

I&AP Correspondence

Process Notification

03 July 2020

Dear Stakeholder and Interested and/or Affected Party,

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

NOTICE OF BASIC ASSESSMENTS AND PUBLIC PARTICIPATION PROCESS

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggart's Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

The study area is located within Zone 7 of the Renewable Energy Development Zones (REDZ) (also known as the Upington REDZ)

Each PV facility will be constructed as a separate stand-alone Special Purpose Vehicle (SPV) project. The SPV for Naledi PV is Naledi PV (Pty) Ltd, and the SPV for Ngwedi PV is Ngwedi PV (Pty) Ltd. Two separate Applications for Environmental Authorisation will be submitted to Department of Environmental Affairs (DEA).

Infrastructure associated with each solar PV facility will include:

- » Solar PV panels.
- » Centralised inverter stations or string inverters.
- » Cabling between the panels, to be laid underground where practical.
- » An on-site facility substation to facilitate the connection between the solar PV facility to the electricity grid.
- » External and internal access roads.
- » A permanent laydown area.
- » Operation and maintenance buildings, including a gate and security house, control centre, offices, warehouses, a workshop and visitors centre.

Site-specific studies and assessments will be undertaken through the BA processes in order to delineate areas of potential sensitivity within the study area. Once constraining factors have been determined, the layout of each solar PV facility can be planned to minimise social and environmental impacts through appropriate avoidance.

The development of the facilities will assist with the achievement of the electricity goals as set out in the Integrated Resources Plan (IRP), 2019. It is the Developer's intention to bid each solar PV facility under the Department of Mineral Resources and Energy's¹ Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. The power generated from each solar PV facility will be sold to Eskom and fed into the national electricity grid through a proposed grid connection solution. The grid connection solution to connect the Naledi and Ngwedi solar PV facilities to the national grid has been assessed as part of a separate BA process.

BASIC ASSESSMENT PROCESS

As per the Environmental Impact Assessment Regulations, 2014, as amended, published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the proponents will require authorisation from the Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department of Environment and Nature Conservation (DENC)) for the development of the projects. Due to the location of the study area within a REDZ, a Basic Assessment (BA) process is required to be undertaken for each project, in accordance with GN R114 (as formally gazetted on 16 February 2018). Each application is required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

The proponent has appointed Savannah Environmental, as the independent environmental consultant, to undertake the BAs for the two projects to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programme (EMPr) for each report. A combined Public Participation Process is being conducted for the two applications, and allows all Interested and Affected Parties (I&APs) to understand both projects, and also provide comment on one or both projects. As part of the environmental studies, I&APs will be actively involved through the public involvement process being undertaken by Savannah Environmental.

You and/or the organisation, which you represent, has been identified as an I&AP for the proposed projects, and are encouraged to participate in the public involvement process conducted as part of the BA process. A background information document, which provides further information on the BA process as well as the nature and extent of the two PV facilities is attached to this letter, and is also available for download from the Savannah Environmental website <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

¹ The Department of Mineral Resources and Energy is a merge between the Department of Mineral Resources (DMR) and the Department of Energy (DoE).

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process will be undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the proposed project is made available to potential stakeholders and I&APs
- » participation by I&APs is facilitated in such a manner that all potential stakeholders and I&APs are provided with a reasonable opportunity to comment on the proposed project; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the EIA process.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on how public consultation can be conducted as part of a BA process. The consultation process for these projects has been designed considering these limitations, and the implementation is in line with our public participation plan (PP Plan), as approved by the DEA. Our PP Plan is in compliance with the Department of Environment, Forestry and Fisheries (DEFF) Directions issued on the 5th of June 2020. One of our approved consultation methods is for you to visit our online stakeholder engagement platform, register your interest in the project/s, and view project documentation: visit <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

Alternative means of undertaking consultation have been designed to ensure that I&APs are afforded sufficient opportunity to raise comments on the project, predominately through an interactive web-based platform readily available and accessible to any person with interest in the project, enabling the public participation process to be undertaken in line with Regulations 41 to 44 of the EIA Regulations, 2014, as amended. This online stakeholder engagement platform allows the EAP to visually present details regarding the project and our consultation documentation, including project maps and plans, presentations and posters regarding the project, and reports available for review. The use of online tools enables stakeholders and I&APs to explore the project-specific content in their own time, and allows participation in the consultation process in a meaningful way. The online platform allows for instant feedback and comments to be submitted, in so doing saving time for the stakeholder and also giving the assurance that their comments have been submitted for inclusion in the project reporting.

