**KENNISGEWING TEN OPSIGTE VAN DIE AANSOEK OM 'N MYNREG VIR DIE
VOORGESTELDE DOORNHOEK FLUORSPAR MYN OP VERSKEIE GEDEELTES
VAN DIE PLASE SOOS AANGEDUI OP FIGUUR 1: – ZEERUST DISTRIK**

**NAMENS: SA FLUORITE (EDMS) BEPERK, EN
SOUTHERN PALACE 398 (EDMS) BEPERK**

SA Fluorite (Edms) Beperk en Southern Palace 398 (Edms) Beperk is eksplorasië- en mynboumaatskappye aan wie prospekterregte uitgereik is oor verskeie plase soos aangetoon op die aangehegte Figuur 1. Die ERG Groep behou die beheerende aandeel in albei die maatskappye, en beplan om die regte te konsolideer en om aansoek te doen vir 'n mynreg oor die gesamentelike area.

Prospekteer aktiwiteite wat oor die afgelope paar jaar uitgevoer is het aangetoon dat lewensvatbare konsentrasies vloeispaat oor verskeie van die plase teenwoordig is, en dus die rede vir die aansoek om 'n gekonsolideerde mynreg.

U plaas is een van die plase wat binne die beoogde mynreg lisensie area geleë is, en hierdie brief dien as 'n inligtingsbrief om u op hoogte te hou van ons beplande aktiwiteite, asook om u die geleentheid te bied om kommentaar te lewer, en kommer uit te spreek. 'n Formele proses van openbare deelname in ooreenstemming met die Omgewingsimpakevaluering (Environmental Impact Assessment (EIA)) Regulasies van 2014 sal inisieer word (GN R982 van 8 Desember 2014).

'n Openbare vergadering sal ook gehou word waar alle ander belanghebbende en geaffekteerde partye die geleentheid sal kry om hul kommer uit te spreek.

As gevolg van swak internasionale marktoestande is dit nodig om die mynbou-aktiwiteite gelydelik te faseer en in twee hoof-fases te verdeel. Die eerste fase sal plaasvind op gedeeltes van

Renosterfontein 304 JP, en die tweede fase sal plaasvind op gedeeltes van Plaas 306 JP. Die voorgestelde myn oppervlak infrastruktuur word geleë op die bogenoemde plase. Bykomende minerale hulpbronne is ook geleë op omliggende plase binne die mynreg gebied.

Fase 1 aktiwiteite behels die volgende:

Tydens fase een sal daar moontlik 'n loodsaanleg met 'n kapasiteit van ongeveer 50 ton per uur op die plaas Renosterfontein opgerig word.

Die doel van hierdie aanleg is om die metallurgie en herwinning van die fluorspar te toets, en ook om voldoende tonnemaat wat nodig is vir die bemarking doeleindes te produseer. Die aanleg mag dalk gekoppel word aan die fase 2 ontwikkeling.

Water studies is huidiglik onderweg om die bron van die vereiste water toevoer vas te stel. Hierdie studie word onderneem in samewerking met die Departement van Water en Sanitasie (DWS), en geen water sal gebruik word sonder 'n geldige water lisensie. Impakte wat verband hou met die hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIA-proses. Water-en afvalwaterbestuur sal streng beheer word om die impak op die oppervlak of ondergrondse waterbronne te verminder.

Alle aktiwiteite sal gerehabiliteer word na voltooiing in ooreenstemming met die Wet op Nasionale Omgewingsbestuur (NEMA) Regulasies met betrekking tot die finansiële voorsiening vir prospektering, eksplorasië, mynbou en produksiebedrywighede (GN R1147).

Fase 2 aktiwiteite behels die volgende:

Fase 2 sal die oprigting van 'n groter verwerkingsaanleg, met gepaardgaande mynbedrywighede betrek. Oppervlak huurooreenkomste sal onderhandel word met die grondeienaars wie se eiendom geraak sal word deur die beplande bedrywighede.

Stortingsterreine en rehabilitasie sal streng beheer word in terme van die goedgekeurde omgewingsbestuursprogram.

Soortgelyk aan Fase 1, sal die bron van die watervoorsiening bepaal word met water studies. Hierdie studies is onderweg en sal onderneem word in samewerking met die Departement van Water en Sanitasie. Geen water sal verkry word sonder 'n geldige water lisensie nie. Impakte wat verband hou met die water hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIAOIB-proses. Water- en afvalwater bestuur sal streng beheer word met betrekking tot die impak op die oppervlak of ondergrondse waterbronne te verminder.

Arbeid sal so ver as moontlik verkry word vanaf die plaaslike gemeenskap, en behuising van arbeid word beplan in die dorp van Zeerust.

Indien toegang benodig word tot plase, sal die eienaar se toestemming verky word.

Alle mynbedrywighede sal onderneem word in ooreenstemming met die mynbou, gesondheid en veiligheidsmaatreëls van die maatskappy se, sowel as al die wetlike vereistes; en alle versteurings sal gerehabiliteer word by voltooiing.

In terme van tydsberekening, sal mynbedrywighele begin binne drie maande na die toestaan van alle relevante magtigings, lisensies en permitte. Hierdie proses kan ten minste 'n jaar neem. Indien u enige navrae of verdere inligting met betrekking tot die aansoek benodig, kan sodanige inligting van myself by kontaknommer 082 881 7850 of skriftelik by die Direkteur: Mineraalontwikkeling te Klerksdorp, by die volgende adres verkry word:

Die Direkteur: Mineraalontwikkeling
Departement van Minerale Hulpbronne
Privaatsak A1
KLERKSDORP
2570
Tel: (018) 464 1631

Ons sal dit baie waardeer indien u enige navrae of kommentaar sal verskaf binne 30 dae na ontvangs van hierdie kennisgewing, sodat ons genoeg tyd kan hê om enige kwessies aan te spreek.

