

**SITE PHOTOGRAPHS – RE Capital 10 Solar Development**

**Figure 1:** View of site from near the R325.

**Figure 21:** View north-east across proposed solar development site towards hills along eastern boundary.

**Figure 3:** View south onto southern boundary of proposed solar site (note overhead powerline cables) and hills covering the majority of the area to the south.

**Figure 4:** Access off R325 onto Portion 4 of Farm 436 Kapstewel (previously Vaalkop).

**Figure 5:** Access off R325 onto Portion 2 of Farm 436. Note old open-cast manganese & iron ore mine on hills in background.

**Figure 6:** Access road from southern portion of RE/436 onto solar study site.

**Figure 7:** Vacant house in north-eastern portion of property & development property.

**Figure 8:** Solar pump and borehole.

**Figure 9:** One of two water reservoirs connected to borehole / solar pump, located within north-eastern portion of study-site.

**Figure 10:** Cattle camp adjacent to existing vacant house on study site.

**Figure 11:** View south along farm access road to existing house and cattle camps. Note hill to the east.

**Figure 12:** Steel-lattice powerline to Mangalore Substation extending from east, across Portion 4 of Farm 436 Kapstewel (Vaalkop). Note access road aligned parallel to this line.
