Meeting Minutes

Project Title: Middeldrift Scheme
Location: Magwaza Tribal House
Date: 06 February 2019

Attendees:

Please see attached attendance register.

Agenda

- 1. Introductions
- 2. Presentation of information by Anthony Mader and Simphiwe Khumalo of EnviroPro
- 3. Agreement regarding notification of the community
- 4. Discussion and Questions

Introduction to Project & Purpose of Meeting

Mr Nene from King Cetshwayo District Municipality introduced Anthony Mader and Simphiwe Khumalo from EnviroPro, Khetha and Puleng from ISD Consultant to the Tribal Council and the Ward Cllr, both consultants were given time to further explain their scope of work. EnviroPro thanked Mr Nene, Ward Cllr Mr Lushozi and the tribal Counsel for taking the time to meet to discuss this project. The purpose of this meeting was to introduce the proposal to the representatives of the community so as to allow them to notify community members through the official recognised channels. The meeting also served to allow the consultants to meet the community representatives and answer any comments or concerns they might have. These meeting minutes will be distributed to registered I and APs and authorities as part of the Basic Assessment Report.

The King Cetshwayo District Municipality propose to upgrade the bulk water supply and reticulation to Middledrift SSA 3. The Middledrift SSA 3 is located in Ward 13 and Ward 14, Nkandla Local Municipality within the King Cetshwayo District Municipality. Water for the supply scheme will be obtained from the Thukela-Mhlathuze Transfer Scheme or the Nsuze River and pumped to the Middledrift water treatment works. The area boundary is identified as the Nsuze River to the east, uThukela River in the west and the Nkandla Forest to the north. The proposed construction will result in the development of infrastructure with a physical footprint of more than $100m^2$ within 32m of a watercourse and the infilling/depositing of any material of more than $10m^3$ into or from a watercourse. A WUA is required in terms of section 21 (a) for the abstraction of water and section 21 (c) & (i) for the construction of infrastructure within 500m of delineated wetlands. All Interested and Affected Parties are invited to register with EnviroPro within 60 days of the issuing of this notice

Please note that the following is only a summary of the discussions held and comments have not been recorded exactly as stated while additional information may have been added to responses where this may not have been available at the time of the meeting.

Comments

1. The izinduna welcomed everyone, and wanted to hear more about the project.

Mr Nene added why he was part of the meeting and how EnviroPro and ISD Consulting will help with the project according to their scope of work and made the tribal council aware that both consultants will come again visit the community to finish their work. The iNduna asked if both companies will need any additional help navigating the community and also if there are any job opportunities that will be created during the whole process.

Mr. Nene responded by saying that EnviroPro will not hire any person but ISD consulting will work with the community since they will be doing house head counts to make sure every household will have sufficient clean running water.

2. Induna asked how they are going to hire people since the project will go into different villages.

Mr Nene suggested that the izinduna should work with the ward Cllr and pick people in their own way that works for them and the people they are leading since they know the community better, when that is completed, can they present the list to Khetha from ISD Consulting? In addition to that list, they will have to pick people who will help with digging and infilling the trenches if need be.

Ward Cllr Lushozi agreed with Mr. Nene and added that they got that under control.

3. Induna asked how long will it take for project to be implemented

Mr Nene explained that as soon as they get numbers from ISD Consulting and also other things sorted from the municipality side with all the necessary authorizations in place.

Simphiwe added that the council must be aware that work won't be done where there are water crossings because the contractor will have to have an authorization to dig across such areas which is why EnviroPro is part of the project to get the necessary authorizations in place.

4. There were no further questions.

The meeting register was signed, other notification document were left with the tribal council secretary for the iNkosi to sign.

The meeting was closed.