Vir hierdie doeleindes heg ons 'n kommentaar blad aan waarop u aanmerkings kan aanbring.

Ons dank u vir u samewerking in hierdie verband.

Paid visit to Frans Markram at his home on 11/4/16. Discussed our planned operations with him. He had no objections at the time, but said that he would like to discuss it with his sons before filling in the form. Arranged to pick up form next day. Next day he still did not have the form completed, and said that he would bring it to me the following day. This never happened. At the time he indicated that he wanted to sell the farm.

Geagte Meneer

KENNISGEWING TEN OPSIGTE VAN DIE AANSOEK OM 'N MYNREG VIR DIE VOORGESTELDE DOORNHOEK FLUORSPAR MYN OP VERSKEIE GEDEELTES VAN DIE PLASE SOOS AANGEDUI OP FIGUUR 1: - ZEERUST DISTRIK

NAMENS: SA FLUORITE (EDMS) BEPERK, EN SOUTHERN PALACE 398 (EDMS) BEPERK

SA Fluorite (Edms) Beperk en Southern Palace 398 (Edms) Beperk is eksplorasië- en mynboumaatskappye aan wie prospekterregte uitgereik is oor verskeie plase soos aangetoon op die aangehegte Figuur 1. Die ERG Groep behou die beheerende aandeel in albei die maatskappye, en beplan om die regte te konsolideer en om aansoek te doen vir 'n mynreg oor die gesamentelike area.

Prospekteer aktiwiteite wat oor die afgelope paar jaar uitgevoer is het aangetoon dat lewensvatbare konsentrasies vloeispaat oor verskeie van die plase teenwoordig is, en dus die rede vir die aansoek om 'n gekonsolideerde mynreg.

U plaas is een van die plase wat binne die beoogde mynreg lisensie area geleë is, en hierdie brief dien as 'n inligtingsbrief om u op hoogte te hou van ons beplande aktiwiteite, asook om u die geleentheid te bied om kommentaar te lewer, en kommer uit te spreek. 'n Formele proses van openbare deelname in ooreenstemming met die Omgewingsimpakevaluering (Environmental Impact Assessment (EIA)) Regulasies van 2014 sal inisieer word (GN R982 van 8 Desember 2014).

'n Openbare vergadering sal ook gehou word waar alle ander belanghebbende en geaffekteerde partye die geleentheid sal kry om hul kommer uit te spreek.

As gevolg van swak internasionale marktoestande is dit nodig om die mynbou-aktiwiteite gelydelik te faseer en in twee hoof-fases te verdeel. Die eerste fase sal plaasvind op gedeeltes van Renosterfontein 304 JP. en die tweede fase sal plaasvind op gedeeltes van Plaas 306 JP. Die

voorgestelde myn oppervlak infrastruktuur word geleë op die bogenoemde plase. Bykomende minerale hulpbronne is ook geleë op omliggende plase binne die mynreg gebied.

Fase 1 aktiwiteite behels die volgende:

Tydens fase een sal daar moontlik 'n loodsaanleg met 'n kapasiteit van ongeveer 50 ton per uur op die plaas Renosterfontein opgerig word.

Die doel van hierdie aanleg is om die metallurgie en herwinning van die fluorspar te toets, en ook om voldoende tonnemaat wat nodig is vir die bemarking doeleindes te produseer. Die aanleg mag dalk gekoppel word aan die fase 2 ontwikkeling.

Water studies is huidiglik onderweg om die bron van die vereiste water toevoer vas te stel. Hierdie studie word onderneem in samewerking met die Departement van Water en Sanitasie (DWS), en geen water sal gebruik word sonder 'n geldige water lisensie. Impakte wat verband hou met die hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIA-proses. Water-en afvalwaterbestuur sal streng beheer word om die impak op die oppervlak of ondergrondse waterbronne te verminder.

Alle aktiwiteite sal gerehabiliteer word na voltooiing in ooreenstemming met die Wet op Nasionale Omgewingsbestuur (NEMA) Regulasies met betrekking tot die finansiële voorsiening vir prospektering, eksplorاسie, mynbou en produksiebedrywighede (GN R1147).

Fase 2 aktiwiteite behels die volgende:

Fase 2 sal die oprigting van 'n groter verwerkingsaanleg, met gepaardgaande mynbedrywighede betrek. Oppervlak huurooreenkomste sal onderhandel word met die grondeienaars wie se eiendom geraak sal word deur die beplande bedrywighede.

Stortingsterreine en rehabilitasie sal streng beheer word in terme van die goedgekeurde omgewingsbestuursprogram.

Soortgelyk aan Fase 1, sal die bron van die watervoorsiening bepaal word met water studies. Hierdie studies is onderweg en sal onderneem word in samewerking met die Departement van Water en Sanitasie. Geen water sal verkry word sonder 'n geldige water lisensie nie. Impakte wat verband hou met die water hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIAOIB-proses. Water- en afvalwater bestuur sal streng beheer word met betrekking tot die impak op die oppervlak of ondergrondse waterbronne te verminder.

Arbeid sal so ver as moontlik verkry word vanaf die plaaslike gemeenskap, en behuising van arbeid word beplan in die dorp van Zeerust.

Indien toegang benodig word tot plase, sal die eienaar se toestemming verky word.

Alle mynbedrywighede sal onderneem word in ooreenstemming met die mynbou, gesondheid en veiligheidsmaatrëels van die maatskappy se, sowel as al die wetlike vereistes; en alle versteurings sal gerehabiliteer word by voltooiing.

In terme van tydsberekening, sal mynbedrywighede begin binne drie maande na die toestaan van alle relevante magtigings, lisensies en permitte. Hierdie proses kan ten minste 'n jaar neem.

