#### SISHEN IRON ORE COMPANY (Pty) Ltd

## SISHEN MINE: ALDAG AND LYLVELD STORMWATER MANAGEMENT PROJECT KATHU, NORTHERN CAPE

### NOTICE OF THE ENVIRONMENTAL AUTHORISATION PROCESS

The Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province.

The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions of the regulations on use of water for mining and related activities (GN 704 of 1999) published in terms of the National Water Act, 1998. The new dams will allow for the accommodation of a 1:50 year storm event.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment** of the Sishen Mine EMPr as amended.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.
4. An application for the amendment of the Sishen Mine Integrated Water Use License.

The above applications are supported by a basic assessment process in terms of the EIA regulations. Should you wish to obtain further information or **register as an interested and affected party** kindly make written submission to:

SISHEN IRON ORE COMPANY (Pty) Ltd

### SISHEN MYN: STORMWATERBESTUUR UITBREIDINGS PROJEK

#### KATHU, NOORD-KAAP

Sishen Iron Ore Company (Pty) Ltd is besig met die uitvoerbaarheid studie vir die uitbreiding van die waterbestuursinfrastruktuur ten einde die konstruksie van 'n nuwe Besoedelingsbeheerdam by die Aldag-vulstasie in te sluit asook die uitbreiding van die bestaande goedgekeurde Besoedelingsbeheerdam by die Lylyveld Suid-mynbou gebiede. Albei hierdie gebiede is geleë in Sishen Myn, Kathu, Noord-Kaap Provinsie.

Die doel van hierdie veranderinge is om die bestuur van vuil en skoon waterstelsels te verbeter om ooreenstemming met GNR 704 van 1999 te verseker (Regulasies op die gebruik van water vir Mynbou en Verwante Aktiwiteite gerig op die Beskerming van Waterhulpbronne) ingevolge die Nasionale Waterwet, 1998. Die nuwe damme sal voorsiening maak vir 'n 1:50 jaar storm gebeurtenis.

Die aansoek vir omgewingsmagtiging behels die volgende:

- 'n Aansoek ingevolge **Artikel 102 van die Wet op die Ontwikkeling van Minerale en Petroleumhulpbronne, 2002** vir 'n **wysiging van die Sishen Myn Omgewingsbestuursplan soos gewysig** om die konstruksie van die Aldag- en Lylyveld-Besoedelingsbeheerdam by Sishen Myn in te sluit.
- 'n Aansoek om magtiging ingevolge **Regulasie 31 van Deel 2 van Hoofstuk 5 van die Regulasies vir Omgewingsinvloedbepaling, 2014 (GN 982 van 4 Desember 2014)** ingevolge die Wet op Nasionale Omgewingsbestuur, 1998 vir die **wysiging** van die Sishen Myn Omgewingsbestuursplan soos gewysig.
- Aansoek word ook gedoen vir die magtiging van **gelysde aktiwiteite 9, 27 en 34** wat geaktiveer is in noterings kennisgewing 1 (GNR 983 van 2014) wat omgewingsmagtiging ingevolge die Wet op Nasionale Omgewingsbestuur, 1998 vereis.
- 'n Aansoek vir die wysiging van die Sishen Mine geïntegreerde watergebruikslisensie.

Bogenoemde aansoeke word ondersteun deur 'n basiese assesseringsproses ingevolge die Omgewingsinvloedbepaling Regulasies, 2014. Indien u verdere inligting wil verkry of as 'n belanghebbende en geaffekteerde party wil registreer, maak asseblief skriftelike voorlegging aan:

Sishen Iron Ore Company (Pty) Ltd  
 Proposed Overflow Dam at Aldag PCD and Lylyveld  
 South PCD

22

**EXM**  
 SOLUTIONS | PROGRESS | PARTNERS

**3. Newspaper advert in the Kathu Gazette on the 25<sup>th</sup> of November 2017 in English**

**SISHEN IRON ORE COMPANY (Pty) Ltd**

**SISHEN MINE: ALDAG AND LYLYVELD STORMWATER MANAGEMENT PROJECT**

**KATHU, NORTHERN CAPE**

The Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province.

