for your information to be gathered, stored and distributed for the purpose of this project.

RE: PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITY (SEF) AND ASSOCIATED INFRASTRUCTURE NEAR LOEROIESFONTEIN IN THE NORTHERN CAPE PROVINCE.

Reference is made to the above-mentioned report with issue date 10 March 2023 submitted to the Department of Water and Sanitation.

This Department takes note of the proposed activity of the above-mentioned report, as well as all the mitigation and damage management controls directed towards water resources, surface, and subsurface water flow. The department, however, still wishes to make the following comments:

- Any activity within the 1:100-year floodline or within 100 metres of a watercourse (river, spring, natural channel, a lake or dam) or within a 500 m radius from the delineated boundary (extent) of any wetland or pan triggers a water use activity in terms of Section 21 (c) & (i) of the National Water Act, 1998 (Act 36 of 1998).
- 2. All battery storage facilities need to be constructed in such a way as no surface or groundwater will be polluted by any leakage from the battery storage facilities.

RE: PROPOSED DEVELOPMENT OF THE LESAKA 1 AND 2 SOLAR ENERGY FACILITY (SEF) AND ASSOCIATED INFRASTRUCTURE NEAR LOEROIESFONTEIN IN THE NORTHERN CAPE PROVINCE.

- If any pollution incident is experienced, the DWA must be notified immediately (within 24 hours) as required in terms of section 19 of the National Water Act, 1998 (Act no.36 of 1998).
- 4. General waste needs to be collected and disposed of at a registered municipal site during construction, and written agreement should be provided to this department.
- 5. The applicant shall ensure that hazardous waste generated during the construction is removed from site and disposed of at a registered waste disposal facility and a signed copy of service agreement is submitted to DWS as proof of such a service.
- Please note that all requirements as stipulated in the National Water Act (NWA) 1998 (Act no.36 of 1998) must be adhered to.

Please feel free to contact this department, should there be any enquiries.

Yours sincerely,

PROVINCIAL HEAD: NORTHERN CAPE OPERATIONS

0001

Attention: Muhammed Essop (DFFE: Priority Infrastructure Projects) (<u>MEssop@dffe.gov.za</u>); cc the EAP (Michelle Guy) on behalf of SIVEST Environmental Consultancy (<u>michelleg@sivest.com</u>).

Dear Mr. Essop

Background:

Lesaka 1 & 2; PV Solar Energy Facility (Pty) Ltd is proposing to construct the Lesaka 1 & 2 Solar Energy Facilities (SEF), and associated infrastructure located on Portion 0 of farm Kluitjies Kraal No.264, approximately 35 km north of Loeriesfontein in the Hantam Local Municipality and the Namakwa District Municipality, in the Northern Cape Province. Both solar developments will have a total development footprint of approximately 1465 hectares (excluding associated power lines).

The spatial extent of impacts is potentially significant in the study area. Considering the diversification of South **Africa's energy** developments, identification and understanding of the associated impacts on the natural resources of the area is considered important.

Although the terrestrial specialist has confirmed that the CBAs are based on aquatic features and not terrestrial features, it must be noted that the EIA must fully (cumulative) consider the impacts of the solar developments in addition to other renewable energy developments on habitat transformation/loss, harm to birds, impact on total water resource availability, impact on local ecology and biodiversity, vegetation clearance and associated erosion, visual and dust impact.

The Aquatic specialist confirmed the following:

"No wetlands were identified within the study area, and thus the criteria for the designated CBA 2 areas within this study area is based solely on the presence of the FEPA catchment of the Rooiberg and Klein Rooiberg River catchments. Given that the PVSEF1 and PVSEF2 proposed development footprints almost exclusively fall outside of the development setbacks of the delineated freshwater ecosystems except in the case of some overhead powerline's routes, SEF 2 Buildable area 5 and the collector substations being located within 32m of some small drainage features no change in the Present Ecological State (PES) Category of these freshwater ecosystems is deemed likely. This is provided that the mitigation measures as listed in the freshwater specialist report are strictly applied, with routine monitoring of freshwater ecosystems during the operational phase. For this reason, development of the SEF within a CBA catchment is not deemed an unacceptable land use and can be considered for authorisation from a freshwater resource management point of view".

In relation to the freshwater impacts, one of the reasons the CBA's was mapped in the area is for water source protection. Since this proposed development requires a full EIA, a more comprehensive study on water source protection and the mitigation of impacts on water source protection is critical for decision making. Especially also as water is a scares resource within this area and ground water often the only access to water for the people. The loss of freshwater related CBA's must not further compromise conservation targets of freshwater ecosystems.