Indien u enige navrae of verdere inligting met betrekking tot die aansoek benodig, kan sodanige inligting van myself by kontaknommer 082 881 7850 of skriftelik by die Direkteur: Mineraalontwikkeling te Klerksdorp, by die volgende adres verkry word:

Die Direkteur: Mineraalontwikkeling
Departement van Minerale Hulpbronne
Privaatsak A1
KLERKSDORP
2570
Tel: (018) 464 1631

Ons sal dit baie waardeer indien u enige navrae of kommentaar sal verskaf binne 30 dae na ontvangs van hierdie kennisgewing, sodat ons genoeg tyd kan hê om enige kwessies aan te spreek.

Vir hierdie doeleindes heg ons 'n kommentaar blad aan waarop u aanmerkings kan aanbring.

Ons dank u vir u samewerking in hierdie verband.

Date: 10 March 2016

Dear Sir / Madam,

NOTIFICATION WITH RESPECT TO THE APPLICATION FOR A MINING RIGHT FOR THE PROPOSED DOORNHOEK FLUORSPAR MINE ON VARIOUS PORTIONS OF FARMS AS INDICATED ON THE ATTACHED FIGURE 1: ZEERUST DISTRICT

ON BEHALF OF: SA FLUORITE (PTY) LIMITED, AND SOUTHERN PALACE 398 (PTY) LIMITED

SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited are exploration and mining companies which hold prospecting rights over the area shown on Figure 1. The controlling interest in both these companies is held by the ERG Group which is planning on consolidating the prospecting rights and applying for a mining right over the consolidated area.

Prospecting activities which were carried out over the past few years indicated that economically viable concentrations of fluorspar may be found underlying these properties, and hence the reason for applying for a consolidated mining right.

Your farms fall within the mining right area, and this letter serves to inform you of our planned activities, and also offer you the opportunity to comment on the proposal and to voice your concerns. A formal public participation process in accordance with the Environmental Impact Assessment (EIA) Regulations of 2014 will be initiated (GN R982 of 8 December 2014). A public meeting will also be held where all other interested and affected parties will have the opportunity to voice their concerns.

Due to poor international market conditions it will be necessary to gradually phase in the mining activities, and to divide the mining activities into two phases. The first phase will take place on portions of Renosterfontein 304 JP, and the second phase will take place on portions of Farm 306

JP. The mine surface infrastructure is proposed to be located on the above farms. Additional mineral resources are also located on surrounding farms within the mining right area.

Phase 1 activities involve the following:

During phase 1, the company is planning on erecting an approximately 50 ton/hr pilot plant on Renosterfontein. The purpose of this plant will be to test the metallurgy of the ore, and also to produce sufficient tonnages required for marketing purposes.

Water studies are underway to determine the source of the required water supply. This will be done in cooperation with the Department of Water and Sanitation (DWS), and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

All activities will be rehabilitated upon completion in accordance with the National Environmental Management Act (NEMA) Regulations pertaining to the Financial Provision for Prospecting, Exploration, Mining or Production Operations (GN R1147).

Phase 2 activities involve the following:

Phase 2 will involve the erection of a larger processing plant, with an associated mining operation. Surface lease agreements will be negotiated with those surface owners that will be affected by the planned operations.

Waste dumps and rehabilitation will be strictly managed in terms of the approved environmental management programme.

Similar to phase 1, water studies are underway to determine the source of the required water supply. This will be done in cooperation with DWS, and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

Labour will be sourced from the local community as far as possible, and is planned to be accommodated in the town of Zeerust.

Should at any stage access be required to any of the farms, the explicit consent of the owner will be acquired prior to access.

All mining activities will be undertaken in accordance with the company's strict mine, health and safety rules, as well as all legislative requirements, and all disturbances will be rehabilitated upon completion.

In terms of timing, mining activities will commence within three months of the granting of all relevant authorizations, licenses and permits. This process could take at least a year.

Should you require further information regarding this project application, please do not hesitate to direct these enquiries either to myself at the above address and contact number, or alternately via official channels in writing to The Regional Manager of the Department of Mineral Resources - Klerksdorp at the below address. Please copy myself on all such correspondence.

The Regional Manager
Department of Mineral Resources
Private Bag A1
KLERKSDORP

Discussion meeting between Hennie Grobler, ADS and AES on 10/3/2016

An informal meeting was held between ADS, AES and Hennie Grobler on 10-3-16. The purpose of the visit was to explain to Mr Grobler the planned way forward.

Previous discussions were held with Mr Grobler in an attempt to secure the right mine on his farm. Although Mr Grobler is not averse to mining, his terms were rather unreasonable, and due to a lack of commitment by the company, the issue was not pursued.

During the meeting held on the day, the main issue (of relevance) discussed was water. Mr Grobler indicated that the old pipeline leading from the municipality to the now derelict Marico Fluorspar mine had been lifted on his farm. The pipe now stops at Witkop as far as he is aware. He was of the opinion that underground water would not be an option for mining purposes, and that this would be the most important issue to farmers. Besides this, he believed that farmers would welcome a mining operation in the area.

Due to his poor eyesight and resultant inability to read, the consultation letter was left with Mr Grobler for later collection and further discussion.

Recommendation

Phase 1 mining will take place on this property, so the consent of the surface owner is essential.

My recommendation would be to secure the right to purchase this property as soon as possible via an option to purchase agreement, or simply a land lease agreement. This should be done before the EMPR is complete. It will eliminate a major obstacle in the entire process, and neutralize objections from surrounding farmers.

AE Saad

**KENNISGEWING TEN OPSIGTE VAN DIE AANSOEK OM 'N MYNREG VIR DIE
VOORGESTELDE DOORNHOEK FLUORSPAR MYN OP VERSKEIE GEDEELTES
VAN DIE PLASE SOOS AANGEDUI OP FIGUUR 1: – ZEERUST DISTRIK**

**NAMENS: SA FLUORITE (EDMS) BEPERK, EN
SOUTHERN PALACE 398 (EDMS) BEPERK**

SA Fluorite (Edms) Beperk en Southern Palace 398 (Edms) Beperk is eksplorasië- en mynboumaatskappye aan wie prospekterregte uitgereik is oor verskeie plase soos aangetoon op die aangehegte Figuur 1. Die ERG Groep behou die beheerende aandeel in albei die maatskappye, en beplan om die regte te konsolideer en om aansoek te doen vir 'n mynreg oor die gesamentelike area.