The benefits of the online stakeholder engagement platform include:

- » Ability to create a dedicated project-specific online platform to enable easy access to project-related information.
- » Ability to reach a wider audience, allowing more widespread consultation for major infrastructure projects.
- » Allowing stakeholders and I&APs the opportunity to engage on a project without leaving their office or home.
- » Enabling stakeholders and I&APs to register their interest in a project (for inclusion on the project database), and automatically gaining access to comprehensive project documentation.

- » Enabling the EAP to maintain a complete database of I&APs through maintaining a record of persons accessing the online stakeholder consultation platform.
- » Enabling the EAP and stakeholders/I&APs to meet virtually.
- » Provides a resilient solution to a public consultation process.

Where I&APs do not have the applicable facilities or access to internet, provision has been made to include these I&APs in the consultation process by consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

Should you have an interest in the project, please register yourself as an I&AP on our online stakeholder engagement platform (<https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>) or by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will be kept informed of the BA processes being undertaken for the projects and will be provided with an opportunity to provide comment and input.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Nicolene Venter

Mr Botha du Toit
Landowner
Farm: Dayson's Klip
UPINGTON 8806

Per e-pos:

Dear Mr Du Toit,

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

NOTICE OF BASIC ASSESSMENTS AND PUBLIC PARTICIPATION PROCESS

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggart's Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

The study area is located within Zone 7 of the Renewable Energy Development Zones (REDZ) (also known as the Upington REDZ)

Each PV facility will be constructed as a separate stand-alone Special Purpose Vehicle (SPV) project. The SPV for Naledi PV is Naledi PV (Pty) Ltd, and the SPV for Ngwedi PV is Ngwedi PV (Pty) Ltd. Two separate Applications for Environmental Authorisation will be submitted to Department of Environmental Affairs (DEA).

Infrastructure associated with each solar PV facility will include:

- » Solar PV panels.
- » Centralised inverter stations or string inverters.
- » Cabling between the panels, to be laid underground where practical.
- » An on-site facility substation to facilitate the connection between the solar PV facility to the electricity grid.

- » External and internal access roads.
- » A permanent laydown area.
- » Operation and maintenance buildings, including a gate and security house, control centre, offices, warehouses, a workshop and visitors centre.

Site-specific studies and assessments will be undertaken through the BA processes in order to delineate areas of potential sensitivity within the study area. Once constraining factors have been determined, the layout of each solar PV facility can be planned to minimise social and environmental impacts through appropriate avoidance.

The development of the facilities will assist with the achievement of the electricity goals as set out in the Integrated Resources Plan (IRP), 2019. It is the Developer's intention to bid each solar PV facility under the Department of Mineral Resources and Energy's¹ Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. The power generated from each solar PV facility will be sold to Eskom and fed into the national electricity grid through a proposed grid connection solution. The grid connection solution to connect the Naledi and Ngwedi solar PV facilities to the national grid has been assessed as part of a separate BA process.

BASIC ASSESSMENT PROCESS

As per the Environmental Impact Assessment Regulations, 2014, as amended, published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the proponents will require authorisation from the Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department of Environment and Nature Conservation (DENC)) for the development of the projects. Due to the location of the study area within a REDZ, a Basic Assessment (BA) process is required to be undertaken for each project, in accordance with GN R114 (as formally gazetted on 16 February 2018). Each application is required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

The proponent has appointed Savannah Environmental, as the independent environmental consultant, to undertake the BAs for the two projects to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programme (EMPr) for each report. A combined Public Participation Process is being conducted for the two applications, and allows all Interested and Affected Parties (I&APs) to understand both projects, and also provide comment on one or both projects. As part of the environmental studies, I&APs will be actively involved through the public involvement process being undertaken by Savannah Environmental.

You have been identified as an adjacent property owner for the properties **Portion 12 of the farm Dayson's Klip 454**, that could be impacted by the proposed projects. The EIA Regulations 2014, as amended, Regulation 41.(2)(b)(ii) requires that the owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken and to any alternative site where the activity is to be undertaken, is informed of the Basic Assessment processes in writing.

¹ The Department of Mineral Resources and Energy is a merge between the Department of Mineral Resources (DMR) and the Department of Energy (DoE).

In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment processes. Should you or any other occupier of your property have an interest in this project, please register yourselves as an Interested and Affected Party (I&AP) by completing and returning the attached registration and comment form. By registering on the project database, you will receive all information relating to the proposed projects and will be provided with an opportunity to provide comment and input into the Basic Assessment processes.

