

**ENVIRONMENTAL IMPACT ASSESSMENT
 RES SOUTHERN AFRICA WIND ENERGY FACILITY NORTH OF OYSTER BAY
 COMMENTS AND RESPONSES REPORT**

SCOPING PHASE: COMMENTS RECEIVED (OCTOBER 2010 – JANUARY 2011)

No.	Issue	Raised by	Response
General			
1.	<ul style="list-style-type: none"> » When is the project due to start? » What is the duration of the project? » What quantities of steel will be required? » What Grade of steel will be required for the project? 	M. Mitchley – Brown Mctarlane Africa- General Manager (comment received 15/11/2010).	<p>The project construction would start as soon as possible after environmental permissions, Government permissions, generating licence and grid agreement have been acquired. As timings for these are currently unknown it would be unwise to predict a date for commencing construction at this stage. However, we hope to begin construction in 2012/13.</p> <p>Construction of the wind farm could take 18-24 months.</p> <p>The project duration is expected to be 20-25 years at which point the project could be decommissioned or re-powered.</p> <p>For a single modern turbine with the capacity of 3MW, approximately 45 tonnes of steel is required in the foundation alone. The grade of this foundation steel would need to meet 500 N/mm². The tower, nacelle and contents would most probably be imported as there are no commercial scale turbine manufacturers in SA yet.</p>
2.	Interested in the project to make analysis and make investment decisions.	A. Louw and G. Babaya – Standard Bank: Director African Infrastructure	Comment noted.

No.	Issue	Raised by	Response
		(comment received 16/11/2010).	
3.	Concerned about the manner in which these projects have allegedly already concluded the assessment requirements as per GN R 543 or GN 546 OF 18 JUNE 2010 effective 2 August 2010. Kindly register me as an interested and affected party and keep me fully informed of any and all developments.	P. Dreyer – Oyster Bay property owner (comment received via email 25/11/2010)	Mr Dreyer has been registered on the database for the Oyster Bay Wind Energy Facility, for which the EIA has commenced and Savannah Environmental are currently in the Scoping Phase. Note that the EIA has not been concluded and it currently underway.
4.	There will be no pollution because the wind is free. Hope it won't take another 20 years before they see it. Hope it will come sooner than the proposed tar road from Oyster Bay to Humansdorp.	W Vosloo – Oyster Bay Resident (Comment received 29/11/2010)	Comment noted.
5.	A commentary on wind farms document was received from the St Francis Kromme Trust via email and is attached to Appendix E of the Scoping Report.	F. Silberbauer - St Francis Kromme Trust (comment received via email 08/01/2010).	Noted.
6.	How far is the facility from Oyster Bay?	P. Bosman (comment received during focus group meeting held 06/12/2010).	Approximately 6km from the centre point of the site to the town of Oyster Bay.
7.	Is there a possibility that different developers target the same farm?	Y. Bosman (comment received during focus group meeting held 06/12/2010).	Different developers could target the neighbouring farms but not the same one as RES Southern Africa has a contract with the individual landowners.
8.	Does the full EIA include the power lines? Which corridor is being considered? I think the timeline is very tight and will not be enough to do all the studies.	C. Barratt (comment received during focus group meeting held 06/12/2010).	The power line corridors are being discussed with Eskom and are being covered within the EIA, and are to be assessed in the EIA Phase.
9.	Do not go near St Francis Substation. The maps provided during the meeting are also quite up to date as most conservancies are listed.	C. Longie (comment received during focus group meeting held 06/12/2010).	Comment noted.

No.	Issue	Raised by	Response
10.	Can we contact the specialist as we have a lot of information at our disposal?	C. Barratt & Peter Bosman (comment received during focus group meeting held 06/12/2010).	Please feel free to contact them.
11.	Concerned that they don't want to end up with wind turbines everywhere. The development of wind turbines should be regulated. Coupled with the proposed nuclear energy facility the area might end up with too many energy facilities.	B.F. Rheeder – Oyster Bay councillor (comment received during meeting with councillor and Kouga municipality 07/12/2010).	It is likely that not all proposed wind energy facilities will be constructed due to many reasons such as environmental or grid connection constraints. There is also a Government limit on the total maximum Mega Watts (MW) capacity of wind energy in South Africa. With regard to power lines their location is to be discussed with Eskom.
12.	Where else has RES built wind farms?	B.F. Rheeder - Oyster Bay councillor (comment received during meeting with councillor and Kouga municipality 07/12/2010).	In many places worldwide such as UK, Ireland, Mediterranean, Scandinavia, America and Canada. RES develop, build, own and maintain wind farms.
13.	Why are you repeating an EIA that was done by Red Cap?	K. Koen (comment received during public meeting held 07/12/2010).	This is a different site from the one proposed by Red Cap hence a separate EIA process is being done in accordance with the EIA legislation.
14.	Concerned about the representation of farm workers and requested a copy of the minutes of the meeting.	Z. Mayoni (comment received during public meeting held 07/12/2010).	Consultation with all interested and affected parties is still on going. Minutes of the meeting will be circulated to all attendees. Neighbouring landowners / farmers have been notified of the project.
15.	Is the project still at proposal stage?	Z. Mayoni (comment received during public meeting held 07/12/2010).	The project is currently still at investigation stage.
Birds / Avifauna			
16.	What precautions will be taken to prevent bird strikes?	C. Tregoning – Oyster Bay resident (comment received 25/11/2010).	As part of the EIA a specialist avifauna / bird study is being done. During the EIA phase (next phase) the bird study will list mitigation measures to avoid / reduce possible impacts on bird species of concern. This information will also be included in the Environmental
17.	I am getting an impression that there is not a lot of information of the impacts of bird. There are a	H Stoffberg (comment received during public	

No.	Issue	Raised by	Response
	lot of birds in the area.	meeting held 07/12/2010).	Management Plan (EMP) for the project which will be developed as part of the EIA. When the EIA report is prepared and available for public review later this year, you will find more information on potential bird impacts and how these can be managed.
18.	Concerned about the impacts of wind farms on endangered species of large terrestrial birds.	Y. Bosman – Chairman St Francis Bird Club (comment received 22/11/2010).	
19.	I am in favour of "Green energy" generation. I would just like to know if any measures have been put forward to avoid bird strikes as much as possible.	C. Tregoning (comment received via email 07/01/2011).	
20.	We are concerned about the larger birds and would like a proper bird study to be done as endangered birds could occur in the area.	Y. Bosman (comment received during focus group meeting held 06/12/2010).	The bird specialist being used is familiar with the area and the various assessment criteria to be used. RES is also working with other relevant national and international organizations on the impacts of wind farms on birds.
21.	The St Francis Bay bird club has been contributing data since 1998 to the Co-ordinated Avifaunal Roadcounts (CAR) project operated by the Animal Demography Unit in the Zoology department at UCT. One of the routes that we survey twice a year for the project incorporates the farms identified for the wind facility, and I attach a spreadsheet showing the numbers of large terrestrial birds identified on that route over the last 12 years. Perhaps you could pass this on to Chris van Rooyen? Some technical details: the route is coded EH03, Tsitsikamma East and follows gravel roads from the intersection of the Humansdorp-Oyster Bay road with the road from St Francis Bay to the R102. The 53km length of the route goes west past Oyster Bay and the Huisklip Nature Reserve, joins the R102 eastwards for about 7km, and then turns back onto the gravel road just south of the Impofu Dam to return to its starting point.	Maggie Langlands/Yvonne Bosman - St Francis Bay bird club (Comment received via email 10/12/2010).	Savannah Environmental has passed on this information to the avifauna specialist, who will also be in contact with the local bird club.

No.	Issue	Raised by	Response
	<p>Please contact us if any further information is needed.</p>		
22.	<p>The St Francis Kromme Trust raises two pressing concerns:</p> <ul style="list-style-type: none"> • Bird and Bat Impacts <p>Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e.</p> <p>“A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa...”</p> <p>Only in this way will sufficient data be accumulated to assess accurately the level of</p>	<p>St Francis Kromme Trus, letter via email on 19 July 2011</p>	<p>Reply via letter: Savannah Environmental acknowledges receipt of your letter which was received on 19 July 2011 via email. We thank you for your contribution and encourage you to communicate any further concerns to us without hesitation.</p> <p>The requested response to your issues/ concerns stated in your letter is provided herewith by the EIA Project team, and where applicable, by the developer, RES Southern Africa.</p> <p>1. Bird and Bat Impacts</p> <p>We concur that the impacts of wind energy facilities on birds and bats are unknown in South Africa, this is because no large scale wind energy facility exists in the country. In the absence of this knowledge the wind energy facility development will be guided by the EIA specialists’ studies and by international best practice. Note that the undertaking of bird monitoring at proposed wind energy facility sites within South Africa is currently considered as good practice and is not a legal requirement. This will remain the case until guidelines are adopted and gazetted by the regulating authorities.</p> <p>RES Southern Africa is committed to the responsible and sustainable development of wind energy and their development manager is the South African Wind Energy Association’s board member who is working collaboratively with the BAWESG on the further development of the bird</p>

No.	Issue	Raised by	Response
	<p>impact associated with renewable energy facilities.</p> <ul style="list-style-type: none"> 2. Decommissioning Sureties <p>Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, including concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.</p>		<p>monitoring guidelines and other strategic bird, bat and wind energy issues. Note that RES Southern Africa has already initiated a bird monitoring programme on their site to consider bird presence and movement on their proposed development site for a period of one year as per the BAWESG guidelines. Bat sensitivities will be assessed in the EIA studies and if monitoring is required it will be implemented pre-construction. This will fulfil any requirements for pre-construction monitoring as proposed by the guidelines for bird monitoring, as well as any requirement which may be included within an Environmental Authorisation for the project (should it be authorised).</p> <p>2. Decommissioning Sureties</p> <p>Provision for the possible requirement for financial provision for rehabilitation is made within the EIA Regulations (refer to Regulation 33 (g)(v). This will be considered within the drafting of the Environmental Management Programme for the project. In addition, National DEA will have to consider the request for financial surety as part of their decision-making for the EIA. However, it is anticipated that the wind energy facility will have a lifespan of up to 20-25 years. The current EIA Regulations requires a separate environmental assessment for decommissioning of the facility at the end of the project lifespan. Any decommissioning activities will be required to comply with the legislation relevant at the time.</p> <p>RES Southern Africa is fully owned by RES Group which is an established, family owned company with over 1000</p>

No.	Issue	Raised by	Response
			employees worldwide. RES has been developing, constructing and operating wind farms for over 25 years and is one of the world's leading international developers. RES has an impressive track record of producing successful wind energy facilities of very high quality.
Visual Impacts			
23.	What will the impacts be on the skyline?	C. Tregoning – Oyster Bay resident (comment received 25/11/2010).	The visual impact assessment will consider the visibility of the facility from different vantage points and a visual simulation will be done to see what the facility could look like.
24.	Concerned that a higher mast wind turbine will influence the pristine environment and visual on the Tsitsikama mountains.	J. Van Dyk – Oyster Bay resident (comment received 25/11/2010).	The purpose of the EIA is to consider the extent and significance of impacts on the environment and provide a recommendation on the impacts on the environmental and what measures can be used to mitigate such impacts. A detailed visual impact assessment will be undertaken as part of the EIA in order to assess this potential impact.
25.	Concerned about visual impact on the environment	J.A Botha – Oyster bay resident (comment received 26/11/2010).	
26.	Concerned about the visual impact.	A.G. Joseph – Property owner in Oyster Bay (comment received 26/11/2010).	
27.	Wind farms are unsightly and make noise.	C. Wilhelmina – Oyster Bay property owner (Holiday home) (Comment received 29/11/2010)	
28.	Oyster Bay is a holiday destination where I relax in the pristine nature and I do not want to see or hear the wind turbines.	F J Dutoit – Oyster Bay Resident (Comment date needed to show this was during scoping)	The settlement of Oyster Bay is acknowledged as a holiday destination in the Scoping Report. The potential visual and noise impacts associated with the facility will be investigated in more detail during the EIA phase.
Social / Employment / Economic			
29.	Will the project bring additional labour/workers	C. Tregoning – Oyster Bay	Yes, during construction and limited maintenance staff

No.	Issue	Raised by	Response
	to Oyster Bay area?	resident (comment received 25/11/2010).	during operation, although specialist skills will be outsourced internationally, however where local skills are available, RES Southern Africa will endeavour to use these.
30.	How long does it take to be carbon neutral? Can the country afford such inefficient expenditure of capital?	J.A Botha – Oyster bay resident (comment received 26/11/2010).	<p>The average wind farm will pay back the energy used in its manufacture within 3-5 months of operation¹. A modern wind turbine is designed to operate for more than 20 years and at the end of its working life, the area can be restored at low environmental costs. Wind energy is a form of development which is essentially reversible – in contrast to fossil fuel or nuclear power stations.</p> <p>A modern wind turbine produces electricity 70-85% of the time, but it generates different outputs depending on the wind speed. Over the course of a year, it will typically generate about 30% of the theoretical maximum output. This is known as its load factor (or capacity factor). The load factor of conventional fossil fuel power stations is on average 50%². A modern wind turbine will generate enough to meet the electricity demands of more than a thousand homes over the course of a year.</p> <p>The cost of generating electricity from wind has fallen dramatically over the past few years. Between 1990 and 2002, world wind energy capacity doubled every three years and with every doubling prices fell by 15%³. Wind</p>

No.	Issue	Raised by	Response
			<p>energy is competitive with new coal and new nuclear capacity, even before any environmental costs of fossil fuel and nuclear generation⁴ are taken into account. The average cost of generating electricity from onshore wind is now around 0.34-0.45 ZAR⁵ per kilowatt hour, competitive with new coal (0.28-0.51 ZAR) and cheaper than new nuclear (0.45-0.79 ZAR)⁶. As gas prices increase and wind power costs fall – both of which are very likely – wind becomes even more competitive, so much so that sometime in the 2010s wind should challenge gas as the lowest cost power source.</p> <p>Furthermore, the wind is a free and widely available fuel source, therefore once the wind farm is in place, there are no fuel or waste related costs.</p>
31.	<p>Hope for cheaper electricity as we currently have. Hope the residents of Kouga municipality can benefit from this.</p>	<p>W Vosloo – Oyster Bay Resident (Comment received 29/11/2010)</p>	<p>Comment noted.</p>
32.	<p>It seems the scope of the EIA as presented does not consider social impacts. Would like to see the social impacts of the development e.g. Employment etc. Would also like to see the micro economic impacts.</p>	<p>J. Botha (comment received during public meeting held 07/12/2010).</p>	<p>Social impacts are being considered in the social impact assessment study. However, the government is considering macro-economic aspects of these activities.</p>
33.	<p>Wind energy facilities are very expensive capital projects and it is a waste of money in terms of trying to create jobs.</p>	<p>J. Botha (comment received during public meeting held 07/12/2010).</p>	<p>The purpose of the project is not to create jobs but rather to provide a clean renewable energy source for the country. Alternative energy sources are necessary due to</p>

No.	Issue	Raised by	Response
			various environmental issues and current energy demands as well as government policy. In other parts of the world it costs approximately 1.5M UK pounds per installed Mega Watt for the construction of a wind energy facility. The final costs of wind energy in South Africa are not certain at this stage but are predicted to be similar. Yes, the up-front capital costs are high but the fuel (the wind) is free and therefore costs in the long-term are cheaper than conventional fossil fuel energy generation. Ultimately what is important is the cost of electricity.
34.	The micro economic aspects of such developments are very important as a project of this type can also increase the price of electricity. Can the country afford this?	J. Botha (comment received during public meeting held 07/12/2010).	The current cost of Eskom electricity is increasing. The cost of coal is increasing. The cost of all fossil fuels and nuclear energy are increasing. Whereas the cost of wind energy is decreasing. Studies have predicted that the electricity cost for wind energy and for Eskom will be equal in 4-5 years. Unfortunately there are many incorrect articles in newspapers.
35.	How much money is being invested?	H Stoffberg (comment received during public meeting held 07/12/2010).	This cannot be determined by RES Southern Africa at this stage. It will depend on a number of aspects such as the allocation of power to be generated, the grid connection point, etc.
36.	How much is being invested as part of corporate social investment around Oyster Bay? Don't need all the money to be invested in Johannesburg	H Stoffberg (comment received during public meeting held 07/12/2010).	This is not defined at this stage. RES Southern Africa is very familiar with community benefits from wind farms and would like to enter into discussions with the community in terms of what they need.
37.	What will be the project construction period and how many jobs will be created?	P.P Mofokeng (comment received during public meeting held 07/12/2010).	The construction period is estimated to take 18-24 months. The number of jobs created has not been determined as yet.
38.	Concerned that small companies are not being considered. Need skills training before the development to empower locals.	H Stoffberg (comment received during public meeting held 07/12/2010).	RES Southern Africa will be happy to consider this if the proposed project receives environmental and Government permission to proceed.
Noise Impacts			

No.	Issue	Raised by	Response
39.	Concerned about Noise Pollution.	C. Tregoning – Oyster Bay resident (comment received 25/11/2010).	The noise impact assessment will consider noise pollution.
40.	How close will the nearest tower be to Oyster Bay? What level of noise will the wind turbines generate at maximum speed?	N. Fowler – Oyster Bay Resident (comment received 28/11/2010).	The distance of the nearest tower to Oyster Bay will be determined once a layout is available, during the EIA Phase. A modern day turbine with an installed capacity of 1.8 – 3MW has a source noise (i.e. just from the turbine) of approximately 95 – 105 dB(A) but it differs between sizes and types of turbines.
41.	Worried that the process will be looking at noise within the vicinity of the development and not the broader area.	H Stoffberg (comment received during public meeting held 07/12/2010).	The noise impact assessment will consider the whole area affected by the proposed facility, as required by the relevant legislation. There is legislation in terms of acceptable noise limits which will be applied in this study. This will also be considered in considering the layout of the turbines.
42.	How will we benefit as previously disadvantaged people? Will we have workshops to try and develop skills?	P.P Mofokeng (comment received during public meeting held 07/12/2010).	RES Southern Africa is keen on doing that however is not sure how to do that at the moment. RES Southern Africa would support the principle of some form of mentoring as the project develops.
43.	What is the situation in terms of noise in Europe in particular with regard to low frequency noise	J. Botha (comment received during public meeting held 07/12/2010).	Standards are in place to regulate the amount of noise generated from wind turbines. However, turbines have a lower noise in low winds and in high winds the noise is masked by other structures. International Best Practice Standards are also being applied.
44.	Our farm is next to the proposed site. The concern is noise pollution because of a piggery that could be affected	Albie Schruder, reply form via post (received on 4 November 2011)	Noise modelling within 3000 metres of the site was done, as this is the focus area for the noise study, and the impact was rated as being of a low significance.
Ecology And General Environmental Issues			
45.	» Concerned about Impact on fauna and Flora. » Concerned the pristine area of Oyster Bay will be ruined.	A.G. Joseph – Property owner in Oyster Bay (comment received	An ecological specialist will conduct a study on the flora and fauna and biodiversity of the site.