Prospekteer aktiwiteite wat oor die afgelope paar jaar uitgevoer is het aangetoon dat lewensvatbare konsentrasies vloeispaat oor verskeie van die plase teenwoordig is, en dus die rede vir die aansoek om 'n gekonsolideerde mynreg.

U plaas is een van die plase wat binne die beoogde mynreg lisensie area geleë is, en hierdie brief dien as 'n inligtingsbrief om u op hoogte te hou van ons beplande aktiwiteite, asook om u die geleentheid te bied om kommentaar te lewer, en kommer uit te spreek. 'n Formele proses van openbare deelname in ooreenstemming met die Omgewingsimpakevaluering (Environmental Impact Assessment (EIA)) Regulasies van 2014 sal inisieer word (GN R982 van 8 Desember 2014).

'n Openbare vergadering sal ook gehou word waar alle ander belanghebbende en geaffekteerde partye die geleentheid sal kry om hul kommer uit te spreek.

As gevolg van swak internasionale marktoestande is dit nodig om die mynbou-aktiwiteite gelydelik te faseer en in twee hoof-fases te verdeel. Die eerste fase sal plaasvind op gedeeltes van Renosterfontein 304 IP en die tweede fase sal plaasvind op gedeeltes van Plaas 306 IP. Die

voorgestelde myn oppervlak infrastruktuur word geleë op die bogenoemde plase. Bykomende minerale hulpbronne is ook geleë op omliggende plase binne die mynreg gebied.

Fase 1 aktiwiteite behels die volgende:

Tydens fase een sal daar moontlik 'n loodsaanleg met 'n kapasiteit van ongeveer 50 ton per uur op die plaas Renosterfontein opgerig word.

Die doel van hierdie aanleg is om die metallurgie en herwinning van die fluorspar te toets, en ook om voldoende tonnemaat wat nodig is vir die bemarking doeleindes te produseer. Die aanleg mag dalk gekoppel word aan die fase 2 ontwikkeling.

Water studies is huidiglik onderweg om die bron van die vereiste water toevoer vas te stel. Hierdie studie word onderneem in samewerking met die Departement van Water en Sanitasie (DWS), en geen water sal gebruik word sonder 'n geldige water lisensie. Impakte wat verband hou met die hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIA-proses. Water-en afvalwaterbestuur sal streng beheer word om die impak op die oppervlak of ondergrondse waterbronne te verminder.

Alle aktiwiteite sal gerehabiliteer word na voltooiing in ooreenstemming met die Wet op Nasionale Omgewingsbestuur (NEMA) Regulasies met betrekking tot die finansiële voorsiening vir prospektering, eksplorاسie, mynbou en produksiebedrywighede (GN R1147).

Fase 2 aktiwiteite behels die volgende:

Fase 2 sal die oprigting van 'n groter verwerkingsaanleg, met gepaardgaande mynbedrywighede betrek. Oppervlak huurooreenkomste sal onderhandel word met die grondeienaars wie se eiendom geraak sal word deur die beplande bedrywighede.

Stortingsterreine en rehabilitasie sal streng beheer word in terme van die goedgekeurde omgewingsbestuursprogram.

Soortgelyk aan Fase 1, sal die bron van die watervoorsiening bepaal word met water studies. Hierdie studies is onderweg en sal onderneem word in samewerking met die Departement van Water en Sanitasie. Geen water sal verkry word sonder 'n geldige water lisensie nie. Impakte wat verband hou met die water hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIAOIB-proses. Water- en afvalwater bestuur sal streng beheer word met betrekking tot die impak op die oppervlak of ondergrondse waterbronne te verminder.

Arbeid sal so ver as moontlik verkry word vanaf die plaaslike gemeenskap, en behuising van arbeid word beplan in die dorp van Zeerust.

Indien toegang benodig word tot plase, sal die eienaar se toestemming verky word.

Alle mynbedrywighede sal onderneem word in ooreenstemming met die mynbou, gesondheid en veiligheidsmaatreëls van die maatskappy se, sowel as al die wetlike vereistes; en alle versteurings sal gerehabiliteer word by voltooiing.

In terme van tydsberekening, sal mynbedrywighede begin binne drie maande na die toestaan van alle relevante magtigings, lisensies en permitte. Hierdie proses kan ten minste 'n jaar neem.

Indien u enige navrae of verdere inligting met betrekking tot die aansoek benodig, kan sodanige inligting van myself by kontaknommer 082 881 7850 of skriftelik by die Direkteur: Mineraalontwikkeling te Klerksdorp, by die volgende adres verkry word:

Die Direkteur: Mineraalontwikkeling

Date: _____ March 2016

Dear Sir / Madam,

NOTIFICATION WITH RESPECT TO THE APPLICATION FOR A MINING RIGHT FOR THE PROPOSED DOORNOEK FLUORSPAR MINE ON VARIOUS PORTIONS OF FARMS AS INDICATED ON THE ATTACHED FIGURE 1: ZEERUST DISTRICT

ON BEHALF OF: SA FLUORITE (PTY) LIMITED, AND SOUTHERN PALACE 398 (PTY) LIMITED

SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited are exploration and mining companies which hold prospecting rights over the area shown on Figure 1. The controlling interest in both these companies is held by the ERG Group which is planning on consolidating the prospecting rights and applying for a mining right over the consolidated area.

Prospecting activities which were carried out over the past few years indicated that economically viable concentrations of fluorspar may be found underlying these properties, and hence the reason for applying for a consolidated mining right.