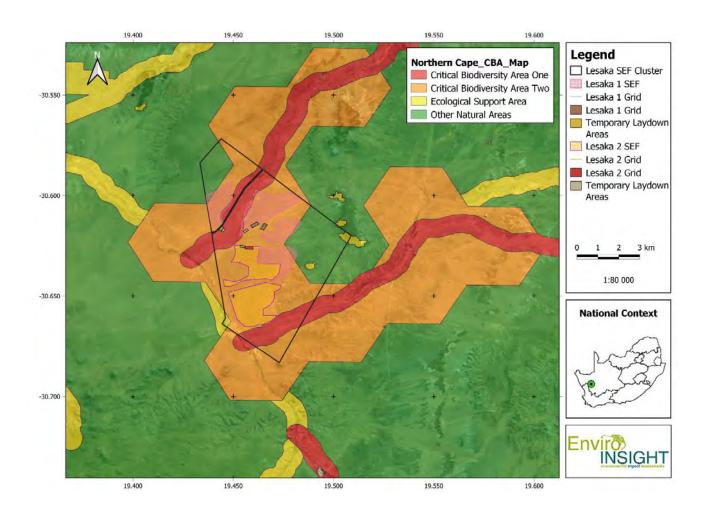

Figure 1: CBA's in relation to the Lesaka Solar 1 & 2 developments.

The opinion of the terrestrial and avifaunal specialist concluded the following:

"The vegetation unit is not considered threatened or highly sensitive and there are limited sensitive features or important landscape features that, if disturbed or transformed, will result in a catastrophic collapse of the system. The proposed Lesaka SEF does not represent a significant impact on the ecosystem processes and services, except for the main river courses and wetland pans as well as Koppies located on the study area which needs to be excluded from construction activities. Large sections of the affected area are not considered highly sensitive and there are no specific features of the affected area which would indicate that it is of broadscale significance for faunal movement or landscape connectivity. The CBA are mainly aquatic related, and as indicated the Hantam Karoo is not a threatened system or highly sensitive, accordingly the CBA is not justified for this, unless certain elements or endemism, rarity or important ecosystem processes have been identified, which this assessment has not.

There is accordingly no reason based on the collected data to indicate that the CBA1 and CBA2 are from a Terrestrial Biodiversity perspective. Should the sensitive areas, specifically the no-go areas with indicated

buffers be avoided by the proposed development, and the indicated mitigation measures in the reports be implemented, the proposed Lesaka 1 and 2 SEFs can proceed".

It is not evident that specialist inputs have already gone into the screening study to screen out the various alternatives. The specialist studies must refer to all the alternatives assessed prior to screening in order to provide the necessary information and motivation for screening these alternatives out, particularly where the motivation for screening these alternatives was biodiversity-related impacts. It is a concern that no alternatives were considered during the study. Thus it is interpreted that the mitigation hierarchy has not been filly applied yet.

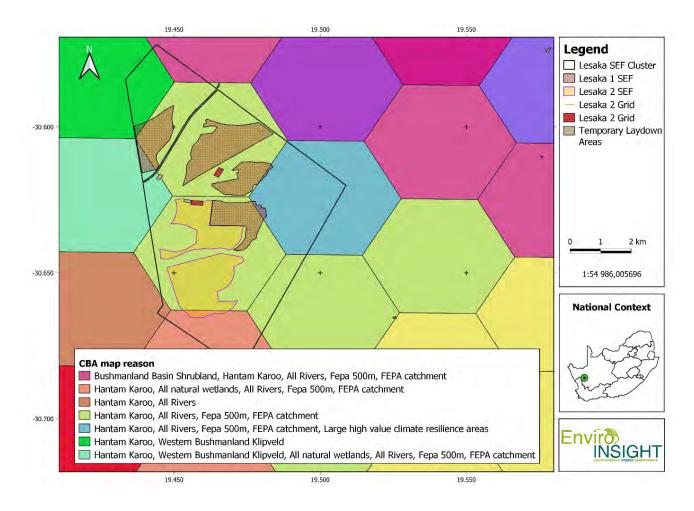

Figure 2: Sensitivity map of the area

DAERL recommends that any protected, specially protected (including TOPS listed) vegetation that requires removal be rescued and used for rehabilitation purposes. The DEAERL would like to reiterate that all protected species listed in Schedules 1,2 and 3 respectively, in terms of the Northern Cape Nature Conservation Act, 1999 (Act No. 109 of 2009) may not be picked or removed without the relevant permits (fauna and flora), which

must be obtained from DAERL. This is also to ensure that rescued plant material is accounted for and used in the rehabilitation or relocation processes. This includes for fauna capture or removal permits.