No.	Issue	Raised by	Response
		26/11/2010).	
46.	<ul style="list-style-type: none"> » Enjoy the pristine nature and I am for the protection of the beach and the birds. » They affect the natural environment and birdlife. » It is not desirable to construct wind farms in holiday towns. » According to a GIBB map the wind farm is located right up to Oyster Bay. 	C. Wilhelmina – Oyster Bay property owner (Holiday home) (Comment received 29/11/2010)	Comments noted. These issues will be assessed within the detailed EIA phase of the process.
47.	I am a homeowner at Oyster Bay for the past 30 years. I object to the proposed wind farm close to Oyster Bay for the following reasons (based on personal observations of similar development in overseas countries): <ul style="list-style-type: none"> » High and continuous noise levels. » Severe impact on bird migration routes. » Visual interference. 	LJ Heyl – Property owner (comment received via email 10/01/2010).	
48.	I have been enjoying the pristine beauty of the area since 1987 when I bought my first property there. The proposed turbines (about 100?) will have a devastating impact on the visual beauty of the area. It is feared that the turbines will be visible from a distance of 10 kilometres. It could also have a noise impact and may negatively influence bird life. This part of the our coastline – known for its biodiversity – is now threatened not only by your proposed “development” but also by a nuclear power station planned by Eskom at Thyspunt, not far from Oyster Bay. The cumulative effect of these power generating schemes will unfairly burden the area and the owners of property in Oyster Bay. I propose	Professor C. Van Wyk – Property Owner (comment received via email 10/01/2010).	The total number of turbines proposed for the Oyster Bay site could vary as follows: <ul style="list-style-type: none"> » Up to 50 turbines, assuming a turbine capacity of 3MW each » Up to 80 turbines, assuming a turbine capacity of 1.8 MW each Potential visual, noise, bird and biodiversity impacts are being investigated in the EIA. Cumulative impacts of approved projects will be considered in the EIA, however due to all the projects being in the planning stages cumulative impacts are difficult to assess at this stage, as it will be based on a “what-if” scenario. This issue is something that the authorising body, DEA will have to address.

No.	Issue	Raised by	Response
	that you look for a different site on which to erect your wind energy facility.		<p>The other energy projects in the area are also subject to EIAs to look at environmental impacts for that particular project.</p> <p>RES Southern Africa consider the Oyster Bay wind energy facility site as a preferred site for wind energy development based on technical reasons, primarily the wind resource, which will be confirmed by collecting wind data.</p>
Technical Aspects			
49.	Do turbines rotate sideways?	P. Bosman (comment received during focus group meeting held 06/12/2010).	There is an anemometer on the roof of the nacelle to measure wind speed and detect wind direction. A mechanism then slowly turns the nacelle towards the relevant wind direction.
50.	What speed does the wind need to be to generate electricity?	B. Elton (comment received during focus group meeting held 06/12/2010).	A minimum of approximately 4m/s and a maximum of 24m/s (it depends on the turbine make and model). At maximum wind speed the turbine will automatically shut down and turn away from that wind direction.
51.	What is the speed at the tip of the blades?	C. Barratt (comment received during focus group meeting held 06/12/2010).	Based on a 90m rotor diameter and a maximum rotation speed of 20rpm = maximum tip speed of 95m/sec (340 km/h).
52.	Do you have any oil for the generators and is any stored underground?	B. Elton (comment received during focus group meeting held 06/12/2010).	Generators and gearboxes will have oil lubrication but none will be stored underground.
53.	What type of technology will be used?	B. Elton (comment received during focus group meeting held 06/12/2010).	Modern (wind energy) technology will be used. Only turbines with proven functionality will be used.
54.	Why is the exact type and height of tower not being given?	C. Barratt (comment received during focus group meeting held 06/12/2010).	The type of turbine to be used will depend, among other things, on the wind measurement results of the meteorological masts to be erected. However, it is probable that the turbines will be between 1.8MW and 3MW in capacity. This range is being given for the scoping

No.	Issue	Raised by	Response
			phase however; during the EIA phase more information on the types of turbines will be available.
55.	How many turbines do you think the area can hold considering the Western Cape legislation for wind energy facility development?	C. Barratt (comment received during focus group meeting held 06/12/2010).	<ul style="list-style-type: none"> » The Western Cape does not have legislation but have guidelines to guide the siting of wind energy facility development. » The national Department of Environmental Affairs has initiated a similar process as the Western Cape for selected province in the country and this could be available possibly in early 2011. This will guide decisions on the number of turbines in a particular area.
56.	How many turbines are planned?	Y. Bosman (comment received during focus group meeting held 06/12/2010).	Up to a maximum of 80 turbines are planned but the final number will depend on the environmental impact assessment results and the individual turbine capacity that is finally chosen and the wind data that is collected.
57.	How many sites are you looking at in the Kouga area?	B.F. Rheeder - Oyster Bay councillor (comment received during meeting with councillor and Kouga municipality 07/12/2010).	RES Southern Africa is currently looking at one site in the Kouga area.
58.	After receiving the Environmental Record of Decision when will construction be finished?	B.F. Rheeder - Oyster Bay councillor (comment received during meeting with councillor and Kouga municipality 07/12/2010).	Any wind energy developer will still need a power purchase agreement from Eskom and generation license from NERSA which is in no way guaranteed. Construction of the wind farm could take 18-24 months but the grid process may take longer due to planning issues. Therefore a completion date for construction cannot be specified as yet. Based on RES's experience they have learnt to develop carefully and responsibly and they do not make unrealistic promises on what is achievable.
59.	Will most of the manufacturing of components be outside the country?	J. Botha (comment received during public meeting held 07/12/2010).	In the early years of this new industry it will be, as there is currently very little capacity in South Africa to manufacture the main components.

No.	Issue	Raised by	Response
Heritage			
60.	There is also a Koi San Issue to be considered. However I think the specialist that you appointed will be able to pick it up.	C. Barratt (comment received during focus group meeting held 06/12/2010).	Noted for the heritage study.
61.	<p>From previous archaeological research and surveys in the area remains which are reasonably likely to be encountered during the establishment of the wind energy facility and its related infrastructure are Early and Middle Stone Age stone tools scatters or sites, Later Stone Age middens and sites used by Khoi Khoi pastoralists in the last 2000 years. Evidence is however much scarcer from the coast inland, as it is expected that the presence of shell middens gradually reduces from the coastline inland, encountered after 5 km from the coastline. It is however important to highlight that the archaeology of the inland of the Eastern Cape has not been extensively studied yet and therefore new sites may be identified, including shelters bearing rock art paintings.</p> <p>SAHRA supports the recommendations of the author and requires that a full Heritage Impact Assessment is undertaken for the Draft Environmental Impact Assessment Phase. This needs to include a Phase 1 Archaeological Impact Assessment, a Palaeontological Impact Assessment and an Assessment of all other heritage resources such as Built Environment, Living Heritage and Cultural Landscape. SAHRA will comment on the heritage aspect of the draft EIA once received during the next phase of the</p>	South African Heritage Resources Agency, Dr Mariagrazia Galimberti (comment received of 12 January 2011).	Comment noted. A Phase one HIA and a Palaeontological assessment will be undertaken as part of the EIA study.

No.	Issue	Raised by	Response
	project.		
Spatial Development Frame Work			
62.	Any activity that is proposed needs to consider the spatial development frame work of the Municipality. There are areas that are earmarked for development that need to be taken into consideration.	T. De Groot – Kouga Local Municipality (comment received during meeting with councillor and Kouga municipality 07/12/2010).	The Spatial development framework is being considered and the social impact assessment specialist will look at that and will also consult with the municipality.
Agriculture			
63.	What impacts will the wind energy facility have on farming? I experienced a lot of resonance the last time I was next to a wind facility overseas. However, we welcome anything that will help the country.	P. Van Ransburg (comment received during public meeting held 07/12/2010).	Technology has now advanced greatly and turbines are now quieter. Almost all the wind energy facilities in the UK are on farms and departure of fauna has not been significant.
Water Resources			
64.	Water is quite sensitive in the area.	C. Barratt (comment received during focus group meeting held 06/12/2010).	Water is not needed for the wind energy facility operation.

EIA PHASE: COMMENTS RECEIVED (FEBRUARY 2011 - OCTOBER 2011)

Support for the Proposed Project			
1.	We support the Oyster Bay Wind Energy Project. We would like to see it happen. Please approve	Sivuyile July – Ancyl Resident	RES Southern Africa notes the support from the community.
2.	Ek Ondersteun die projek. Keur Goed, ons is werkloos.	Martha rollison - Resident	
3.	We support this project. Approve we don't have jobs	Samuel Mzangwa - Resident	
4.	Ons Ondersteun die projek. Keur dit assebleief. Ons soek werk.	Marinda Mzanga – Ancyl Resident	
5.	Ek ondersteun Oesterbaai indkrag. Keur dit asseblief. Ons wil die projek sien gebeur.	Shaun van Rheede - Resident	
6.	We Support this project and hopefully we will get jobs. We would appreciate if you approve.	John Oliphant - Resident	
7.	Ons ondersteun die Oesterbaai windkrag projek. Keur dit goed asseblief, ons wil die projek sien gebeur.	Sampie Vis - Resident	
8.	I am very positive about the Oysterbay wind energy project. My community of Umzamowethu at Oysterbay supports the RES Oysterbay project. We Would like to see this project happen. Please approve the Oysterbay Wind Farm project.	Akhona Nkatsha – Ancyl Resident	
9.	Ons ondersteun die Oesterbaai windkrag projek. Keur dit asseblief goed.	Maggie Tarentaal - Resident	
10.	Ons ondersteun die Oesterbaai windkrag projek. Keur dit goed asseblief. Ons wil die projek sien voorgaan.	Liezel Tarentaal - Resident	
11.	Ons soek die windkrag. Keur dit goed asseblief. Ons soek werk.	Sophie Oliphant – Ancwl Resident	
12.	Ek persoonlik ondersteun fie projek. Keur dit goed	Bessie Oliphant - Resident	

No.	Issue	Raised by	Response
	en laat dinge gebeur.		
13.	Ons wil asseblief die wind energie projek hê. Die projek moet goedgekeur word asseblief.	Lidia Miller- Resident	
14.	The whole of Umzamowethu including me are supporting this project. We would appreciate it if you can approve this project. Also to help us with job creation.	Wendy Skosana - Resident	
15.	Me and the whole Umzamowethu are supporting this project. We would appreciate it if you can approve this project. Also to help us with job creation.	Mbulela Mlamli – Resident	
16.	We want this wind energy project please. We support it 100%. Please approve it for the sake of job creation.	Pamela Menzi - Resident	
17.	Ons ondersteun die Oesterbaai windkrag. Keur dit asseblief. Goed ons will dit sien gebeur.	Jane Oliphant - Resident	
18.	We support the Oysterbay Wind Energy project. Approve because we want job creation.	Esra Tanda - Resident	
19.	I support this wind power project. Approve and we will be happy.	Hubert Tanda - Resident	
20.	We support the Oysterbay Wind Energy project. Please approve. We want to see it happen.	James Doro- Resident	
21.	We want this project please. Approve it we want jobs.	Leanne Rettledas- Ancyl Resident	
22.	I am fully support this wind energy project. My community Umzamowethu support Res Oysterbay project. We want to see this wind energy project happen. Please approve the oysterbay wind farm energy project.	Florida Witrooi – Ancyl, Bec memebr	
23.	We want this wind energy. Please approve, we want jobs.	Douglas Oliphant – Umzamowethu Resident	
24.	Ons seek die projek asseblief. Keur dit goed	Elsie Kees – Ancwl Resident	

No.	Issue	Raised by	Response
	asseblief.		
25.	Ons seek die wind energie. Ek ondersteun 100%. Keur dit goed asseblief.	Bettie Ruiters - Resident	
26.	<p>I am fully supportive of this because this is going to create job opportunities. This will be effective in terms of giving more power to the electricity that we have. This is also a significant step in terms of creating more development in our community.</p> <p>How are you going to make sure that this is not going to be on the hands of rich people? I would also want to know how- much general workers will pay per day, because we sick and tired of white people underpay us here. I'll propose and plead to you to help our soccer team in order to upgrade the field and also sponsorship as our club in already joined the leisure.</p>	Zandisile Nsamase – Ancyl Chair / ANC member, also youth communist member.	
27.	I am positive about this wind energy project in Umzamowethu. We support this project. Please approve the Oysterbay wind farm project.	Magaret Barry – Ancwl, Member of community	
28.	Ons wil graag die windkrag hê. Keur dit goed asseblief.	Yolandi Oliphant - Resident	
29.	Ons wil graag die windkrag hê. Keur dit goed asseblief.	Odrey Oliphant - Resident	
30.	I am positive about this wind energy project at Umzamowethu. We support this 100%. We want this project to be approved. This project must provide job creations.	Rewiena Jordaan – Bec member	
31.	I am very positive about this wind energy project. My community in Umzamowethu support RES Oysterbay project. We want to see this project happen, please support it. Approve	Charmaine Rettledas – Ancwl Community leader (Department Chair SGB)	

No.	Issue	Raised by	Response

	hope that the environmental impact assessment will not delay the project.	Bay, 20 September 2011.	
52.	We will help you to support your project and we will inform the community and make sure they all register as interesetd and affected parties.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	
53.	I will inform the community and invite them to attend the public meeting on the 21 September 2011.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
54.	Please make sure you send the reply forms for us to ensure the local community to register.	Charmaine Kettledas, comment at focus group meeting Oyster Bay, 20 September 2011.	Reply forms were sent as requested.
55.	I have seen wind turbines in Europe and they are very close to homes and the noise levels are very low.	Johan Vermaak, comment at focus group meeting Humansdorp , 17 October 2011	Comment noted.
56.	I want to urge the farmers in the area to welcome and support wind energy facilities in the area. The wind industry will provide growth and great economic opportunities to the farming community and surrounding towns and villages.	Johan Vermaak, comment at focus group meeting Humansdorp , 17 October 2011	Comment noted.
General			
57.	Thank you for this information, if I require anything you will be informed. Kindest Regards Mr. Limpho Mongoato Department of Agriculture, Forestry & Fisheries Directorate: Land Use and Soil Management Pretoria (South Africa) Tel: (012) 319 7609 Fax: (012) 329 5938	Limpho Mongoato, Department of Agriculture, Forestry & Fisheries Directorate: Land Use and Soil Management, comment by e-mail, 16 September 2011.	Noted.
58.	Thank you for the opportunity to hear more about	Zolani Mayoui, comment at	Noted.

No.	Issue	Raised by	Response
	the RES Oyster Bay Wind Energy Facility project.	focus group meeting Oyster Bay, 20 September 2011.	
59.	Thank you for the opportunity to hear about your project. We were not aware of this project. The two projects that have been presented to the Kouga Municipality is the Redcap and Mainstream wind energy facilities.	Elvis Olivier, comment at focus group meeting Jeffreys Bay, 21 September 2011.	The Kouga Municipality was notified of the project at the outset of the process.
60.	Will RES Southern Africa be bidding in the first round in November 2011?	Maggie Langlands, comment at public meeting Oyster Bay, 21 September 2011.	No, RES Southern Africa will not bid in November 2011.
61.	Stan Clarke: What are the major concerns raised on the project?	Stan Clarke, comment at focus group meeting Humansdorp , 17 October 2011	Job creation, noise from the turbines, use of the access road.
Public Process			
62.	Was the project information sent to the Kouga Municipality?	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	Project information was sent to the office of the municipal manager and to the ward councillor for Oyster Bay. The draft environmental impact assessment report was also sent to the new ward councillor and the new municipal manager.
Planning			
63.	Are you aware that you would have to apply for rezoning of your site?	Sunette Maree, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011..	RES Southern Africa is aware and has employed Setplan to conduct the rezoning process.
64.	Are you aware that the Cacadu District Municipality have drafted guidelines for renewable energy facilities and development and that this process still needs to be finalised and that no rezoning would be approved.	Sunette Maree, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.2011.	RES Southern Africa has been following the Cacadu District Municipality draft guidelines process for renewable energy in the Eastern Cape. The draft documents have been sent to us. We await the opportunity to comment on it once it becomes available. It is our understanding that we can prepare a land rezoning which can be submitted after we receive the

No.	Issue	Raised by	Response
			environmental authorisation.
65.	Are you aware that the rezoning application needs to be submitted to the Kouga Municipality. We are waiting on the renewable energy guidelines and the alignment of the structures plan for our municipality.	Sunette Maree, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.1.	RES Southern Africa is aware of the rezoning process and will clarify all concerns flagged with Setplan.
66.	Are you aware that your eastern power line alignment goes through the expansion of the town of Humansdorp to the east?	Sunette Maree, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	RES Southern Africa and Savannah Environmental were not aware of this planned expansion. This information will be included in the Final EIA Report.
67.	The town will be growing eastward along the Humansdorp-Jeffreys Bay corridor.	Sunette Maree, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011..	Noted.
68.	It is crucial that Savannah look at the integrated development plan and our structures plan for the area and the proposed growth of all surrounding towns.	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	Comment noted. The IDP has been considered in the Social Impact Assessment.
Communications			
69.	We need to ensure that we have regular communication between RES Southern Africa and the Kouga municipality on the project.	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	Comment noted.
70.	We will review and comment and we would have to deal with the projects rezoning application.	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	Noted.
Partnerships and Jobs			
71.	Is the Reebokrant, the trust farm part of the project? Are they partners?	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Duncan Ayling: Yes the Reebokrant trust is part of the RES Southern Africa Oyster Bay project.
72.	I will make sure the leadership of Reebokrant	Zolani Mayoui, comment at	Noted.

No.	Issue	Raised by	Response
	attend the public meeting on the 21 September 2011. I will speak to Mr. Zeppe the chairman of Reebokrant trust.	focus group meeting Oyster Bay, 20 September 2011.	
73.	How many people are you looking at employing?	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Kumbuyani Chisoro: We are looking at employing about two hundred workers at the height of the construction phase. We are looking at local contractors and using local workers on the project. Community benefits will range from local accommodation providers, local contractors, influx of funding into the community. RES Southern Africa is looking at various localised community benefits that would benefit the community directly. This needs to be developed further. This might include small community projects; however it needs to be clarified. We need to be very clear, however, that we cannot promise anything at this stage because we do not have an approved project yet. We can only plan and discuss possible community benefit schemes which could happen if our wind project becomes approved.
74.	What percentage of people would be localised?	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	It will depend on what skills are available locally.
75.	The community at Uzamowethu would be interested in sustainable jobs in the area. We will take the project to the community and inform them about it.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Noted.
76.	We support the project and would like to see the approval of the project as soon as possible. We hope that the environmental impact assessment will not delay the project.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Noted.
77.	We need the jobs. The community is in crisis and need projects of this nature in the Oyster Bay area.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.