You are encouraged to participate in the public involvement process conducted as part of the BA process. A background information document, which provides further information on the BA process as well as the nature and extent of the two PV facilities is attached to this letter, and is also available for download from the Savannah Environmental website <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process will be undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the proposed project is made available to potential stakeholders and I&APs
- » participation by I&APs is facilitated in such a manner that all potential stakeholders and I&APs are provided with a reasonable opportunity to comment on the proposed project; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the EIA process.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on how public consultation can be conducted as part of a BA process. The consultation process for these projects has been designed considering these limitations, and the implementation is in line with our public participation plan (PP Plan), as approved by the DEA. Our PP Plan is in compliance with the Department of Environment, Forestry and Fisheries (DEFF) Directions issued on the 5th of June 2020. One of our approved consultation methods is for you to visit our online stakeholder engagement platform, register your interest in the project/s, and view project documentation: visit <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

Alternative means of undertaking consultation have been designed to ensure that I&APs are afforded sufficient opportunity to raise comments on the project, predominately through an interactive web-based platform readily available and accessible to any person with interest in the project, enabling the public participation process to be undertaken in line with Regulations 41 to 44 of the EIA Regulations, 2014, as amended. This online stakeholder engagement platform allows the EAP to visually present details regarding the project and our consultation documentation, including project maps and plans, presentations and posters regarding the project, and reports available for review. The use of online tools enables stakeholders and I&APs to explore the project-specific content in their own time, and allows participation in the consultation process in a meaningful way. The online platform allows for instant feedback and comments to be submitted, in so doing saving

time for the stakeholder and also giving the assurance that their comments have been submitted for inclusion in the project reporting.

The benefits of the online stakeholder engagement platform include:

- » Ability to create a dedicated project-specific online platform to enable easy access to project-related information.
- » Ability to reach a wider audience, allowing more widespread consultation for major infrastructure projects.
- » Allowing stakeholders and I&APs the opportunity to engage on a project without leaving their office or home.
- » Enabling stakeholders and I&APs to register their interest in a project (for inclusion on the project database), and automatically gaining access to comprehensive project documentation.
- » Enabling the EAP to maintain a complete database of I&APs through maintaining a record of persons accessing the online stakeholder consultation platform.
- » Enabling the EAP and stakeholders/I&APs to meet virtually.
- » Provides a resilient solution to a public consultation process.

Where I&APs do not have the applicable facilities or access to internet, provision has been made to include these I&APs in the consultation process by consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

Should you have an interest in the project, please register yourself as an I&AP on our online stakeholder engagement platform (<https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>) or by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will be kept informed of the BA processes being undertaken for the projects and will be provided with an opportunity to provide comment and input.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Nicolene Venter

Ms Lungi Motsis
Manager: Land and Rights
Eskom Holdings SOC Ltd

Per e-mail:

Dear Ms Motsis

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

NOTICE OF BASIC ASSESSMENTS AND PUBLIC PARTICIPATION PROCESS

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggart's Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

The study area is located within Zone 7 of the Renewable Energy Development Zones (REDZ) (also known as the Upington REDZ)

Each PV facility will be constructed as a separate stand-alone Special Purpose Vehicle (SPV) project. The SPV for Naledi PV is Naledi PV (Pty) Ltd, and the SPV for Ngwedi PV is Ngwedi PV (Pty) Ltd. Two separate Applications for Environmental Authorisation will be submitted to Department of Environmental Affairs (DEA).

Infrastructure associated with each solar PV facility will include:

- » Solar PV panels.
- » Centralised inverter stations or string inverters.
- » Cabling between the panels, to be laid underground where practical.
- » An on-site facility substation to facilitate the connection between the solar PV facility to the electricity grid.

- » External and internal access roads.
- » A permanent laydown area.
- » Operation and maintenance buildings, including a gate and security house, control centre, offices, warehouses, a workshop and visitors centre.

Site-specific studies and assessments will be undertaken through the BA processes in order to delineate areas of potential sensitivity within the study area. Once constraining factors have been determined, the layout of each solar PV facility can be planned to minimise social and environmental impacts through appropriate avoidance.

The development of the facilities will assist with the achievement of the electricity goals as set out in the Integrated Resources Plan (IRP), 2019. It is the Developer's intention to bid each solar PV facility under the Department of Mineral Resources and Energy's¹ Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. The power generated from each solar PV facility will be sold to Eskom and fed into the national electricity grid through a proposed grid connection solution. The grid connection solution to connect the Naledi and Ngwedi solar PV facilities to the national grid has been assessed as part of a separate BA process.

