Dear Ms Thomas

COMMENTS ON THE DRAFT SCOPING REPORT FOR THE PROPOSED THERMAL POWER DUAL FUEL FACILITY AND ASSOCIATED INFRASTRUCTURE TO FORM PART OF A HYBRID GENERATION FACILITY TOGETHER WITH THE AUTHORISED HYPERION 1 & 2 SOLAR PV ENERGY FACILITIES NEAR KATHU, NORTHERN CAPE PROVINCE

The draft Scoping Report (SR) dated October 2020 and received by this Department on 16 October 2020 refer.

This letter serves to inform you that the following information must be included in the final SR:

(a) Listed Activities

- i. Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure as described in the project description.
- ii. If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link <https://www.environment.gov.za/documents/forms>.

(b) Layout & Sensitivity Maps

- i. Please provide a layout map which indicates the following:
 - a) Positions of the power island, steam turbine and generator, fuel storage tanks, water storage reservoir and tanks, water and gas supply pipelines;
 - b) Permanent laydown area footprint;
 - c) All supporting onsite infrastructure e.g. roads (existing and proposed);
 - d) Substation(s) and/or transformer(s) sites including their entire footprint;
 - e) Connection routes (including pylon positions) to the distribution/transmission network; and
 - f) All existing infrastructure on the site.
- ii. Please provide an environmental sensitivity map which indicates the following:
 - a) The location of sensitive environmental features on site e.g. CBAs, heritage sites, wetlands, drainage lines etc. that will be affected;
 - b) Buffer areas; and
 - c) All "no-go" areas.

- iii. The above layout map must be overlain with the sensitivity map and a cumulative map which shows neighbouring energy developments and existing grid infrastructure.

(c) Public Participation Process

- i. Please ensure that all issues raised and comments received during the circulation of the draft SR from registered I&APs and organs of state (including this Department's Climate Change Section), which have jurisdiction in respect of the proposed activity are adequately addressed in the final SR. Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.
- ii. The Public Participation Process must be conducted in terms of Regulation 39, 40 41, 42, 43 & 44 of the EIA Regulations 2014, as amended.
- iii. A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Annexure 1 of this comments letter. Please refrain from summarising comments made by I&APs. All comments from I&APs must be copied verbatim and responded to clearly. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.
- iv. The final SR must provide evidence that all identified and relevant competent authorities have been given an opportunity to comment on the proposed development particularly the Northern Cape Department of Environment and Nature Conservation, and the District and Local Municipalities.

(d) Specialist Assessments

- i. An Air Quality and Climate Change impact assessment must be undertaken.
- ii. Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of infrastructure positions, and all other associated infrastructures that they have assessed and are recommending for authorisation.
- iii. The specialist studies must also provide a detailed description of all limitations to their studies. All specialist studies must be conducted in the right season and providing that as a limitation, will not be accepted.
- iv. Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defensible reasons and where necessary, include further expertise advice.

(e) Cumulative Assessment

- i. If there are other similar facilities proposed within a 30km radius of the proposed development site, a cumulative impact assessment must be conducted for all identified and assessed impacts which must be refined to indicate the following:
 - a) Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e. hectares of cumulatively transformed land.
 - b) Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.
 - c) The cumulative impacts significance rating must also inform the need and desirability of the proposed development.
 - d) A cumulative impact environmental statement on whether the proposed development must proceed.

(f) Specific comments

- i. The Air Quality and Climate Change specialist studies' terms of reference must be made available to this Department's Climate Change Directorate for comments. Proof of correspondence must be included in the public participation report.
- ii. The landowner contact person is different from the applicant contact person. The EAP must submit as signed landowner consent as prescribed in terms of Regulation 39(1) of the EIA Regulations, 2014 as amended, and outlined in the application form, if the landowner is different from the applicant.

General

You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that:

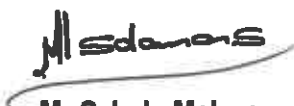

"If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a scoping report which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority"

You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of Scoping Reports in accordance with Appendix 2 and Regulation 21(1) of the EIA Regulations 2014, as amended.

Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.

Yours sincerely

Mr Sabelo Malaza
Chief Director: Integrated Environmental Authorisations

Interim Comment

In terms of Section 38(3), 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Hyperion Solar Development (Pty) Ltd

Hyperion Solar Development (Pty) Ltd proposing the development of a hybrid generation facility consisting of a dispatchable, dual fuel (liquid or gas) thermal generation plant that will work in combination with the authorised Hyperion PV Solar Energy Facility (SEF) complex. The power generated by the thermal facility and authorised Hyperion PV facility complex will connect via an overhead 132kV power line to the existing Eskom Kalbas substation. The thermal generation plant will include the following infrastructure

Savannah Environmental (Pty) Ltd has been appointed by Hyperion Solar Development (Pty) Ltd to conduct an Environmental Authorisation (EA) Application for the proposed 75MW Thermal Dual Fuel Facility and associated infrastructure for the authorised Hyperion 1 & 2 Solar OV facilities, near Kathu, Northern Cape Province.

A draft Scoping Report (DSR) has been submitted in terms of the National Environmental Management Act, 1998 (NEMA) and the 2017 NEMA Environmental Impact Assessment (EIA) Regulations. The proposed infrastructure will include gas turbines or reciprocating engines, access roads, truck entrance and parking facility, regasification plant and fuel preparation plant, dry cooling system, fuel off-loading facility, fuel storage facility, water demineralisation plant, substation, cabling, operation and maintenance building, fencing, warehouse and workshops covering an area of 5ha. The proposed Thermal Dual Fuel Facility will be located within the authorised Hyperion PV Solar Energy Facility.

SAHRIS Case ID 12966 has reference (<https://sahris.sahra.org.za/cases/hyperion-solar-development-2>). In a Final Comment issued on the 06/05/2019, SAHRA noted no objections to the proposed development and provided specific conditions for the development.

ASHA Consulting (Pty) Ltd has been appointed to provide heritage specialist input as required by section 24(4)b(iii) of NEMA and section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA).

Orton, J. 2020. Heritage Impact Assessment: Proposed Thermal Power Dual Fuel Generator on Farm 432/REM and Access Road on Farm 464/1, North of Kathu, Kuruman Magisterial District, Northern Cape.

Page No: 2

It is noted that no physical survey was conducted as part of this HIA, however, the area where the proposed facility is to be located was surveyed as part of the original EA application. No heritage resources were previously identified within the proposed facility footprint.

Recommendations provided in the report include the following:

- The subsurface palaeontological record can never be fully understood, and the EIA Phase report will need to make recommendations for monitoring and/or mitigation to be carried out in advance of or during construction work;
- The EIA Phase report will need to make recommendations for mitigation to be carried out in advance of construction work. This will likely entail monitoring of excavations and excavating column samples from a few strategic locations. It should be noted that the potential does exist for a larger excavation to be required if highly significant archaeological resources are discovered;
- The EIA Phase report will need to make recommendations for mitigation or avoidance of graves visible on the surface and indicate how to proceed in the event that a grave is discovered during excavation.

Interim Comment

The SAHRA Archaeological, Palaeontological and Meteorites (APM) requests that the EIA phase report HIA must include a field-based survey be conducted for the proposed access road. The EIA phase HIA must include a Palaeontological Desktop Study as the proposed development footprint is located within an area of moderate sensitivity as per the SAHRIS PalaeoSensitivity map.

The draft EIA and appendices must be submitted in order for informed comments can be issued.

Further comments will be issued upon receipt of the above requested documents.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