The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions GNR. 704 of 1999 (Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources) in terms of the National Water Act, 1998. The new dams will allow for the accommodation of a 1:50 year storm event.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment** of the Sishen Mine EMPr as amended.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.
4. An application for the amendment of the Sishen Mine Integrated Water Use License.

The above applications are supported by a basic assessment process in terms of the EIA regulations. Should you wish to obtain further information or register as an interested and affected party kindly make written submission to:

ALDAG AND LYLVELD STORMWATER MANAGEMENT PROJECT

**Attachments:** APPENDIX A\_Background Information Document (BID).pdf

ATTENTION: AUTHORITIES AND INTERESTED & AFFECTED PARTIES

### **SISHEN MINE: ALDAG AND LYLVELD STORMWATER MANAGEMENT PROJECT**

Dear Sir/Madam

Notice is hereby given that Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province. The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions GNR. 704 of 1999 (Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources) in terms of the National Water Act, 1998. The new dams will allow for the accommodation of a 1:50 year storm event.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment** of the Sishen Mine EMPr as amended.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.
4. An application for the amendment of the Sishen Mine Integrated Water Use License.

The above applications are supported by a basic assessment process in terms of the EIA regulations. Please find attached "**Appendix A: Background Information Document (BID)**", which provides further details on the proposed project.

To receive further information on the project please complete the registration forms contained within the attached BID and return it to the undersigned:

**Attachments:** APPENDIX A\_Background Information Document (BID).pdf

AANDAG: GEINTERESEERDE & GEAFFEKTEERDE PARTY E

### SISHEN MYN: STORMWATERBESTUUR UITBREIDINGS PROJEK

Goeie dag Meneer / Mevrou

Hiermee word u in kennis gestel dat die Sishen Iron Ore Company (Pty) Ltd besig is met die uitvoerbaarheid studie vir die uitbreiding van die waterbestuursinfrastruktuur ten einde die konstruksie van 'n nuwe Besoedelingsbeheerdam by die Aldag-vulstasie in te sluit asook die uitbreiding van die bestaande goedgekeurde Besoedelingsbeheerdam by die Lylyveld Suid-mynbou gebiede. Albei hierdie gebiede is geleë in Sishen Myn, Kathu, Noord-Kaap Provinsie. Die doel van hierdie veranderinge is om die bestuur van vuil en skoon waterstelsels te verbeter om ooreenstemming met GNR 704 van 1999 te verseker (Regulasies op die gebruik van water vir Mynbou en Verwante Aktiviteite gerig op die Beskerming van Waterhulpbronne) ingevolge die Nasionale Waterwet, 1998. Die nuwe damme sal voorsiening maak vir 'n 1:50 jaar storm gebeurtenis.

Die aansoek vir omgewingsmagtiging behels die volgende:

1. 'n Aansoek ingevolge Artikel 102 van die Wet op die Ontwikkeling van Minerale en Petroleumhulpbronne, 2002 vir 'n wysiging van die Sishen Myn Omgewingsbestuursplan soos gewysig om die konstruksie van die Aldag- en Lylyveld- Besoedelingsbeheerdam by Sishen Myn in te sluit.
2. 'n Aansoek om magtiging ingevolge Regulasie 31 van Deel 2 van Hoofstuk 5 van die Regulasies vir Omgewingsinvloedbepaling, 2014 (GN 982 van 4 Desember 2014) ingevolge die Wet op Nasionale Omgewingsbestuur, 1998 vir die wysiging van die Sishen Myn Omgewingsbestuursplan soos gewysig.

1

3. Aansoek word ook gedoen vir die magtiging van **gelysde aktiwiteite 9, 27 en 34** wat geaktiveer is in noteringskennisgewing 1 (GNR 983 van 2014) wat omgewingsmagtiging ingevolge die Wet op Nasionale Omgewingsbestuur, 1998 vereis.
4. 'n Aansoek vir die wysiging van die Sishen Mine geïntegreerde watergebruiklisensie.