Dust during strong winds can be problematic where vegetation and topsoil were removed. Vegetation regrowth is generally encouraged under the solar panels, except where vegetation in the solar field is a fire hazard. Where natural vegetation is kept intact, it is seen as an effective natural dust suppressor.

Erosion is also a concern and must be addressed comprehensively to not negatively impact the freshwater ecosystems and surrounding ecosystems, and general cause soil degradation (edge effect impacts extend over time if not managed and contained).

The following comments are based on faunal, vegetation and landscape connectivity in the study area:

- 1. Can the specialist provide more comments regarding how the site is proposed to be fenced and what impacts this may have on faunal movements and migration corridors. Also provide management guidelines on how the movement of animals in and out of the development footprints will be managed. Mammal drownings (e.g., bat-eared fox and aardwolf) are common at evaporation ponds associated with solar developments.
- 2. Given the extent of the neighbouring renewable energy developments (to the north) can the specialist comment on the cumulative impact that this development will have on the ecological connectivity in the landscape. This impact is very important given how this development has not yet been approved, while the developments to the north has been approved. Not to say that the applicants need to take responsibility for other developers but to assess the impacts of the proposed development on ecosystem function and specific vegetation units and/or protected species on a local and regional scale.
- 3. The timeframe for rehabilitation to occur after development has commenced should be specified. Many plants species' seed banks do not remain viable within the topsoil for such a long time period or may be lost. In addition, disturbed areas and stockpiled topsoil is prone to invasion by alien plants and pioneer species. Soil erosion management to be included.
- 4. The ecological specialist study should also be updated to refer to the updated 2018 South African Vegetation Map. The list of species provided at quarter degree grid scale are not meaningful on its own. Lists of species (plants and animals) seen on site should be provided and where surveys are not conducted should be explained and motivated.

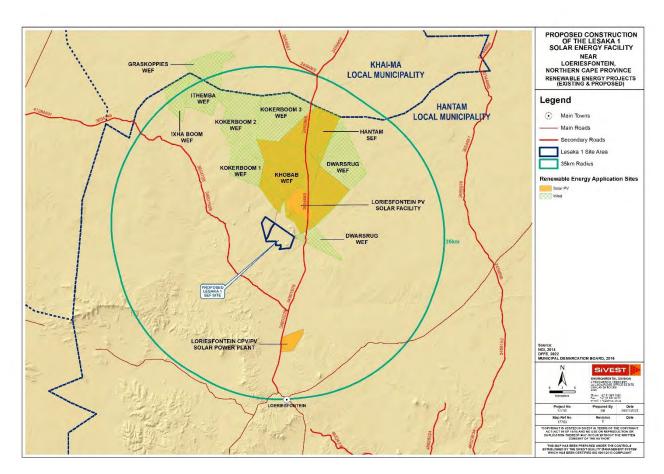

Figure 3: Geographical location of proposed Lesaka Solar 1 & 2 Energy Facilities in relation to neighbouring renewable energy developments.

In addition, it is unclear if there is synchronisation of the NEMA and WULA processes, however this will be for the Competent Authorities to decide.

Yours truly

forte

PER E-MAIL

Dear Ms Guy

ACCEPTANCE OF THE SCOPING REPORT FOR THE PROPOSED 240MW LESAKA 1 SOLAR ENERGY FACILITY (SEF) AND THE ASSOCIATED INFRASTRUCTURE NORTH OF THE TOWN OF LOERIESFONTEIN WITHIN THE HANTAM LOCAL MUNICIPALITY IN THE NORTHERN CAPE PROVINCE

The final Scoping Report (SR) and the Plan of Study for Environmental Impact Assessment dated April 2023 and received by the Department on 21 April 2023, refer.

The Department has evaluated the submitted final SR and the Plan of Study for Environmental Impact Assessment dated April 2023 and is satisfied that the documents comply with the minimum requirements of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended. The final SR is hereby accepted by the Department in terms of Regulation 22(1)(a) of the EIA Regulations, 2014, as amended.

You may proceed with the environmental impact assessment process in accordance with the tasks contemplated in the Plan of Study for Environmental Impact Assessment as required in terms of the EIA Regulations, 2014, as amended.

