

**Photo 1: One of few tuckshops located within the existing Gamakor Settlement.**

**Photo 2: Bricks used for construction of informal houses – presenting a challenge with regards to the proposed Gamakor Project.**

**Photo 3: Photo showing layout of previously constructed houses within the existing Gamakor Settlement.**

**Photo 4: Photo showing lack of vegetation characteristic of the Bushmanland Arid Grassland vegetation type.**

**Photo 5: Illegal dumping noted outside the existing Gamakor Settlement boundary.**

**Photo 6: Photo showing areas previously cleared of vegetation for informal access roads.**

**Photo 7: Presence of alien invasive plant species located within highly, previously disturbed areas.**

**Photo 8: Presence of alien invasive plant species located within highly, previously disturbed areas. Note, illegal dumping has taken place.**

**Photo 9: Sparse vegetation present within the proposed site for the Gamakor Development.**

**Photo 10: Sparse vegetation characteristic of the proposed site for development. Note, large areas of exposed soil susceptible to erosion.**

**Photo 11: Presence of livestock within the existing Gamakor Settlement.**

**Photo 12: Illegal dumping activities in close proximity to the existing Gamakor Development.**

**Photo 13: Services, namely electrical supply, associated with the existing Gamakor Settlement.**

**Photo 14: Illegal dumping noted during the site visit. Overview of the proposed site for development. Note, sparse vegetation and large areas of exposed soil susceptible to erosion.**

**Photo 15: Illegal dumping of general and hazardous (e.g. nappies) waste within close proximity to households, highlighting the potential health and safety risks and waste management plan required.**

**Photo 16: Contaminated runoff where litter has been accumulated. This presents health and safety risks.**

**Photo 17: Another tuckshop where a poster was placed. This tuckshop receives a lot of customers and is located within a conspicuous location.**

**Photo 18: Illegal dumping in close proximity to households. This highlights the need for a waste management plan.**

**Photo 19: Illegal dumping within the development footprint of the proposed Gamakor Development.**

**Photo 20: Fencing associated with households adjacent to the proposed site for the Gamakor Development.**