BASIC ASSESSMENT PROCESS

As per the Environmental Impact Assessment Regulations, 2014, as amended, published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the proponents will require authorisation from the Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department of Environment and Nature Conservation (DENC)) for the development of the projects. Due to the location of the study area within a REDZ, a Basic Assessment (BA) process is required to be undertaken for each project, in accordance with GN R114 (as formally gazetted on 16 February 2018). Each application is required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

The proponent has appointed Savannah Environmental, as the independent environmental consultant, to undertake the BAs for the two projects to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programme (EMPr) for each report. A combined Public Participation Process is being conducted for the two applications, and allows all Interested and Affected Parties (I&APs) to understand both projects, and also provide comment on one or both projects. As part of the environmental studies, I&APs will be actively involved through the public involvement process being undertaken by Savannah Environmental.

You have been identified as an adjacent property owner for the properties **Olyvenhouts Drift Settlement Agricultural Holding 1080**, that could be impacted by the proposed projects. The EIA Regulations 2014, as amended, Regulation 41.(2)(b)(ii) requires that the owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken and to any alternative site where the activity is to be undertaken, is informed of the Basic Assessment processes in writing.

¹ The Department of Mineral Resources and Energy is a merge between the Department of Mineral Resources (DMR) and the Department of Energy (DoE).

In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment processes. Should you or any other occupier of your property have an interest in this project, please register yourselves as an Interested and Affected Party (I&AP) by completing and returning the attached registration and comment form. By registering on the project database, you will receive all information relating to the proposed projects and will be provided with an opportunity to provide comment and input into the Basic Assessment processes.

You are encouraged to participate in the public involvement process conducted as part of the BA process. A background information document, which provides further information on the BA process as well as the nature and extent of the two PV facilities is attached to this letter, and is also available for download from the Savannah Environmental website <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process will be undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the proposed project is made available to potential stakeholders and I&APs
- » participation by I&APs is facilitated in such a manner that all potential stakeholders and I&APs are provided with a reasonable opportunity to comment on the proposed project; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the EIA process.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on how public consultation can be conducted as part of a BA process. The consultation process for these projects has been designed considering these limitations, and the implementation is in line with our public participation plan (PP Plan), as approved by the DEA. Our PP Plan is in compliance with the Department of Environment, Forestry and Fisheries (DEFF) Directions issued on the 5th of June 2020. One of our approved consultation methods is for you to visit our online stakeholder engagement platform, register your interest in the project/s, and view project documentation: visit <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

Alternative means of undertaking consultation have been designed to ensure that I&APs are afforded sufficient opportunity to raise comments on the project, predominately through an interactive web-based platform readily available and accessible to any person with interest in the project, enabling the public participation process to be undertaken in line with Regulations 41 to 44 of the EIA Regulations, 2014, as amended. This online stakeholder engagement platform allows the EAP to visually present details regarding the project and our consultation documentation, including project maps and plans, presentations and posters regarding the project, and reports available for review. The use of online tools enables stakeholders and I&APs to explore the project-specific content in their own time, and allows participation in the consultation process in a meaningful way. The online platform allows for instant feedback and comments to be submitted, in so doing saving

time for the stakeholder and also giving the assurance that their comments have been submitted for inclusion in the project reporting.

The benefits of the online stakeholder engagement platform include:

- » Ability to create a dedicated project-specific online platform to enable easy access to project-related information.
- » Ability to reach a wider audience, allowing more widespread consultation for major infrastructure projects.
- » Allowing stakeholders and I&APs the opportunity to engage on a project without leaving their office or home.
- » Enabling stakeholders and I&APs to register their interest in a project (for inclusion on the project database), and automatically gaining access to comprehensive project documentation.
- » Enabling the EAP to maintain a complete database of I&APs through maintaining a record of persons accessing the online stakeholder consultation platform.
- » Enabling the EAP and stakeholders/I&APs to meet virtually.
- » Provides a resilient solution to a public consultation process.

Where I&APs do not have the applicable facilities or access to internet, provision has been made to include these I&APs in the consultation process by consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

Should you have an interest in the project, please register yourself as an I&AP on our online stakeholder engagement platform (<https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>) or by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will be kept informed of the BA processes being undertaken for the projects and will be provided with an opportunity to provide comment and input.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Nicolene Venter

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

Dear Ms Motsis,

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggarts Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the projects. Our team welcomes your participation and look forward to your involvement throughout this process.