No.	Issue	Raised by	Response
78.	Please inform us of your social responsibility programme as its being developed. We need to understand the type of support you need from our communities.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	RES Southern Africa would like to look at long term partnerships with the local community and would keep the communication open.
79.	How many jobs will your project generate?	Patrick Kota, comment at focus group meeting Jeffreys Bay, 21 September 2011.	At the peak of construction about two hundred jobs with a range of other spin offs for the local economy.
80.	Are you working on a social responsibility initiative as put forward by the other developers?	Patrick Kota, comment at focus group meeting Jeffreys Bay, 21 September 2011.	RES Southern Africa's social responsibility initiative and options for various community projects need to be finalised in conjunction with the local community and key stakeholders.
81.	Please clarify job creation on this project?	Joseph Williams, comment at public meeting Oyster Bay, 21 September 2011.	RES has built wind farms around the world and we are looking at approximately two hundred jobs during the construction phase. It will consist of skilled, semi skilled and low skilled jobs. The largest amount of localised jobs would be semi and low skilled jobs. In the operations phase over the 20 years there would be approximately forty five full-time jobs associated with the project and possibly seventy occasional temporary jobs. The social impact report considered it as a low positive impact. We are looking at community benefits and skills training as it is common for RES to do this but also because it is a requirement by the South African Government on all renewable energy projects.
82.	Where will the labour force be housed?	Charl Du Plessis, comment at public meeting Oyster Bay, 21 September 2011.	Duncan Ayling: The plan is to house all staff in surrounding towns and villages. No accommodation will be provided on the property.
83.	What will RES offer the community and the youth of Oyster Bay in the form of jobs? Will you assist youth with a high school certificate? We want to see local people used and employed.	Thandisizwe Mbiko, comment at public meeting Oyster Bay, 21 September 2011.	Duncan Ayling: We are looking at various options. We need to clarify it as part of our bidding process. We are looking at empowerment schemes, for example we are currently looking at a possible partnership with a BBBEE

No.	Issue	Raised by	Response
			company called Soul City; however this needs to be clarified. We need to clarify what the needs of the local community are and we need the community's input in this matter. We cannot do anything before we have a project in hand. We are keen to investigate shadowing and training schemes and welcome input from the local communities.
84.	The environmental impact assessment process is taking too long. We as a community support the project. The environmental impact assessment process should not stop the project, it should be much faster and it should approve the project.	Zandisile Ndamase, comment at public meeting Oyster Bay, 21 September 2011.	The EIA process must be undertaken in accordance with the requirements of the EIA Regulations.
85.	When will RES provide skills training?	Charmaine Kettledas, comment at public meeting Oyster Bay, 21 September 2011.	Once RES Southern Africa knows they have a successful project.
86.	Can agriculture and the wind energy facility be integrated in this area?	Thandisizwe Mbiko, comment at public meeting Oyster Bay, 21 September 2011.	Yes it can. Agriculture can continue under the operating turbines.
87.	Will RES support students studying engineering, project management and aspects relating to wind energy facilities?	Zandisile Ndamase, comment at public meeting Oyster Bay, 21 September 2011.	RES Southern Africa will be considering various options to support the local community.
Access Routes & Transport			
88.	The St Francis Kromme Trust objects in the strongest terms to the route proposed for transporting wind turbine components to the prospective Oyster Bay wind farm site. Seven abnormal-load trucks for each of 62 turbines amounts to over four hundred heavy vehicles proposing to use the R330 and then the gravel	Maggie Langands, St Francis Kromme Trust, comment by e-mail, 24 September 2011. Lynn Slogrove, Cape St Francis, comment by e-mail, 28 September 2011.	Dear Lynn Slogrove, Jenny Barwood, Renee Botha, Michelle Strydom and Maggie Langlands. Thank you for submitting your concerns into the public consultation process for the RES Southern Africa Oyster Bay wind energy project. I hope that I can assure you that RES Southern Africa will, at all times, attempt to

No.	Issue	Raised by	Response
	<p>road from the southern end of the Kromme River bridge to the junction with the Humansdorp-Oyster Bay road. This road cannot stand up to such punishing use and the residents at the St Francis Bay end of the road should not have to contend with traffic of this nature.</p>	<p>Jenny Barwood, KL barwood & Son Projects, comment by e-mail, 28 September 2011.</p> <p>Renee Botha, St. Francis Kromme Trust, comment by e-mail, 28 september 2011.</p> <p>Michelle Strydom, Wikus Strydom Attorneys, comment by e-mail, 30 September 2011.</p> <p>Pippa Swart, St Francis Kromme Trust, comment by e-mail, 03 October 2011.</p>	<p>minimise disruption to the local residents of St Francis Bay whilst at the same time delivering the project to Oyster Bay and bringing the associated benefits to the local community in that area.</p> <p>I agree that over 400 heavy vehicles will have an impact on the road and on traffic congestion, however this is over a probable 2 year time period and so averages approximately 4 abnormal heavy loads per week. RES Southern Africa will therefore be able to contract these deliveries so that they avoid passing by St Francis Bay at busy times of day. We undertake to consult with you and other residents to agree on times to be avoided.</p> <p>Although the road is currently in a poor state of repair, RES Southern Africa will be required to enter agreements with the roads authorities to ensure the roads are upgraded and reinforced so that they can support the heavy traffic safely. Any damage caused by RES Southern Africa use of the roads will be repaired quickly and efficiently at our cost.</p> <p>RES Southern Africa identified that traffic near St Francis Bay may bring concern to the residents and so we have already spent extra time identifying an alternative route which approaches Oyster Bay from the West. This Western approach is significantly longer and involves some difficult pinch-points where manoeuvring long blades around corners would be very difficult.</p> <p>The route survey, contracted by RES Southern Africa, assessed both route options and identified the approach from the East that passes near St Francis Bay to be</p>

No.	Issue	Raised by	Response
			<p>shorter and more efficient. At this point in time RES Southern Africa would like to keep both routes available as options.</p> <p>If Department for Environmental Affairs environmental authorisation is granted, and the project is successful in bidding for allocation from the Department of Energy, and all other permits are secured, then construction could start in mid 2013 at the earliest. At that time a new route survey would be needed prior to road strengthening and subsequent commencement of the delivery of materials and components. It is also at this time that we would re-consult the local residents to agree on delivery times to be avoided, as mentioned.</p> <p>RES Southern Africa is a responsible and experienced family owned company who have been sustainably developing wind energy projects for over 25 years. We very much hope that, through ongoing communication and respectful consideration of concerns, the RES Southern Africa Oyster Bay project can have the support of the residents of St Francis Bay and other local villages.</p> <p>Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.</p> <p>Yours faithfully, Duncan Ayling Head of Development, RES Southern Africa</p>
89.	What routes would you be using for construction purposes?	Charmaine Kettledas, comment at focus group meeting Oyster Bay, 20	Kumbuyani Chisoro: We are looking at two different transport routes. These options need to be investigated. These are listed in the draft environmental impact

No.	Issue	Raised by	Response
		September 2011.	assessment report.
90.	We have almost 90% unemployment in Umzamoewethu and education is in crisis. So please look at sustainable jobs and support the local school as one of your projects. The school require a new school building. You are welcome to visit the community.	Charmaine Kettledas, comment at focus group meeting Oyster Bay, 20 September 2011.	RES Southern Africa notes these comments and would evaluate all options of support.
91.	The road conditions are really bad in the area. There are no transport services in the area.	George Williams, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
92.	Please consider all possible community projects when you start developing community projects.	George Williams, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
93.	The community need a good public transport system from Oyster Bay to Humansdorp. There is nothing at the moment.	Patricia Tanda, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
94.	Are you aware that there are transport constraints in the Humansdorp area for accessing your Oyster Bay site?	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	The transport routes are being assessed but have not been finalised. RES Southern Africa will consult with the highways agency and affected communities.
95.	How will you transport the tonnage on the Oyster Bay roads? Are you looking at tar roads?	Nick Bornman, comment at public meeting Oyster Bay, 21 September 2011.	Duncan Ayling: We will consult with the highways authority and upgrade the routes where necessary. The type of road upgrade would be decided through consultation and engineering assessments.
96.	We are concerned about the tonnage your project would haul to Oyster Bay through Humansdorp towards St. Francis Bay, across the Kromme River bridge and then turning right towards Oyster Bay. This is quite a busy road. Is there not an alternative route to be used? I would like to urge	Renee Botha, comment at public meeting Oyster Bay, 21 September 2011.	Duncan Ayling: We are investigating traffic access. The routes have not been finalised. The wind turbines will be imported through Coega port. We are looking at the route along the N2 through Palmietvlei to Oyster Bay. We will ensure the communities are consulted to minimize disruption.

No.	Issue	Raised by	Response
	RES not to use the route from Humansdorp towards St.Francis Bay across the Kromme River. The community of St. Francis Bay will not be happy about the proposed route. The RES Oyster Bay project will increase traffic volumes on a already congested route. This is also the route being proposed by Eskom for its Thyspunt Nuclear facility.		
97.	What access routes are you investigating?	Paul Heyns, comment at focus group meeting Humansdorp , 17 October 2011	Kumbuyani Chisoro: We are currently busy with a traffic impact and access study. We are investigating two routes, to the proposed Oyster Bay site. We are looking at road upgrades to bring all the equipment in.
Cumulative Impacts			
98.	Please note there are about forty kilometres of wind turbines proposed in this area.	Maggie Langlands, comment at public meeting Oyster Bay, 21 September 2011.	Comment noted.
99.	How many wind energy facilities are RES Southern Africa proposing for the area?	Krappie Koen, comment at public meeting Oyster Bay, 21 September 2011.	Only one wind energy facility [in this area].
100.	RES has only one proposed facility and Redcap has three proposed facilities in the area.	Maggie Langlands, comment at public meeting Oyster Bay, 21 September 2011.	Noted. Note that there are also a number of other wind energy facilities being investigated in the Kouga and Kou-kamma Municipal areas.
Primary Health Care			
101.	We need primary health services. We currently have major problems with the mobile clinic. It's quite irregular. We need better primary health care.	George Williams, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
102.	The clinic is a major community need.	Patricia Tanda, comment at focus group meeting Oyster Bay, 20 September 2011.	Comment noted.
Project Ideas			
103.	We would like to establish sustainable aquaculture	Zolani Mayoui, comment at	Noted.

No.	Issue	Raised by	Response
	and mariculture projects in our community. It would create sustainable jobs for a portion of the community.	focus group meeting Oyster Bay, 20 September 2011.	
104.	Are you aware of the other proposed wind energy projects in the area?	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	Yes, RES Southern Africa knows of the other proposed projects and we communicate with the other developers.
Technical			
105.	I would like to see and understand how wind energy facilities work.	Zolani Mayoui, comment at focus group meeting Oyster Bay, 20 September 2011.	There are no modern commercial wind energy facilities in South Africa. There is one wind turbine in Coega near Port Elizabeth, three at Klipheuwel near Durbanville and four at Darling. These are all demonstration projects. The rest are all overseas.
106.	Who will buy your power?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011..	It will be sold to Eskom's Single Buyers Office until the Independent System Market Operator (ISMO) is created.
107.	Where will you join the Eskom grid?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	It is RES Southern Africa's intention to connect into the grid at the Melkhout substation, located outside of Humansdorp.
108.	Where are your power line routes?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	RES Southern Africa is considering three routes, the western route, the central route and the eastern route into the Melkhout substation.
109.	Are you aware that your central route and eastern routes follow the proposed Eskom Thyspunt powerline routes?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	Yes, they are quite close to one another. However, there are some differences in the alignment.
110.	Have you spoken to the farmers along the proposed routes and have you negotiated servitudes?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	All interested and affected parties along the routes have received correspondence regarding the project. A focus group meeting with the farmers along the power line routes was held on 17 October 2011.

No.	Issue	Raised by	Response
111.	Have you spoken to Eskom about the capacity at the Melkhout substation?	Aubrey Marais, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	RES Southern Africa has communicated with Eskom regarding their connection, and Eskom indicated that there is about 160MW capacity at the Melkhout substation.
112.	What port will you use to bring your wind turbines in?	Elvis Olivier, Focus group meeting with the Kouga Local Municipality in Jeffrey's Bay, 20 September 2011.	RES Southern Africa has appointed a transport specialist to study transport routes and points of entry. We are likely to plan importation of turbines via the port of Coega.
113.	Each of the developers cannot build separate power lines. Somewhere power lines need to be consolidated. Will there be partnerships on power line routes.	Charl Du Plessis, comment at public meeting Oyster Bay, 21 September 2011.	At this stage each developer is investigating the power line routes on their own. The developers are not sure if they will be awarded a project. Once projects have been awarded, Eskom will indicate what power line routes they would prefer and it can then be determined if infrastructure can be consolidated. All developers are in contact with Eskom on grid connections and power line routes.
114.	What percentage of the farm is used?	Paul Jooste, comment at public meeting Oyster Bay, 21 September 2011.	We will only use about 2% of the site permanently. Less than 5% will be used during construction.
115.	By how many turbines have you reduced the overall footprint?	Paul Jooste, comment at public meeting Oyster Bay, 21 September 2011.	From 77 to 62 so by fifteen wind turbines.
116.	Is there excellent wind to warrant a wind energy facility in this area?	Paul Jooste, comment at public meeting Oyster Bay, 21 September 2011.	Our monitoring programme has indicated a very good wind resource to warrant establishing a facility in the Oyster Bay area. We are estimating at a capacity factor of thirty to forty percent from this project. This is regarded as a very good wind resource.
117.	Have you received any objections from Eskom on the proposed power line routes?	Alan Wolfronn, comment at focus group meeting Humansdorp , 17 October 2011.	Kumbuyani Chisoro: No we have not. We are in close communications with Eskom about power line routes. I just want to make it clear that Eskom does not know how many wind energy facilities would be approved in this part of the Eastern Cape.

No.	Issue	Raised by	Response
118.	Have you negotiated power line corridors?	Alan Wolfronn, comment at focus group meeting Humansdorp , 17 October 2011.	No corridors have been negotiated or finalised at this stage in the process.
119.	What will the height of your proposed power lines be?	David Masterson, comment at focus group meeting Humansdorp , 17 October 2011.	Kumbuyani Chisoro: About twenty four meters high but this will vary depending on design parameters.
120.	Why build the wind energy facility here? Why not closer to Port Elizabeth?	Stan Clarke, comment at focus group meeting Humansdorp , 17 October 2011	The location of the wind energy facility is based on a good wind resource, willing farmers and an Eskom network in the area with the Melkhout substation to integrate at
121.	Do you cover the base of your wind turbine?	Cassie Lotter, comment at focus group meeting Humansdorp , 17 October 2011	The base will be covered with soil and rehabilitated after construction.
Social Impact			
122.	We would not want three different power lines going through your farm.	Bonnen Biggs, comment at focus group meeting Humansdorp, 17 October 2011.	Comment noted.
123.	Who did the social impact assessment on the power line routes? Do they just make an assumption that farmers would not object against power lines?	Bonnen Bigggs, comment at focus group meeting Humansdorp, 17 October 2011.	The social impact assessment was undertaken by Tony Barbour. Interviews with interested and affected parties are held as part of this process, and they also make use of the comments and responses report compiled as part of the public participation process to inform this study.
124.	If we do not want the power lines over our farms, will they go around us or will they force us?	David Masterson, comment at focus group meeting Humansdorp, 17 October 2011.	Power line routes and servitudes are negotiated and no one can be forced to have a servitude on their property.
125.	Can Eskom force there the proposed 400kV Thyspunt power line through?	David Masterson, comment at focus group meeting	Eskom would have to negotiate with all farmers to register servitude across their farms.

No.	Issue	Raised by	Response
		Humansdorp, 17 October 2011.	
Objections			
126.	<p>Hi</p> <p>I am very much against this. If really needed, the turbines must be on the north side of the gravel road from Palmietvlei - Oyster Bay - Humansdorp.</p> <p>Nothing close to the sea - it will mess up the seafront and corrosion will be too high as well.</p> <p>From the map I see that some of the turbines will be close to the sea, why can't all of them be north of the gravel road?</p>	Deon Marshall, comment by e-mail, 13 September 2011.	<p>Most of the Oyster Bay project turbines are approximately 6km from the coast and the closest turbine is over 4km from the coast.</p> <p>The visual impact from the sea will be very limited or non-existent due to the higher land between the sea and the project.</p> <p>Modern wind turbines are designed to be corrosion resistant.</p>
127.	<p>(Letter sent in Afrikaans – below is the English translation only (Refer to Appendix E for letter): Dear Shawn / Ravisha</p> <p>Let me start off by responding positively; that in principle I am not opposed to the use of wind turbines as an alternative source of power generation. It is considerably cleaner than coal-fired power stations and less dangerous than nuclear power stations. I do however have the following issues with regard the location of the wind turbines:</p> <p>1. Oyster Bay is the last coastal area where stands can still be laid out. If you go and look at the area between Gouritsmond and the Van Staden's River Mouth, there are large areas of land where no coastal stands can be laid out. Personally I think that it would be the ideal area</p>	Koos van Staden, comment by e-mail, 14 September 2011.	<p>Letter sent to the I&AP from RES Southern Africa Dear Mr van Staden</p> <p>Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process and will do my best to answer your questions in below:</p> <p>1. Whilst coastal areas are indeed suitable areas for wind energy generation in terms of wind resource, RES are mindful that the coastal areas are usually of significant environment sensitivity.</p> <p>2. Most of the Oyster Bay project turbines are approximately 6km from the coast and the closest turbine is over 4km from the coast. The visual impact assessment shows that most Oyster Bay residents will not be able to see the wind turbines due to the village being mostly on the side of the hill looking seaward. Residents living on the top of the hill will only be able to</p>

No.	Issue	Raised by	Response
	<p>to use for wind chargers, which can be utilised without causing inconvenience to residents and residential areas.</p> <p>2. Why do you want to scar this one small piece of paradise that still exists in South Africa with giant wind turbines?</p> <p>3. This will have the following consequences: 3.1 The value of my property is going to drop; will your company compensate me for this? At this stage I have a buyer, but he is awaiting the outcome of yours and another company's final plans. 3.2 Any development is associated with an influx of job seekers and associated higher crime figures. This is going to dramatically change the character of Oyster Bay. My children grew up there. Currently I am confined to a wheelchair, but even during the past April holidays, my wife was able to walk to the rocky point and back all alone and without fear. 3.3. Is your company willing to guarantee us that safety that we have been enjoying for the past 20 years? 3.4 Although I reside up here in Gauteng, my insurance company is still happy with an alarm, without any burglar bars or safety doors, which is expected from me here. Should crime increase, this is going to be the requirement there as well. Will your company carry the costs?</p>		<p>see the wind turbines if they face inland.</p> <p>3. 3.1 Studies have been carried out in other countries and there is no proven link between proximity to wind farms and property prices. The following documents may be referred to:</p> <ul style="list-style-type: none"> » What is the impact of wind farms on house prices? by Peter Dent and Dr Sally Sims of Oxford Brookes University, examined three locations in Cornwall. See www.rics.org/Environmentalandlandconsultancy/Energy/Renewableenergy/Wind%20farms%20FiBRE.html » The Effect of Wind Development on Local Property Values, Renewable Energy Policy Project, May 2003, online at www.crest.org/articles/static/1/binaries/wind_online_final.pdf » Impact of Wind Farms on Residential Property Prices – Crystal Rig Case Study, Edinburgh Solicitors' Property Centre, February 2007, available from ESPC. See www.espc.com <p>3.2 You are indeed correct that development is normally associated with an influx of job seekers and associated higher crime figures. This has been identified as an impact within the social impact report. RES will implement mitigation measures to reduce this risk by using the following measures:</p> <ul style="list-style-type: none"> » Except for security, no workers will be housed on site overnight

