NOTICE OF APPLICATIONS FOR ENVIRONMENTAL AUTHORISATION, WASTE MANAGEMENT LICENCE AND WATER USE LICENCE, 3 AUGUST 2018

**IN SUPPORT OF THE RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT
GAUTENG PROVINCE**

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlaktefontein 233 IQ, Vlaktefontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ. The northern section of the project area would be crossed by the R41 (Mainreef/Randfontein) provincial road, with the R24 (Albertina Sisulu/Hamberg) provincial road running along the northern boundary of the project area.

West Wits currently holds a prospecting right (GP 30/5/11/2/10035 PR) over the above farms. The prospecting right (MPT No. 29/2016) was ceded from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits. Consent for the transfer of the prospecting right in terms of Section 11(2) of the MPRDA was granted by the DMR in 2018.

In broad terms, the proposed project would involve the short-term development of five open pit mining areas (the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing mine infrastructure complexes (the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) which will be used to access the existing underground mine workings. The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project the following environmental authorisations are required from the mentioned competent authorities. The relevant legislation and associated activities include but are not limited to the following:

Legislation	Listed activities	Authorisation required and key process elements	Competent Authority
National Environmental Management Act (NEMA), (No. 107 of 1998) and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended. NOTICE OF APPLICATIONS FOR ENVIRONMENTAL AUTHORISATION, WASTE MANAGEMENT LICENCE AND WATER USE LICENCE, 3 AUGUST 2018

**IN SUPPORT OF THE RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT
GAUTENG PROVINCE**

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlaktefontein 233 IQ, Vlaktefontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ. The northern section of the project area would be crossed by the R41 (Mainreef/Randfontein) provincial road, with the R24 (Albertina Sisulu/Hamberg) provincial road running along the northern boundary of the project area.

West Wits currently holds a prospecting right (GP 30/5/1/1/2/10035 PR) over the above farms. The prospecting right (MPT No. 29/2016) was ceded from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits. Consent for the transfer of the prospecting right in terms of Section 11(2) of the MPRDA was granted by the DMR in 2018.

In broad terms, the proposed project would involve the short-term development of five open pit mining areas (the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing mine infrastructure complexes (the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) which will be used to access the existing underground mine workings. The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project the following environmental authorisations are required from the mentioned competent authorities. The relevant legislation and associated activities include but are not limited to the following:

Legislation	Listed activities	Authorisation required and key process elements	Competent Authority
National Environmental Management Act (NEMA), (No. 107 of 1998) and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended.	GNR 983 Activities: 37 (power generation facility); 9 & 45 (water pipelines); 10 (sewage pipelines); 47 (power lines); 12, 19 & 48 (watercourse disturbance); 13 & 50 (water dams); 14 & 51 (diesel storage facilities); 22 & 31 (decommissioning); 24 & 56 (roads); 25 (water treatment facility); 27 & 30 (clearing of land); 28 (land use change); and 46 (dirty water pipelines). GNR 984 Activities: 4 (diesel storage facility); 6 (release of emissions/pollution); 11 (water pipelines); 15 (clearing of land); 16 (water dam); 17 (mine pits); 24 (watercourse disturbance); 25 (water treatment facility); and 27 (roads). GNR 985 Activities: 1 (billboards); 2 & 16 (water reservoirs); 3 (telecommunication mast); 4 & 18 (roads); 10 & 22 (dangerous good storage facilities); 12 (clearing of land); 14 (water dams); and 15 (land use change).	Environmental Authorisation: application for environmental authorisation; a Scoping Report, an EIA including an Environmental Management Programme (EMPr) and a public participation process.	DMR – Gauteng Province
National Environmental Management: Waste Act (NEM:WA) (No. 59 of 2008) and the EIA Regulations, 2014, as amended. Category B, Activities: Category B, Activity: 4(1) Storage of waste; 4(4) Treatment of waste; 4(7), 4(9) Disposal of waste; 4(10) construction/expansion of waste facility(s); and 4(11) Residue stockpiles or residue deposits.	Waste Management Licence: application for a waste management licence, a Scoping Report, an EIA including an EMPr and a public participation process.	
National Water Act (NWA) (No 36 of 1998) and Regulations Regarding the Procedural Requirements for Water Use Licence Applications (WULA's) (GNR 267 of 2017).	(a) groundwater abstraction; (b) water storage; (c) water flow; (f) waste water discharge; (g) waste disposal; (i) watercourse alteration; and (j) mine pit dewatering.	Water Use Licence: application for a water use licence, integrated technical support document and public participation process.	Department of Water and Sanitation (DWS)

SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the environmental consultant responsible for undertaking the required environmental regulatory processes and conducting public participation. The application is subject to a Scoping and EIA process as stipulated in the EIA Regulations (GNR 982, 8 December 2014), as amended, promulgated under Section 24(5) of the NEMA.

This notice also serves to inform Interested & Affected Parties (I&APs) that SLR is preparing a Scoping Report as part of the West Wits mining right application process. The purpose of the Scoping Report is to summarise the Scoping process followed to date; provide an overview of the proposed project and the surrounding environment; present potential impacts and possible preliminary mitigation measures; and provide terms of reference for specialist studies. The Scoping Report is being made available to I&APs for a 30-day comment period from **3 August 2018 until 3 September 2018**. NOTICE OF APPLICATIONS FOR ENVIRONMENTAL AUTHORISATION, WASTE MANAGEMENT LICENCE AND WATER USE LICENCE, AUGUST 2018

**IN SUPPORT OF THE RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT
GAUTENG PROVINCE**

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlaktefontein 233 IQ, Vlaktefontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ. The northern section of the project area would be crossed by the R41 (Mainreef/Randfontein) provincial road, with the R24 (Albertina Sisulu/Hamberg) provincial road running along the northern boundary of the project area.

West Wits currently holds a prospecting right (GP 30/5/11/2/10035 PR) over the above farms. The prospecting right (MPT No. 29/2016) was ceded from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits. Consent for the transfer of the prospecting right in terms of Section 11(2) of the MPRDA was granted by the DMR in 2018.