Please find attached the following documents which will provide you with additional information regarding these projects:

- Basic Assessment and Public Participation Process notification letter;
- Background Information Document; and
- Registration and Comment Form.

Kind regards,

03 July 2020

Directors
Khi CSP South Africa (Pty) Ltd

Per e-mail:

Dear Messrs Mogollo and Dube,

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

NOTICE OF BASIC ASSESSMENTS AND PUBLIC PARTICIPATION PROCESS

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggart's Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

The study area is located within Zone 7 of the Renewable Energy Development Zones (REDZ) (also known as the Upington REDZ)

Each PV facility will be constructed as a separate stand-alone Special Purpose Vehicle (SPV) project. The SPV for Naledi PV is Naledi PV (Pty) Ltd, and the SPV for Ngwedi PV is Ngwedi PV (Pty) Ltd. Two separate Applications for Environmental Authorisation will be submitted to Department of Environmental Affairs (DEA).

Infrastructure associated with each solar PV facility will include:

- » Solar PV panels.
- » Centralised inverter stations or string inverters.
- » Cabling between the panels, to be laid underground where practical.
- » An on-site facility substation to facilitate the connection between the solar PV facility to the electricity grid.

- » External and internal access roads.
- » A permanent laydown area.
- » Operation and maintenance buildings, including a gate and security house, control centre, offices, warehouses, a workshop and visitors centre.

Site-specific studies and assessments will be undertaken through the BA processes in order to delineate areas of potential sensitivity within the study area. Once constraining factors have been determined, the layout of each solar PV facility can be planned to minimise social and environmental impacts through appropriate avoidance.

The development of the facilities will assist with the achievement of the electricity goals as set out in the Integrated Resources Plan (IRP), 2019. It is the Developer's intention to bid each solar PV facility under the Department of Mineral Resources and Energy's¹ Renewable Energy Independent Power Producer Procurement (REIPPP) Programme. The power generated from each solar PV facility will be sold to Eskom and fed into the national electricity grid through a proposed grid connection solution. The grid connection solution to connect the Naledi and Ngwedi solar PV facilities to the national grid has been assessed as part of a separate BA process.

BASIC ASSESSMENT PROCESS

As per the Environmental Impact Assessment Regulations, 2014, as amended, published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the proponents will require authorisation from the Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department of Environment and Nature Conservation (DENC)) for the development of the projects. Due to the location of the study area within a REDZ, a Basic Assessment (BA) process is required to be undertaken for each project, in accordance with GN R114 (as formally gazetted on 16 February 2018). Each application is required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

The proponent has appointed Savannah Environmental, as the independent environmental consultant, to undertake the BAs for the two projects to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programme (EMPr) for each report. A combined Public Participation Process is being conducted for the two applications, and allows all Interested and Affected Parties (I&APs) to understand both projects, and also provide comment on one or both projects. As part of the environmental studies, I&APs will be actively involved through the public involvement process being undertaken by Savannah Environmental.

You have been identified as an adjacent property owner for the properties **Portion 3 of the farm McTaggart's Camp 453** and **Portion 12, Portion of Portion 3 of the farm Klip Punt 452**, that could be impacted by the proposed projects. The EIA Regulations 2014, as amended, Regulation 41.(2)(b)(ii) requires that the owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken and to any alternative site where the activity is to be undertaken, is informed of the Basic Assessment processes in writing.

¹ The Department of Mineral Resources and Energy is a merge between the Department of Mineral Resources (DMR) and the Department of Energy (DoE).

In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment processes. Should you or any other occupier of your property have an interest in this project, please register yourselves as an Interested and Affected Party (I&AP) by completing and returning the attached registration and comment form. By registering on the project database, you will receive all information relating to the proposed projects and will be provided with an opportunity to provide comment and input into the Basic Assessment processes.