No.	Issue	Raised by	Response
	<p>4. Noise pollution: anything that turns, whether it is a fan at home, an air conditioner, a windmill, wind charger or whatever, makes a constant noise. The older it gets, the worse it becomes. Say what you like, I was in Europe and spoke to people and heard it myself. Even from as far as 10 km downwind, you can hear the noise. Do you really want to make it unpleasant for us as residents, to give up the tranquillity we currently experience?</p> <p>5. The impact it will have on our avifauna alone is enormous, because over an area of kilometres they would not be able to maintain normal flight patterns.</p> <p>6. My biggest fear is that in Oyster Bay, we have moving land formations. We were built on moving dunes and rock plates. Have you investigated the effect of the constant vibration on that and has it been addressed in your impact studies at all? Should any damage result from this, will you take responsibility for the costs incurred?</p> <p>7. My own house is built on rock, but although I have no cracks in my walls, I have started noticing cracks in my floor tiles. Following wide consultation with environmental experts, engineers, builders, etc., the conclusion was that, in addition to the moving dunes, there are also two rock plates that are experiencing increased pressure from buildings along the edge and the</p>		<ul style="list-style-type: none"> » Approximately 160 semi-skilled and low-skilled workers will be employed during the construction. In order to reduce influx of new people, RES will attempt to source the majority of these workers from existing communities in the local area. » Workers will be closely managed and a code of conduct will be enforced. <p>3.3 RES will do its best to minimise any negative effect on public safety created by the project however RES cannot be held responsible for influences outside of our control.</p> <p>3.4 Should crime be proven to be directly attributed to the RES project then compensation will be considered.</p> <p>4. The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from international guidance on this issue.</p> <p>5. The impact on avifauna is taken seriously by RES and we have voluntarily employed independent bird specialists to monitor the area following the South African best practice guidelines. The results of the monitoring program will be taken into account in the wind farm design.</p> <p>6. Geological specialist studies on the Oyster Bay project</p>

No.	Issue	Raised by	Response
	<p>fact that the rock plates are moving away from each other. I had inspection holes drilled and it indeed seems to be the case. So as a precaution, I have to have holes drilled through the first plate and have 100 mm steel pins inserted 50 cm to 100 cm into the second plate and have it filled up with 1 m2 of reinforced concrete to prevent my entire house from moving forward.</p> <p>8. Have you done any research concerning this, because a constant vibration can accelerate such a movement and could result in Oyster Bay eventually disappearing into the ocean? I would like you to investigate the phenomenon and report back on it comprehensively.</p> <p>9. A tarred road? Unlike the permanent residents, I personally believe that the dirt road has always been one of our biggest assets. In the sense that it kept out undesirable elements and conserved our 8 km of beach for ourselves. A tarred road will bring about an influx of day visitors and there are no toilet facilities or parking available for visitors. Are you going to pay for it?</p> <p>10. To hold an information session there in September will serve virtually no purpose, because we can't be there. 16 – 20 December could perhaps be a better date, because in September, you are going to conduct a meeting with the few residents and maybe a few farmers from the surrounding area. The Ratepayer's Association has no mandate to speak on behalf of</p>		<p>have not identified this as a potential effect. RES have built over 5000MW of wind farms in many countries over the last 25 years and, as far as RES is aware, no reports of this happening have ever been observed.</p> <p>7 & 8 - Geological specialist studies on the Oyster Bay project have not identified this as a potential effect. Further investigation on this has not been recommended by the specialists.</p> <p>9. The roads will need to be surveyed and reinforced where necessary but RES have not suggested that a tar road will be built. Reinforcements and repairs required for the RES project will be paid for by RES.</p> <p>10. A meeting was requested with the I&AP, however with no response. The information session is only one part of the public consultation process which the independent environmental assessment practitioners have carried out for RES. Fair and reasonable opportunity has been provide to all interested and affected parties as per South African regulations. Also, a meeting in late December would not be suitable for many people who would be on holiday elsewhere, and DEA advise public participation during December 2011.</p> <p>11. Comment noted</p>

No.	Issue	Raised by	Response
	<p>the majority of residents, because fewer than half of the owners are members of the Ratepayer's Association.</p> <p>11. Last year, when I heard of your and other companies' plans, I obtained legal opinions. I was far advanced in creating a Section 21 Company, to which various residents were willing to give inputs and to invoice their time and write it off as a donation against tax. Each land owner would receive a free share in the company at payment of 1c and 90% of the resolutions could be taken via the Internet. At that stage I already had 65% of all land owners on record, but unfortunately I had a stroke in Oyster Bay on 16 December and since then my health has deteriorated rapidly.</p> <p>I didn't suffer any brain damage, but I do have serious physical limitations. So far this year I have spent 85 days in various hospitals and then the lightning hit my computer. I was able to retrieve some of the data, but some data has been lost and was not stored on my external hard drive.</p> <p>Needless to say, I have not given the matter any further attention. I have given the concept and the emails I could retrieve as a concept to the Chairperson of the Ratepayers' Association two weeks ago. I got the concept from a friend near Boesmansriviermond. They did away with a Ratepayers' Association and started operating a Non-profit Section 21 Company with great success; much more success and inputs from</p>		

No.	Issue	Raised by	Response
	<p>members and to a great benefit of all residents, since legal experts, financial experts, contractors, etc. suddenly came to the fore to offer their knowledge, skills, etc. in return for tax deductions. Membership was free if you were a registered owner of property in the area. They received more cash donations than Ratepayers' Associations ever could generate with their membership fees and they spoke on behalf of 100% of all owners.</p> <p>Despite the lightning damage, I still have more emails than the Ratepayers' Association and I have given it to them, together with the Draft Constitution that I have compiled.</p> <p>If any attention is paid to the emails, then my unconditional feeling is a definitive 'no'. I think Oyster Bay is too valuable and there are definitely better places to establish this with fewer disadvantages for fewer people.</p> <p>Thanking you in advance. Koos van Staden</p>		
Noise			
128.	<p>I am the owner of 10 Brander Street, Oysterbay.</p> <p>In principle I do not have a problem with a windfarm (it generates clean electricity), as long as it is erected and maintained in accordance with good international practice. So proper assurance must please be given in this regard.</p>	<p>Bram de Klerk, comment by e-mail, 20 September and 07 October 2011.</p>	<p>Dear Mr van Van Niekerk Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process.</p> <p>Generally, although not exclusively, there is no specific set-back distance for wind farms that is strictly specified in various markets around the world. From an acoustics point of view setback does not ensure protection for</p>

No.	Issue	Raised by	Response
	<p>One of the biggest problems with windfarms, is the irritating low frequency noise it generates ,for anybody living nearby.In Europe, as I witnessed again recently,these facilities are never erected close to residential areas ,specifically for this reason.</p> <p>I do not know what an acceptable distance is between a windfarm and a residential area, in international good practise. I would however appreciate it if you could provide me (and other Oysterbay residents) with this information ,as well as the assurance that the intended windfarm is outside the specified good practice distance.</p> <p>Regards, Bram de Klerk</p> <p>Ravisha, Thank you for the letter giving good info wrt the setback criteria used ,as well as the assurance that these criteria were indeed used in the modelling.</p> <p>Regards, A de Klerk</p>		<p>neighbours - a setback of, say XXXm (550m in Ontario, Canada for instance), may be entirely suitable to ensure protection of amenity for “smaller” machines (say 50m rotor diameter), but not sufficient for protection of amenity should larger (say 100m rotor diameter) machines be employed.</p> <p>The obvious solution to this is to make the set-back a function of rotor diameter. In Northern Ireland there is a loose recommendation for 10 times rotor diameter, which is what RES typically adhere to in initial layout design. However the acceptability of a project cannot be guaranteed through this means either because:</p> <ol style="list-style-type: none"> 1. The specific turbine might be noisy (or quiet) for its size 2. The noise incident upon a property will be dependent upon the number of machines in close proximity to it – i.e. the context and layout of the wind farm. A house which is XXXm from one turbine (maybe the wind farm layout is like a line) does not receive the same noise incident upon it as a house which is XXXm from 5 turbines (essentially broadside, or encircling, the house). <p>Therefore the concept of setback is of more relevance to visual dominance aspects or as a guide to ensuring acoustic amenity. The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from</p>

No.	Issue	Raised by	Response
			international guidance on this issue.
Visual Impact			
129.	I notice that on almost every impact chart, the long thin portion included to the South of the proposed development is indicated as the most Sensitive and having the most possible adverse effect on the environment. In addition, I suspect it is this area that will be visible from the Town of Oysterbay as well. Why is this piece of land not taken off from the site?	Jan Boeyens, comment by e-mail, 13 September 2011.	The Farm Klippedrift is still included in the project documents because it is part of the original agreement with the landowner, even though no wind turbines are planned on this farm portion.
Birds & Bats			
130.	<p>With regard to the cumulative impact of wind farms on bird habitat, the Trust points out that the Oyster Bay project is one of ten wind projects proposed for the Kouga area. Kouga is the nation's heartland for the Denham's Bustard and is rich in other Red Data bird species that are vulnerable to turbine and power line collision and to habitat displacement</p> <p>While it is unlikely that all ten facilities will be constructed immediately, it is not impossible that they will all eventually go ahead. This will have a serious cumulative effect and it is essential that sufficient habitat be preserved to ensure these species' continued survival.</p> <p>This applies not only to Kouga, but to many other localities around the country.</p> <p>As a member of the South African Wind Energy Association, the developer is urged to actively motivate for the association to create a fund for</p>	Maggie Langands, St Francis Kromme Trust, comment by e-mail, 24 September 2011.	<p>The avifauna study considered the cumulative effect of the authorised wind projects in the Overberg region.</p> <p>RES Southern Africa welcomes the suggested possible mitigation for cumulative impacts. As this is a strategic level mitigation RES Southern Africa would suggest that it should be discussed in the SAWEA/BAWESG working group which is the dedicated forum for strategic topics such as these. RES Southern Africa will ask for it to be placed on the agenda of the next SAWEA meeting.</p>

No.	Issue	Raised by	Response
	<p>the preservation of the habitat of affected bird species, and for each project actually constructed to contribute a meaningful amount to the fund, sufficient to enable the fund to buy entire farms if necessary for habitat preservation.</p>		
131.	<p>Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e.</p> <p>“A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa...”</p> <p>Only in this way will sufficient data be accumulated to assess accurately the level of impact associated with renewable energy facilities.</p>	<p>Maggie Langlands, St. Francis Kromme Trust, comment by letter, 19 July 2011.</p>	<p>It is agreed that the impacts of wind energy facilities on birds and bats are unknown in South Africa, this is because no large scale wind energy facility exists in the country. In the absence of this knowledge the wind energy facility development will be guided by the EIA specialists’ studies and by international best practice. Note that the undertaking of bird monitoring at proposed wind energy facility sites within South Africa is currently considered as good practice and is not a legal requirement. This will remain the case until guidelines are adopted and gazetted by the regulating authorities.</p> <p>RES Southern Africa is committed to the responsible and sustainable development of wind energy and their development manager is the South African Wind Energy Association’s board member who is working collaboratively with the BAWESG on the further development of the bird monitoring guidelines and other strategic bird, bat and wind energy issues. Note that RES Southern Africa has already initiated a bird monitoring programme on their site to consider bird presence and movement on their proposed development site for a period of one year as per the BAWESG guidelines. Bat sensitivities will be assessed in the EIA studies and if monitoring is required it will be implemented pre-construction. This will fulfil any requirements for pre-construction monitoring as proposed by the guidelines for bird monitoring, as well as any requirement which</p>

No.	Issue	Raised by	Response
			may be included within an Environmental Authorisation for the project (should it be authorised).
Decommissioning Sureties			
132.	Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, including concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.	Maggie Langlands, St. Francis Kromme Trust, comment by letter, 19 July 2011.	<p>Provision for the possible requirement for financial provision for rehabilitation is made within the EIA Regulations (refer to Regulation 33 (g)(v). This will be considered within the drafting of the Environmental Management Programme for the project. In addition, National DEA will have to consider the request for financial surety as part of their decision-making for the EIA. However, it is anticipated that the wind energy facility will have a lifespan of up to 20-25 years. The current EIA Regulations requires a separate environmental assessment for decommissioning of the facility at the end of the project lifespan. Any decommissioning activities will be required to comply with the legislation relevant at the time.</p> <p>RES Southern Africa is fully owned by RES Group which is an established, family owned company with over 1000 employees worldwide. RES has been developing, constructing and operating wind farms for over 25 years and is one of the world's leading international developers. RES has an impressive track record of producing successful wind energy facilities of very high quality.</p>
The Adjacent RedCap Wind Energy Facility			
133.	Thanks for your time on the phone last week. As indicated Red Cap has an Environmental Authorisation for the Red Cap Kouga Wind Farm which borders on the East of the wind farm indicated in the Oyster Bay Wind Farm (DEA Ref No 12/12/20/1585) for which you are the EAP. As	Lance Blaine (RedCap), comment received on 14 July 2011 via email.	<p>Mr Blaine has been registered on the project database.</p> <p>RES Southern Africa response: RES has significant experience at designing and constructing wind farms and in particular has a considerable understanding of different wind regimes</p>

No.	Issue	Raised by	Response
	<p>we are adjoining neighbours and the development on the Oyster Bay wind farm may impact on our wind farm I would like to be registered as an IAP for this project.</p> <p>Furthermore, I have attached the layout of our central cluster for our wind farm (this is the cluster that is on the Eastern Boarder of the Oyster Bay wind farm) which was approved in our EA. Please will you make sure that our approved layout, and particularly the turbines along this boundary, are taken account of in your layout determination and specifically with regard to any impact on the efficiencies of our turbines. If you require any further information in this regard please do not hesitate to contact me.</p> <p>Please confirm that I will be registered as an IAP and that this information will be taken account of in refining the layout on this proposed wind farm.</p>		<p>and turbine manufacturer siting rules. Taking into account this knowledge and making use of software that has been developed to simulate the impacts of wakes on energy yield as well as turbine loading RES is designing the Oyster Bay turbine layout to minimise the effects on the adjacent Redcap turbines.</p> <p>Specifically, taking into account site constraints, RES will be using a minimum spacing of 5 rotor diameters based on our maximum turbine envelope in the prevailing (bi-directional east west) wind directions, 3 rotor diameters for non-predominant directions , this will ensure any impacts on yield from increased turbulence and velocity deficits are kept to a minimum. The turbine layout would then be run with the predicted wind climate through software that has been based on the IEC standard 61400 (Edition 3 amended) that simulates the wake added turbulence on each turbine and a corresponding fatigue calculation to ensure that none of the turbines (both within the Oyster Bay layout and Redcap layout) would be at risk of manufacturer imposed curtailment.</p> <p>Taking into account the above steps that RES are taking in their layout design there should be no significant impact on the operation of the Redcap turbines.</p> <p>Please let me know if you have any questions or further concerns.</p> <p>Kind regards, Duncan Ayling</p>

No.	Issue	Raised by	Response
134.	<p>Dear Duncan,</p> <p>The Red Cap Kouga Development Company is looking forward to having RES's and its own wind farms working side by side with each other. However, we are still concerned with a few of your proposed turbine positions due to the impact they will likely have on the efficiencies of some of our turbine locations as approved in our Environmental Authorization. In this regard we are concerned with your turbines numbered: 59, 60, 61, 72, 74 & 77 and their impact on our turbines numbered: 70, 71, 72 and 74. Please will you provide us with the technical verification of the anticipated impacts on our efficiencies so that we have a framework around which we can discuss this further? We look forward to getting the required information and working with you to come to a suitable solution.</p> <p>Best Regards,]Gerald Ehlers</p>	<p>Gerald Ehlers, comment by e-mail, 14 October 2011.</p>	<p>Dear Gerald,</p> <p>Thank you for your email. RES Southern Africa is also keen for our projects to both be successful and to eliminate or minimise any negative effects on each other. Firstly, I just wanted to check that you had received our previous correspondence which is attached to this email*. We hope the information within can give us the framework around which to discuss this further. I propose that we organise a conference call including our respective technical teams to discuss the specific separation distances between the turbines that you mention that are of concern. Please be assured that RES Southern Africa is committed to finding a mutually agreeable solution.</p> <p>Kind regards,</p> <p>Duncan Ayling Head of Development</p> <p><i>[*See correspondence in previous response: Comment 133]</i></p>

Please address any comments to Shawn Johnston at the above address.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS: PROPOSED RES SOUTHERN AFRICA OYSTER BAY WIND ENERGY FACILITY

Venue: Kouga Municipality – Jeffreys Bay
Date: Tuesday, 20 September 2011
Time: 09h00 – 10h00

WELCOME AND INTRODUCTION

Shawn Johnston, the process facilitator welcomed all the stakeholders present and thanked the officials of the Kouga Municipality for the opportunity to meet and clarify the RES Southern Africa Oyster Bay project. He introduced the RES Southern Africa and Savannah Environmental team members. Shawn Johnston then requested all the interested and affected parties present to introduce themselves.

MEETING ATTENDEES

Name	Organisation & Position
Shawn Johnston	Sustainable Futures ZA- Public Participation Specialist
Duncan Ayling	RES Southern Africa
Ravisha Ajodhapersadh	Savannah Environmental
Kumbuyani Chisoro	RES Southern Africa
Eksteen De Lange	Kouga Municipality
Sunette Maree	Kouga Municipality
Elvis Olivier	Kouga Municipality
Patrick Kota	Kouga Municipality
Thandeka Maseti	Kouga Municipality
Gcobise Dedamasi	Kouga Municipality
Aubrey Marais	Kouga Municipality

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Duncan Ayling from RES Southern Africa introduced the proposed Oyster Bay Wind Energy Facility project. Ravisha Ajodhapersadh from Savannah Environmental then clarified the environmental impact assessment study.