In broad terms, the proposed project would involve the short-term development of five open pit mining areas (the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing mine infrastructure complexes (the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) which will be used to access the existing underground mine workings. The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project the following environmental authorisations are required from the mentioned competent authorities. The relevant legislation and associated activities include but are not limited to the following:

Legislation	Listed activities	Authorisation required and key process elements	Competent Authority
National Environmental Management Act (NEMA), (No. 107 of 1998) and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended. **KENNISGEWING VAN AANSOEKE OM OMGEWINGSMAGTIGING, AFVALBESTUURLISENSIE EN WATERGEBRUIKLISENSIE,
AUGUSTUS 2018**

**TER STAWING VAN DIE HERINDIENING VAN 'N AANSOEK OM 'N MYNREG VIR DIE WEST WITS PROJEC
GAUTENG PROVINSIE**

West Wits Mining MLI (Eiendoms) Beperk (West Wits) is van voorneme om 'n mynbou operasie te vestig in 'n gebied geleë suid van Roodepoort en noord van Soweto in die Stad van Johannesburg Metropolitaanse Munisipaliteit, Gauteng. Wes Wits het weer aansoek gedoen vir 'n mynreg ingevolge die Wet op die Ontwikkeling van Minerale en Petroleumhulpbronne (Wet No. 28 van 2002) (MPRDA) vir goud, uraan en silwer oor verskillende gedeeltes van die plase Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Dorpsgebied, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Diep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ en Tshekiso 710 IQ. Die noordelike gedeelte van die projekgebied sal deur die provinsiale pad R41 (Mainreef / Randfontein) gekruis word, met die provinsiale pad R24 (Albertina Sisulu / Hamberg) langs die noordelike grens van die projekgebied.

West Wits hou tans 'n prospekteringsreg (GP 30/5/1/1/2/10035 PR) oor die bogenoemde plase. Die prospekteringsreg (MPT No. 29/2016) is van Mintails SA Soweto Cluster (Eiendoms) Beperk tot Wes Wits gesedeer. Toestemming vir die oordrag van die prospekteringsreg ingevolge artikel 11(2) van die MPRDA is in 2018 deur die DMR toegestaan.

In breë trekke sal die voorgestelde projek die ontwikkeling van vyf korttermyn oopgroefmynareas (die Mona Lisa-Birdrifgroef, die Roodepoort-Hoofrifgroef, die Rugbyklub Hoofrifgroef, die 11-Skag Hoofrifgroef en die Kimberleyrif Oosgroef) insluit tesame met die opknapping van twee bestaande myninfrastruktuurkomplekse (die Birdrif Sentrale Infrastruktuurkompleks en Kimberleyrif-Oos Infrastruktuurkompleks) wat gebruik sal word om toegang te verkry tot die bestaande ondergrondse mynbedrywighede. Die projek sal ook die totstandkoming van mynertshope, bogronthope en afvalrotshope insluit, asook die ondersteunende infrastruktuur, insluitende materiaal stoor- en hanteringsfasiliteite (vir brandstof, smeermiddels, algemene en gevaarlike stowwe), algemene en gevaarlike afvalbestuursfasiliteite, rioolbestuursfasiliteite, waterbestuursinfrastruktuur, kommunikasie- en beligtingsfasiliteite, gesentraliseerde en satellietkantore, werksinkels, wasareas, store, kledkamers, lampkamers, ventilasiewaaiers en sekuriteitsfasiliteite.

Voor die aanvang van die voorgestelde projek word die volgende omgewingsmagtigings van bogenoemde bevoegde owerhede vereis. Die betrokke wetgewing en verwante aktiwiteite sluit in, maar is nie beperk tot die volgende nie:

Wetgewing	Gelyste aktiwiteite	Magtiging vereis en sleutel elemente van die proses	Bevoegde owerheid
Nasionale Wet op Omgewingsbestuur (NEMA) (Wet 107 van 1998) en die Regulasies op Omgewingsimpak-evaluerings (OIB-regulasies), 2014, soos gewysig.	GNR 983 Aktiwiteite: 37 (kragopwekkingsfasiliteit); 9 & 45 (waterpypeleidings); 10 (rioolpypeleidings); 47 (kraglyne); 12, 19 & 48 (waterloopversteuring); 13 & 50 (waterdamme); 14 & 51 (diesel bergingsfasiliteite); 22 en 31 (buitediensstelling); 24 & 56 (paaie); 25 (waterbehandelingsfasiliteit); 27 & 30 (ontbossing); 28 (verandering in grondgebruik); en 46 (vuil waterpypeleidings). GNR 984 Aktiwiteite: 4 (diesel bergingsfasiliteit); 6 (vrystelling van emissies / besoedeling); 11 (waterpypeleidings); 15 (ontbossing); 16 (waterdam); 17 (oopgroewe); 24 (waterloopversteuring); 25 (waterbehandelingsfasiliteit); en 27 (paaie). GNR 985 Aktiwiteite: 1 (advertensieborde); 2 & 16 (water reservoirs); 3 (telekommunikasie maste); 4 & 18 (paaie); 10 & 22 (gevaarlike goedere bergingsfasiliteite); 12 (ontbossing); 14 (waterdamme); en 15 (grondgebruik verandering).	Omgewingsmagtiging: aansoek om omgewingsmagtiging; 'n bestekopnameverslag, 'n OIB, insluitend 'n Omgewingsbestuursprogram (OBPr) en 'n openbare deelnameproses.	DMR – Gautengprovinsie
Nasionale Wet op Omgewingsbestuur: Afval (NEM:WA) (Wet 59 van 2008) en die OIB-regulasies, 2014, soos gewysig.	Kategorie A-aktiwiteite: 3 (9) & 3 (10) Wegdoening van afval; 3 (12) en 3 (13) konstruksie van afvalfasiliteit(e); 3 (14) buitediensstelling van afvalfasiliteit. Kategorie B-aktiwiteite: 4 (1) Berging van afval; 4 (4) Behandeling van afval; 4 (7), 4 (9) Wegdoening van afval; 4 (10) konstruksie / uitbreiding van afvalfasiliteit (e); en 4 (11) Oorskotstortings of oorskot-deposito's.	Afvalbestuurlisensie: aansoek om 'n afvalbestuurlisensie, 'n bestekopnameverslag, 'n OIB, insluitend 'n OBPr en 'n openbare deelnameproses.	
Nasionale Waterwet (NWW) (Wet 36 van 1998) en Regulasies Betreffende die Prosedurele Vereistes vir Aansoeke om Water-gebruiklisensies (WULA's) (Staatskennisgewing R267 van 2017).	(a) grondwater-onttrekking; (b) waterberging; (c) watervloei; (f) afvalwater vrystelling; (g) afvalwegdoening; (i) waterloopverandering; en (j) myngroef ontwatering.	Watergebruiklisensie: aansoek om 'n watergebruiklisensie; geïntegreerde tegniese stawingsdokument en openbare deelnameproses.	Departement van Water en Sanitasie (DWS)