Bogenoemde aansoeke word ondersteun deur 'n basiese assesseringsproses ingevolge die Omgewingsinvloedbepaling Regulasies, 2014. Vind asseblief aangeheg " Appendix A: Background Information Document (BID)", wat verdere besonderhede verskaf oor die voorgestelde projekte.

Om verdere inligting oor die projekte ontvang voltooi asseblief die registrasie vorm in die aangehegte "BID" en stuur terug aan die ondergetekende persoon:

### **SISHEN MINE: ALDAG AND LYLVELD STORMWATER MANAGEMENT PROJECT**

Dear Sir/Madam

Notice is hereby given that Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province. The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions GNR. 704 of 1999 (Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources) in terms of the National Water Act, 1998. The new dams will allow for the accommodation of a 1:50 year storm event.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment of the Sishen Mine EMPr as amended**.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.
4. An application for the amendment of the Sishen Mine Integrated Water Use License.

The above applications are supported by a basic assessment process in terms of the EIA regulations. Please find attached "**Appendix A: Background Information Document (BID)**", which provides further details on the proposed project.

To receive further information on the project please complete the registration forms contained within the attached BID and return it to the undersigned:

4 Federale Mynbou Street,  
Kuruman,  
8460

**BY REGISTERED POST**

## **SISHEN MINE: ALDAG AND LYLYVELD STORMWATER MANAGEMENT PROJECT**

This letter serves to notify you that the Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province.

The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions GNR. 704 of 1999 (Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources) in terms of the National Water Act, 1998. The new dams will allow for the accommodation of a 1:50 year storm event.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment** of the Sishen Mine EMPr as amended.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.

4. An application for the amendment of the Sishen Mine Integrated Water Use License.

The above applications are supported by a basic assessment process in terms of the EIA regulations.

Please find under cover as **Appendix "A"** of this letter a Background Information Document (BID); which provides further details on the proposed project.

To receive further information on the project please complete the registration forms contained within the attached BID and return it to the undersigned before the **15<sup>th</sup> of December 2017**.

Yours sincerely,

Roelof Letter

NOTIFICATION OF AVAILABILITY OF THE DRAFT BASIC ASSESSMENT REPORT AND INTEGRATED WATER AND WASTE MANAGEMENT PLAN FOR THE SISHEN MINE – PROPOSED OVERFLOW DAM AT ALDAG AND LYLYVELD SOUTH POLLUTION CONTROL DAM, KATHU

Dear Jacoline Mans

Sishen Iron Ore Company (Pty) Ltd has applied for approval to expanding the water management infrastructure at Sishen Mine to include the construction of a new overflow dam at Aldag Pollution Control Dam (PCD) and the Lylyveld South PCD at the Lylyveld South Mining Area.

The Draft Basic Assessment Report as part of the application for environmental authorisation, as well as the Integrated Water and Waste Management Plan (IWWMP) as part of the water use licence application for the Sishen Mine – Proposed overflow dam at Aldag PCD and the Lylyveld South PCD is available for review. EXM Advisory Services (Pty) Ltd (EXM) was responsible for completing the draft basic assessment report and the IWWMP.

**You are hereby notified in terms of regulation 40(1)(b) of the Environmental Impact Assessment Regulations, 2014 and the National Water Act, 1998 of the availability of the Draft Basic Assessment Report and IWWMP.**

Interested and Affected Parties have **30 calendar days** to comment on the reports. The reports are available for review from the **19<sup>th</sup> of January until the 19<sup>th</sup> of February 2018**. A Copy of the reports will be made available at the Kathu Library (1 Hendrik van Eck Rd, Kathu, Northern Cape) from Wednesday the 24<sup>th</sup> of January 2018 for review. You can also obtain a copy of the report from Lynné Viljoen (see contact details below) upon request. If you would like to comment on the reports please submit your comments to EXM on or before 19 February 2018.