DISCUSSION SESSION

Question / Comment	Response
<p>Elvis Olivier: Thank you for the opportunity to hear about your project. We were not aware of this project. The two projects that have been presented to the Kouga Municipality are the Redcap and Mainstream wind energy facilities.</p>	<p>Shawn Johnston: Thank you for the opportunity to clarify the project. The environmental impact assessment was started in 2010 and we are now in the environmental impact assessment phase.</p>
<p>Elvis Olivier: Was the project information sent to the Kouga Municipality?</p>	<p>Shawn Johnston: Yes it was sent to the office of your previous municipal manager the the previous ward councillor for Oyster Bay. The draft environmental impact assessment report was also sent on to the new ward councillor and the new municipal manager. We have the draft report on CD which we can make available to the executive team and portfolio committee councillors here in this meeting.</p>
<p>Sunette Maree: Are you aware that you would have to apply for rezoning of your site?</p>	<p>Kumbuyani Chisoro: Yes we are aware and have employed Setplan to conduct the rezoning process.</p>
<p>Sunette Maree: Are you aware that the Cacadu District Municipality have drafted guidelines for renewable energy facilities and development and that this process still needs to be finalised and that no rezoning would be approved.</p>	<p>Duncan Ayling: Yes we have been following the Cacadu District Municipality draft guidelines process for renewable energy in the Eastern Cape. The draft documents have been sent to us. We await the opportunity to comment on it once it becomes available. It is our understanding that we can prepare a land rezoning which can be submitted after we receive the environmental authorisation</p>
<p>Sunette Maree: Are you aware that the rezoning application needs to be submitted to the Kouga Municipality. We are waiting on the renewable energy guidelines and the alignment of the</p>	<p>Duncan Ayling: Yes we are aware of the rezoning process and we will clarify all concerns flagged with Setplan.</p>

Question / Comment	Response
structures plan for our municipality.	
Patrick Kota: How many jobs will your project generate?	Kumbuyani Chisoro: At the peak of construction about two hundred jobs with a range of other spin offs for the local economy.
Patrick Kota: Are you working on a social responsibility initiative as put forward by the other developers?	Duncan Ayling: Yes we are, our social responsibility initiative and options for various community projects need to be finalised in conjunction with the local community and key stakeholders.
Aubrey Marais: Who will buy your power?	Duncan Ayling: It will be sold to Eskom's Single Buyers Office until the ISMO is created.
Aubrey Marais: Where will you join the Eskom grid?	Kumbuyani Chisoro: We hope to connect into the grid at the Melkhout substation outside of Humansdorp.
Aubrey Marais: What are your power line routes?	Kumbuyani Chisoro: We are looking at three routes, the western route, the central route and the eastern route into the Melkhout substation.
Aubrey Marais: Are you aware that your central route and eastern routes follow the proposed Eskom Thyspunt powerline routes?	Kumbuyani Chisoro: Yes, it's quite close, however there are some differences in the alignment.
Aubrey Marais: Have you spoken to the farmers along the proposed routes and have you negotiated servitudes?	Kumbuyani Chisoro: We have included and communicated the project with all interested and affected parties along the routes. We will do a special focus group meeting with all interested and affected land owners along the alternative routes. They will be invited through the Tsitsikamma East Farmers Association as well.
Aubrey Marais: Have you spoken to Eskom about the capacity at the Melkhout substation?	Kumbuyani Chisoro: Yes we have and Eskom indicated that there is about 160MW capacity at the Melkhout substation.
Sunette Maree: Are you aware that your eastern power line alignment goes through the expansion of the town of Humansdorp to the east?	Shawn Johnston: No we are not aware. Can you provide us with more information on the Humansdorp expansion plan?
Sunette Maree: The town will be growing eastward along the Humansdorp-Jeffrey's bay corridor.	Shawn Johnston: Thank you for flagging this issue with the team present.
Elvis Olivier: It is crucial that Savannah look at the integrated development plan and our structures plan for the area and the proposed growth of all	Shawn Johnston: Comment noted.

Question / Comment	Response
surrounding towns.	
Elvis Olivier: What port will you use to bring your wind turbines in?	Duncan Ayling: We have appointed a transport specialist to study transport routes and points of entry. We are likely to plan importation of turbines via the port of Coega.
Elvis Olivier: Are you aware that there are transport constraints in the Humansdorp area for accessing your Oyster Bay site?	Duncan Ayling: The transport routes are being assessed but have not been finalised. We will consult with the highways agency and affected communities.
Elvis Olivier: We need to ensure that we have regular communication between RES and the Kouga municipality on the project.	Shawn Johnston: Comment noted.
Shawn Johnston: I would like to urge members and councillors present to review the draft environmental impact assessment report and provide comments to the team.	Elvis Olivier: We will review and comment and we would have to deal with the projects rezoning application.
Elvis Olivier: Please feel free to clarify any issues you might have with the key officials and portfolio committee members present. We have provided you with our contact details.	Shawn Johnston: We appreciate your input and the concerns you have raised.

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all for the opportunity to clarify their concerns and encourage all to review the draft environmental impact assessment report and provide the team with their inputs.

The meeting ended at 10h00.

Name	Organisation & Position
Rene Botha	St. Francis Kromme Trust
Brendan Hinds	Setplan
Thandisizwe Mbiko	Oyster Bay Fishing Project
Nkosiyawo Vuthuza	Oyster Bay Reebokrant Trust
Jo-Anne Thomas	Savannah Environmental

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Duncan Ayling from RES Southern Africa introduced the proposed Oyster Bay Wind Energy Facility project. Ravisha Ajodhapersadh from Savannah Environmental then clarified the environmental impact assessment study.

DISCUSSION SESSION

Question / Comment	Response
Joseph Williams: Please clarify the comment on job creation?	Duncan Ayling: RES has built wind farms around the world and we are looking at approximately two hundred jobs during the construction phase. It will consist of skilled, semi skilled and low skilled jobs. The largest amount of localised jobs would be semi and low skilled jobs. In the operations phase over the 20 years there would be approximately forty five full-time jobs associated with the project and possibly seventy part-time jobs. The social impact report considered it as a low positive impact. We are looking at community benefits and skills training as it is common for RES to do this but also because it is a requirement by the South African Government on all renewable energy projects.
Charl du Plessis: Were will the labour force be housed?	Duncan Ayling: The plan is to accommodate most staff in surrounding towns and villages. No accommodation will be provided on the property.

Question / Comment	Response
<p>Charl du Plessis: Each of the developers cannot build separate power lines. Somewhere power lines need to be consolidated. Will there be partnerships on power line routes.</p>	<p>Kumbuyani Chisoro: At this stage each developer is investigating the routes on their own. The developers are not sure if they will be awarded a project. Once projects have been awarded, Eskom will indicate what power line routes they would prefer. All developers should be in contact with Eskom on grid connections and power line routes.</p>
<p>Paul Jooste: What percentage of the farm is used?</p>	<p>Duncan Ayling: We will only use about 2% of the site permanently. Less than 5% will be used during construction.</p>
<p>Paul Jooste: By how many turbines have you reduced the overall footprint?</p>	<p>Duncan Ayling: From 77 to 62 so by fifteen wind turbines.</p>
<p>Paul Jooste: Is there excellent wind to warrant a wind energy facility in this area.</p>	<p>Duncan Ayling: Our monitoring programme has indicated a very good wind resource to warrant establishing a facility in the Oyster Bay area. We are estimating at a capacity factor of thirty to forty percent from this project. This is regarded as a very good wind resource.</p>
<p>Paul Jooste: Wind cannot provide base load, however nuclear can provide it.</p>	<p>Shawn Johnston: Comment noted, it all about getting the South African energy mix corrected.</p>
<p>Nick Bornman: How will you transport the tonnage on the Oyster Bay roads? Are you looking at tar roads?</p>	<p>Duncan Ayling: We will consult with the highways authority and upgrade the routes where necessary. The type of road upgrade would be decided through consultation and engineering assessments.</p>
<p>Maggie Langlands: Please note there are about forty kilometres of wind turbines in this area if all the proposed wind energy facilities are built in this area.</p>	<p>Comment noted.</p>
<p>Krappie Koen: How many wind energy facilities are RES Southern Africa proposing for the area?</p>	<p>Shawn Johnston: Only one wind energy facility.</p>
<p>Maggie Langlands: RES has only one proposed facility and Redcap has three proposed facilities in the area.</p>	<p>Shawn Johnston: Thank you for clarifying the other projects for Mr. Koen in the area. Please note there are a number of wind energy facilities being investigated in the Kouga and Kou-kamma Municipal areas.</p>
<p>Maggie Langlands: Will RES Oyster Bay be bidding in the first round in November 2011?</p>	<p>Kumbuyani Chisoro: No, RES Southern Africa will not bid in November 2011.</p>

Question / Comment	Response
<p>Thandisizwe Mbiko: What will RES offer the community and the youth of Oyster Bay in the form of jobs? Will you assist youth with a high school certificate? We want to see local people used and employed.</p>	<p>Duncan Ayling: We are looking at various options. We need to clarify it as part of our bidding process. We are looking at empowerment schemes, for example we are currently looking at a possible partnership with a BBEE company called Soul City, however this needs to be clarified. We need to clarify what the needs of the local community are and we need the community's input in this matter. We cannot do anything before we have a project in hand. We are keen to investigate shadowing and training schemes and welcome input from the local communities.</p>
<p>Zandisile Ndamase: The environmental impact assessment process is taking too long. We as a community support the project the environmental impact assessment process should not stop the project, it should be much faster and it should approve the project.</p>	<p>Shawn Johnston: Comment noted, we need to follow the process. There is no way of rushing a project. It is important Mr. Ndamase that you add your comments to the reply forms and indicate how you feel about the project. If it is positive or negative you need to indicate it.</p>
<p>Charmaine Kettledas: When will RES provide skills training?</p>	<p>Shawn Johnston: Once RES know they have a successful project.</p>
<p>Thandisizwe Mbiko: Can agriculture and the wind energy facility be integrated in this area?</p>	<p>Duncan Ayling: Yes it can. Agriculture can continue under the operating turbines.</p>
<p>Rene Botha: We are concerned about the tonnage your project would haul to Oyster Bay through Humansdorp towards St. Francis Bay, across the Kromme River bridge and then turning right towards Oyster Bay. This is quite a busy road. Is there not an alternative route to be used? I would like to urge RES not to use the route from Humansdorp towards St. Francis Bay across the Kromme River. The community of St. Francis Bay will not be happy about the proposed route. The RES Oyster Bay project will increase traffic volumes on an already congested route. This is also the route being proposed by Eskom for its</p>	<p>Duncan Ayling: We are investigating traffic access. The routes have not been finalised. The wind turbines will be imported through Coega port. We are looking at the route along the N2 through Palmietvlei to Oyster Bay. We will ensure the communities are consulted to minimize disruption.</p> <p>Rene Botha: We are thinking of what is the best routes to be used without impacting and upsetting the St. Francis Bay community.</p> <p>Shawn Johnston: Please ensure that you submit your detailed comments on haul roads to the proposed Oyster Bay wind energy facility site.</p>

Question / Comment	Response
Thyspunt Nuclear facility.	
Zandisile Ndamase: Will RES support students studying engineering, project management and aspects relating to wind energy facilities?	Duncan Ayling: RES Southern Africa are looking at various options to support the local community but we cannot commit to providing support until we have an approved project.

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all for the opportunity to clarify their concerns and encourage all to review the draft environmental impact assessment report and provide the team with their inputs.

The meeting ended at 19h30.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS: PROPOSED RES SOUTHERN AFRICA OYSTER BAY WIND ENERGY FACILITY

Venue: Humansdorp Boutique Hotel Conference Room

Date: Monday, 17 October 2011

Time: 14h00 – 15h00

WELCOME AND INTRODUCTION

Shawn Johnston, the process facilitator welcomed all the Tsitsikamma East Framers Association farmers and other interested and affected parties to the special focus group meeting for landowners. He introduced the RES Southern Africa and Savannah Environmental team members. Shawn Johnston then requested all the interested and affected parties present to introduce themselves and state their interest.

MEETING ATTENDEES

Name	Organisation & Position
Shawn Johnston	Sustainable Futures ZA- Public Participation Specialist
Alan Wolfronn	WKN-Windcurrent
Bongani Khupe	Savannah Environmental
Kumbuyani Chisoro	RES Southern Africa
Cassie Lotter	Farmer & WKN-Windcurrent
Stan Clarke	Woodlands Farm
Paul Heyns	Woodlands Fram
Bonnen Biggs	Suiderland Farm
K. Strydom	Strydom Boerdery
J.P. Stynberg	SBT
David Masterson	Broadlands Farm
J.C. Vermaak	Rosenhof Boerdery
Charl du Plessis	Klawerplaas

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Kumbuyani Chisoro from RES Southern Africa introduced the proposed Oyster Bay Wind Energy Facility project. Bongani Khupe from Savannah Environmental then clarified the environmental impact assessment study.

DISCUSSION SESSION

Question / Comment	Response
Alan Wolfronn: Have you received any objections from Eskom on the proposed power line routes?	Kumbuyani Chisoro: No we have not. We are in close communications with Eskom about power line routes. I just want to make it clear that Eskom does not know how many wind energy facilities would be approved in this part of the Eastern Cape. Any grid route finalisation would only be confirmed once there are approved projects.
Alan Wolfronn: Have you negotiated power line corridors?	Shawn Johnston: No corridors have been negotiated and finalised.
Bonnen Biggs: We would not want three different power lines going through your farm.	Shawn Johnston: Comment noted.
Bonnen Biggs: Who did the social impact assessment on the power line routes? Do they just make an assumption that farmers would not object against power lines?	Shawn Johnston: The social impact assessment team are responsible for visiting with all farmers along the power line route and to interview them and gather information for landowners and then publish their findings in the social impact assessment report.
David Masterson: If we do not want the power lines over our farms, will they go around us or will they force us?	Shawn Johnston: Power line routes and servitudes are negotiated and no one can be forced.
David Masterson: What will the height of your proposed power lines?	Kumbuyani Chisoro: About twenty four meters high but this will vary depending on design parameters.
David Masterson: Can Eskom force there the proposed 400kV Thyspunt power line through?	Shawn Johnston: Eskom would have to negotiate with all farmers to register servitude across their farms.
Stan Clarke: Why build the wind energy facilities here? Why not closer to Port Elizabeth?	Shawn Johnston: You have a good wind resource, willing farmers and an Eskom network in the area with the Melkhout substation to integrate at.
Stan Clarke: What are the major	Shawn Johnston: Road access, quality of roads,

Question / Comment	Response
concerns raised on the project?	power line routes, job creation and visual impact.
Paul Heyns: What access routes are you investigating?	Kumbuyani Chisoro: We are currently busy with a traffic impact and access study. We are investigating two routes, to the proposed Oyster Bay site. We are looking at road upgrades to bring all the equipment in.
Cassie Lotter: Do you cover the base of your wind turbine?	Kumbuyani Chisoro: Yes the base will be covered with soil and rehabilitated after construction.
Johan Vermaak: I have seen wind turbines in Europe and they are very close to homes and the noise levels are very low.	Shawn Johnston: Comment noted.
Johan Vermaak: I want to urge the farmers in the area to welcome and support wind energy facilities in the area. The wind industry will provide growth and great economic opportunities to the farming community and surrounding towns and villages.	Shanw Johnston: Comment noted.

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all for the opportunity to clarify their concerns and encourage all to review the draft environmental impact assessment report and provide the team with their inputs.

The meeting ended at 15h00.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS: PROPOSED RES SOUTHERN AFRICA OYSTER BAY WIND ENERGY FACILITY

Venue: Nick's Oyster Bay Bed and Breakfast Conference Room
Date: Tuesday, 20 September 2011
Time: 14h00 – 15h00

WELCOME AND INTRODUCTION

Shawn Johnston, the process facilitator welcomed all the stakeholders present for the opportunity to meet and clarify the RES Southern Africa Oyster Bay project with the Oyster Bay Ward Councillor and members of Umzamoethu Community at Oyster Bay. He introduced the RES Southern Africa and Savannah Environmental team members. Shawn Johnston then requested all the interested and affected parties present to introduce themselves and state their interest.

MEETING ATTENDEES

Name	Organisation & Position
Shawn Johnston	Sustainable Futures ZA- Public Participation Specialist
Duncan Ayling	RES Southern Africa
Ravisha Ajodhapersadh	Savannah Environmental
Kumbuyani Chisoro	RES Southern Africa
George Williams	Umzamoethu Community Representative
Zolani Mayoui	Ward Councillor Oyster Bay Ward 1
Charmaine Kettledas	SGB Sandwater School, ANC Womens League Umzamoethu
Patricia P. Tanda	Umzamoethu Resident

APOLOGIES

No apologies were received.

BACKGROUND & TECHNICAL ASPECTS REGARDING THE PROPOSED PROJECT

Duncan Ayling from RES introduced the proposed Oyster Bay Wind Energy Facility project. Ravisha Ajodhapersadh from Savannah Environmental then clarified the environmental impact assessment study.

DISCUSSION SESSION

Question / Comment	Response
Zolani Mayoui: Thank you for the opportunity to hear more about the RES Southern Africa Oyster Bay Wind Energy Facility project.	Shawn Johnston: Thank you for the time you have made available to clarify the project.
Zolani Mayoui: Is the Reebokrant, the trust farm part of the project? Are they partners?	Duncan Ayling: Yes the Reebokrant trust is part of the RES Southern Africa Oyster Bay project.
Zolani Mayoui: I will make sure the leadership of Reebokrant attend the public meeting on the 21 September 2011. I will speak to Mr. Zeppe the chairman of Reebokrant trust.	Shawn Johnston: Thank you for the clarity provided. We welcome the attendance of all key stakeholders.
Zolani Mayoui: How many people are you looking at employing?	Kumbuyani Chisoro: We are looking at employing about two hundred workers at the height of the construction phase. We are looking at local contractors and using local workers on the project. Community benefits will range from local accommodation providers, local contractors, influx of funding into the community. RES Southern Africa are looking at various localised community benefits that would benefit the community directly. This needs to be developed further. This might include small community projects, however it needs to be clarified. We need to be very clear, however, that we cannot promise anything at this stage because we do not have an approved project yet. We can only plan and discuss possible community benefit schemes which could happen if our wind project becomes approved.
Zolani Mayoui: What percentage of people would be localised?	It depends on how much is available locally.
Charmaine Kettledas: What routes would you be using for construction	Kumbuyani Chisoro: We are looking at two different transport routes. These options need to

Question / Comment	Response
purposes?	be investigated. These are listed in the draft environmental impact assessment report.
Zolani Mayoui: The community at Uzamowethu would be interested in sustainable jobs in the area. We will take the project to the community and inform them about it.	Shawn Johnston: We welcome you informing the community you represent.
Charmaine Kettledas: We have almost 90% unemployment in Umzamowethu and education is in crisis. So please look at sustainable jobs and support the local school as one of your projects. The school require a new school building. You are welcome to visit the community.	Shawn Johnston: Thank you for the comment. Kumbuyani Chisoro: Thank you for highlighting the community needs and the education needs of the school, we note your comments and would evaluate all options of support.
George Williams: We need primary health services. We currently have major problems with the mobile clinic. Its quite irregular. We need better primary health care.	Kumbuyani Chisoro: Comment noted.
George Williams: The road conditions are really bad in the area. There are no transport services in the area.	Kumbuyani Chisoro: Comment noted.
George Williams: Please consider all possible community projects when you start developing community projects.	Kumbuyani Chisoro: Comment noted.
Patricia P. Tanda: The community need a good public transport system from Oyster Bay to Humansdorp. There is nothing at the moment.	Kumbuyani Chisoro: Comment noted.
Patricia P. Tanda: The clinic is a major community need.	Shawn Johnston: Comment noted.
Shawn Johnston: You have indicated a number of community needs and possible community projects. As indicated by Duncan Ayling from RES Southern Africa, please inform the team at RES Southern Africa of options for projects they could consider as projects.	Zolani Mayoui: Comment noted we look forward to engaging with RES Southern Africa on project options.
Zolani Mayoui: We would like to	Shawn Johnston: Point noted.

