Dear David

Thank you for response.

Your suggested impact mitigation is noted and has been incorporated in the Environmental Management Programme.

Kind regards

**Liandra Scott-Shaw (Pr.Sci.Nat)**

Hi Liandra

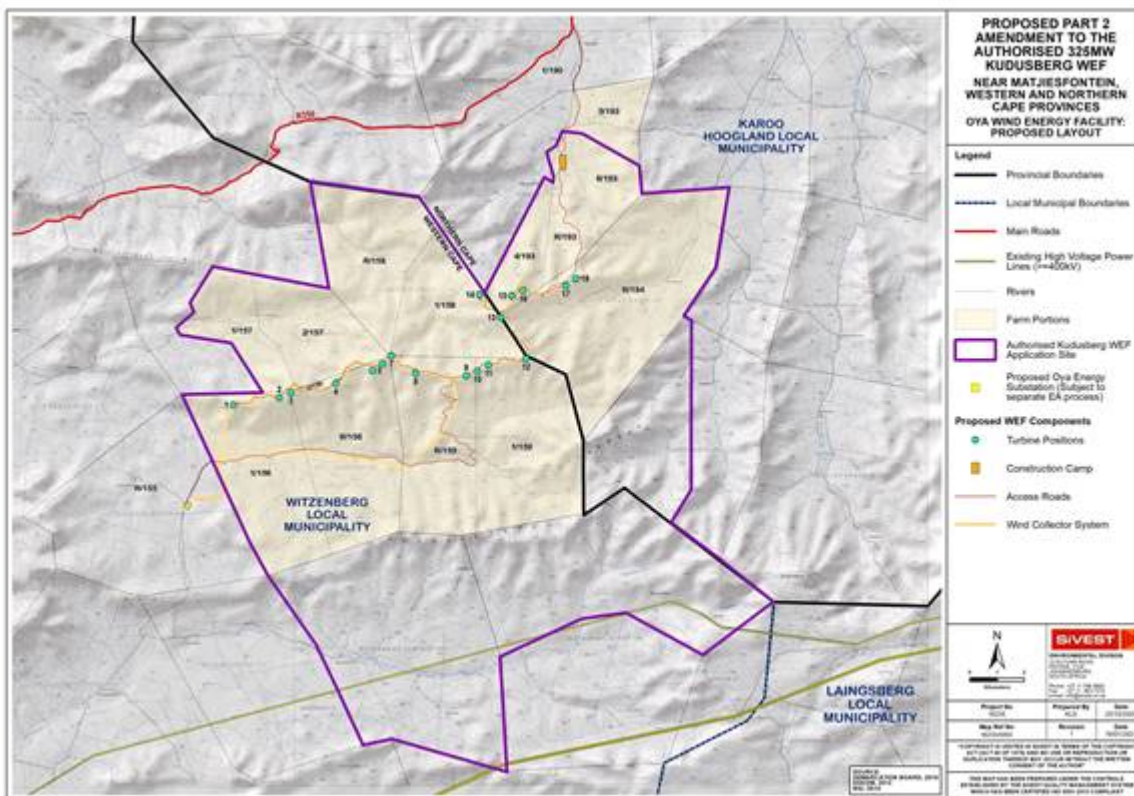

As per our telephonic conversation, I cannot foresee any issues regarding using the existing access road onto the site. It is of significant proportions already and minor upgrades will have little additional impact on terrestrial ecology. Suggested mitigation measures for identified issues, such as for dust suppression, will be adequate for controlling construction impacts.

Kind regards  
David

Dear Specialists

Please see the map below and attached for ease of reference:

This existing road was not reflected on previous layouts, but was accessed during the Kudusberg Split Part 2 Amendment process (DEFF Reference Number: 14/12/16/3/3/1/1976/AM2).

The roads will be maintained (re-gravelled) during construction and operation but will not be widened and as such do not trigger any listed Activity under the National Environmental Management Act (NEMA): Environmental Impact Assessment (EIA) Regulations of 2014 as amended.

Please confirm if this road will have any bearing on your specialist findings.

Please respond to this email, we would like to submit this in Friday 22 January 2021.

Kind regards
