Hi Lane

I wasn't aware that Bucandi would be sending letters out yet as I was hoping to give you a call as a heads up so apologies for that.

Attached and marked in red is a broad area which we would most likely be looking at (however the actual area for the site would be much smaller, closer to 6ha, once the exact location is determined). It is most likely going to be on the western side of the Weltevreden gravel road on Quintin's side.

I've also included a link of the website of the houses we are looking at:

<https://www.echocoldrooms.co.za/chicken-houses/projects>

Their work is exceptionally neat and the odours are hardly existent compared to the old type of houses. We could arrange a site visit to one of their existing sites if you would be interested.

Please feel free to contact Bucandi about any environmental concerns or ourselves for any other concerns or queries.

Kind regards

NORMAN KERSLAKE

Director

Subject: RE: Notification Letter for Val Grain (Site 2)

Good afternoon Sir

With reference to the email in receipt

We are an interested party and wish to express our interest to "register" as an interested and affected party.

At the outset we would like the following information:

- 1) The Location, due to the nature of the business.
- 2) The scope and size of the development of the project and how this may relate to future expansion.
This to ascertain the impact on ourselves

It is Common Cause that large chicken farming operations cause '**odours and emissions of ammonia, hydrogen sulphide and poultry dust, containing bacteria, bacterial toxins, and chicken skin debris.**

Note

Residents and workers in the poultry industry breathe the polluted air emanating from these chicken farms.

Kind regards

Lane Kenneth Reynolds
Trustee
