*Dear Sir,*

---

**PROJECT: COSMO CITY EXT. 55 – ELECTRICAL SERVICES**

**RE: TOWNSHIP APPLICATION**

---

1. The proposed township is located within the Eskom area of supply and will be supplied from the existing Eskom owned Cosmo City 88/11kV substation.
2. Eskom has an existing overhead 11kV feeder line routed across/adjacent the proposed township. They also plan to construct a 132kV overhead line across the proposed township. This will form part of the Lulamisa-Dalkeith future overhead line. You can contact Me. Martie Heyneke from Eskom Land & Rights Department (PO Box 1091, Johannesburg, 2000) (cell 082 533 0810 or 011 800 4074) for further details.
3. An application for a supply, as and when required, must be address to:  
Eskom, Sales & Customer Services  
PO Box 6368, Randfontein, 1767  
Attention: Mr. Jannie van Niekerk  
E-mail: *vniekeja@eskom.co.za*
4. An allowance of 200kVA will be sufficient for the proposed development, and it is likely that bulk supply can be made available from the existing 11kV overhead line across/adjacent the property. This however will need to be confirmed by Eskom once the application has been submitted.
5. Kindly refer all enquiries to the undersigned.

Yours faithfully,

**EKSTEEN & LE ROUX (PTY) LTD**