Question / Comment	Response
<p>establish a sustainable aquaculture and mariculture projects in our community. It would create sustainable jobs for a portion of the community.</p>	
<p>Zolani Mayoui: Are you aware of the other proposed wind energy projects in the area?</p>	<p>Duncan Ayling: Yes we know of the other proposed projects and we speak to each other.</p>
<p>Zolani Mayoui: Would it be possible for the different wind energy project developers to form a partnership and upgrade the road system in the area? Can you build a tar road?</p>	<p>Kumbuyani Chisoro: Nobody knows if their project will be successful. It is too early to establish partnerships with other developers. If our project is successful, we will need to upgrade the roads to an acceptable standard.</p>
<p>Zolani Mayoui: We support the project and would like to see the approval of the project as soon as possible. We hope that the environmental impact assessment will not delay the project.</p>	<p>Shawn Johnston: Comment noted.</p>
<p>Zolani Mayoui: We will help you to support your project and we will inform the community and make sure they all register as interested and affected parties.</p>	<p>Duncan Ayling: We note your support and welcome it.</p>
<p>Zolani Mayoui: We need the jobs, the community is in crisis and need projects of this nature in the Oyster Bay area.</p>	<p>Shawn Johnston: Comment noted.</p>
<p>Zolani Mayoui: I would like to see and understand how wind energy facilities work.</p>	<p>Shawn Johnston: There are no modern commercial wind energy facilities in South Africa. There is one wind turbine at Coega near Port Elizabeth, three at Klipheuwel near Durbanville and four at Darling. These are all demonstration projects. The rest are all overseas.</p>
<p>Zolani Mayoui: Please inform us of your social responsibility programme as its been developed. We need to understand the type of support you need from our communities.</p>	<p>Duncan Ayling: We would like to look at long term partnerships with the local community and would keep the communication open with your team.</p> <p>Ravisha Ajodhapersadh: We would like to make sure the entire project is communicated to the entire community, provide all interested and affected parties with information and get feedback on the draft environmental impact</p>

Question / Comment	Response
	assessment report.
Zolani Mayoui: I will inform the community and invite them to attend the public meeting on the 21 September 2011.	Shawn Johnston: Comment noted.
Charmaine Kettledas: Please make sure you send the reply forms for us to ensure the local community to register.	Shawn Johnston: I will liaise to ensure the reply forms are sent to the community.

WAY FORWARD AND CLOSURE

Shawn Johnston thanked all for the opportunity to clarify their concerns and encourage all to review the draft environmental impact assessment report and provide the team with their inputs.

The meeting ended at 15h00.

September 2011

Dear Stakeholder

**PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY
ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/1585)**

**ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
NOTICE OF PUBLIC REVIEW PERIOD FOR THE DRAFT EIA REPORT &
PUBLIC MEETING**

Renewable-Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA). It is proposed for a cluster of up to 80 wind turbines to be constructed over an area of approximately 23 km² in extent. The nature and extent of this facility is explored in more detail in this document.

The proposed turbines would be appropriately located on the identified site, which covers an area of ~23 km². The broader site is proposed to accommodate both the wind turbines as well as the associated infrastructure which is required for such a facility including:

UNIT 606, 1410 EGLIN OFFICE PARK, 4 EGLIN ROAD, SUNNINGHILL, GAUTENG
PO BOX 148, SUNNINGHILL, 2157, GAUTENG
TEL: +27 (0)11 234 6621 • FAX: +27 (0)86 684 0547 • E-MAIL: INFO@SAVANNAHSA.COM
WWW.SAVANNAHSA.COM

DIRECTORS: KM JODAS • J THOMAS • M MATSABU
COMPANY REGISTRATION NO.: 2006/000127/07
VAT REGISTRATION NO.: 4780226736

- » **Wind turbines** (between 80 – 120m hub height) and **concrete foundations** to support them.
- » **Cabling** between the turbines, to be laid underground where practical.
- » **Internal access roads** to each turbine.
- » **Workshop area** for control, maintenance and storage.
- » An on-site **substation** to facilitate the connection between the wind energy facility and the grid.
- » New overhead **power line** to connect to Eskom's existing Melkhout (132/66kV) substation, which is located approximately 20km from the site.

INVITATION FOR PUBLIC REVIEW OF THE DRAFT EIA REPORT

In accordance with the EIA Regulations, a Draft EIA Report is being compiled and will be available for public review and comment by Interested and Affected Parties (I&APs) and stakeholders. You are invited to review and comment on the draft report at the following locations:

- » Oyster Bay Library
- » Humansdorp Public Library
- » St Francis Bay LibrarY
- » www.res-sa.com (follow the link to Our Projects)
- » www.savannahSA.com/projects

The period for public review is from **14 September 2011 to 14 October 2011**. Please submit written comment to Savannah Environmental no later than 14 October 2011. All comments received will be included in the Final Scoping Report, which will be submitted to DEA for their consideration and decision.

Comments can be made as written submission via fax, post or e-mail to Shawn Johnston.

PUBLIC MEETING

In order to facilitate comments on the draft EIA Report, a public meeting will be held during the public review period. All interested and affected parties are invited to attend a public meeting:

DATE: **20 September 2011**
TIME: **18:00**
VENUE: **Oyster Bay Community Hall**

The aim of the public meeting is to provide you with more information regarding the proposed project (including technical details, project process and timeframes etc.), to provide a summary of the findings of the EIA undertaken, to invite

comment on the proposed project, and to further discuss possible issues of specific concern to you which may need to be investigated and managed through the EIA process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Yours sincerely,

Shawn Johnston
Process Facilitator

Dear Stakeholder,

My name is Shawn Johnston the public participation facilitator appointed by Savannah Environmental to assist with the Environmental Impact Assessment public participation phase for the proposed RES Oyster Bay Wind Energy Facility.

The environmental impact assessment practitioner from Savannah Environmental is:

Ravisha Ajodhapersadh

Savannah Environmental (Pty) Ltd
Unit 606, 1410 Eglin Office Park
14 Eglin Road
Sunninghill
2157

Tel: +2711 234-6621
Fax: +2786 684 0547
Cell: +2784 300 0660
Email: ravisha@savannahsa.com
www.savannahSA.com

Please forward all your comments, concerns and queries relating to the environmental impact assessment process to both of us.

Find attached the process letter clarifying the environmental impact assessment process, the release of the Draft Environmental Impact Assessment Report and the public review period of the Draft Environmental Impact Assessment Report. Please note copies of this report can be downloaded from the Savannah Environmental website and can be sent to registered interested and affected parties on request.

November 2011

Agri Tsitsikamma Farmers Union

ATT: The Chairperson

Dear Mr Olof Cillier,

**PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY
ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/1585)**

**ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
POWER LINE ROUTING ALTERNATIVES**

Renewable-Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA). It is proposed for a cluster of up to 80 wind turbines to be constructed over an area of approximately 23 km² in extent.

The proposed turbines would be appropriately located on the identified site, which covers an area of ~23 km². The broader site is proposed to accommodate both the wind turbines as well as the associated infrastructure which is required for such a facility including:

*UNIT 606, 1410 EGLIN OFFICE PARK, 4 EGLIN ROAD, SUNNINGHILL, GAUTENG
PO BOX 148, SUNNINGHILL, 2157, GAUTENG
TEL: +27 (0)11 234 6621 • FAX: +27 (0)86 684 0547 • E-MAIL: INFO@SAVANNAHSA.COM
WWW.SAVANNAHSA.COM*

*DIRECTORS: KM JODAS • J THOMAS • M MATSABU
COMPANY REGISTRATION NO.: 2006/000127/07
VAT REGISTRATION NO.: 4780226736*

- » **Wind turbines** (between 80 – 120m hub height) and **concrete foundations** to support them.
- » **Cabling** between the turbines, to be laid underground where practical.
- » **Internal access roads** to each turbine.
- » **Workshop area** for control, maintenance and storage.
- » An on-site **substation** to facilitate the connection between the wind energy facility and the grid.
- » New overhead **power line** to connect to Eskom's existing Melkhout (132/66kV) substation, which is located approximately 20km from the site.

Following the meeting held on 17 October 2011 below please find more information on the proposed power line routes associated with the Oyster Bay Wind Energy Facility for distribution to interested or affected landowners/ farmers in the region.

THE PROPOSED POWER LINE

Planning and design for the transmission of the power generated at the wind energy facility is being undertaken by RES in consultation with Eskom. The point of connection has been informed through understanding the local power requirements and the stability of the local electricity network, and will depend on the final grid connection agreement with Eskom¹. A 132kV overhead power line will connect the on-site substation within the wind energy facility to the electricity distribution network/grid via Eskom's existing Melkhout Substation, which is located approximately 20km to the north east of the site. Alternative routes/corridors for the 132 kV power line have been proposed by RES, and have been comparatively assessed in the EIA report. These power line corridors are also shown in **the attached map**. The three corridor options under consideration for this power line include:

- » The **Western Corridor** option is approximately 38km in length. The route heads north along the eastern boundary of the site, crosses the ridge and turns north-west just before the Mpofu Dam. It follows the boundary of the water purification plant and aligns itself with the existing 22kV power line running north westward. It continues along the 22kV power line and crosses the upper reaches of the Mpofu Dam. The corridor then follows the R102 for approximately 2.8km turning north over the R102 and heads north-easterly to cross the N2. The corridor continues in a north easterly direction until it reaches the 66kV power line feeding into the Melkhout Substation. It then follows this 66kV power line alignment to the Melkhout Substation.

¹ The government are currently in the process of establishing a Single buyers Office for IPP generated power. Once this entity is operational, they would become responsible for the issuing of Power Purchase Agreements and the purchase of the power from facilities such as that proposed.

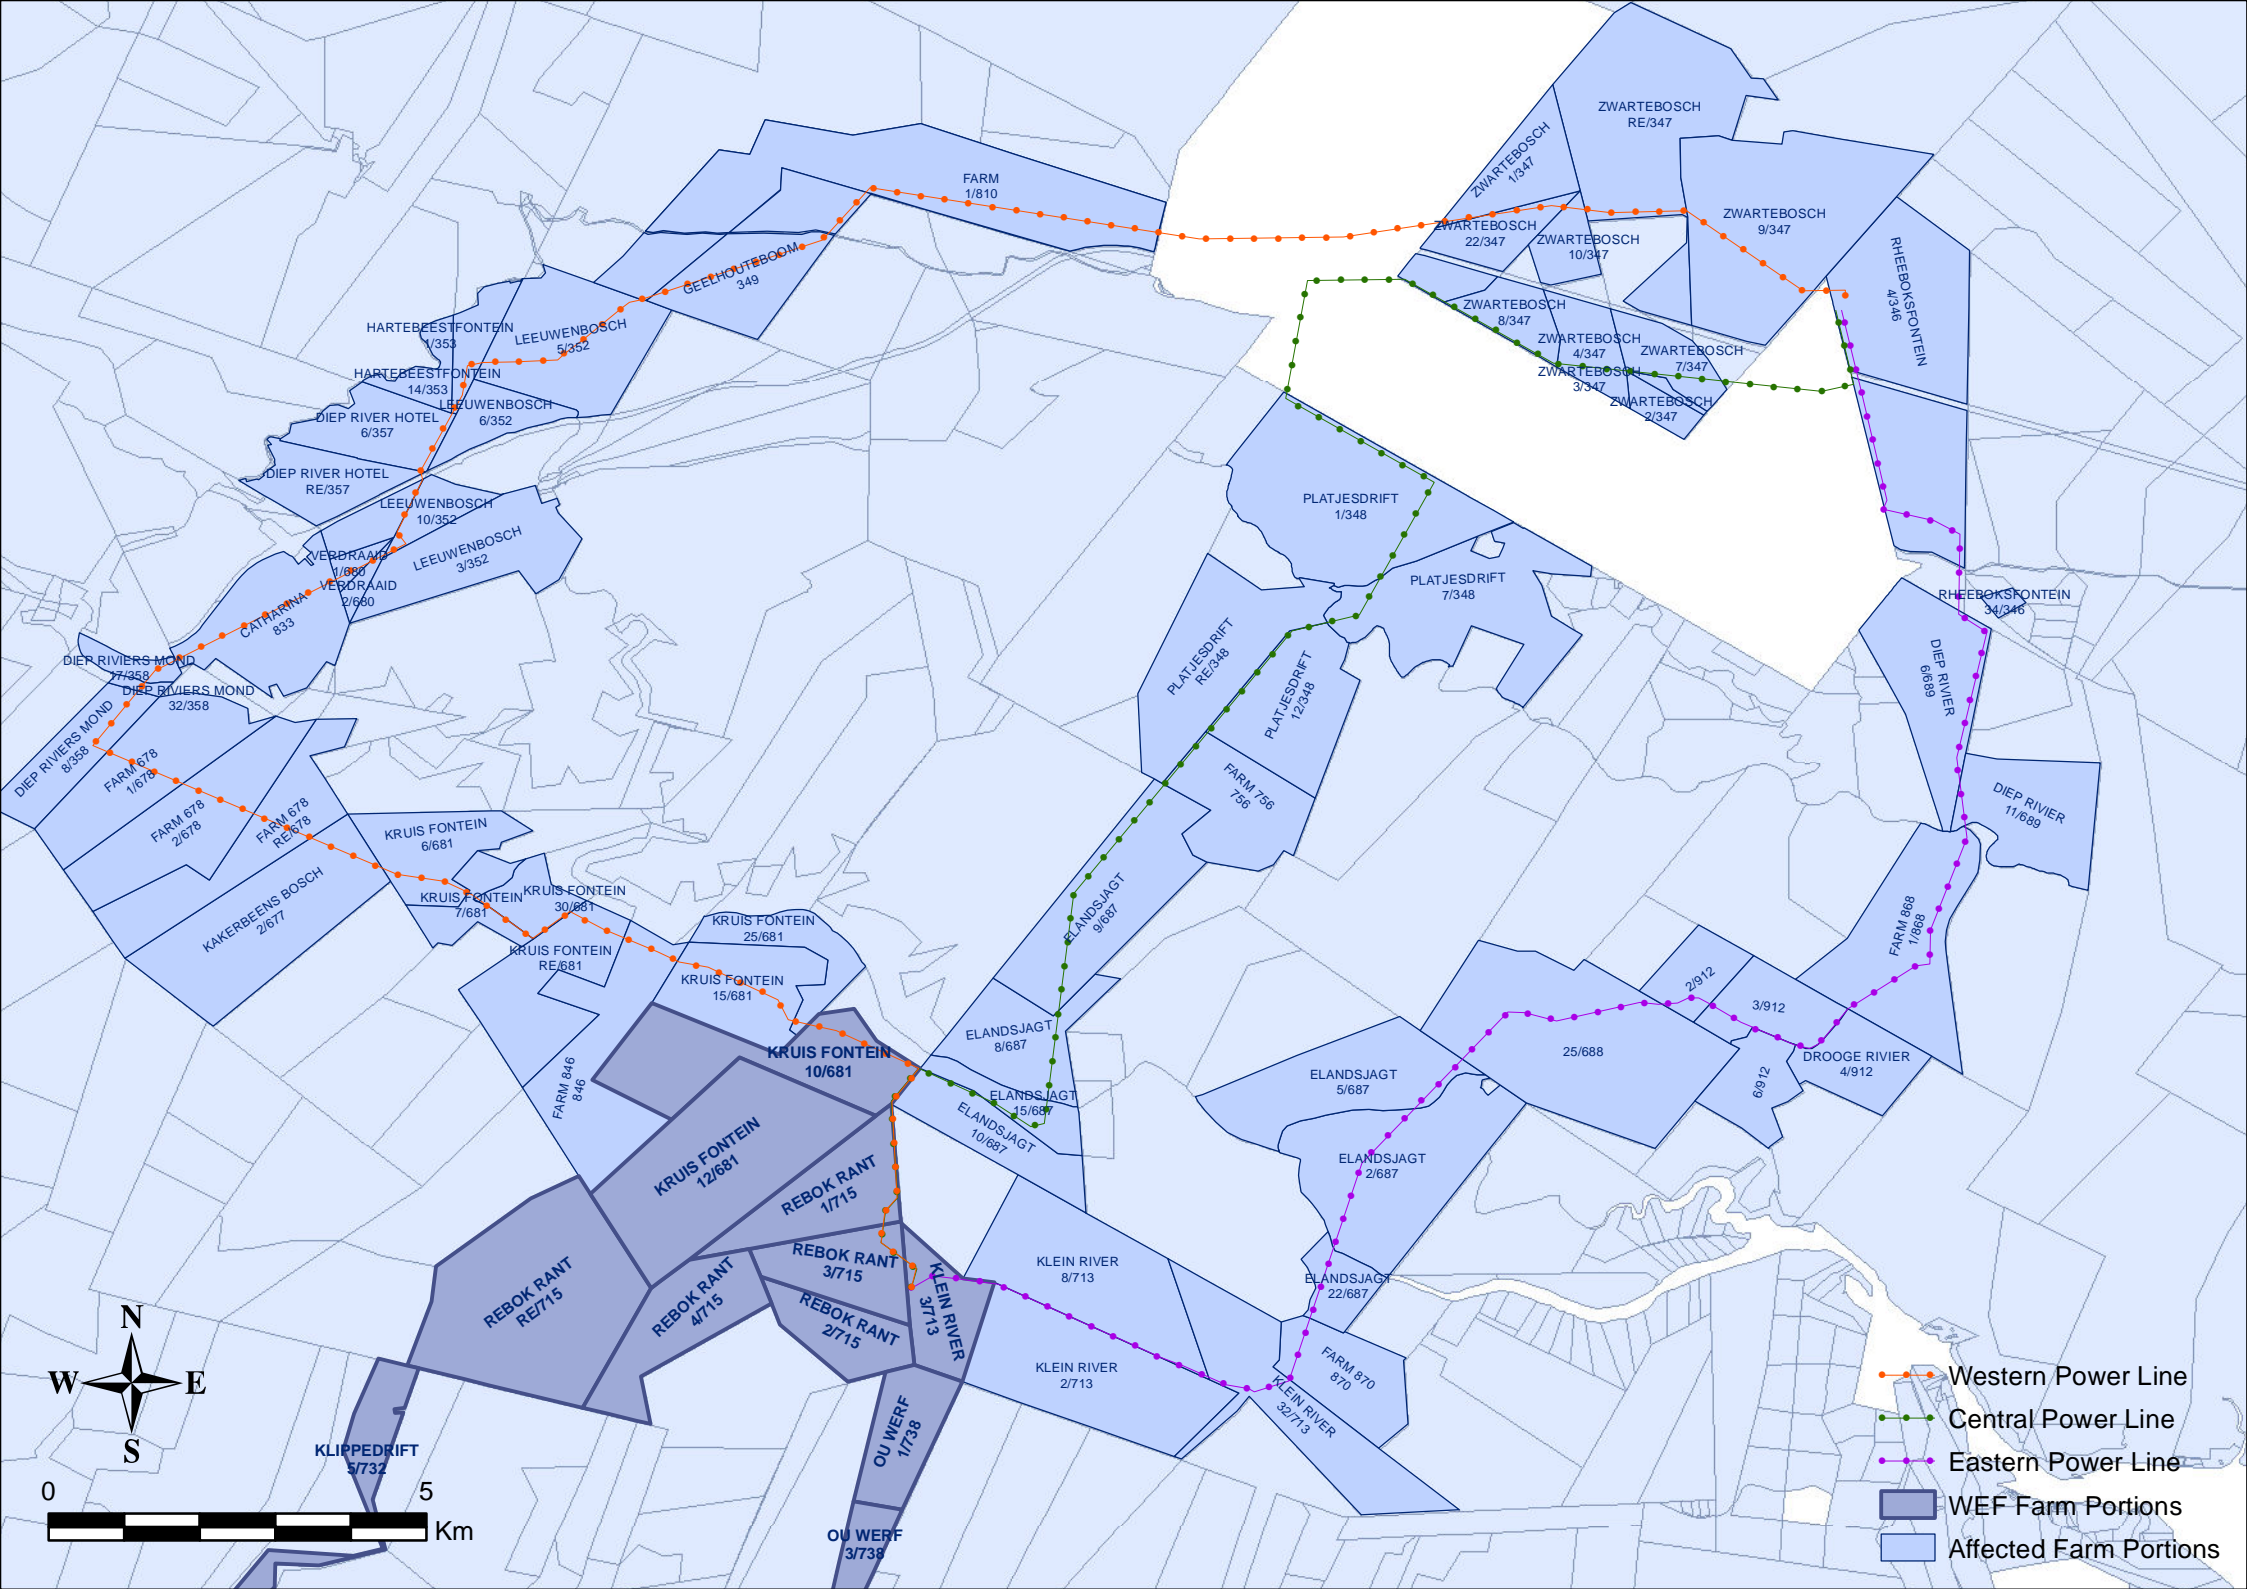

- » The **Central Corridor** is approximately 26km in length. The route heads north along the Eastern boundary of the wind farm, crosses the ridge and turns south east just before the Mpofu Dam. It then heads towards the dam wall where it aligns itself with the proposed Eskom A-route from Thuyspunt to Melkhout Substation.
- » The **Eastern Corridor** option is approximately 25km in length. The route heads south east, exiting the farm boundary until it reaches the proposed Eskom B-route from Thuyspunt to Melkhout Substation. It follows the Eskom route option north for approximately 5.5km then turns east towards the R330. At the R330 the line turns north and aligns itself with the existing 66kV power line. It follows this alignment to the Melkhout Substation.