In addition, the following amendments and additional information are required for the Environmental Impact Assessment Report (EIAr):

(a) Listed Activities

- (i) Please ensure that all relevant listed activities are applied for, are specific and that it can be linked to the development activity or infrastructure as described in the project description.
- (ii) Please ensure that all relevant listed activities and sub-activities are correctly numbered as per the relevant listing notices.
- (iii) The EIAr must assess the correct sub listed activity for each listed activity applied for.
- (iv) The listed activities represented in the EIAr and the application form must be the same and correct. If the activities applied for in the application form differ from those mentioned in the draft EIAr, an amended application form must be submitted.

- (v) Please note that the **Department's application form template has been amended and can be downloaded** from the following link https://www.dffe.gov.za/documents/forms.
- (vi) The EIAr must provide an assessment of the impacts and mitigation measures for each of the listed activities applied for.

(b) Public Participation

- (i) Please ensure the language used to inform potential I&APs in the newspaper advertisement is not only communicated in the language English but should also utilise other dominant languages spoken in the study area. The EAP must ensure that the newspaper medium adequately caters for all potential I&APs in the study area. This should also apply to any site notification boards as well.
- (ii) Please ensure that comments from all relevant stakeholders are submitted to the Department with the EIAr. This includes but is not limited to the Northern Cape Department of Agriculture, Environmental Affairs, Rural Development and Land Reform, the Hantam Local Municipality, the Namakwa District Municipality, the Department of Water and Sanitation (DWS), the provincial Department of Agriculture, the South African Heritage Resources Agency (SAHRA), the Endangered Wildlife Trust (EWT), BirdLife SA, the Department of Mineral Resources, the Department of Rural Development and Land Reform, and the Department of Forestry, Fisheries and the Environment: Directorate Biodiversity and Conservation.
- (iii) Please ensure that all issues raised and comments received during the circulation of the draft SR and draft EIAr from registered I&APs and organs of state which have jurisdiction in respect of the proposed activity are adequately addressed in the final EIAr.
- (iv) Proof of correspondence with the various stakeholders must be included in the final EIAr. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.
- (v) A Comments and Response trail report (C&R) must be submitted with the final EIAr. The C&R report must incorporate all comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Appendix 1 of this comments letter. Please refrain from summarising comments made by I&APs. All comments from I&APs must be copied verbatim and responded to clearly. Please note that a response such as "noted" is not regarded as an adequate response to I&AP's comments.
- (vi) Comments from I&APs must not be split and arranged into categories. Comments from each submission must be responded to individually.
- (vii) The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 and 44 of the EIA Regulations, 2014, as amended.

(c) Layout & Sensitivity Maps

- (i) The EIAr must provide coordinate points for the proposed development site and all proposed infrastructure (note that if the site has numerous bend points, at each bend point coordinates must be provided) as well as the start, middle and end point of all linear activities.
- (ii) The EIAr must provide a copy of the final preferred layout map. All available biodiversity information must be used in the finalisation of the layout map. Existing infrastructure must be used as far as possible e.g., roads. The layout map must indicate the following:
 - a) A clear indication of the envisioned area for the proposed solar energy facility;
 - b) Position of the solar panels;
 - c) Powerlines;
 - d) Internal roads:
 - e) All supporting onsite infrastructure such as laydown area, guard house and control room etc.;
 - f) Substations, transformers, switching stations and inverters;
 - g) Battery Energy Storage System;

1CA

- h) Connection routes (including pylon positions) to the distribution/transmission network;
- i) All existing infrastructure on the site, especially railway lines and roads; and
-) Buildings, including accommodation.
- (iii) Please provide an environmental sensitivity map which indicates the following:
 - a) The location of sensitive environmental features identified on site, e.g. CBAs, protected areas, heritage sites, wetlands, drainage lines, nesting and roosting sites, etc. that will be affected by the facility and its associated infrastructure;
 - b) Buffer areas; and
 - c) All "no-go" areas.
- (iv) The above layout map must be superimposed (overlain) with the sensitivity map and a cumulative map which shows neighbouring and existing infrastructure.
- (v) Google maps will not be accepted.