**Subject:** SISHEN MINE - ALDAG AND LYLYVELD STORMWATER MANAGEMENT PROJECT: PUBLIC REVIEW OF THE DRAFT BAR & IWWMP

AANDAG: GRONDBENAARS

#### KENNISGEWING VAN BESKIKBAARHEID VAN DIE BAR EN DIE IWWMP VIR SISHEN MYN - VOORGESTELDE OORLOOPDAM BY ALDAG PCD EN DIE LYLYVELD SUID PCD, KATHU

Goede dag Meneer / Mevrou

Sishen Iron Ore Company (Pty) Ltd het aansoek gedoen vir goedkeuring om die waterbestuursinfrastruktuur by Sishenmyn uit te brei om die konstruksie van 'n nuwe oorloopdam by Aldag Besoedelingsbeheerdam (PCD) en die Lylyveld Suid-PCD by die Lylyveld Suid-Mynbougebied in te sluit.

Die Konsep Omvangbepalingsverslag (BAR), as deel van die aansoek om omgewingsmagtiging, sowel as die Geïntegreerde Water- en Afvalbestuursplan (IWWMP), as deel van die aansoek vir watergebruiklisensie vir die Sishenmyn - Voorgestelde oorloopdam by Aldag PCD en die Lylyveld Suid PCD, is beskikbaar vir hersiening. EXM Advisory Services (Pty) Ltd (EXM) was verantwoordelik vir die voltooiing van die konsep Omvangbepalingsverslag en die IWWMP.

**U word hiermee in kennis gestel in terme van regulasie 40 (1)(b) van die Regulasies oor Omgewingsimpakbepaling, 2014, en die Nasionale Waterwet, 1998 van die beskikbaarheid van die Konsep Omvangbepalingsverslag en die IWWMP.**

1

Belanghebbende en Geaffekteerde Partye het **30 kalender dae** om kommentaar te lewer op die verslae. Die verslae is beskikbaar vir hersiening van die **19de Januarie tot die 19de Februarie 2018**. 'n Afskrif van die verslae sal vanaf Woensdag 24 Januarie 2018 by die Kathu biblioteek (1 Hendrik van Eck Rd, Kathu, Noord-Kaap) beskikbaar wees. U kan ook 'n afskrif van die verslag van Lynné Viljoen (sien kontakbesonderhede hieronder) op versoek verkry. Indien u kommentaar wil lewer op die verslae, stuur asseblief u kommentaar voor of op 19 Februarie 2018 aan EXM.

Groete

**Subject:** SISHEN MINE - ALDAG AND LYLYVELD STORMWATER MANAGEMENT PROJECT: PUBLIC REVIEW OF THE DRAFT BAR & IWWMP

ATTENTION: AUTHORITIES

NOTIFICATION OF AVAILABILITY OF THE DRAFT BASIC ASSESSMENT REPORT AND INTEGRATED WATER AND WASTE MANAGEMENT PLAN FOR THE SISHEN MINE – PROPOSED OVERFLOW DAM AT ALDAG AND LYLYVELD SOUTH POLLUTION CONTROL DAM, KATHU

Dear Sir/Madam

Sishen Iron Ore Company (Pty) Ltd has applied for approval to expanding the water management infrastructure at Sishen Mine to include the construction of a new overflow dam at Aldag Pollution Control Dam (PCD) and the Lylyveld South PCD at the Lylyveld South Mining Area.

The Draft Basic Assessment Report as part of the application for environmental authorisation, as well as the Integrated Water and Waste Management Plan (IWWMP) as part of the water use licence application for the Sishen Mine – Proposed overflow dam at Aldag PCD and the Lylyveld South PCD is available for review. EXM Advisory Services (Pty) Ltd (EXM) was responsible for completing the draft basic assessment report and the IWWMP.