Your farms fall within the mining right area, and this letter serves to inform you of our planned activities, and also offer you the opportunity to comment on the proposal and to voice your concerns. A formal public participation process in accordance with the Environmental Impact Assessment (EIA) Regulations of 2014 will be initiated (GN R982 of 8 December 2014). A public meeting will also be held where all other interested and affected parties will have the opportunity to voice their concerns.

Due to poor international market conditions it will be necessary to gradually phase in the mining activities, and to divide the mining activities into two phases. The first phase will take place on portions of Renosterfontein 304 JP, and the second phase will take place on portions of Farm 306

JP. The mine surface infrastructure is proposed to be located on the above farms. Additional mineral resources are also located on surrounding farms within the mining right area.

Phase 1 activities involve the following:

During phase 1, the company is planning on erecting an approximately 50 ton/hr pilot plant on Renosterfontein. The purpose of this plant will be to test the metallurgy of the ore, and also to produce sufficient tonnages required for marketing purposes.

Water studies are underway to determine the source of the required water supply. This will be done in cooperation with the Department of Water and Sanitation (DWS), and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

All activities will be rehabilitated upon completion in accordance with the National Environmental Management Act (NEMA) Regulations pertaining to the Financial Provision for Prospecting, Exploration, Mining or Production Operations (GN R1147).

Phase 2 activities involve the following:

Phase 2 will involve the erection of a larger processing plant, with an associated mining operation. Surface lease agreements will be negotiated with those surface owners that will be affected by the planned operations.

Waste dumps and rehabilitation will be strictly managed in terms of the approved environmental management programme.

Similar to phase 1, water studies are underway to determine the source of the required water supply. This will be done in cooperation with DWS, and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

Labour will be sourced from the local community as far as possible, and is planned to be accommodated in the town of Zeerust.

Should at any stage access be required to any of the farms, the explicit consent of the owner will be acquired prior to access.

All mining activities will be undertaken in accordance with the company's strict mine, health and safety rules, as well as all legislative requirements, and all disturbances will be rehabilitated upon completion.

In terms of timing, mining activities will commence within three months of the granting of all relevant authorizations, licenses and permits. This process could take at least a year.

Should you require further information regarding this project application, please do not hesitate to direct these enquiries either to myself at the above address and contact number, or alternately via official channels in writing to The Regional Manager of the Department of Mineral Resources - Klerksdorp at the below address. Date: _____ March 2016

Dear Sir / Madam,

NOTIFICATION WITH RESPECT TO THE APPLICATION FOR A MINING RIGHT FOR THE PROPOSED DOORNHOEK FLUORSPAR MINE ON VARIOUS PORTIONS OF FARMS AS INDICATED ON THE ATTACHED FIGURE 1: ZEERUST DISTRICT

ON BEHALF OF: SA FLUORITE (PTY) LIMITED, AND SOUTHERN PALACE 398 (PTY) LIMITED

SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited are exploration and mining companies which hold prospecting rights over the area shown on Figure 1. The controlling interest in both these companies is held by the ERG Group which is planning on consolidating the prospecting rights and applying for a mining right over the consolidated area.

Prospecting activities which were carried out over the past few years indicated that economically viable concentrations of fluor spar may be found underlying these properties, and hence the reason for applying for a consolidated mining right.

Your farms fall within the mining right area, and this letter serves to inform you of our planned activities, and also offer you the opportunity to comment on the proposal and to voice your concerns. A formal public participation process in accordance with the Environmental Impact Assessment (EIA) Regulations of 2014 will be initiated (GN R982 of 8 December 2014). A public meeting will also be held where all other interested and affected parties will have the opportunity to voice their concerns.

Due to poor international market conditions it will be necessary to gradually phase in the mining activities, and to divide the mining activities into two phases. The first phase will take place on portions of Renosterfontein 304 JP, and the second phase will take place on portions of Farm 306 JP. The mine surface infrastructure is proposed to be located on the above farms. Additional mineral resources are also located on surrounding farms within the mining right area.

Phase 1 activities involve the following:

During phase 1, the company is planning on erecting an approximately 50 ton/hr pilot plant on Renosterfontein. The purpose of this plant will be to test the metallurgy of the ore, and also to produce sufficient tonnages required for marketing purposes.

Water studies are underway to determine the source of the required water supply. This will be done in cooperation with the Department of Water and Sanitation (DWS), and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

All activities will be rehabilitated upon completion in accordance with the National Environmental Management Act (NEMA) Regulations pertaining to the Financial Provision for Prospecting, Exploration, Mining or Production Operations (GN R1147).

Phase 2 activities involve the following:

Phase 2 will involve the erection of a larger processing plant, with an associated mining operation. Surface lease agreements will be negotiated with those surface owners that will be affected by the planned operations.

Waste dumps and rehabilitation will be strictly managed in terms of the approved environmental management programme.

Similar to phase 1, water studies are underway to determine the source of the required water supply. This will be done in cooperation with DWS, and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

Labour will be sourced from the local community as far as possible, and is planned to be accommodated in the town of Zeerust.

Should at any stage access be required to any of the farms, the explicit consent of the owner will be acquired prior to access.

All mining activities will be undertaken in accordance with the company's strict mine, health and safety rules, as well as all legislative requirements, and all disturbances will be rehabilitated upon completion.

In terms of timing, mining activities will commence within three months of the granting of all relevant authorizations, licenses and permits. This process could take at least a year.

Should you require further information regarding this project application, please do not hesitate to direct these enquiries either to myself at the above address and contact number, or alternately via official channels in writing to The Regional Manager of the Department of Mineral Resources - Klerksdorp at the below address. Please copy myself on all such correspondence.