SLR Consulting (Suid-Afrika) (Edms) Bpk (SLR) is aangestel as die omgewingskonsultant wat verantwoordelik is vir die uitvoering van die vereiste omgewingsregulerende prosesse en openbare deelname. Die aansoek is onderworpe aan 'n Omvangsbepaling- en OIB-proses soos uiteengesit in die OIB-regulasies (GNR 982, 8 Desember 2014), soos gewysig, afgekondig ingevolge Artikel 24 (5) van die NEMA.

Hierdie kennisgewing dien ook om belanghebbende en geaffekteerde partye (B&GPe) in te lig dat SLR 'n Omvangsbepalingsverslag voorberei as deel van die West Wits-mynregte-aansoekproses. Die doel van die Omvangsbepalingsverslag is om die Omvangsbepalingsproses wat tot op hede gevolg is op te som; 'n oorsig te gee van die voorgestelde projek en die omliggende omgewing; huidige moontlike impakte en moontlike voorlopige versagtingsmaatreëls; en gee verwysingsraamwerk vir spesialisstudies. Die Omvangsbepalingsverslag word beskikbaar gestel aan B&GPe vir 'n kommentaarperiode van 30 dae vanaf **3 Augustus 2018** tot **3 September 2018**. Kopieë van die Omvangsbepalingsverslag sal op die volgende plekke vir openbare oorsig beskikbaar gemaak word:

NOTICE OF APPLICATIONS FOR ENVIRONMENTAL AUTHORISATION, WASTE MANAGEMENT LICENCE AND WATER USE LICENCE, 3 AUGUST 2018

IN SUPPORT OF THE RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT GAUTENG PROVINCE

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshakiso 710 IQ. The northern section of the project area would be crossed by the R41 (Mainreef/Randfontein) provincial road, with the R24 (Albertina Sisulu/Hamberg) provincial road running along the northern boundary of the project area.

West Wits currently holds a prospecting right (GP 30/5/1/1/2/10035 PR) over the above farms. The prospecting right (MPT No. 29/2016) was ceded from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits. Consent for the transfer of the prospecting right in terms of Section 11(2) of the MPRDA was granted by the DMR in 2018.

In broad terms, the proposed project would involve the short-term development of five open pit mining areas (the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing mine infrastructure complexes (the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) which will be used to access the existing underground mine workings. The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project the following environmental authorisations are required from the mentioned competent authorities. The relevant legislation and associated activities include but are not limited to the following:

Legislation	Listed activities	Authorisation required and key process elements	Competent Authority
National Environmental Management Act (NEMA), (No. 107 of 1998) and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended.	GNR 983 Activities: 37 (power generation facility); 9 & 45 (water pipelines); 10 (sewage pipelines); 47 (power lines); 12, 19 & 48 (watercourse disturbance); 13 & 50 (water dams); 14 & 51 (diesel storage facilities); 22 & 31 (decommissioning); 24 & 56 (roads); 25 (water treatment facility); 27 & 30 (clearing of land); 28 (land use change); and 46 (dirty water pipelines). GNR 984 Activities: 4 (diesel storage facility); 6 (release of emissions/pollution); 11 (water pipelines); 15 (clearing of land); 16 (water dam); 17 (mine pits); 24 (watercourse disturbance); 25 (water treatment facility); and 27 (roads). GNR 985 Activities: 1 (billboards); 2 & 16 (water reservoirs); 3 (telecommunication mast); 4 & 18 (roads); 10 & 22 (dangerous good storage facilities); 12 (clearing of land); 14 (water dams); and 15 (land use change).	Environmental Authorisation: application for environmental authorisation; a Scoping Report, an EIA including an Environmental Management Programme (EMPr) and a public participation process.	DMR – Gauteng Province
National Environmental Management: Waste Act (NEM:WA) (No. 59 of 2008) and the EIA Regulations, 2014, as amended.	Category A, Activities: 3(9) & 3(10) Disposal of waste; 3(12) and 3(13) construction of waste facility(s); 3(14) decommissioning of waste facility. Category B, Activities: Category B, Activity: 4(1) Storage of waste; 4(4) Treatment of waste; 4(7), 4(9) Disposal of waste; 4(10) construction/expansion of waste facility(s); and 4(11) Residue stockpiles or residue deposits.	Waste Management Licence: application for a waste management licence, a Scoping Report, an EIA including an EMPr and a public participation process.	DMR – Gauteng Province
National Water Act (NWA) (No 36 of 1998) and Regulations Regarding the Procedural Requirements for Water Use Licence Applications (WULA's) (GNR 267 of 2017).	(a) groundwater abstraction; (b) water storage; (c) water flow; (f) waste water discharge; (g) waste disposal; (i) watercourse alteration; and (j) mine pit dewatering.	Water Use Licence: application for a water use licence, integrated technical support document and public participation process.	Department of Water and Sanitation (DWS)

SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the environmental consultant responsible for undertaking the required environmental regulatory processes and conducting public participation. The application is subject to a Scoping and EIA process as stipulated in the EIA Regulations (GNR 982, 8 December 2014), as amended, promulgated under Section 24(5) of the NEMA.

This notice also serves to inform Interested & Affected Parties (I&APs) that SLR is preparing a Scoping Report as part of the West Wits mining right application process. The purpose of the Scoping Report is to summarise the Scoping process followed to date; provide an overview of the proposed project and the surrounding environment; present potential impacts and possible preliminary mitigation measures; and provide terms of reference for specialist studies. The Scoping Report is being made available to I&APs for a 30-day comment period from 3 August 2018 until 3 September 2018. Copies of the Scoping Report will be placed at the following locations for public review:

Justice for women and kids

By LETHABO KHAMBULE

SINCE the beginning of the year, 217 life sentences have been handed down to those guilty of violent crimes against women and children across Mzansi.

