# NOTICE OF BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

## GEELSTERT 1 AND GEELSTERT 2 SOLAR PV FACILITIES AND GEELSTERT GRID CONNECTION NEAR AGGENEYS, NORTHERN CAPE

**Proposed Activity:** The development of two (2) separate solar photovoltaic (PV) facilities, each with a contracted capacity of up to 125MW. The two solar PV facilities will be connected to the Aggeneys Main Transmission Substation (MTS) through the development of specific grid connection infrastructure with a capacity of up to 220kV.

The infrastructure to be developed for the solar PV facilities include solar PV panels, inverters, underground cabling, on-site facility substation, main access and internal access roads, temporary laydown areas and operation and maintenance buildings.

The grid connection infrastructure to be developed includes a collector substation and an overhead power line.

**Location:** South-east of Aggeneys within the Khâi-Ma Local Municipality and the Namakwa District Municipality. The two solar PV facilities are positioned adjacent to one another on the Remaining Extent of the Farm Bloemhoek 61, south of the Loop 10 gravel road. The projects fall within the Springbok Renewable Energy Development Zone (or REDZ 8). The grid connection infrastructure will be placed within a grid connection corridor assessed for the project.

# Babas met klompvoetjies kry behandeling by Dr Harry Surtie Hospitaal

**GEMSBOK-UPINGTON:** By Dr Harry Surtie Hospitaal op Upington is dienste vir babas en kinders met klompvoetjies beskikbaar!

Ongeveer 2000 babas met klompvoete word elke jaar gebore in Suid-Afrika. 'n Klompvoet is 'n misvormde voet wat inwaarts gedraai is wat veroorsaak dat die sool nie plat op die vloer kan trap nie.

Klompvoete kan in een of albei voete voorkom. 'n Baba met klompvoete sal sukkel om te begin loop omdat die voetjies nie plat op die vloer kan trap om gewig daardeur te neem nie.

Indien hierdie diagnose nie vroeg reeds behandel word nie, kan die voetjies styf raak in die misvormde posisie wat effektiewe loop en hardloop op 'n latere stadium byna onmoontlik maak.

En natuurlik hoe vroeër 'n baba of kind behandeling ontvang vir klompvoete, hoe beter is die kans op instandhouding van funksie in die voetjies. By Dr Harry Surtie

skoene dra tot die ouderdom van 4-5 jaar en dus is dit nodig om steeds aanhoudend op te volg sodat skoene vervang kan word soos die kind se voetjies groei.

Die Allied Health afdeling van die Dr Harry Surtie Hospitaal wil graag die gemeenskap uitnooi om navrae te doen by die Arbeidsterapie en Fisioterapie afdelings by Dr Harry Surtie Hospitaal by 054 332 9239/9124 indien hul bewus is van kinders met misvormde voetjies wat nog nie behandeling ontvang nie.

Hulle sien uit om julle te help en staan gereed om 'n verskil te maak in 'n jong kind/baba se toekoms.

Hierdie kleiding is deur die terapeute by die DHS Klompvoet Kliniek gehelp. Hier is die voor en na fotos van sy voetjies.

Hospitaal is dienste vir hierdie babas/ kinders beskikbaar!

Hulle het 'n weeklikse Klompvoet Kliniek op Donderdae vanaf 09:00 – 12:00 waar die Ponsetti metode gebruik word om hierdie voetjies te behandel.

Behandeling begin met weeklikse gips van die voetjie wat geleidelik die stywe voetjie in die verlangde posisie trek, en volg met verlangde chirurgie soos die geval bepaal.

DHS lewer ook spesiale skoene wat na hierdie prosedure die baba of kind se voetjies in die regte posisie hou om te voorkom dat dit weer inwaarts trek.

Daar word verwag dat die kind daaglik hierdie

# Leerders bly so veilig

**GEMSBOK-POFADDER:** Om die veiligheid van gemeenskapsleerders te verseker, het Konkoonies Solar Power meer as 500 maskers aan leerders oor drie skole in die klein dorpie Pella en Pofadder geskenk.

In 'n gekoördineerde poging met die Namakwa-distrikkantoor in Springbok, het die sonkraag aanleë ook 'n uitgebreide reeks sanitiseerders vir die skole voorsien.

"Ons beskou dit as krities dat leerders uit ons gemeenskappe so veilig as moontlik is, veral omdat COVID-19-infeksies toeneem in die Noord-Kaapse gebiede," het Tsholofelo Moote, ekonomiese ontwikkelingspraktisyn by Konkoonies Solar Power, verduidelik.

Die skole sluit in Pella Primêr, Hoërskool Boesmanland asook Laerskool Francois Visser. Hierdie gemeenskaps COVID-19-ondersteuning, gelewer deur Konkoonies Solar Power, is nog 'n voorbeeld van hoe die provinsie broodnodige hulp van die private sektor ontvang.

Mev. Clarina van Rooyen, hoof van Hoërskool Boesmanland in Pofadder het die maskers en saniteerders wat deur Konkoonies Solar Power geskenk is, ontvang.