You are encouraged to participate in the public involvement process conducted as part of the BA process. A background information document, which provides further information on the BA process as well as the nature and extent of the two PV facilities is attached to this letter, and is also available for download from the Savannah Environmental website <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process will be undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the proposed project is made available to potential stakeholders and I&APs
- » participation by I&APs is facilitated in such a manner that all potential stakeholders and I&APs are provided with a reasonable opportunity to comment on the proposed project; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the EIA process.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on how public consultation can be conducted as part of a BA process. The consultation process for these projects has been designed considering these limitations, and the implementation is in line with our public participation plan (PP Plan), as approved by the DEA. Our PP Plan is in compliance with the Department of Environment, Forestry and Fisheries (DEFF) Directions issued on the 5th of June 2020. One of our approved consultation methods is for you to visit our online stakeholder engagement platform, register your interest in the project/s, and view project documentation: visit <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

Alternative means of undertaking consultation have been designed to ensure that I&APs are afforded sufficient opportunity to raise comments on the project, predominately through an interactive web-based platform readily available and accessible to any person with interest in the project, enabling the public participation process to be undertaken in line with Regulations 41 to 44 of the EIA Regulations, 2014, as amended. This online stakeholder engagement platform allows the EAP to visually present details regarding the project and our consultation documentation, including project maps and plans, presentations and posters regarding the project, and reports available for review. The use of online tools enables stakeholders and I&APs to explore the project-specific content in their own time, and allows participation in the consultation process in a meaningful way. The online platform allows for instant feedback and comments to be submitted, in so doing saving

time for the stakeholder and also giving the assurance that their comments have been submitted for inclusion in the project reporting.

The benefits of the online stakeholder engagement platform include:

- » Ability to create a dedicated project-specific online platform to enable easy access to project-related information.
- » Ability to reach a wider audience, allowing more widespread consultation for major infrastructure projects.
- » Allowing stakeholders and I&APs the opportunity to engage on a project without leaving their office or home.

BASIC ASSESSMENT PROCESS

As per the Environmental Impact Assessment Regulations, 2014, as amended, published in terms of Section 24(5) of the National Environmental Management Act (NEMA, Act No 107 of 1998), the proponents will require authorisation from the Department of Environmental Affairs (DEA) (in consultation with Northern Cape Department of Environment and Nature Conservation (DENC)) for the development of the projects. Due to the location of the study area within a REDZ, a Basic Assessment (BA) process is required to be undertaken for each project, in accordance with GN R114 (as formally gazetted on 16 February 2018). Each application is required to be supported by comprehensive, independent environmental studies undertaken in accordance with the EIA Regulations, 2014, as amended.

The proponent has appointed Savannah Environmental, as the independent environmental consultant, to undertake the BAs for the two projects to identify and assess all potential environmental impacts associated with the projects and recommend appropriate mitigation measures in the Environmental Management Programme (EMPr) for each report. A combined Public Participation Process is being conducted for the two applications, and allows all Interested and Affected Parties (I&APs) to understand both projects, and also provide comment on one or both projects. As part of the environmental studies, I&APs will be actively involved through the public involvement process being undertaken by Savannah Environmental.

You have been identified as an adjacent property owner for the properties **Remaining Extent of Rooipunt 617**, that could be impacted by the proposed projects. The EIA Regulations 2014, as amended, Regulation 41.(2)(b)(ii) requires that the owners, persons in control of, and occupiers of land adjacent to the site where the activity is or is to be undertaken and to any alternative site where the activity is to be undertaken, is informed of the Basic Assessment processes in writing.

¹ The Department of Mineral Resources and Energy is a merge between the Department of Mineral Resources (DMR) and the Department of Energy (DoE).

In this regard, please could you kindly inform any other persons (tenants, employees, farm managers and workers etc.) residing on your property of this Basic Assessment processes. Should you or any other occupier of your property have an interest in this project, please register yourselves as an Interested and Affected Party (I&AP) by completing and returning the attached registration and comment form. By registering on the project database, you will receive all information relating to the proposed projects and will be provided with an opportunity to provide comment and input into the Basic Assessment processes.

You are encouraged to participate in the public involvement process conducted as part of the BA process. A background information document, which provides further information on the BA process as well as the nature and extent of the two PV facilities is attached to this letter, and is also available for download from the Savannah Environmental website <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process will be undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the proposed project is made available to potential stakeholders and I&APs
- » participation by I&APs is facilitated in such a manner that all potential stakeholders and I&APs are provided with a reasonable opportunity to comment on the proposed project; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the EIA process.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on how public consultation can be conducted as part of a BA process. The consultation process for these projects has been designed considering these limitations, and the implementation is in line with our public participation plan (PP Plan), as approved by the DEA. Our PP Plan is in compliance with the Department of Environment, Forestry and Fisheries (DEFF) Directions issued on the 5th of June 2020. One of our approved consultation methods is for you to visit our online stakeholder engagement platform, register your interest in the project/s, and view project documentation: visit <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>.

