Good day Gabriele

When is building going to start on the Woodhouse solar project at Vryburg.

I see you have a poster at the door at the library

Thank you

Regards
Neil

Dear Niel Faber

Thank you for your enquiry. The construction date for the Woodhouse Solar project is not yet know. The project still needs to receive Environmental Authorisation from the Department of Environmental Affairs and approval from the Department of Energy before it can be constructed. The project developer aims to bid this project into the Department of Energy's Renewable Energy Independent Power Producer Procurement Programme (REIPPPP) in the next bidding round which is anticipated to be in August 2016. If the project is approved by the Department of Energy then construction is likely to commence in the second half of 2017 or beginning of 2018, however this will be confirmed at a later stage.

I have attached a background information document on the project and Environmental Impact Assessment process for your information. Please complete and return the attached form if you would like to register as an Interested and Affected Party (I&AP) for this project.

Kind regards

Gabriele Wood

Morning Mike

As requested, please see attached a KMZ file of the Remaining Extent of the Farm Woodhouse 729 (i.e. the site proposed for the Woodhouse 1 & 2 PV Facilities).

Unfortunately I don't have more info on where the developer plans to locate the facilities within the site at this point.

Kind regards
Lisa

Dear Ms Jodas

COMMENTS ON THE DRAFT ENVIRONMENTAL IMPACT ASSESSMENT REPORT FOR THE PROPOSED CONSTRUCTION OF THE 100 MEGAWATTS (MW) WOODHOUSE SOLAR 1 PHOTOVOLTAIC (PV) FACILITY ON THE REMAINING EXTENT OF THE FARM WOODHOUSE 729 WITHIN THE NALEDI LOCAL MUNICIPALITY IN THE NORTH WEST PROVINCE

The draft Environmental Impact Assessment report (EIAr) dated May 2016 and received by this Department on 06 May 2016 refers.

This Department has the following comments on the abovementioned application:

- i. The environmental assessment practitioner (EAP) must ensure that the exact thresholds related to the listed activities are specified in both the application form and the final EIAr.
- ii. Should there be a need to amend the application form, please note that the Department's application form template has been amended and can be downloaded from the following link <https://www.environment.gov.za/documents/forms>.
- iii. Coordinates for the proposed site as well as substation and powerline must be provided with the final EIAr. Coordinates must be provided in the format DDMMSS.
- iv. In terms of Appendix 3 of the EIA Regulations, 2014, the report must include an undertaking under oath or affirmation by the EAP in relation to:
 - the correctness of the information provided in the reports;
 - the inclusion of comments and inputs from stakeholders and interested and affected parties (I&APs);
 - the inclusion of inputs and recommendations from the specialist reports where relevant;
 - any information provided by the EAP to I&APs; and
 - responses by the EAP to comments or inputs made by I&APs.
- v. In terms of Appendix 4 of the EIA Regulations, 2014, the environmental management programme (EMPr) must include an environmental awareness plan describing the manner in which-
 - the applicant intends to inform his or her employees of any environmental risk which may result from their work; and
 - risks must be dealt with in order to avoid pollution or the degradation of the environment.

- vi. Please ensure that all issues raised and comments received during the circulation of the EIAR from registered I&APs and organs of state which have jurisdiction (including this Department's Biodiversity Section) in respect of the proposed activity are adequately addressed and included in the final EIAR.
- vii. Proof of correspondence with the various stakeholders must be included in the final EIAR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.
- viii. The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 and 44 of the EIA Regulations 2014.
- ix. Proof that the notice of Environmental Impact Assessment process was advertised in print media must be included in the final EIAR. Alternatively, motivation as to why this was not done must be provided.
- x. Recommendations provided by specialist reports must be considered and used to inform the Layout Plan and environmental management programme (EMPr).
- xi. All specialist reports that were done in-house must be externally peer reviewed before submission of the final EIAR. The peer-review must address the following:
 - Acceptability of the ToR;
 - Is the methodology clearly explained and acceptable;
 - Evaluate the validity of the findings (review data evidence);
 - Discuss the mitigation measures and recommendations;
 - Evaluate the appropriateness of the reference literature;
 - Is the article well-written and easy to understand; and
 - Identify any short comings.
- xii. The EIAR must provide the technical details for the proposed facility in a table format as well as their description and/or dimensions. A sample of the minimum information required is listed under point 2 of the EIA information required for solar energy facility as requested in the acceptance of the final Scoping Report (SR).
- xiii. The final EIAR must provide the final EMPr and final Layout Plan with the information as requested in the acceptance of the SR.
- xiv. You are further reminded that the final EIAR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of the EIAR in accordance with Appendix 3 of the EIA Regulations, 2014.
- xv. Further note that in terms of Regulation 45 of the EIA Regulations 2014, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of the these Regulations, unless an extension has been granted in terms of Regulation 3(7).

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an environmental authorisation being granted by the Department.

Yours faithfully

Dear Motsei

Thank you for the email. Your request is noted. The Environmental Impact Assessment (EIA) process is still being undertaken and the results of the environmental assessments will inform the layout of the facilities. The preliminary layout maps will be presented in the draft EIA report which will be made available for review and comment in the coming weeks. The layout maps will be sent to your office once finalised.

Please do not hesitate to contact me if you have any queries in this regard.

Kind regards
Lisa

Dear Obitseng Moholo

The Environmental Impact Assessment (EIA) process for the proposed Woodhouse Solar 1 and Woodhouse Solar 2 PV Facilities (READ Ref: NWP/DEA/45/2015) has reference. The draft EIA Reports were released for a 30-day review period on 3 May and 5 May 2016 for Woodhouse Solar 1 and Woodhouse Solar 2 respectively. Hard copy and electronic versions of the draft EIA Reports were sent to your office via courier on 4 May 2016 (refer to attached courier waybill). Further to our telephone conversation this morning, please could you kindly submit comments on the aforementioned projects at your earliest convenience.

Please do not hesitate to contact me if you have any queries in this regard.

Kind regards

Gabriele Wood