**You are hereby notified in terms of regulation 40(1)(b) of the Environmental Impact Assessment Regulations, 2014 and the National Water Act, 1998 of the availability of the Draft Basic Assessment Report and IWWMP.**

Interested and Affected Parties have **30 calendar days** to comment on the reports. The reports are available for review from the **19<sup>th</sup> of January until the 19<sup>th</sup> of February 2018**. A Copy of the reports will be made available at the Kathu Library (1 Hendrik van Eck Rd, Kathu, Northern Cape) from Wednesday the 24<sup>th</sup> of January 2018 for review. You can also obtain a copy of the report from Lynné Viljoen (see contact details below) upon request. If you would like to comment on the reports please submit your comments to EXM on or before 19 February 2018.

Your Sincerely;

Lynné Viljoen  
Environmental Advisor

## **C4: Background Information Document (BID)**

24 November 2017

# SISHEN IRON ORE COMPANY (PTY) LTD

ATTENTION: INTERESTED AND/OR AFFECTED PARTY

## SISHEN MINE: ALDAG AND LYLVELD STORMWATER MANAGEMENT PROJECT KATHU, NORTHERN CAPE.

Dear Sir/Madam

### 1. INTRODUCTION

The Sishen Iron Ore Company (Pty) Ltd is investigating the feasibility of expanding the water management infrastructure to include the construction of a new Pollution Control Dam (PCD) at the Aldag Filling Station and the expansion of the existing approved PCD at the Lylyveld South Mining Area. Both these areas are located within Sishen Mine, Kathu, Northern Cape Province.

Application is being sought for authorisation in terms of the following:

1. An application in terms of **Section 102 of the Minerals and Petroleum Resources Development Act, 2002** for the **amendment of the Sishen Mine Environmental Management Programme (EMPr) as amended** to include the construction of the Aldag and Lylyveld PCD at Sishen Mine.
2. The submission also includes application for authorisation in terms of **Regulation 31 of Part 2 of Chapter 5 of the Environmental Impact Assessment Regulation, 2014 (GN. 982 of 4 December 2014) (EIA Regulations)** under the National Environmental Management Act, 1998 (NEMA) for the **amendment** of the Sishen Mine EMPr as amended.
3. Application is also made for authorisation for **Listed activities 9, 27, and 34** triggered in listing Notice 1 (GNR. 983 of 2014) which required environmental authorization in terms of NEMA.
4. An application for the amendment of the Sishen Mine Integrated Water Use License.

This letter serves to **notify you as a landowner, lawful occupier, interested or affected party of the environmental authorisation process that is being sought.**

EXM Advisory Services (Pty) Ltd has been appointed as independent Environmental Assessment Practitioner (EAP), responsible for administrating the environmental authorisation process.

#### Purpose

This document serves to:

- Notify you of the application for authorisation.
- Describe the environmental assessment process.
- Inform you how you can provide input into the process.

#### Your Role

As an interested and affected party, your role is to:

- Ask questions, raise issues and concerns.
- Attend public meetings.
- Review and provide comment on environmental reports.

## 2. PROJECT OVERVIEW

Sishen Mine has been in operation since the 1950s and operates under an existing mining right (DMR Ref: NC 259 MR) for iron ore issued to the Sishen Iron Ore Company (Pty) Ltd (SIOC) which remains valid until 2039.

The Sishen Mine EMPr and its amendments are approved under Section 39 of the MPRDA, and despite the Section being repealed with all future environmental authorisations being regulated under the National Environmental Management Act (Act No. 107 of 1998), existing authorisations remain valid in terms of the transitional arrangements. The Sishen Mine EMPr is to be amended to accommodate changes in environmental management actions at the mine.

The proposed amendments include the construction of new Pollution Control Dams (PCDs) at the Aldag Filling Station and Lylyveld South Mining Area. Both these areas are located within the Sishen approved mining area. The purpose of these changes is to improve the management of dirty and clean water systems to ensure alignment with the provisions GNR. 704 of 1999 (Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources) in terms of the National Water Act, 1998 (NWA). The new dams will allow for the accommodation of a 1:50 year storm event.