CONSULTATION MEETING ATTENDANCE REGISTER

Date: 09 March 2016

Time: 14:00

Venue: Knoflookfontein ph 1 re

Name:	Address:	Contact number:	Email/Fax number:	Signature:
Allan Daniel Saad	Knoflookfontein 4196		AllanSaad@gmail.com	
Allan Emile Saad	"	0828817850	Asaad@mweb.co.za	
Fatima Green	Knoflookfontein ph 1 r/e	071 692 2591	—	

Additional agenda points / matters discussed during consultation meeting apart from content of above letter:

Water Supply	• Labour issues
Security / Safety	
Blasting	
Waste water	
Roads	
Dust	
Impact on animals	
Will Farm be purchased	
Graves	

Comments by Mrs Green re meeting with Allan Daniel on 2nd March 2016

Issues raised:

1. Water supply
2. Security/safety
3. Blasting
4. Waste water
5. Roads
6. Dust
7. Impact on animals
8. Will farm be purchased
9. Graves

Comments by Mrs Green re meeting with AE Saad on 9th March 2016

1. This follow-up meeting was held with Mrs Green after she had read the letter delivered by ADS, and studied the maps.
2. Her main concern was having a mine on her farm boundary. She was certainly not happy with that, and complained about the effect of blasting, noise, dust, labour and the likes. Clearly her concerns were valid, and her farm will have to be purchased sometime in the future.
3. Another major concern was water, so we discussed the possibility of sourcing water from Zeerust.

Recommendation

The orebody extends onto this property, and at some time in the future the property will need to be purchased. Negotiations were previously held with the late Mr Green who passed away about a year ago. His terms were unacceptable, so negotiations ceased.

Phase 2 operations border on the property of Mrs Green, and her concerns are quite valid. It would be quite impossible to mine Phase 2 without purchasing her property.

My recommendation would be to secure the right to purchase her property through an option to purchase agreement. This should be done as soon as possible and before the EMPR is complete. It will eliminate a major objector in the entire process.

AE Saad

Date: 23rd February 2016

Dear Sir

NOTIFICATION WITH RESPECT TO THE APPLICATION FOR A MINING RIGHT FOR THE PROPOSED DOORNHOEK FLUORSPAR MINE ON VARIOUS PORTIONS OF FARMS AS INDICATED ON THE ATTACHED FIGURE 1: ZEERUST DISTRICT

ON BEHALF OF: SA FLUORITE (PTY) LIMITED, AND SOUTHERN PALACE 398 (PTY) LIMITED

SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited are exploration and mining companies which hold prospecting rights over the area shown on Figure 1. The controlling interest in both these companies is held by the ERG Group which is planning on consolidating the prospecting rights and applying for a mining right over the consolidated area. Prospecting activities which were carried out over the past few years indicated that economically viable concentrations of fluor spar may be found underlying these properties, and hence the reason for applying for a consolidated mining right.

The various portions of your farm fall within the mining right area, and this letter serves to inform you of our planned activities, and also offer you the opportunity to comment on the proposal and to voice your concerns. A formal public participation process in accordance with the Environmental Impact Assessment (EIA) Regulations of 2014 will be initiated (GN R982 of 8 December 2014). A public meeting will also be held where all other interested and affected parties will have the opportunity to voice their concerns.

Due to poor international market conditions it will be necessary to gradually phase in the mining activities, and to divide the mining activities into two phases. The first phase will take place on portions of Renosterfontein 304 JP, and the second phase will take place on portions of Farm 306

JP. The mine surface infrastructure is proposed to be located on the above farms. Additional mineral resources are also located on surrounding farms within the mining right area.

Phase 1 activities involve the following:

During phase 1, the company is planning on erecting a small pilot plant on Renosterfontein. The purpose of this plant will be to test the metallurgy of the ore, and also to produce sufficient tonnages required for marketing purposes.

Water studies are underway to determine the source of the required water supply. This will be done in cooperation with the Department of Water and Sanitation (DWS), and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

All activities will be rehabilitated upon completion in accordance with the National Environmental Management Act (NEMA) Regulations pertaining to the Financial Provision for Prospecting, Exploration, Mining or Production Operations (GN R1147).

Phase 2 activities involve the following:

Phase 2 will involve the erection of a larger processing plant, with an associated mining operation. Surface lease agreements will be negotiated with those surface owners that will be affected by the planned operations.

Waste dumps and rehabilitation will be strictly managed in terms of the approved environmental management programme.

Similar to phase 1, water studies are underway to determine the source of the required water supply. This will be done in cooperation with DWS, and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

Labour will be sourced from the local community as far as possible, and is planned to be accommodated in the town of Zeerust.

Should at any stage access be required to any of the farms, the explicit consent of the owner will be acquired prior to access.

All mining activities will be undertaken in accordance with the company's strict mine, health and safety rules, as well as all legislative requirements, and all disturbances will be rehabilitated upon completion.

In terms of timing, mining activities will commence within three months of the granting of all relevant authorizations, licenses and permits. This process could take at least a year.

Should you require further information regarding this project application, please do not hesitate to direct these enquiries either to myself at the above address and contact number, or alternately via

official channels in writing to The Regional Manager of the Department of Mineral Resources - Klerksdorp at the below address. Please copy myself on all such correspondence.

Date: 23rd February 2016

Dear Sir

NOTIFICATION WITH RESPECT TO THE APPLICATION FOR A MINING RIGHT FOR THE PROPOSED DOORNHOEK FLUORSPAR MINE ON VARIOUS PORTIONS OF FARMS AS INDICATED ON THE ATTACHED FIGURE 1: ZEERUST DISTRICT

ON BEHALF OF: SA FLUORITE (PTY) LIMITED, AND SOUTHERN PALACE 398 (PTY) LIMITED

SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited are exploration and mining companies which hold prospecting rights over the area shown on Figure 1. The controlling interest in both these companies is held by the ERG Group which is planning on consolidating the prospecting rights and applying for a mining right over the consolidated area.

Prospecting activities which were carried out over the past few years indicated that economically viable concentrations of fluorspar may be found underlying these properties, and hence the reason for applying for a consolidated mining right.

