

PLATREEF RESOURCES TSHAMAHANSI PUBLIC MEETING - MINUTES
FOR

**ENVIRONMENTAL AUTHORISATIONS FOR THE PROPOSED PLATREEF UNDERGROUND
MINE PROJECT, NEAR MOKOPANE IN THE LIMPOPO PROVINCE**

Project No: PLA1677

Date: 17 November 2013

1 PRESENT:

Community members from Tshamahansi were represented at the meeting. The general public were also free to attend this meeting. Attendance registers are attached to these minutes (Appendix A).

Table 1: Project Team

John Dombo	Platreef	Government and Community Liaison Manager
Charles Phahlane	Platreef	Communications & Public Affairs Manager
Steve Horak	Digby Wells	Public Participation
Evidence Simango	Digby Wells	Minute Taker
Moses Mathebula	Golder & Associates	Translations

2 MEETING PROCEDURE

2.1 Welcome and Introductions

10:10 – 10:18 John Dombo

Everyone was welcomed and thanked for the opportunity provided. The project team was introduced and it was highlighted that Digby Wells will be presenting the Environmental and Social Impact Assessment (ESIA) process as the appointed independent Environmental Assessment Practitioner (EAP).

2.2 Meeting Presentation

10:19 – 11:20 Steve Horak, – Digby Wells (Presenter)

11:20 – 12:30 KJ Baloyi, District Municipality Councillor (Facilitator)

Moses Mathebula Golder Associates (Translations)

The presentation that was used during the meeting is attached as (Appendix B).

3 COMMENTS RAISED

Comments raised by stakeholders during the meeting and responses provided are included as part of Table 2.

Table 2: Stakeholder Comments

NAME AND SURNAME	VILLAGE/ORGANISATION	COMMENT	RESPONSE
Mr Jack Mahlase	Tshamahansi	How far is Platreef with their skills development programme implementation?	Platreef is busy looking for tutors who will work at the skills centre which is to be developed. Letters were sent out to communities requesting for people who are interested in getting bursaries to study mining related courses. Platreef is in the process of giving out scholarships to primary school pupils as from next year.
Mr Jerry Chabalala	Tshamahansi	How does Platreef hire their security companies, because there are so many registered security companies in the community which are not getting contracts with Platreef?	Platreef advises people to think of other business opportunities other than security companies, because not all security companies will be contracted.
Mr Jerry Chabalala	Tshamahansi	Does Platreef only employ people with mathematics? What will happen to those who do not have mathematics?	Maths and Science are subjects which are required by most jobs and not only in mining. Platreef will have jobs which require maths and some which will not require maths, people will be hired according to meeting the minimum requirements of each specific job.
Mr Percy Mtileni	Tshamahansi	It was mentioned that the platinum found in Tshamahansi was of the best quality and that it would only be mined open pit and not underground, the community requests that it be updated in this regard.	It was decided by Platreef after several studies that have been conducted that the mine will only be an underground mine as the findings of the studies indicated that the impacts from underground mining will be much less compared to open cast mining.
Mr Percy Mtileni	Tshamahansi	What is happening at the farm which belongs to the former Anooraq now Atlatsa companies? Why are the Platreef drilling machines working there?	Platreef has an agreement with Atlatsa to do exploration drilling on the Rietfontein farm.
Mr RS Manganyi	Tshamahansi	While Steve was presenting he mentioned how the business will benefit but he did not say anything about how the community will	The people are given priority in everything that Platreef does; business people were informed to register themselves at the procurement office

NAME AND SURNAME	VILLAGE/ORGANISATION	COMMENT	RESPONSE
		benefit. How will the community benefit?	and the communities will benefit from the jobs which will be provided.
Mr RS Manganyi	Tshamahansi	The community needs Platreef to commit to their promises and deliver on what they say they will do.	Platreef meets their commitments; they are for example in a process of improving the Ben Hlugwani school.
Mr RS Manganyi	Tshamahansi	Platreef should slow down and give the community a chance to discuss things with their lawyers and geologists about the project	Platreef has a schedule and time line that it needs to follow as all the consultations and exploration needs to be within the time frame set by the government.
Mr RS Manganyi	Tshamahansi	Will there be diseases caused by the mine, like what happened at the asbestos mines in Kimberly?	The air quality study indicates that there will be minor dust impacts after mitigation measures. Underground platinum mining also does not cause asbestosis.
Ms Winnie Baloyi	Tshamahansi	During the presentation it was mentioned that during the construction phase people will be employed, where should people go to get employed?	The information will be available at the community liaison offices and people will be informed.
Mr Kenneth Ribisi	Tshamahansi	What happened to the drilling in Tshamahansi? The people want to drill boreholes at their homes, how do they know that the underground water is not polluted from the exploration drilling?	The shaft will be sealed off; monitoring has been implemented to detect any changes to water quality that might occur as a result of mining. There should be no pollution of underground water.
Mr Kenneth Ribisi	Tshamahansi	What will happen to plants and animals that are in the mining area?	The mining area will be fenced off and where the mining infrastructure will go the plants and animals will be removed, the areas where the infrastructure will not be will be protected by the fence.
Ms Welminah Ngoveni	Tshamahansi	What will happen to the affected graves?	Heritage specialists are trained and know what to do in this regard, first the specialist go to site and search for graves that might be affected the graves are identified and marked. The families are then consulted and the necessary steps and rituals are undertaken before the graves are relocated.

NAME AND SURNAME	VILLAGE/ORGANISATION	COMMENT	RESPONSE
Mr Maluleke	Tshamahansi	Where will the waste rock be stored?	It will be placed on the mine boundary and will be used as a noise berm. There will also be a waste rock dump within the mining area.
Mr Maluleke	Tshamahansi	What will happen to boreholes which are drilled deeper than 60m if the protection of ground water in the shaft is provided for between 25 -60m of the shaft area?	The water table in the area is between 20 -50 m deep therefore boreholes drilled deeper than 60m should not be affected.