This was revealed by the police ministry this week.

Crimes against women and children included murder, rape and child pornography.

Minister Bheki Cele has declared that the safety of women and children should be a policing focus this year.

"Police are prioritising crimes against women and children while doing everything in their power to sensitise communities about paedophiles and other sexual offenders lurking in our communities," Cele told the People's Paper.

The police also warned parents and guardians of children to report crimes committed against their kids.

This comes after a 29-year-old mum was sentenced to life imprisonment in April for failing to report and identify the person responsible for raping her child in Soweto.

Cele said it was time for the

criminal justice system to deal decisively with those responsible for gender-based crimes.

Family violence, child protection and sexual offences units have been working with the visible policing and social crime prevention units to conduct awareness campaigns throughout the year.

They have been visiting schools and communities to educate citizens about kids' safety, cybercrime and pornography.

National police commissioner General Khehla Sitole has commended members of the unit for working hard to make sure criminals are brought to justice and that causes of crime are dealt with.

Among the cases that were successfully prosecuted were:

■ In May, a 47-year-old man in Brits, North West, was sentenced to eight life sentences for raping three kids aged between nine and 11.

One of the kids was his niece, whom he made pregnant.

■ In Bellville, Cape Town, a man found guilty of rape, sexual assault and child porn was sentenced to life in prison.

Locals want to live in the new homes

Residents demanded to know if the people moving into the new flats were from their kasi.

FLATS SPARK RAGE

By CHRISTOPHER MOAGI

JUST a day after the official handover of Bokamoso Social housing project, they have been vandalised.

This was after threats made by disgruntled back yard dwellers, who wanted to move in by force on Wednesday.

A group of 50 people allegedly burned five units and vandalised 30 units at the site.

No injuries were reported except for a pregnant woman who fell from a wall while trying to flee the scene.

Mayor Herman Mashaba said: "I appeal to communities to raise their concerns in a manner that doesn't infringe on the rights of others."

One of the tenants, Sibongile Xaba (39), was happy to receive keys to her new home yesterday.

She said she was happy because she would now live in a bigger place and her 16-year-old son would have his own room.

But scores of residents from Freedom

Park protested and demanded to know if the people moving into the new flats were from their kasi.

Resident Scebiso Masondo, said: "We've been engaging with the Joburg Social Housing Company. We want the majority of people who occupy the flats to be from Freedom Park."

He said if the company didn't want them to move in, they should take the flats to the city where they will be occupied by foreigners.

Mashaba said South Africans should get first preference. He asked the company and the housing department to do an audit of the occupants of the properties.

NOTICE OF APPLICATIONS FOR ENVIRONMENTAL AUTHORISATION, WASTE MANAGEMENT LICENCE AND WATER USE LICENCE, 3 AUGUST 2018

IN SUPPORT OF THE RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT GAUTENG PROVINCE

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver over various portions of the farms: Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekiso 710 IQ. The northern section of the project area would be crossed by the R41 (Mainreef/Randfontein) provincial road, with the R24 (Albertina Sisulu/Hamberg) provincial road running along the northern boundary of the project area.

West Wits currently holds a prospecting right (GP 30/5/11/2/10035 PR) over the above farms. The prospecting right (MPT No. 29/2016) was ceded from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits. Consent for the transfer of the prospecting right in terms of Section 11(2) of the MPRDA was granted by the DMR in 2018.

In broad terms, the proposed project would involve the short-term development of five open pit mining areas (the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing mine infrastructure complexes (the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) which will be used to access the existing underground mine workings. The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project the following environmental authorisations are required from the mentioned competent authorities. The relevant legislation and associated activities include but are not limited to the following:

Legislation	Listed activities	Authorisation required and key process elements	Competent Authority
National Environmental Management Act (NEMA), (No. 107 of 1998) and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended.	GNR 983 Activities: 37 (power generation facility); 9 & 45 (water pipelines); 10 (sewage pipelines); 47 (power lines); 12, 19 & 48 (watercourse disturbance); 13 & 50 (water dams); 14 & 51 (diesel storage facilities); 22 & 31 (decommissioning); 24 & 56 (roads); 25 (water treatment facility); 27 & 30 (clearing of land); 28 (land use change); and 46 (dirty water pipelines). GNR 984 Activities: 4 (diesel storage facility); 6 (release of emissions/pollution); 11 (water pipelines); 15 (clearing of land); 16 (water dam); 17 (mine pit s); 24 (watercourse disturbance); 25 (water treatment facility); and 27 (roads). GNR 985 Activities: 1 (billboards); 2 & 16 (water reservoirs); 3 (telecommunication mast); 4 & 18 (roads); 10 & 22 (dangerous good storage facilities); 12 (clearing of land); 14 (water dams); and 15 (land use change).	Environmental Authorisation: application for environmental authorisation; a Scoping Report, an EIA including an Environmental Management Programme (EMPr) and a public participation process.	DMR – Gauteng Province
National Environmental Management: Waste Act (NEM:WA) (No. 59 of 2008) and the EIA Regulations, 2014, as amended.	Category A, Activities: 3(9) & 3(10) Disposal of waste; 3(12) and 3(13) construction of waste facility(s); 3(14) decommissioning of waste facility. Category B, Activities: Category B, Activity: 4(1) Storage of waste; 4(4) Treatment of waste; 4(7), 4(9) Disposal of waste; 4(10) construction/expansion of waste facility(s); and 4(11) Residue stockpiles or residue deposits.	Waste Management Licence: application for a waste management licence, a Scoping Report, an EIA including an EMPr and a public participation process.	DMR – Gauteng Province
National Water Act (NWA) (No 36 of 1998) and Regulations Regarding the Procedural Requirements for Water Use Licence Applications (WULA's) (GNR 267 of 2017).	(a) groundwater abstraction; (b) water storage; (c) water flow; (f) waste water discharge; (g) waste disposal; (i) watercourse alteration; and (j) mine pit dewatering.	Water Use Licence: application for a water use licence, integrated technical support document and public participation process.	Department of Water and Sanitation (DWS)

SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the environmental consultant responsible for undertaking the required environmental regulatory processes and conducting public participation. The application is subject to a Scoping and EIA process as stipulated in the EIA Regulations (GNR 982, 8 December 2014), as amended, promulgated under Section 24(5) of the NEMA.