The various portions of your farm fall within the mining right area, and this letter serves to inform you of our planned activities, and also offer you the opportunity to comment on the proposal and to voice your concerns. A formal public participation process in accordance with the Environmental Impact Assessment (EIA) Regulations of 2014 will be initiated (GN R982 of 8 December 2014). A public meeting will also be held where all other interested and affected parties will have the opportunity to voice their concerns.

Due to poor international market conditions it will be necessary to gradually phase in the mining activities, and to divide the mining activities into two phases. The first phase will take place on portions of Renosterfontein 304 JP, and the second phase will take place on portions of Farm 306

JP. The mine surface infrastructure is proposed to be located on the above farms. Additional mineral resources are also located on surrounding farms within the mining right area.

Phase 1 activities involve the following:

During phase 1, the company is planning on erecting a small pilot plant on Renosterfontein. The purpose of this plant will be to test the metallurgy of the ore, and also to produce sufficient tonnages required for marketing purposes.

Water studies are underway to determine the source of the required water supply. This will be done in cooperation with the Department of Water and Sanitation (DWS), and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

All activities will be rehabilitated upon completion in accordance with the National Environmental Management Act (NEMA) Regulations pertaining to the Financial Provision for Prospecting, Exploration, Mining or Production Operations (GN R1147).

Phase 2 activities involve the following:

Phase 2 will involve the erection of a larger processing plant, with an associated mining operation. Surface lease agreements will be negotiated with those surface owners that will be affected by the planned operations.

Waste dumps and rehabilitation will be strictly managed in terms of the approved environmental management programme.

Similar to phase 1, water studies are underway to determine the source of the required water supply. This will be done in cooperation with DWS, and will not be sourced without a valid water use license. Impacts relating to water quantity and quality will be assessed by means of specialist assessment during the EIA process. Water and waste water management will be strictly controlled as to minimize the impacts on surface or underground water sources.

Labour will be sourced from the local community as far as possible, and is planned to be accommodated in the town of Zeerust.

Should at any stage access be required to any of the farms, the explicit consent of the owner will be acquired prior to access.

All mining activities will be undertaken in accordance with the company's strict mine, health and safety rules, as well as all legislative requirements, and all disturbances will be rehabilitated upon completion.

In terms of timing, mining activities will commence within three months of the granting of all relevant authorizations, licenses and permits. This process could take at least a year.

Should you require further information regarding this project application, please do not hesitate to direct these enquiries either to myself at the above address and contact number, or alternately via

official channels in writing to The Regional Manager of the Department of Mineral Resources - Klerksdorp at the below address. Please copy myself on all such correspondence.

The Regional Manager

**KENNISGEWING TEN OPSIGTE VAN DIE AANSOEK OM 'N MYNREG VIR DIE
VOORGESTELDE DOORHOEK FLUORSPAR MYN OP VERSKEIE GEDEELTES
VAN DIE PLASE SOOS AANGEDUI OP FIGUUR 1: – ZEERUST DISTRIK**

**NAMENS: SA FLUORITE (EDMS) BEPERK, EN
SOUTHERN PALACE 398 (EDMS) BEPERK**

SA Fluorite (Edms) Beperk en Southern Palace 398 (Edms) Beperk is eksplorasië- en mynboumaatskappye aan wie prospekterregte uitgereik is oor verskeie plase soos aangetoon op die aangehegte Figuur 1. Die ERG Groep behou die beheerende aandeel in albei die maatskappye, en beplan om die regte te konsolideer en om aansoek te doen vir 'n mynreg oor die gesamentelike area.

Prospekteer aktiwiteite wat oor die afgelope paar jaar uitgevoer is het aangetoon dat lewensvatbare konsentrasies vloeispaat oor verskeie van die plase teenwoordig is, en dus die rede vir die aansoek om 'n gekonsolideerde mynreg.

U plaas is een van die plase wat buite die beoogde mynreg lisensie area geleë is, maar wat moontlik geraak kan word deur die beoogde aktiwiteite. Hierdie brief dien dus as 'n inligtingsbrief om u op hoogte te hou van ons beplande aktiwiteite, asook om u die geleentheid te bied om kommentaar te lewer, en kommer uit te spreek. 'n Formele proses van openbare deelname in ooreenstemming met die Omgewingsimpakevaluering (Environmental Impact Assessment (EIA)) Regulasies van 2014 sal inisieer word (GN R982 van 8 Desember 2014). 'n Openbare vergadering sal ook gehou word waar alle ander belanghebbende en geaffekteerde partye die geleentheid sal kry om hul kommer uit te spreek.

As gevolg van swak internasionale marktoestande is dit nodig om die mynbou-aktiwiteite gelydelik te faseer en in twee hoof-fases te verdeel. Die eerste fase sal plaasvind op gedeeltes van Renosterfontein 304 JP, en die tweede fase sal plaasvind op gedeeltes van Plaas 306 JP. Die

voorgestelde myn oppervlak infrastruktuur word geleë op die bogenoemde plase. Bykomende minerale hulpbronne is ook geleë op omliggende plase binne die mynreg gebied.

Fase 1 aktiwiteite behels die volgende:

Tydens fase een sal 'n loodsaanleg met 'n kapasiteit van ongeveer 50 ton per uur op die plaas Renosterfontein opgerig word.

Die doel van hierdie aanleg is om die metallurgie en herwinning van die fluorspar te toets, en ook om voldoende tonnemaat wat nodig is vir die bemaking doeleindes te produseer.

Water studies is huidiglik onderweg om die bron van die vereiste water toevoer vas te stel. Hierdie studie word onderneem in samewerking met die Departement van Water en Sanitasie (DWS), en geen water sal gebruik word sonder 'n geldige water lisensie. Impakte wat verband hou met die hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIA-proses. Water-en afvalwaterbestuur sal streng beheer word om die impak op die oppervlak of ondergrondse waterbronne te verminder.

Alle aktiwiteite sal gerehabiliteer word na voltooiing in ooreenstemming met die Wet op Nasionale Omgewingsbestuur (NEMA) Regulasies met betrekking tot die finansiële voorsiening vir prospektering, eksplorasië, mynbou en produksiebedrywighede (GN R1147).