Alternative means of undertaking consultation have been designed to ensure that I&APs are afforded sufficient opportunity to raise comments on the project, predominately through an interactive web-based platform readily available and accessible to any person with interest in the project, enabling the public participation process to be undertaken in line with Regulations 41 to 44 of the EIA Regulations, 2014, as amended. This online stakeholder engagement platform allows the EAP to visually present details regarding the project and our consultation documentation, including project maps and plans, presentations and posters regarding the project, and reports available for review. The use of online tools enables stakeholders and I&APs to explore the project-specific content in their own time, and allows participation in the consultation process in a meaningful way. The online platform allows for instant feedback and comments to be submitted, in so doing saving

time for the stakeholder and also giving the assurance that their comments have been submitted for inclusion in the project reporting.

The benefits of the online stakeholder engagement platform include:

- » Ability to create a dedicated project-specific online platform to enable easy access to project-related information.
- » Ability to reach a wider audience, allowing more widespread consultation for major infrastructure projects.
- » Allowing stakeholders and I&APs the opportunity to engage on a project without leaving their office or home.
- » Enabling stakeholders and I&APs to register their interest in a project (for inclusion on the project database), and automatically gaining access to comprehensive project documentation.
- » Enabling the EAP to maintain a complete database of I&APs through maintaining a record of persons accessing the online stakeholder consultation platform.
- » Enabling the EAP and stakeholders/I&APs to meet virtually.
- » Provides a resilient solution to a public consultation process.

Where I&APs do not have the applicable facilities or access to internet, provision has been made to include these I&APs in the consultation process by consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

Should you have an interest in the project, please register yourself as an I&AP on our online stakeholder engagement platform (<https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/>) or by completing and returning the attached stakeholder registration/comment form. By registering on the project database, you will be kept informed of the BA processes being undertaken for the projects and will be provided with an opportunity to provide comment and input.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Nicolene Venter

NOTE

Subject: NALEDI PV & NGWEDI PV: Notification of the Basic Assessment and Public Participation Processes

Body:

NALEDI PHOTOVOLTAIC (PV) AND NGWEDI PHOTOVOLTAIC (PV) DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

Dear Mr Van Schalkwyk,

The development of two 100MW solar photovoltaic (PV) facilities is proposed within a study area consisting of two properties, Portion 3 of the Farm McTaggarts Camp 453 and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452, located 21km south-west of Upington in the Northern Cape Province. The two solar PV facilities are known as Naledi PV and Ngwedi PV. These facilities are located to the north of the existing Khi Solar One CSP facility within the Kai !Garib Local Municipality, and border the Dawid Kruiper Local Municipality located directly to the east, within the ZF Mgcawu District Municipality in the Northern Cape Province.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the projects. Our team welcomes your participation and look forward to your involvement throughout this process.

Please find attached the following documents which will provide you with additional information regarding these projects:

- Basic Assessment and Public Participation Process notification letter;
- Background Information Document; and
- Registration and Comment Form.

Kind regards,

--

Naledi PV and Ngwedi PV

Basic Assessment and Public Participation Process for the Naledi PV and Ngwedi PV, Northern Cape Province

Proposed Activity: The development of two (2) separate solar photovoltaic (PV) facilities, each with a contracted capacity of up to 100MW.

Location: ~20km south-west of Upington within the Kai !Garib Local Municipality and the ZF Mgcawu District Municipality. The projects fall within the Upington Renewable Energy Development Zone (or REDZ 7).

<i>Applicant:</i>	<i>Project Name:</i>	<i>Affected Property:</i>
Naledi PV (Pty) Ltd	Naledi PV	Portion 3 of the Farm McTaggart's Camp 453; and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452
Ngwedi PV (Pty) Ltd	Ngwedi PV	Portion 3 of the Farm McTaggart's Camp 453; and Portion 12, Portion of Portion 3 of the Farm Klip Punt 452

The following infrastructure will be developed for each project:

- Solar PV Panels;
- Centralised inverter stations or string inverters;
- Cabling between the panels, to be laid underground where practical;
- On-site facility substation;
- Main access roads and internal access roads within the PV panel array areas;
- Permanent laydown area;
- Operation and Maintenance buildings.

Basic Assessment Process: In terms of Sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with Government Notice R324 – R327, as amended, and GN R114 (February 2018), a Basic Assessment is required for each Solar PV Facility. Savannah Environmental is undertaking the required environmental assessment and public participation process for each project. A separate application for each project has been lodged with the Department of Environmental Affairs (DEA), as the competent authority.