This notice also serves to inform Interested & Affected Parties (I&APs) that SLR is preparing a Scoping Report as part of the West Wits mining right application process. The purpose of the Scoping Report is to summarise the Scoping process followed to date; provide an overview of the proposed project and the surrounding environment; present potential impacts and possible preliminary mitigation measures; and provide terms of reference for specialist studies. The Scoping Report is being made available to I&APs for a 30-day comment period from 3 August 2018 until 3 September 2018. Copies of the Scoping Report will be placed at the following locations for public review:

NOTICE OF RE-SUBMISSION OF AN APPLICATION FOR A MINING RIGHT FOR THE WEST WITS PROJECT

West Wits MLI (Proprietary) Limited (West Wits) has re-applied for a mining right in terms of South African law for gold, uranium and silver over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ.

In broad terms, the proposed project would involve mining in five open pit mining areas with mining taking place between three to 12 months and final rehabilitation between three to four months. The proposed project would include the refurbishment of two existing mine infrastructure complexes which will be used to access the existing underground mine workings (refer to the figure attached). The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

The project would also include the establishment of run of mine ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Prior to the commencement of the proposed project environmental authorisations are required from the competent authorities. SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the environmental consultant responsible for undertaking the required environmental regulatory processes and conducting public participation.

A Scoping Report has been compiled for the project, if you want to review a copy of the Scoping Report it is available from **3 August 2018** until **3 September 2018** here:

SCOPING REPORT FOR PUBLIC REVIEW**

Dear Sir/Madam

1. INTRODUCTION

West Wits MLI (Proprietary) Limited (West Wits) is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng. West Wits has re-applied to the Department of Mineral Resources (DMR) for a mining right in terms of the Mineral and Petroleum Resources Development Act (Act No. 28 of 2002) (MPRDA) for gold, uranium and silver.

SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the independent environmental assessment practitioner (EAP) responsible for undertaking the EIA for the project.

2. ATTACHED DOCUMENTS

The following sections have been extracted from the scoping report for your review:

Appendix A: Executive Summary of the Scoping Report

EXECUTIVE SUMMARY

Introduction

West Wits MLI (Proprietary) Limited (West Wits), the applicant, is proposing to establish a mining operation in an area located south of Roodepoort and to the north of Soweto in the City of Johannesburg Metropolitan Municipality, Gauteng.

West Wits has re-applied for a mining right in terms of the Mineral and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA) as amended, for gold, uranium and silver over various portions of farms.

West Wits is the South African subsidiary of West Wits Mining Limited, which is an Australian listed exploration and development company. The directors of West Wits Mining Limited include the Executive Chairman (Michael Quinert) and Non-executive Directors (Hulme Scholes, Daniel Pretorius, Vincent Savage and Dr Andrew Tunks). Through its listing, it is owned by a number of shareholders across the globe. West Wits is 26% empowered. The empowerment company is Lilitha Resources Proprietary Limited, previously referred to as Witpoortjie Resources Investments Proprietary Limited.

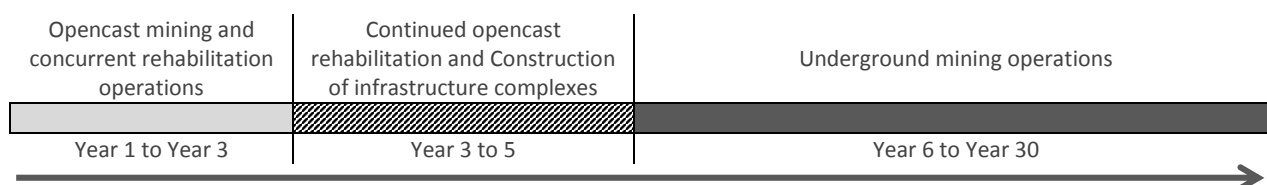

Proposed Development

In broad terms the proposed project would involve the development of five open pit mining areas (referred to as the Mona Lisa Bird Reef Pit, Roodepoort Main Reef Pit, Rugby Club Main Reef Pit, 11 Shaft Main Reef Pit and Kimberley Reef East Pit) and refurbishment of two existing infrastructure complexes (referred to as the Bird Reef Central Infrastructure Complex and Kimberley Reef East Infrastructure Complex) to access the existing underground mine workings.

The project would also include the establishment of run of mine (ROM) ore stockpiles, topsoil stockpiles and waste rock dumps as well as supporting infrastructure including material storage and handling facilities (for fuel, lubricants, general and hazardous substances), general and hazardous waste management facilities, sewage management facilities, water management infrastructure, communication and lighting facilities, centralised and satellite offices, workshops, washbays, stores, change houses, lamprooms, vent fans and security facilities.

Primary mineral processing will take place on site, where ore will be crushed prior to transportation off-site. All run-of mine material will be transported to an existing processing plant off-site for concentrating of minerals.

The expected life of mine for the open pit operations (inclusive of rehabilitation) is three (3) to five (5) years and 25 years for the underground operations (see diagram below). The pits would be mined in a phased approach with each pit taking between six and 16 months to be mined and rehabilitated.