Fase 2 aktiwiteite behels die volgende:

Fase 2 sal die oprigting van 'n groter verwerkingsaanleg, met gepaardgaande mynbedrywighede betrek. Oppervlak huurooreenkomste sal onderhandel word met die grondeienaars wie se eiendom geraak sal word deur die beplande bedrywighede.

Stortingsterreine en rehabilitasie sal streng beheer word in terme van die goedgekeurde omgewingsbestuursprogram.

Soortgelyk aan Fase 1, sal die bron van die watervoorsiening bepaal word met water studies. Hierdie studies is onderweg en sal onderneem word in samewerking met die Departement van Water en Sanitasie. Geen water sal verkry word sonder 'n geldige water lisensie nie. Impakte wat verband hou met die water hoeveelheid en gehalte water sal geassesseer word deur middel van spesialis assessering tydens die EIAOIB-proses. Water- en afvalwater bestuur sal streng beheer word met betrekking tot die impak op die oppervlak of ondergrondse waterbronne te verminder.

Arbeid sal so ver as moontlik verkry word vanaf die plaaslike gemeenskap, en behuising van arbeid word beplan in die dorp van Zeerust.

Indien toegang benodig word tot plase, sal die eienaar se toestemming verky word.

Alle mynbedrywighede sal onderneem word in ooreenstemming met die mynbou, gesondheid en veiligheidsmaatreëls van die maatskappy se, sowel as al die wetlike vereistes; en alle versteurings sal gerehabiliteer word by voltooiing.

In terme van tydsberekening, sal mynbedrywighede begin binne drie maande na die toestaan van alle relevante magtigings, lisensies en permitte. Hierdie proses kan ten minste 'n jaar neem.

Indien u enige navrae of verdere inligting met betrekking tot die aansoek benodig, kan sodanige inligting van myself by kontaknommer 082 881 7850 of skriftelik by die Direkteur: Mineraalontwikkeling te Klerksdorp, by die volgende adres verkry word:

Die Direkteur: Mineraalontwikkeling
Departement van Minerale Hulpbronne
Privaatsak A1
KLERKSDORP
2570
Tel: (018) 464 1631

Ons sal dit baie waardeer indien u enige navrae of kommentaar sal verskaf binne 30 dae na ontvangs van hierdie kennisgewing, sodat ons genoeg tyd kan hê om enige kwessies aan te spreek.

Vir hierdie doeleindes heg ons 'n kommentaar blad aan waarop u aanmerkings kan aanbring.

Ons dank u vir u samewerking in hierdie verband.

Dear Mrs du Toit,

Thank you for your email. We are busy with the initial notification/introduction registration period and therefore no formal public participation has been initiated. Please note that you have been registered as an Interested and Affected Party (I&AP) on the project and will be kept informed of any progress going forward. Please find a notification with regards to the matter attached.

Herewith a response to your queries below:

1. SA Fluorite (Pty) Limited and Southern Palace 398 (Pty) Limited, applicant contact person: Mr Allan Saad
2. Mining Right Application
3. Please refer to Figure 5 in the attached notification
4. Mainly fluorspar (detail in this regard will be made available in the draft Scoping Report)
5. An application will be lodged with the DMR in July 2016 and therefore a mining right reference number has not yet been issued for the project. The prospecting right reference numbers are as follows: NW 30/5/1/1/2/763, NW 30/5/1/1/2/1696 & NW 30/5/1/1/2/1728
6. Exigo Sustainability (Pty) Ltd
7. Please refer to point 5 above
8. Please find the notification attached. All other reports will be made available for comment as they become available and of which you will be notified of in advance

Kind regards,

Chantal Uys *BHCS Hons Archaeology*
Environmental Consultant

Subject: Mining application

Hi Chantal, I am replying to the SMS we received regarding Fluorspar Mining in our area. We are from the farm Strydfontein, NW and would like to register as an interested and affected party. Please can you provide me with the following information:

- 1) Name of applicant

- 2) Is it a prospecting or mining application?
- 3) If mining where is the proposed mine?
- 4) Which minerals?
- 5) The DMR reference number
- 6) Who is the EAP (Environmental Assessment Practitioner) or the Environmental Consulting firm handling the application?
- 7) When was the application lodged?
- **PLEASE email me all documents relating to the application.**

Kind regards,

Marika du Toit

Dear Michelle,

Our telephonic conversation of earlier refers. I phoned back at 11:00 am but was informed that you are on another line and the phone only rings when I tried phoning again.

Could you please confirm whether the municipal manager is available to meet with us on either the 7th or 9th of June 2016?

Your assistance is appreciated.

Kind regards,

Chantal Uys BHCS Hans Archaeology

Subject: Proposed Doornhoek Fluorspar Mine Focus Group Meeting
Importance: High

Good day,

FOCUS GROUP MEETING FOR THE PROPOSED DOORNHOEK FLUORSPAR MINE PROJECT, NORTH WEST

Our telephonic conversation refers. We are the environmental consultants for the proposed Doornhoek Fluorspar Mine project. As part of the public participation process we would like to consult with the district municipality in the form of a focus group meeting to discuss the project as well as the Social and Labour Plan.

Would you be available to meet with us on the 7th or 9th of June 2016?

Your assistance is appreciated.

Kind regards,

Chantal Uys *BHCS Hons Archaeology*

Geagte Mnr Boshoff,

Die onderste korrespondensie verwys. Kan u asb ontvangs van die kennisgewing bevestig?

Soos voorheen bespreek sal ons graag 'n telefoniese konsultasie met u wil reël. Sal u ons asb met 'n geskikte datum en tyd kan voorsien vir so 'n konsultasie?

Kontak my gerus indien u enige vra het en/of verdere inligting benodig.

Groete,

Chantal Uys *BHCS Houers Archaeology*