To obtain further information and register on the project database, please submit your name, contact information and interest in the project to:

Notification of availability of Basic Assessment
Report for review and comment

07 July 2020

Dear Stakeholder and Interested and/or Affected Party,

NALEDI PV AND NGWEDI PV NEAR UPINGTON, NORTHERN CAPE PROVINCE

NOTICE OF BASIC ASSESSMENTS AND PUBLIC PARTICIPATION PROCESS

The Basic Assessment process notification for the development of two 100MW solar photovoltaic (PV) facilities distributed on 03 July 2020, has reference. The notification letter was accompanied by the Background Information Document (BID) which provided information regarding these two Basic Assessment (BA) processes. If you had not received these documents, please inform us accordingly or we encourage you to visit our website / online stakeholder engagement platform at <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/> where the public documents for these two (2) projects are available for your perusal.

AVAILABILITY OF BASIC ASSESSMENT REPORTS FOR REVIEW AND COMMENT

As a registered Interested and Affected Party (I&AP), you are hereby notified that the Basic Assessment Reports (BARs) for the two (2) proposed projects are available for your review and comment from **Wednesday, 08 July 2020** until **Friday, 07 August 2020**. The reports are available for download from our website / stakeholder engagement platform on the above-mentioned link.

The restrictions enforced in terms of Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on making hard copies of the BARs available at public places such as libraries and municipal offices. As per our approved public participation plan submitted to the Department of Environmental Affairs, you can also request that an electronic copy of the BARs be sent to you via file transfer services such as WeTransfer or Dropbox or a compact disk (CD).

Please submit your written comments on the BARs to us by latest **Friday, 07 August 2020** via our website / stakeholder engagement platform (link provided above) or via:

- Telephone: 011 656 3237
- Mobile: 060 978 8396 (including message)
- Fax: 086 684 0547
- Post: PO Box 148, Sunninghill, 2157
- E-mail: publicprocess@savannahsa.com

to Nicolene Venter or Ronald Baloyi.

All comments received during the 30-day review and comment period will be recorded and included in the Final BARs for submission to the Department of Environmental Affairs (DEA) in line with Regulation 44 of the EIA Regulations, 2014, as amended (GN R326).

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

NALEDI PV & NGWEDI PV: Notification of availability of Basic Assessment Report

The screenshot shows a 'Campaign Message Editor' window titled '[Naledi&Ngwedi BAR Notification]'. The editor has a standard toolbar with options for bold, italic, underline, and text color. The 'Format' dropdown is set to 'HTML'. The main text area contains the following content:

NALEDI PV AND NGWEDI PV DEVELOPMENTS NEAR UPINGTON, NORTHERN CAPE PROVINCE

Dear Interested and Affected Party,

The Basic Assessment process notification for the development of two 100MW solar photovoltaic (PV) facilities distributed on 03 July 2020, has reference. The notification letter was accompanied by the Background Information Document (BID) which provided information regarding these two Basic Assessment (BA) processes. If you had not received these documents, please inform us accordingly or we encourage you to visit our website / online stakeholder engagement platform at <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/> where the public documents for these two (2) projects are available for your perusal.

This e-mail serves to inform you, as a registered Interested and Affected Party (I&AP), that in terms of the National Environmental Management Act (NO 107 of 1998) (NEMA) and the Environmental Impact Assessment Regulations, 2014 as amended, that the Basic Assessment Reports (BARs) for the above-mentioned Naledi PV and Ngwedi PV are available for your review and comment from **Wednesday, 08 July 2020** until **Friday, 07 August 2020**.

The restrictions enforced in terms of the Government Gazette 43096 which placed the country in a national state of disaster limiting the movement and gathering of people to curb the spread of the COVID-19 virus has placed some limitations on making hard copies of the BARs at the public places such as Libraries. We invite you to visit our online stakeholder engagement platform at <https://www.savannahsa.com/public-documents/energy-generation/naledi-pv-and-ngwedi-pv/> to download the BARs.

Should you not be able to access our online stakeholder engagement platform to download the BARs, please refer to the attached letter for alternative means to obtain the BARs. The attached letter also provides further details regarding the availability of the BARs.

At the bottom of the editor, there are buttons for 'Design', 'HTML', and 'Preview'. Below the editor, there are 'HELP', 'SAVE', and 'CLOSE' buttons.