### **Aldag PCD:**

A PCD of 4000 m<sup>3</sup> is due to be constructed at Aldag in the near future. It has been identified that the current approved dam is inadequately sized. A second overflow dam is proposed, which will be directly connected to the current planned dam. The recovered water from this dam will be recycled and used at the JIG plant as process water. It was determined that a capacity of 10 000 m<sup>3</sup> is required to retain a 1:50 year 24-hour storm event for the Aldag catchment area. It is therefore proposed that an additional overflow capacity of **6000 m<sup>3</sup>** be provided to ensure compliance with GN 704. A general layout of the proposed PCD is provided in Figure 1.

### **Lylyveld PCD:**

The Lylyveld PCD as authorised (EA Ref: NC/JTG/GAM/KATHU5/2009) was found to be undersized. A larger dam is now proposed to ensure that all dirty water is contained as required by GN. 704. The dam is aimed at collecting the stormwater falling over the Lylyveld South mining area as well as the waste rock dumps and capture the run-off before it enters the Gamagara river. This is mainly to control and prevent siltation from the mining area onto the river bed of the Gamagara river. A capacity of 38 800m<sup>3</sup> is required to retain a 1:50 year 24-hour storm event for the Lylyveld South catchment area. This is an additional **13 000 m<sup>3</sup>** to the approved PCD volume. A general layout of the proposed PCD is provided in Figure 2. The proposed opencast development and associated infrastructure for the

extraction of iron ore at the Lylyveld South Pit was approved in 2011.

### 3. ENVIRONMENTAL AUTHORISATIONS

#### 3.1 Minerals & Petroleum Resources Development Act (No. 28 of 2008) (MPRDA)

The current approved Environmental Management Programme (EMPr) and its subsequent amendments do not provide for the use of an additional PCD at Aldag and an additional stormwater dam at Lylyveld. An amendment to the EMPr is required to accommodate these changes. Application has been made to the Department of Mineral Resources (DMR) for approval of the **amendment** in terms of **Section 102** of the Minerals and Petroleum Resources Development Act, 2002 (MPRDA).

#### 3.2 National Environmental Management Act (No. 107 of 1998) (NEMA)

As indicated in Section 3.1, an additional pollution control dam and stormwater dam will be constructed at Sishen Mine. As such, there is a requirement for the **amendment** of the existing authorised Sishen Mine EMPr's. The transitional arrangements under the Environmental Impact Assessment (EIA) Regulations (GN. 982, 2014) of the National Environmental Management Act, 1998 (NEMA), Section 54(2) provide for the amendment of an EMPr authorised under the MPRDA in terms Chapter 5 of the Regulations.

The project will also result in **listed activities 9, 27, and 34 being triggered** in terms of listing Notice 1 (GNR. 983 of 2014) which **required environmental authorisation** in terms of the NEMA. The application for environmental authorisation is supported by a basic assessment under the NEMA EIA regulations (GN. 982, 2014).

#### 3.3 National Water Act (No. 36 of 1998) (NWA)

The proposed project will also require an amendment to Sishen Mine's existing integrated water use licence (IWUL) for the inclusion of the new dams under Section 21(g) of the licence. The application will be undertaken in accordance with the regulations regarding the procedural requirements for water use licence applications and appeals (GNR. 267 of 2017). Although SIOC has indicated that no amendment to the Integrated Water and Waste Management Plan is required, the regulations do require that the application be supported by a Technical Report.

## 4. PUBLIC PARTICIPATION PROCESS

Interested & affected parties (IAPs) are invited to participate in the environmental process. You can provide input by:

- Registering as an IAP
- Asking questions and raising initial concerns by completing and returning the response sheet (attached)
- Reviewing and providing comment on the Basic Assessment Report in support of environmental authorisation application.
- Reviewing and providing comment on the Technical Report in support of the IWUL amendment.
- Reviewing environmental authorisations

Should your issues and concerns not be addressed through the process, you also have the opportunity to appeal should environmental authorisation be given. To obtain further information or **register as an interested and affected party** kindly make written submission to:

**ISSUES, CONCERNS AND QUESTIONS**

- **C5: Minutes of the Pre-consultation Meeting held at the DMR on the 24<sup>th</sup> of October 2017**

**PRE-CONSULTATION MEETING WITH THE DEPARTMENT OF MINERAL RESOURCES –  
KIMBERLEY**

DATE: 24 October 2017

PLACE: Department of Mineral Resources – Kimberley

TIME: 10H00

**PRESENT**

Mashau Fhatuwani (MF)	Kumba Iron Ore (Sishen)
Takalani Khorombi (TK)	Department of Mineral Resources
Livhuwani Malatjie (LM)	Department of Mineral Resources
Humbulani Mashua (HM)	Department of Mineral Resources
Roelof Letter (RL)	EXM – Associate Director
Lynné Viljoen (LV)	EXM – Environmental Advisor

<u>Nr</u>	<u>Item</u>
<b>1.</b>	<b><u>Introduction</u></b>
1.1	LM welcomes everyone at the meeting.
1.2	RL states that EXM was appointed as the independent external environmental assessment practitioner by the Sishen Iron Ore Company (Pty) Ltd (SIOC), to assist with the environmental authorisation process for the expansion of the Pollution Control Dam's (PCD's) at Aldag and Lylyveld, Sishen Mine, Kathu, Northern Cape.  <b><u>A copy of the presentation is attached hereto as Annexure A.</u></b>

<u>Nr</u>	<u>Item</u>
<b><u>2.</u></b>	<b><u>Purpose of the Meeting</u></b>
2.1	RL states that SIOC is investigating the feasibility of expanding the PCD's at Aldag and Lylyveld, Sishen Mine, in Kathu, Northern Cape. Sishen Mine is in the process of improving the management of dirty and clean water systems to ensure alignment with GN. 704 – Regulations on use of water for Mining and Related Activities aimed at the Protection of Water Resources.
2.2	RL explains that the reason for the expansion of the PCD's is to increase the volumes to cater for a 1:50 year storm event. The original designs approved were under designed and therefore Sishen mine wants to ensure that they comply with the provision of GN 704 of 1999.
2.3	RL confirms that a Pre-Consultation meeting with the DMR is required to confirm the proposed process, to obtain the required approval and introduce the project to the Department.
<b><u>3.</u></b>	<b><u>Project Overview</u></b>
3.1	MF gives an overview of the project.
3.2	<u>Aldag PCD expansion:</u>
3.2.1	MF states that there is not enough infrastructure to contain the dirty water when it rains, and the expansion is therefore aimed at the water that falls into the catchment. MF further states that during the pre-construction meeting it was found that the already approved PCD was undersized and a 2 <sup>nd</sup> dam is therefore proposed. Both dams will be fitted with oil separator systems. Water from the dams will be diverted to a steel tank to be used at the Bioremediation Facility. MF explains that in the event of a storm the clean water will be channelled back to the processing plant.
3.2.2	TK asks if the dam was approved?
3.2.3	MF confirms that the 1 <sup>st</sup> dam was approved.
3.3	<u>Lylyveld PCD expansion:</u>
3.3.1	MF confirms that the Lylyveld mining authorisation was approved in 2013.