Maps of the power line route are attached, as well as details of all the potential farms and landowners that may be affected along each route. It must be noted that only one route will be implemented. This depends on which route is authorised by the Department of Environmental Affairs and accepted by Eskom, and will be communicated to all interested and affected parties at the relevant stage in the project development process. As discussed, please table the matter at the next Farmers Union meeting. Thank you for your assistance.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project.

Yours sincerely,

Shawn Johnston
Process Facilitator

Geagte Oloff Cilliers en Maizie Vermaak,

Vind aangeheg n brief vir die lede van die Tsitsikamma Oost Boerverening. Kan u asseblief die voorgestelde projek op die agenda plaas van die boere gemeenskap. Alle vrae rakend die projek kan na my of Ravisha by Savannah Environmental gestuur word.

Ons waardeur die deelname van lede van u boerverening in die omgewingsimpakstudie proses.

Die uwe,

Dera Oloff Cilliers and Maizie Vermaak,

Please find enclosed a letter for the Tsitsikamma East Farmers Association. It would be greatly appreciated if you can place the proposed Oyster Bay Wind Energy Facility on the agenda of the farmers association. All questions and concerns can be sent to me or Ravisha at Savannah Environmental directly.

We appreciate the comments and participation of members of your association in this EIA process.

Sincerely,

15 November 2010

Dear Stakeholder

**PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY
ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/1585)**

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS AND
INVITATION TO REVIEW THE DRAFT SCOPING REPORT**

Renewable Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA). It is proposed for a cluster of up to 80 wind turbines to be constructed over an area of approximately 23 km² in extent. The nature and extent of this facility is explored in more detail in this document.

The wind energy facility is proposed on the following farm portions: Portion 3 of Farm Klein Rivier 713; Portion 1, 2, 3, 4 and the Remainder of Farm Rebok Rant 715; Portion 1 and 3 of Farm Ou Werf 738; Portion 5 of Farm Klippedrift 732; Portion 10 and Portion 12 of Farm Kruis Fontein 681.

The capacity of the wind energy facility will depend of the wind turbine chosen by RES (turbine size and model that will be deemed most suitable for the site). RES are considering turbines between 1.8 MW and 3 MW. The estimated numbers of turbines are as follows:

- » Approximately 50 turbines assuming a turbine size of 3MW each.
- » Approximately 80 turbines assuming a turbine size of 1.8 MW each.

As the performance of the turbines is determined by disturbances to the wind resource, they must be appropriately spaced within the facility.

The proposed turbines would be appropriately located on the identified site, which covers an area of ~23 km². The broader site is proposed to accommodate both the wind turbines as well as the associated infrastructure which is required for such a facility including, but not limited to:

- » **Wind turbines** (between 80 – 120m hub height) and **concrete foundations** to support them.
- » **Cabling** between the turbines, to be laid underground where practical.
- » **Internal access roads** to each turbine.
- » **Workshop area** for control, maintenance and storage.
- » An on-site **substation** to facilitate the connection between the wind energy facility and the grid.
- » New overhead **power line** to connect to Eskom's existing Melkhout (132/66kV) substation, which is located approximately 20km from the site.

ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

In terms of the EIA Regulations published in terms of Section 24(5) of the National Environmental Management Act (NEMA, No 107 of 1998), RES (Pty) Ltd requires authorisation from the National Department of Environmental Affairs (DEA) (and in consultation with the Eastern Cape Department of Economic Development and Environmental Affairs (DEDEA)) for the undertaking of the proposed project. In terms of sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the EIA Regulations of GN R385 (Regulations 27–36) and R387, a Scoping and EIA are required to be undertaken for this proposed project. In order to obtain authorisation for this project, comprehensive, independent environmental studies must be undertaken in accordance with the EIA Regulations. This project has been registered with National DEA under Application Reference number **12/12/20/1585**.

RES has appointed **Savannah Environmental**, as independent consultants, to undertake a Scoping and Environmental Impact Assessment to identify and assess all potential environmental impacts associated with the proposed project for the area as identified, and propose appropriate mitigation measures in an Environmental Management Plan (EMP). As part of these environmental studies, I&APs will be actively involved through the public involvement process.

You and/or the organisation/department which you represent have been identified as a stakeholder. Should you have an interest in this project, please register yourself as an I&AP and note your formal comments by sending written correspondence in this regard. All comments received will form part of the Comments and Response Report that will be included in the EIA Report which is submitted to the DEA. By submitting your details and comments to Savannah

Environmental, you are ensured that your comments, concerns or queries will be noted.

To obtain further information and register on the project database, please submit your name, contact information and interest in the project to the contact person below.

INVITATION TO REVIEW THE DRAFT SCOPING REPORT

In accordance with the EIA Regulations, a Draft Scoping Report is being compiled and will be available for public review and comment by Interested and Affected Parties (I&APs) and stakeholders. You are invited to review and comment on the draft report at the following locations:

Humansdorp Public Library	St Francis Bay Library
Jeffrey's Bay Public Library	www.savannahSA.com

The 30-day period for review is from **22 November 2010 to 10 January 2011**. Please submit written comment to Savannah Environmental no later than 10 January 2011. All comments received will be included in the Final Scoping Report, which will be submitted to DEA (and the Eastern Cape DEDEA as commenting authority) for their consideration and decision.

Comments can be made as written submission via fax, post or e-mail.

Please submit your comments to
Ravisha Ajodhapersadh / Bongani Khupe PO Box 148, Sunninghill, 2157 Tel: +27 (0)11 234 6621 Fax: +27 (0)86 684 0547 Email: ravisha@savannahsa.com Website: www.savannahSA.com
The due date for comments on the Draft Scoping Report is 10 January 2011

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS
PUBLIC PARTICIPATION PROCESS

PROPOSED ESTABLISHMENT OF A WIND ENERGY
FACILITY AND ASSOCIATED INFRASTRUCTURE ON A SITE
NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
DEA Ref No. 12/12/20/1585

Project name: Oyster Bay Wind Energy Facility

Applicant: Renewable Energy Systems (RES) Southern Africa (Pty) Ltd

Proposed Activity: The establishment of a wind energy facility and associated infrastructure within a broader site of 23 km² located approximately 6 km north of Oyster Bay in the Eastern Cape Province. The proposed facility will have a generating capacity of up to 160MW and the following infrastructure:

- » Up to 80 wind turbines
- » Cabling between the turbines, to be laid underground where practical
- » On-site substation/s to facilitate the connection between the wind energy facility and the grid
- » A new overhead power line to be connected to Eskom's existing Melkhout Substation
- » Internal access roads to each turbine; and
- » Workshop area for maintenance and storage.

Location: The wind energy facility is proposed on the following farm portions: Portion 3 of Farm Klein Rivier 713; Portion 1, 2, 3, 4 and the Remainder of Farm Rebok Rant 715; Portion 1 and 3 of Farm Ou Werf 738; Portion 5 of Farm Klippedrift 732; Portion 10 and Portion 12 of Farm Kruis Fontein 681.

In terms of sections 24 and 24D of the National Environmental Management Act (No 107 of 1998), as read with the EIA Regulations of GN R385 (Regulations 27–36) and R387, a Scoping and EIA are required to be undertaken for this proposed project. The project has been registered with the National Department of Environmental Affairs under Application Reference Number **12/12/20/1585**.

In this regard, **Savannah Environmental** is undertaking the required environmental assessment and public participation process. **A draft Scoping Report will be available for public review from 22 November 2010 – 10 January 2010 and a Public Meeting will be held on 6 December 2010 at 18:00 at the Oyster Bay Community Hall.** In order to obtain further information and to register on the project database, please submit your name, contact information and interest in the project to:

KENNISGEWING VAN 'N OMGEWINGSIMPAKEVALUERINGSPROSES
OPENBARE DEELNAMEPROSES
VOORGESTELDE OPRIGTING VAN 'N WINDKRAGAAANLEG
EN GEPAAARDGAANDE INFRASTRUKTUUR OP 'N TERREIN
NOORD VAN OESTERBAAI, OOS-KAAPPROVINSIE
DEA VERWYSINGSNOMMER 12/12/20/1585

Projeknaam: Oesterbaai Windkragaanleg

Applikant: Renewable Energy Systems (RES) Suider-Afrika (Edms.) Bpk.

Voorgestelde Aktiwiteit: Die oprigting van 'n windkragaanleg en gepaardgaande infrastruktuur oor 'n breër gebied van 23 km², sowat 6 km noord van Oesterbaai in die Oos-Kaapprovinsie. Die voorgestelde aanleg sal oor 'n opwekkingsvermoë van tot 160 MW beskik, met die volgende infrastruktuur:

- » Tot 80 windturbines;
- » kables tussen die turbines, ondergronds gelê waar moontlik;
- » 'n substasie(s) op die terrein om die konneksie tussen die windkragaanleg en die elektrisiteitnet moontlik te maak;
- » 'n nuwe oorhoofse kraglyn om by Eskom se bestaande Melkhou Substasie aan te sluit;
- » interne toegangspaaie na elke turbine; en
- » 'n werkswinkelgebied vir instandhouding en berging.

Ligging: Die windkragaanleg word voorgestel op die volgende plaasgedeeltes: Gedeelte 3 van die plaas Klein Rivier 713; Gedeelte 1, 2, 3, 4 en die Restant van die plaas Rebok Rant 715; Gedeelte 1 en 3 van die plaas Ou Werf 738; Gedeelte 5 van die plaas Klippedrift 732; en Gedeelte 10 en 12 van die plaas Kruis Fontein 681.

Ingevolge Artikel 24 en 24D van die Nasionale Wet op Omgewingsbestuur (Wet 107 van 1998), saamgelees met die OIE-regulasies van Staatskennisgewing R385 (Regulasie 27–36) en R387, word verlang dat 'n Bestekopname en 'n OIE vir hierdie voorgestelde projek onderneem word. Die projek is by die Nasionale Departement Omgewingsake geregistreer onder Aansoekverwysingsnommer **12/12/20/1585**.

In hierdie verband onderneem **Savannah Environmental** die verlangde omgewingsevaluering en openbare deelnameproses. 'n **Konsep bestekopname verslag sal beskikbaar wees vir hersiening deur die publiek van 22 November 2010 – 10 Januarie 2010** en 'n **publieke vergadering sal geskeduleer word vir 06 Desember 2010 op 18:00 by die Oester Baai Gemeenskap Saal**. Ten einde meer inligting te bekom en op die projek se databasis te registreer, verstrek asseblief u naam, kontakbesonderhede en belang by die projek aan:

Dear Sir

I am in favour of "Green energy" generation, I would just like to know if any measures have been put forward to avoid bird strikes as much as possible.

Thank you

Charles Tregoning

Subject: PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE

Sent: Mon 2011/01/10 01:05 PM

Dear Mr Khupe

I am a homeowner at Oyster Bay for the past 30 years.

I object to the proposed wind farm close to Oyster Bay for the following reasons (based on personal observations of similar development in overseas countries):

- High and continuous noise levels
- Severe impact on bird migration routes
- Visual interference.

Yours sincerely

LJ Heyl, Pr Eng

 Subject: Re: PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE

Sent: Mon 2011/01/10 12:15 PM

Dear Consultants

I own two properties in Oyster Bay and am totally opposed to the establishment of a wind energy facility just north of Oyster Bay. I have been enjoying the pristine beauty of the area since 1987 when I bought my first property there.

The proposed turbines (about 100?) will have a devastating impact on the visual beauty of the area. It is feared that the turbines will be visible from a distance of 10 kilometres. It could also have a noise impact and may negatively influence bird life. This part of our coastline – known for its biodiversity – is now threatened not only by your proposed “development” but also by a nuclear power station planned by Eskom at Thyspunt, not far from Oyster Bay. The cumulative effect of these power generating schemes will unfairly burden the area and the owners of property in Oyster Bay.

I propose that you look for a different site on which to erect your wind energy facility.

Yours sincerely
 Professor Christa van Wyk

Subject: PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE

Dear Dr. Peter Novellie

Renewable Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA) (see attached letter for more details).

RES has appointed **Savannah Environmental**, as independent consultants, to undertake a Scoping and Environmental Impact Assessment to identify and assess all potential environmental impacts associated with the proposed project for the area as identified, and propose appropriate mitigation measures in an Environmental Management Plan (EMP). As part of these environmental studies, I&APs will be actively involved through the public involvement process.

You and/or the organisation/department which you represent have been identified as a stakeholder. Should you have an interest in this project, please register yourself as an I&AP and note your formal comments by sending written correspondence in this regard (also find attached reply form).

Kind Regards

Good Day

Standard Bank has a huge interest in Solar and Wind projects. We would like to be registered to get access to EIA Reports on Renewable energy as we are trying to understand the wind and solar sectors in South Africa by investigating how advanced various projects EIA's are.

We will use this analysis to make investment decisions. As such we are trying to access projects public Scoping Reports and Environmental Impact Reports, as well as updates when the reports are available online.

We are only looking at private party projects, i.e. Pofadder Solar Thermal Plant and any other wind or solar projects that you may be working on.

Your assistance would be greatly appreciated.

Subject: EIA Oyster Bay Wind Energy Facility

Hi Ravisha,
 The St Francis Bay bird club has been contributing data since 1998 to the Co-ordinated Avifaunal Roadcounts (CAR) project operated by the Animal Demography Unit in the Zoology department at UCT. One of the routes that we survey twice a year for the project incorporates the farms identified for the wind facility, and I attach a spreadsheet showing the numbers of large terrestrial birds identified on that route over the last 12 years. Perhaps you could pass this on to Chris van Rooyen?

Some technical details: the route is coded EH03, Tsitsikamma East and follows gravel roads from the intersection of the Humansdorp-Oyster Bay road with the road from St Francis Bay to the R102. The 53km length of the route goes west past Oyster Bay and the Huisclip Nature Reserve, joins the R102 eastwards for about 7km, and then turns back onto the gravel road just south of the Impofu Dam to return to its starting point.

Please contact us if any further information is needed.
 Kind regards,
 Maggie Langlands/Yvonne Bosman

Please state your interest in the project (add additional pages if necessary):

I am fully supportive of this, because this is going to create jobs oppo-rtunities. This will be effective in terms of giving more power to the electricity that we have. This is also a significant step in terms of creating more development in our community.

Please list your questions, views or concerns regarding the project (add additional pages if necessary):

How are you going to make sure that this is not going to be on the hands of ~~black~~ people? I would also want to know how much general workers will pay per day, because we sick and tired of white people underpay us here. I'll propose and plea to you to help our soccer team in order to upgrade the field and also sponsorship of our club in already joined the league.

English Afrikaans

St Francis Kromme Trust

The St Francis Kromme Trust supports the quest for renewable energy production for South Africa and particularly environmentally-friendly sources of renewable energy. The issues we have with wind power are its inefficiency, high cost, and major impact on the environment.

An Eskom spokesperson estimates that a wind farm is doing well if it's putting power into the grid 27% of the time¹. The actual amount of power produced is minimal, about a quarter of the capacity claimed². And it is extremely expensive: in Britain at least twice the price of electricity from conventional power stations. In South Africa, if the 2009 REFIT tariff applies, it will be two and a half times the price. But most of all, the impact on the environment is substantial.

Hundreds of giant turbines, sunk into huge cubes of concrete, planted over hectare after hectare of rural landscape. There are at least ten wind farms³ planned in the area of the Kouga Municipality in the Eastern Cape. Eight of these facilities are within a 20km radius of one another, and four of them either border on one another or almost do (Tsitsikamma, Red Cap West, RES Oyster Bay, and Red Cap Central).

Four of these proposed developments have already received environmental authorisation. The Jeffreys Bay Wind Project, Red Cap's Western Cluster, Red Cap's Central Cluster, and Red Cap's Eastern Cluster will be spread over 12 000 hectares – almost 6% of the whole Kouga area.

Construction of all these facilities would not only permanently alter the nature of this rural landscape, the effect on bird species would also be significant. This particular area is the country's stronghold for Denham's Bustard, a vulnerable species, and Blue Cranes, White-bellied Korhaan, White Stork. Greater and Lesser Flamingo and Secretarybird are also found here in high densities.