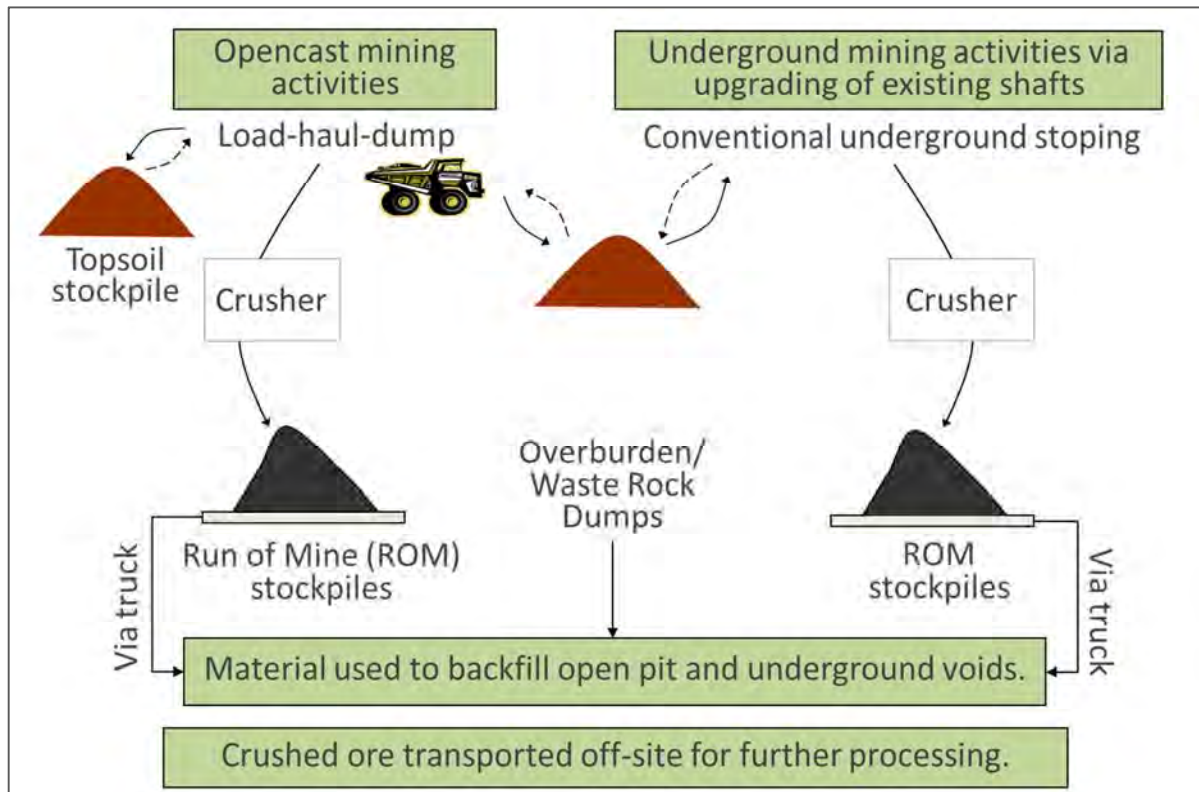

In consultation with landowners the final post closure land use will be identified during the Environmental Impact Assessment (EIA) process.

Specific details regarding the proposed opencast and underground mining operations are included in the table below.

EXAMPLE OF THE OPENCAST MINING OPERATIONS

CONCEPTUAL PROCESS FLOW DIAGRAM OF THE MINING OPERATIONS

EIA Process and Public Participation Process

Prior to the commencement of the project, an EIA regulatory process must be conducted in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002) (MPRDA), National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA) and the National Environmental Management: Waste Act, 2008 (No. 59 of 2008) (NEM:WA), all as amended.

SLR Consulting (South Africa) (Pty) Ltd (SLR) has been appointed as the independent environmental assessment practitioner (EAP) responsible for undertaking the EIA for the project.

A PPP was undertaken to inform the original mining right and environmental application that was lodged in April 2018. The PPP included notification of I&APs through distribution of a Background Information Document (BID), placement of a series of newspaper advertisements, placement of site notices over several occasions, distribution of flyers, radio announcements, focussed engagement and meetings with community structures, public scoping meetings and review of the original Scoping Report and/or summary. Although a new PPP is being undertaken in support of the current application, a detailed understanding of the I&AP groups and related concerns and issues was gleaned from this process. The nature of the project (that is, open pit and underground mining) and overall project location has not changed and therefore this knowledge is deemed relevant to the current application.

The public participation process to date has included notification of interested and affected parties (I&APs) through placement of newspaper advertisements, placement of site notices and distribution of flyers.

Potential impacts

Potential impacts that were identified during the Scoping process are listed below.

Potential impact	Specialist study planned
Surface subsidence	Geotechnical statement.
Negative visual impacts	Visual specialist study
Loss of soil and land capability through removal, erosion and compaction	Soil and land capability specialist study
Loss of soil and land capability through contamination	
Physical loss and/or general disturbance of terrestrial biodiversity	Biodiversity specialist study
Loss or disturbance of aquatic ecosystems	
Reduction in surface water quantity and quality affecting third party users (radiation and non-radiation)	Surface water specialist study
Reduction in groundwater quantity and quality affecting third party users (radiation and non-radiation)	Groundwater specialist study
Climate change	Climate change specialist study
Decrease in air quality from project emissions (radiation and non-radiation)	Air quality specialist study
Ionising radiation	Radiation specialist study
Increase in noise levels	Noise specialist study
Blasting and vibration related impacts (air blasts, ground vibration and fly rock)	Blasting and vibration specialist study
Effect on roads due to project related traffic	Traffic specialist study
Loss of or damage to heritage and/or paleontological resources	Heritage specialist study
Positive and negative socio-economic impacts	Socio-economic specialist study
Impact on surrounding land uses (including valuation statement)	
Human health risks	Health specialist study

In addition to the above, a closure cost estimate will be calculated for the project in line with the DMR's requirements.

Conclusions

The EIA process is currently in the Scoping phase. The project has the potential to impact on the biophysical, cultural and socio-economic both within and surrounding the project area. Input received during the Scoping phase will allow for the meaningful assessment of all relevant biophysical, cultural and socio-economic issues during the following EIA phase. Potential impacts will be investigated by various studies to be conducted by appropriately qualified specialists. Stakeholder engagement will continue throughout the EIA process.

Appendix B: Terms of Reference for Further Investigations Including the Plan of Study for the EIA (Section 7 of Scoping Report)