(d) Specialist assessments

- (i) Please provide a detailed description as well as any associated assessments related to the technology required for the Battery Energy Storage System (BESS) in the EIAr.
- (ii) The EAP must ensure that the terms of reference for all the identified specialist studies must include the following:
 - a) A detailed description of the study's methodology; indication of the locations and descriptions of the development footprint, and all other associated infrastructures that they have assessed and are recommending for authorisation.
 - b) Provide a detailed description of all limitations to the studies. All specialist studies must be conducted in the right season and providing that as a limitation will not be allowed.
 - c) Please note that the Department considers a 'no-go' area, as an area where no development of any infrastructure is allowed; therefore, no development of associated infrastructure including access roads is allowed in the 'no-go' areas.
 - d) Should the specialist definition of 'no-go' area differ from the Department's definition; this must be clearly indicated. The specialist must also indicate the 'no-go' area's buffer if applicable.
 - e) Bird specialist studies must have support from Birdlife South Africa.
 - f) All specialist studies must be final, and provide detailed/practical mitigation measures for the preferred alternative and recommendations, and must not recommend further studies to be completed post EA.
 - g) Should a specialist recommend specific mitigation measures, these must be clearly indicated.
- (iii) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defendable reasons; and were necessary, include further expertise advice.
- (iv) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting in identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. "the Protocols") and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols.
- (v) Please also ensure that the EIAr includes the Site Verification Report and Compliance Statements (where applicable) as required by the relevant themes.
- (vi) Please note further that the protocols, if applicable, require certain **specialists' to be SACNASP** registered. Please ensure that the relevant specialist certificates are attached to the relevant reports.
- (vii) As such, the Specialist Declaration of Interest forms must also indicate the scientific organisation registration/member number and status of registration/membership for each specialist.

1CA

(viii) The following Specialist Assessments will form part of the EIAr:

J	
Specialist Study	Company
Agricultural Compliance Statement	Johann Lanz
Avifauna Scoping Report	Enviro Insight
Freshwater Assessment	Fen Consulting
Terrestrial Biodiversity	Environ Insight
Social Assessment	Tony Barbour Environmental Consulting
Visual Scoping Report	SRK Consulting
Heritage Impact Assessment	CTS Heritage
Geotechnical Specialist Study	GaGE Consulting (Pty) Ltd
Transportation Study	Enertag
High Level Safety Health and Environmental Risk	ishecon
Assessment	

- (ix) Please ensure that each specialist study has the correct and same project description and layout to assess.
- (x) Please include a table that shows the proposed studies and the relevant specialists carrying out the study. In addition, a summary should be included of the specialist's recommendations in terms of the alternatives that are preferred based on the findings of their study.

(e) Cumulative Assessment

- (i) If there other similar facilities proposed within a 30km radius of the proposed development site, a cumulative impact assessment must be conducted for all identified and assessed impacts which must be refined to indicate the following:
 - a) Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e. hectares of cumulatively transformed land.
 - b) Detailed process flow and proof must be provided, to indicate **how the specialist's** recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.
 - c) The cumulative impacts significance rating must also inform the need and desirability of the proposed development.
 - d) A cumulative impact environmental statement on whether the proposed development must proceed.

(f) Specific comments

- (i) The EAP must provide details of the specific locations in the EIAr, and not provide vague locations of the proposed developments. All associated infrastructure must be clearly indicated in the EIAr and its associated layout plans.
- (ii) The EAP must identify and provide a map which shows this development and its associated infrastructure in relation to the other proposed facilities in the area.
- (iii) The co-ordinates in the EIAr must be specific to each activity and infrastructure that is proposed on the site. The co-ordinates for each corner of the solar fields, the substation, BESS, power line route, and laydown areas must be included in the EIAr, i.e., we require that you provide us with the specific development footprints for each development parameter, and not an area outlining the entire site.
- (iv) Please provide a concise, but complete, summary and bullet list of the project description and associated infrastructure (or project scope) to be included in the decision (or as it should appear in the decision), should a positive Environmental Authorisation be granted. This must include a list of all development components and associated infrastructure.

(g) General

- (i) The EIAr must provide the technical details for the proposed facility in a table format as well as their description and/or dimensions. A sample for the minimum information required is listed under Annexure 2 below.
- (ii) The EAP must provide landowner consent for all farm portions affected by the proposed project i.e., all farm portions where the solar field and associated infrastructure are to be located.
- (iii) A construction and operational phase EMPr that includes mitigation and monitoring measures must be submitted with the final EIAr, including the Generic EMPr for substations and powerlines.
- (iv) When submitting the EIAr and future documents kindly name each of the documents and attachments according to the information it contains. E.g., instead of only naming it Appendix A, it must be Appendix A: Maps, Appendix B: EAP Declaration etc.

The applicant is hereby reminded to comply with the requirements of Regulation 45 of GN R982 of 04 December 2014, as amendment, with regard to the time period allowed for complying with the requirements of the Regulations.

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an environmental authorisation being granted by the Department.

Yours faithfully

Mr Sabelo Malaza