<b><u>Nr</u></b>	<b><u>Item</u></b>
3.3.2	MF states that the activities taking place at Lylyveld is blasting, hauling and loading and that there are no plants and no workshops.
3.3.3	MF confirms that the dam is not called a PCD because there are no possibilities of polluting the area but there is a possibility of siltation because of the waste rock dump situated within the area.
3.3.4	MF explains that this dam was also undersized and therefore the capacity needs to be increased and it is important to understand that it is not a PCD but a storm water dam because its only purpose is to capture silt before it enters the Gamagara.
3.3.5	MF states that all the infrastructures were authorised in terms of NEMA.
<b><u>4.</u></b>	<b><u>Environmental Authorisation Process</u></b>
4.1	RL explains the three different applications that are required. RL confirms that an amended IWUL will also be submitted to Water Affairs.
4.2	RL confirms the process that will be followed for these applications.
4.3	RL states that the applications will be uploaded onto SAMRAD and confirms that it will be different applications, but they will run parallel.
4.4	RL states that they need to confirm if a Section 102 application is required for this project.
4.5	HM asks if it is stated on the conditions that the improved EMPr doesn't provide for expansions.
4.6	MF confirms that it is not specifically described as such and that there is no full description of expansion activities in the EMPr.
4.7	RL explains that the approved dams were described in the EMPr but not the expansions.
4.8	HM confirms that a Section 102 application is standard and if there is no Section 102 it means NEMA will not apply and that Section 102 indicates what you are applying for. HM explains that the applications must be submitted at the same time.
4.9	TK confirms that this activity will trigger NEMA.
4.10	RL confirms that the three different applications will be submitted separately but at the same time on SAMRAD.

<u>Nr</u>	<u>Item</u>
<b>5.</b>	<b><u>Project Schedule</u></b>
5.1	RL gives a brief description of the project schedule.
<b>6.</b>	<b><u>Discussion and Closure</u></b>
6.1	HM asks if there will be a change of scope on the expansions?
6.2	RL states that the Aldag area is already transformed and disturbed and that the expansion is within a brown field development. RL further states that it will be quantified in the assessment.
6.3	MF confirms that the scope has changed as the capacity will be doubled.
6.4	LM asks if the dam at Aldag is an extension of an existing project but will be a new dam?
6.5	RL confirms that it will be a new separate dam acting as an overflow dam of the existing dam and that it will be connected to the current dam through a channel.
6.6	MF states that an EIA was done for the 1 <sup>st</sup> dam as it was not only for that specific dam but for the Aldag dam, storm water dams (east and west) and therefore it was a whole EIA. MF further states that the expansions only focus on specific areas and therefore other areas are not affected.
6.7	HM asks if any studies will be required.
6.8	MF confirms that no studies will be required for Aldag, but that certain ecological- and heritage studies are required for Lylyveld and that it will form part of the Basic Assessment.
6.9	RL states that the specific studies that are required as well as the historic development of the approvals of the existing PCD's will be included in the application.
6.10	LM advises RL to make sure if it is an expansion or a new dam and to make sure of the definition of expansion.
6.11	MF confirms it is an expansion and states that if it is less than 20ha it will require a basic assessment and if it is more than 20ha it will require a full EIA.
6.12	LM states that the word expansion can make a big difference in the listing activities.
6.13	TK advises that the Storm Water Management Plan (SWMP) should be submitted.

<u>Nr</u>	<u>Item</u>
6.14	RL confirms that the reports that will be submitted will contain a detailed SWMP.
6.15	MF confirms that the purpose of the dams is to improve the storm water management.
6.16	TK advises RL to describe the type and design of the lining in relation to the chemical content.
6.17	RL confirms that a good description of the proposed liner will be included in the final report to be reviewed by the DMR.
6.18	RL states that Aldag in total for the 2 dams will be 10 000m <sup>3</sup> and the expansion will be 6000m <sup>3</sup> . RL further states that the existing approved dam at Lylyveld is 13 000m <sup>3</sup> and will be expanded to 25 800m <sup>3</sup> .
6.19	TK advises that they should make sure of the safety measures of the dam.
6.20	MF states that all the waterbodies on the mine where there is a risk of someone falling in are fenced off.
6.21	RL confirms that the safety measures will be included in the report.
6.22	LM asks what is the position of the whole project after the application is approved in order to avoid delays and what the urgency of the application is?
6.23	MF confirms that the proposed schedule, based on regulated timeframes, will be followed and that these timeframes will be communicated with the project managers. MF further confirms that the timeframes end in May but that they have lengthen it to July to make provision for delays.
6.24	TK states that he doesn't see any challenges and if they have any queries they should contact LM.
6.25	RL closed out the meeting and thanked everyone for coming.