Issue	Specialist study and Terms of Reference (extracted from Section 7.4 of the scoping report)
<p>Loss of soil and land capability through removal, erosion and compaction</p> <p>Loss of soil and land capability through contamination</p>	<p>Soil and land capability</p> <p>This specialist study will be conducted by a soil scientist from Scientific Aquatic Services CC. The study would map and characterise the soil resources and related land capability within the project area, assess potential impacts associated with each of the project phases and develop a soil conservation and management plan that aligns with the post-closure land use of potential housing developments and/or other activities that are best suited for this area.</p>
<p>Physical loss and/or general disturbance of terrestrial biodiversity</p> <p>Loss or disturbance of aquatic ecosystems</p>	<p>Biodiversity</p> <p>This specialist study will cover terrestrial and freshwater ecosystems and will be conducted by biodiversity specialists from Scientific Terrestrial Services CC and Scientific Aquatic Services CC. The study would review available literature to obtain background information on the site and its importance in terms of national and provincial databases and biodiversity-related guideline documents. Site-specific work focused on the project area would map and characterise the baseline terrestrial conditions of the site and related sensitivities. As part of the freshwater investigation, an aquatic assessment and a wetland assessment will be conducted. Aquatic assessments would be focused on the Klip River and the water courses on site that drain into the Klip River. The wetland assessment would include wetland delineation and wetland ecological assessment. Cognisance would also be taken of biodiversity in the area surrounding the project area. The study would draw on the findings of other specialist studies as necessary to inform any related impacts on biodiversity. The study would provide input on the project plan and alternatives being considered, assess potential impacts associated with each of the project phases and include the development of mitigation measures that align with the post-closure land use of potential housing developments and/or other activities that are best suited for this area.</p>
<p>Reduction in surface water quantity and quality affecting third party users (radiation and non-radiation)</p>	<p>Surface water</p> <p>The surface water study will consider the inter-related aspects of surface water resources. The study would be conducted by hydrologists from SLR. The study would characterise the hydrological features of the site and local catchment, review available floodlines for the Klip River and record the water quality of the Klip River. The hydrological study would also develop a climatic project water balance and a conceptual stormwater management plan (in line with Regulation 704) to inform the design of the stormwater management facilities and water supply options for the project. The study would provide input to the project plan and alternatives being considered, assess potential impacts associated with each of the project phases and include management and monitoring plans. During the course of the studies the necessary consultation would take place with the Department of Water and Sanitation.</p>
<p>Reduction in groundwater quantity and quality affecting third party users (radiation and non-radiation)</p>	<p>Groundwater</p> <p>A specialist grounding study will be undertaken to address the inter-related aspects of groundwater resources. The study would be conducted by geohydrologists from Noa Agencies. The groundwater study would characterise the groundwater resource by reviewing available DWS databases, conducting a hydrocensus of existing water uses and users, measure the water quality of groundwater resources and determine the aquifer parameters on the site. The groundwater study would include a geochemical and waste assessment to inform the contamination potential of any residues/discards generated by the project. The waste assessment would be undertaken in terms of the National Norms and Standards (Regulation 635 and 656 of 2013). The study would provide input to the project plan and alternatives being considered, assess potential impacts associated with each of the project phases and include management and monitoring plans. The groundwater study would make use of modelling techniques to inform the groundwater assessment of potential dewatering and contamination impacts. During the course of the study consultation would take</p>

	place with the Department of Water and Sanitation.
Decrease in air quality from project emissions (radiation and non-radiation)	<p>Air quality</p> <p>The specialist air quality study will be conducted by an air quality specialist from Airshed Planning Professionals (Pty) Ltd. The study would characterise the baseline air quality environment through review of available ambient data, would identify potential receptor sites, provide input on design controls, assess potential impacts associated with each of the project phases against relevant health assessment criteria (that considers human, animal and plant health) and develop an emissions (including dust) management and monitoring plan.</p>
Climate change	<p>Climate change</p> <p>A climate change study will be conducted by a climate change specialist. The study would characterise the baseline climatic environment, calculating the carbon footprint of the project, analyse the project greenhouse gas emissions, analyse the project alternatives and mitigation measures, assess potential impacts associated with each of the project phases and develop an emissions management plan.</p>
Ionising radiation	<p>Radiation</p> <p>This specialist study will be conducted by a radiation specialist from SciRad Consulting. The study would characterise the baseline environment with input from abovementioned air and water specialists, assess potential impacts associated with each of the project phases and develop mitigation measures.</p>
Increase in noise levels	<p>Noise</p> <p>The noise specialist study will be conducted by a noise specialist from Airshed Planning Professionals (Pty) Ltd. The study would characterise the baseline environment through on-site noise sampling, would identify potential receptor sites, provide input on design controls, assess potential impacts associated with each of the project phases against noise assessment criteria and develop a noise management and monitoring plan.</p>
Blasting and vibration related impacts (air blasts, ground vibration and fly rock)	<p>Vibration and blasting</p> <p>This specialist study will be conducted by a vibration and blasting specialist from Cambrian CC. The study would characterise the baseline conditions in and around the site, identify the source locations and levels, assess potential impacts of each of the project phases on the receiving environment and develop mitigation measures.</p>
Negative visual impacts	<p>Visual</p> <p>The visual specialist study will be conducted by a visual specialist from Scientific Aquatic Services CC. The study would characterise the baseline environment by considering the natural and cultural landscape, scenic resources, sense of place and visual receptors, compile a viewshed analysis, assess potential impacts associated with each of the project phases and develop mitigation measures.</p>
Effect on roads due to project related traffic	<p>Traffic</p> <p>This study would be conducted by traffic specialists from the consulting engineering firm Siyazi Gauteng (Pty) Ltd. The study would establish the baseline traffic volumes by means of traffic counts, calculate project-related contributions to baseline traffic volumes, evaluate the performance and layout of intersections, provide input on road conditions and the design of the access point, assess potential impacts associated with each of the project phases, recommend any road and safety improvements and develop a traffic management plan.</p>
Loss of or damage to heritage and/or paleontological resources	<p>Heritage/Cultural resources</p> <p>The study will be conducted by accredited heritage and palaeontological specialists from Professional Grave Solutions. The study would identify and map heritage resources within the opencast mining areas and infrastructure complexes, determine the likelihood of fossils occurring within the</p>

	project area, provide input on the project plan, assess potential impacts associated with each of the project phases, identify requirements for any additional permits and develop a heritage management plan.
Positive and negative socio-economic impacts	<p>Socio-economic</p> <p>The specialist study will be conducted by a social specialist and a financial specialist from Mercury Financial Consultants. The study would characterise the baseline socio-economic environment with respect to the immediate area and broader municipal areas, identify and map land uses, liaise with other appointed specialists, as required, to understand the potential extent and significance of impacts (including health), provide input on the project plan, assess both potential positive and negative impacts associated with each of the project phases, provide input into enhancing positive and minimising negative socio-economic impacts, provide input on the issue of property value, and develop related management plans.</p>
Human health	<p>Human health</p> <p>The Human Health Risk and Impact Assessment (HHRIA) will focus on potential health impacts to members of the public relating to the potential chemical (non-radioactive) contamination of environmental media (such as the atmosphere, groundwater and surface water) induced as a result of the proposed mining and mineral processing activities. Health risks will be assessed in accordance with the basic paradigm for human health risk assessment developed by the USA National Research Council and all potential impacts will be considered as far as complete source-pathway-receptor linkages can be demonstrated. The study will rely on information from geochemistry, air quality, groundwater and social specialists to characterise the different elements of the source-pathway-receptor model. The HHRIA will be conducted by a specialist environmental scientist from EnviroSim Consulting.</p>
Impact on surrounding land uses	<p>Land use</p> <p>As part of the land use assessment and with input from the technical project team and relevant specialist studies, a safety buffer for third party structures and surfaces will be determined to manage project risks. The related conditions will be included in the EMP.</p>
-	<p>Financial provision</p> <p>The financial provision for the proposed project will be determined by Golder Associates and would be determined in accordance with the NEMA Regulations (1147 of 2015) pertaining to the financial provision for mining operations.</p>

Dear Andrew,

Thank you for the email.

The applicant felt the need to re-apply in order to:

- Include the consideration of design/layout alternatives for the opencast mine pits; and
- Exclude the Main/South Reef Infrastructure Complex and underground mine workings which would have been located towards the north-western side within the proposed mining right application area next to Witpoortjie.

Could you please let me know whether you were able to access the revised Scoping Report on the SLR website?

Dear Ms Medallie

RE: COMMENTS TO BE CAPTURED WITHIN THE FINAL SCOPING REPORT FOR THE PROPOSED WEST WITS MINING PROJECT AND ADDRESSED DURING THE EIA PHASE OF THE APPLICATION.

Maxam Dantex South Africa (Pty) Ltd is an interested and affected party of the proposed Wits Mining Project as described in the Scoping Report, dated May 2018 by virtue of being a land occupier over a portion of Remainder of Portion 161 of the Farm Vogelstruisfontein 231 IQ.

Background to Maxam Dantex activities:

Maxam Dantex South Africa (Pty) Ltd is one of the largest manufacturers of cartridge explosives in South Africa. It develops and commercialises a wide range of cartridges, bulk and specialised explosives products.

Based in Roodepoort, on Rand Leases Properties, in Gauteng, MAXAM Dantex is one of the largest subsidiaries in the MAXAM Group employing approximately 250 people in South Africa producing bulk explosives, packed explosives and initiation systems for local, regional and international market. It is also the regional office for subsidiary companies based in Mali, Ghana, Ivory Coast, Cameroon, Angola, Zambia and Tanzania.

Maxam Dantex has been operating at the current site for over 40 years and it has grown in infrastructure, production capacity and experienced technological advancement. The infrastructure comprises of:

- 14 functional magazines (with a total maximum storage capacity of 178 tons of explosives)
- 9 manufacturing plants
- Burning ground
- Shooting bay.

Legal Permits and Permissions:

Due to the nature of the activities at Maxam Dantex, the factory is classified as danger area according to the Explosives Act. As such, it is governed by licences under schedule 1 and schedule 2 of the Explosives Act which are explained below:

Schedule 1 Explosives Workplace Licence

- Provides a description of all explosives that may be manufactured, tested, stored or used in a danger area, specifying nominal formulas, with tolerances, components, construction and packaging

Schedule 2 Explosives Building Licence

- Specifies the name and number of the building or room, the maximum number of persons and the **maximum mass of explosives allowed** in the building or room, the operations authorized and which of these operations may be carried out simultaneously

These licences are issued with the condition of having a maximum allowed quantity in kg of explosives which then according to Annexure 1 of Occupational Health and Safety Act No.85 of 1993 and Regulations, under Explosives Regulation dictates the safety distances that must be adhered to in order to mitigate the risks of any accidental explosions that may occur. These safety circles are shown in the diagram on Annexure A attached to this report and must be strictly adhered to. Failure to comply will result in licence cancellation and subsequent factory closure.

List of concerns / objections:

The following concerns and objections are applicable to the following sub projects;

Open Pit Activities - 11 Shaft Pit Activity

1. According to the OSH-ACT #85, Explosives regulation which stipulates the safety distance, the 11 Shaft Pit Activities are situated within the outer/public safety distance of one of the magazines. Bearing in mind that the safety distances are calculated to minimize the casualties and damage of people and property during an incident, allowing mining activities within the safety zone will contravene the legal requirement for operation. In addition, it will also endanger the lives of +/-50 people working in the area including the fleet as indicated in the report.
2. The proposed open cast mining activities is situated directly on the access road to the Dantex Factory facility which will affect the business' operations as all transportation of raw material, products and personnel to and from the factory will be hindered.

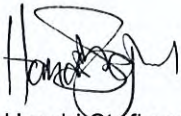

Under Ground- Kimberley Reef East Pit Activity

1. The proposed underground mining activities as per the scoping report indicates that the activities will occur directly underneath the factory. The factory includes storage magazines housing approximately 100 tonnes of explosives at any given time. The underground operations that shall be taking place such as blasting and drilling pose a high risk of structural integrity deterioration which will compromise the safety of the magazines resulting in incidents such as explosion.
2. The portion of the proposed Kimberley Reef East Infrastructure Complex is situated within the leased buffer zone.
3. The past mining activities have resulted in unstable ground which currently is resulting in sinkholes within the factory. As such, further underground mining activities pose a major threat of more sinkholes occurring jeopardising the safety of the facility and personnel within.

4. The factory conducts blasting activities on a daily basis as part of the Product Quality tests. Thus, a combination of blasting activities on the surface and underground poses a threat of ground instability leading to collapse and sinkholes.
5. Increased traffic of personnel around the factory will compromise the security and thus increase the chances of theft of explosives particularly in view of the escalating cash in transit heists involving explosives.

Please ensure that the project is assessed and adapted based on the feedback provided above.

Yours sincerely

Handri Stofberg-Nel

Dear Marline

Thank you very much for the information you sent in respect of the project. May you please advise who is responsible for the coordination of meetings with the Community. May I have the individual's contact details. I am aware that the community has been giving a lot of resistance, and I would like to assist. I have some members/community leaders, who are influential and whom the community listens to. I think it would be beneficial, for the sake of progress, to meet with these guys and yourselves to gain traction.

Let me know as soon as you can. The leaders I refer to above are from all the affected communities, and have done great work in similar projects in the past.