The most severely threatened of South Africa's ten bustard species is the Denham's Bustard. Wind farms, like power lines, pose a serious threat to bustards (and to cranes). Internationally, bustards are at the top of the mortality lists for wind turbines. The reason has recently been identified through research, which shows that bustard visual fields have large blind sectors projecting forwards. Unlike herons, which need comprehensive forward vision for close-range stealth-foraging, bustards need wide ranging vision to detect predators and food sources at considerable distances. Blind spots are the evolutionary price they pay, and without man-made obstacles in their flight paths the price would be negligible. (Information from Birdlife SA's *Bustard Beat*: research by Graham Martin and Jessica Shaw)

We submit that, for an inefficient power source, these environmental costs are too high.

ATT: The Chairperson

RE: Wind Energy Facility, near Oyster Bay, Eastern Cape Province

Dear Sir / Madam

Savannah Environmental acknowledges receipt of your letter which was received on 19 July 2011 via email. We thank you for your contribution and encourage you to communicate any further concerns to us without hesitation.

The requested response to your issues/ concerns stated in your letter is provided herewith (in blue text) by the EIA Project team, and where applicable, by the developer, RES Southern Africa.

1. Bird and Bat Impacts

Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e. "A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa..." Only in this way will sufficient data be accumulated to assess accurately the level of impact associated with renewable energy facilities.

UNIT 606, 1410 EGLIN OFFICE PARK, 4 EGLIN ROAD, SUNNINGHILL, GAUTENG
PO BOX 142, SUNNINGHILL, 2157, GAUTENG
TEL: +27 (0)11 234 6621 • FAX: +27 (0)86 684 0547 • E-MAIL: INFO@SAVANNAHSA.COM
WWW.SAVANNAHSA.COM

DIRECTORS: KM JODAS • J THOMAS • M MATSABU
COMPANY REGISTRATION NO.: 2006/000127/01
VAT REGISTRATION NO.: 4780226736

We concur that the impacts of wind energy facilities on birds and bats are unknown in South Africa, this is because no large scale wind energy facility exists in the country. In the absence of this knowledge the wind energy facility development will be guided by the EIA specialists' studies and by international best practice. Note that the undertaking of bird monitoring at proposed wind energy facility sites within South Africa is currently considered as good practice and is not a legal requirement. This will remain the case until guidelines are adopted and gazetted by the regulating authorities.

RES Southern Africa is committed to the responsible and sustainable development of wind energy and their development manager is the South African Wind Energy Association's board member who is working collaboratively with the BAWESG on the further development of the bird monitoring guidelines and other strategic bird, bat and wind energy issues. Note that RES Southern Africa has already initiated a bird monitoring programme on their site to consider bird presence and movement on their proposed development site for a period of one year as per the BAWESG guidelines. Bat sensitivities will be assessed in the EIA studies and if monitoring is required it will be implemented pre-construction. This will fulfil any requirements for pre-construction monitoring as proposed by the guidelines for bird monitoring, as well as any requirement which may be included within an Environmental Authorisation for the project (should it be authorised).

2. Decommissioning Sureties

Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, including concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.

Provision for the possible requirement for financial provision for rehabilitation is made within the EIA Regulations (refer to Regulation 33 (g)(v)). This will be considered within the drafting of the Environmental Management Programme for the project. In addition, National DEA will have to consider the request for financial surety as part of their decision-making for the EIA. However, it is anticipated that the wind energy facility will have a lifespan of up to 20-25 years. The current EIA Regulations requires a separate environmental assessment for decommissioning of the facility at the end of the project lifespan. Any decommissioning activities will be required to comply with the legislation relevant at the time.

RES Southern Africa is fully owned by RES Group which is an established, family owned company with over 1000 employees worldwide. RES has been developing, constructing and operating wind farms for over 25 years and is one of the world's

leading international developers. RES has an impressive track record of producing successful wind energy facilities of very high quality.

Should you have any queries kindly contact us.

Subject: RE: Submission re Oyster Bay wind project

Hi Rav,

Is this something that needs replying to? Or do we wait until the EIA public review period in August?

FYI:

- A wind turbine actually produce power 70-85% of the time depending on location and wind regime.
- Capacity factors of 25-35% are common so they are 'almost' correct about wind farms producing a quarter of their rated capacity.
- And cost... well, we know conventional power costs are going up and wind power costs are going down. How soon will these costs meet is the only significant question.

Subject: Re: Oyster Bay Wind Farm DEA Ref No 12/12/20/1585
Attachments: WTG Co-ordinates - Only Central - Final.pdf

Dear Duncan and Ravisha

Please find attached the co-ords of our turbines. As you will be aware, these may change slightly due to the need for final micro-siting.

Regarding the details on our turbines, our hub height will be between 80-100m and the blade length will be between 45-55m depending on what we finalise based on the bid criteria. Please can you work with these and get back to us with regard to how you have taken this into consideration in your proposed layout.

Thanks and Regards

Lance

Hi Lance,

Thanks for the turbine layout. Please provide turbine location coordinates, expected turbine type, model and size, as this will help us make allowances and determine adequate spacing.

Please also let us know if any of the details above change over time.

Best regards

Duncan

Subject: Oyster Bay Wind Farm DEA Ref No 12/12/20/1585

Dear Ravisha

Thanks for your time on the phone last week. As indicated Red Cap has an Environmental Authorisation for the Red Cap Kouga Wind Farm which borders on the East of the wind farm indicated in the Oyster Bay Wind Farm (DEA Ref No 12/12/20/1585) for which you are the EAP. As we are adjoining neighbours and the development on the Oyster Bay wind farm may impact on our wind farm I would like to be registered as an IAP for this project.

Furthermore, I have attached the layout of our central cluster for our wind farm (this is the cluster that is on the Eastern Boarder of the Oyster Bay wind farm) which was approved in our EA. Please will you make sure that our approved layout, and particularly the turbines along this boundary, are taken account of in your

layout determination and specifically with regard to any impact on the efficiencies of our turbines. If you require any further information in this regard please do not hesitate to contact me.

Please confirm that I will be registered as an IAP and that this information will be taken account of in refining the layout on this proposed wind farm.

Thanks and regards

Subject: Turbine spacing

Dear Lance,

RES has significant experience at designing and constructing wind farms and in particular has a considerable understanding of different wind regimes and turbine manufacturer siting rules. Taking into account this knowledge and making use of software that has been developed to simulate the impacts of wakes on energy yield as well as turbine loading RES is designing the Oyster Bay turbine layout to minimise the effects on the adjacent Redcap turbines.

Specifically, taking into account site constraints, RES will be using a minimum spacing of 5 rotor diameters based on our maximum turbine envelope in the prevailing (bi-directional east west) wind directions, 3 rotor diameters for non-predominant directions, this will ensure any impacts on yield from increased turbulence and velocity deficits are kept to a minimum. The turbine layout would then be run with the predicted wind climate through software that has been based on the IEC standard 61400 (Edition 3 amended) that simulates the wake added turbulence on each turbine and a corresponding fatigue calculation to ensure that none of the turbines (both within the Oyster Bay layout and Redcap layout) would be at risk of manufacturer imposed curtailment.

Taking into account the above steps that RES are taking in their layout design there should be no significant impact on the operation of the Redcap turbines.

Please let me know if you have any questions or further concerns.

Kind regards

Duncan Ayling

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Ravisha

Thanks for your time on the phone last week. As indicated Red Cap has an Environmental Authorisation for the Red Cap Kouga Wind Farm which borders on the East of the wind farm indicated in the Oyster Bay Wind Farm (DEA Ref No 12/12/20/1585) for which you are the EAP. As we are adjoining neighbours and the development on the Oyster Bay wind farm may impact on our wind farm I would like to be registered as an IAP for this project.

Furthermore, I have attached the layout of our central cluster for our wind farm (this is the cluster that is on the Eastern Boarder of the Oyster Bay wind farm) which was approved in our EA. Please will you make sure that our approved layout, and particularly the turbines along this boundary, are taken account of in your layout determination and specifically with regard to any impact on the efficiencies of our turbines. If you require any further information in this regard please do not hesitate to contact me.

Please confirm that I will be registered as an IAP and that this information will be taken account of in refining the layout on this proposed wind farm.

Thanks and regards

St Francis Kromme Trust

19 July 2011

The St Francis Kromme Trust raises two pressing concerns:

1. Bird and Bat Impacts

Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e.

“A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa...”

Only in this way will sufficient data be accumulated to assess accurately the level of impact associated with renewable energy facilities.

2. Decommissioning Sureties

Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, *including* concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.

07 September 2011

Dear Stakeholder

**PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY
ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/1585)**

**ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
NOTICE OF PUBLIC REVIEW PERIOD FOR THE DRAFT EIA REPORT &
PUBLIC MEETING**

Renewable-Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA). It is proposed for a cluster of up to 80 wind turbines to be constructed over an area of approximately 23 km² in extent. The nature and extent of this facility is explored in more detail in this document.

The proposed turbines would be appropriately located on the identified site, which covers an area of ~23 km². The broader site is proposed to accommodate both the wind turbines as well as the associated infrastructure which is required for such a facility including:

- » **Wind turbines** (between 80 – 120m hub height) and **concrete foundations** to support them.
- » **Cabling** between the turbines, to be laid underground where practical.
- » **Internal access roads** to each turbine.
- » **Workshop area** for control, maintenance and storage.
- » An on-site **substation** to facilitate the connection between the wind energy facility and the grid.
- » New overhead **power line** to connect to Eskom's existing Melkhout (132/66kV) substation, which is located approximately 20km from the site.

INVITATION FOR PUBLIC REVIEW OF THE DRAFT EIA REPORT

In accordance with the EIA Regulations, a Draft EIA Report is being compiled and will be available for public review and comment by Interested and Affected Parties (I&APs) and stakeholders. You are invited to review and comment on the draft report at the following locations:

- » Oyster Bay Library
- » Humansdorp Public Library
- » St Francis Bay Library
- » www.res-sa.com (follow the link to Our Projects)
- » www.savannahSA.com/projects

The period for public review is from **14 September 2011 to 14 October 2011**. Please submit written comment to Savannah Environmental no later than 14 October 2011. All comments received will be included in the Final Scoping Report, which will be submitted to DEA for their consideration and decision.

Comments can be made as written submission via fax, post or e-mail to Shawn Johnston.

PUBLIC MEETING

In order to facilitate comments on the draft EIA Report, a public meeting will be held during the public review period. All interested and affected parties are invited to attend a public meeting:

DATE: 20 September 2011
TIME: 18:00
VENUE: Oyster Bay Community Hall

The aim of the public meeting is to provide you with more information regarding the proposed project (including technical details, project process and timeframes etc.), to provide a summary of the findings of the EIA undertaken, to invite

comment on the proposed project, and to further discuss possible issues of specific concern to you which may need to be investigated and managed through the EIA process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Yours sincerely,

Shawn Johnston

SUSTAINABLE
FUTURES ZA

07 September 2011

Dear Stakeholder

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
CONSTRUCTION OF THE PROPOSED
TSITSIKAMMA COMMUNITY WIND ENERGY FACILITY
EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/2209)**

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

Exxaro Resources and Watt Energy (Pty) Ltd are proposing to establish a commercial wind energy facility and associated infrastructure on a site located within the Kouga Local Municipality in the Eastern Cape Province. The proposed site is situated approximately 30 km west of Humansdorp, south of the N2 National Road in the Tsitsikamma area. Based on an extensive pre-feasibility analysis and site identification process undertaken, as well as an analysis of the wind resource in the area, a favourable area has been identified for consideration and assessment as per the requirements of an Environmental Impact Assessment (EIA). Wind turbines with a capacity of up to **100 MW**, collectively referred to as a **wind energy facility**, are planned to be constructed over an area of approximately 54 km² in extent.

PUBLIC FEEDBACK MEETING

All interested and affected parties are invited to attend a public feedback meeting to be held on 22 September 2011, 18h00 at the Clarkson Community Hall, Clarkson

DRAFT EIA REPORT AVAILABLE FOR REVIEW

The Draft EIA Report has been made available for public review from 16 September 2011- 17 October 2011 at the following locations:

- » www.savannahSA.com
- » Kareedouw Library
- » Clarkson Library

To obtain further information and register on the project database, please submit your name, contact information and interest in the project to the contact person below.

Shawn/Ravisha

I am the owner of 10 Brander Street , Oysterbay.

In principle I do not have a problem with a windfarm (it generates clean electricity), as long as it is erected and maintained in accordance with good international practice. So proper assurance must please be given in this regard.

One of the biggest problems with windfarms, is the irritating low frequency noise it generates, for anybody living nearby. In Europe, as I witnessed again recently, these facilities are never erected close to residential areas, specifically for this reason.

I do not know what an acceptable distance is between a windfarm and a residential area, in international good practice. I would however appreciate it if you could provide me (and other Oysterbay residents) with this information, as well as the assurance that the intended windfarm is outside the specified good practice distance.

Regards
Bram de Klerk

Hi

I am very much against this.

If really needed, the turbunes must be on the north side of the gravel road from palmietvley - oyster bay - Humansdorp.

Nothing close to the sea - it will mess up the seafront and corrosion will be too high as well.

From the map I see that some of the turbunes will be close to the sea, why can't all of them be north of the gravel road?

Dear Maggie

Your attached letter refers. Attached is RES response regarding the concern about the access road to be used.\

Below is an additional response on the cumulative bird impacts concern:

The avifauna study considered the cumulative effect of the authorised wind projects in the Overberg region. RES I welcome the suggested possible mitigation for cumulative impacts. As this is a strategic level mitigation RES would suggest that it should be discussed in the SAWEA/BAWESG working group which is the dedicated forum for strategic topics such as these. RES will ask for it to be placed on the agenda of the next SAWEA meeting.

Subject: OESTERBAAI WINDLAAIERS

GEAGTE MNR JOHNSTON/RAVISHA

EK WIL BEGIN DEUR POSITIEF TE REAGEER, DAT EK IN BEGINSSEL NIE GEKANT IS TEEN WINDLAAIERS AS ALTERNATIEWE KRAGOPWEKKING NIE. DIT IS BAIE SKONER AS STEENKOOLKRAGSTASIES EN MINDER GEVAARLIK AS KERNKRAGSENTRALES. EK HET WEL DIE VOLGENDE PROBLEME, M.B.T. DIE LIGGING VAN DIE WINDLAAIERS.

1. OESTERBAAI IS DIE LAASTE STRANDGEBIED, WAAR DAAR NOG KUSERWE UITGESIT KAN WORD. AS U GAAN KYK NA DIE GEBIED TUSSEN GOURITSMOND EN VAN STADENSRIVIERMOND, IS DAAR GROOT STUKKE GROND, WAAR GEEN KUSERWE UITGESIT KAN WORD NIE. EK PERSOONLIK DINK, DIT IS DIE IDEALE AREA OM TE GEBRUIK VIR WINDLAAIERS, WAT SONDER ONGERIEF VAN INWONERS EN WOONGEBIEDE, BENUT KAN WORD.
2. HOEKOM WIL U DIE EEN STUKKIE PARADYS, WAT DAAR NOG IN S.A. BESTAAN, KOM ONTSIER, MET REUSE WINDLAAIERS?
3. DIT GAAN DIE VOLGENDE TOT GEVOLG Hê:
 - 3.1 MY EIENDOMSWAARDE GAAN VAL, GAAN U FIRMA MY VERGOED DAARVOOR? EK HET OP DIE OOMBLIK 'N KOPER, MAAR HY WAG EERS OP DIE UITKOMS VAN U EN ANDER FIRMA'S SE FINALE PLANNE.
 - 3.2 ENIGE ONTWIKKELING, GAAN GEPAARD MET 'N TOESTROMING VAN WERKSOEKERS EN GEPAARDGAANDE HOËR MISDAADSYFERS. DIT GAAN DIE KARAKTER VAN OESTERBAAI DRAMATIES

VERANDER. MY KINDERS HET DAAR OPGEGROEI. EK SELF IS TANS AAN 'N ROLSTOEL GEKLUISTER, MAAR MY VROU, HET GEDURENDE DIE AFGELOPE APRILVAKANSIE, NOG ELKE DAG STOKSIELALLEEN, KLIPPEPUNT TOE EN TERUG GESTAP, SONDER ENIGE VREES.

- 3.3 IS U FIRMA BEREID OM DAARDIE VEILIGHEID, WAT ONS DIE AFGELOPE 20 JAAR ERVAAR HET TE WAARBORG?
- 3.4 HOEWEL EK HIER BO IN GAUTENG SIT, IS MY VERSEKERINGSMAATSKAPPY, NOG GELUKKIG MET 'N ALARM, GEEN DIEFWERING OF VEILIGHEIDSDEURE, SOOS WAT HIER VAN MY VERWAG WORD NIE. SOU MISDAAD TOENEEM, GAAN DIT DAAR OOK VEREIS WORD. GAAN U FIRMA DIE KOSTE DAARVOOR DRA?
4. GERAASBESOEDELING: ENIGE DING WAT DRAAI, OF DIT NOU 'N HUISWAAIER, LUGREËLING, WINDPOMP, WINDLAAIER OF WAT OOKAL IS, MAAK 'N KONSTANTE LAWAAI. HOE OUER, HOE ERGER. U KAN SÊ NET WAT U WIL, EK WAS IN EUROPA EN HET MET MENSE GEPRAAAT EN SELF GELUISTER. SELFS SO VER AS 10 KM WINDAF, TEL JY NOG DIE GERAAS OP. WIL U DIT REGTIG ONAANGENAAM VIR ONS AS INWONERS MAAK, OM DIE STILTE WAT ONS TANS ERVAAR, PRYS TE GEE?
5. DIE IMPAK WAT DIT OP ONS VOËLLEWE, ALLEEN GAAN HÊ, IS ENORM GROOT, WANT OOR 'N AREA VAN KILOMETERS, KAN HULLE NIE MEER HULLE NORMALE VLUGPATRONE, HANDHAAF NIE.
6. MY GROOTSTE VREES, IS DAT ONS BY OESTERBAAI, OOR BEWEGENDE GRONDFORMASIE SIT. ONS IS GEBOU OP BEWEGENDE DUINE EN ROTSPLAATTE. HET U AL DIE UITWERKKING VAN DIE KONSTANTE VIBRASIE DAAROP ONDERSOEK EN IS DIT, ENIGSENS IN U IMPAKSTUDIES AANGESPREEK, SOU DAAR SKADE DAARVOOR ONTSTAAN, SOU U PA STAAN VIR DIE KOSTE DAARVAN?
7. MY EIE HUIS IS OP KLIP GEBOU, MAAR HOEWEL EK GEEN KRAKE IN MY MURE HET NIE, HET EK BARSTE IN MY VLOERTEËLS BEGIN OPTEL. NA WYE KONSULTASIE MET OMGEWINGSKENNERS, INGENEURS, BOUERS, ENS. WAS DIE SLOTSOM, DAT BEHALWE DIE BEWEGENDE DUINE, DAAR OOK TWEE KLIPPLATE IS WAT TOENEMEND DRUK ERVAAR, VAN GEBOUE TEEN DIE RAND EN DAT DIE KLIPPLATE OOK BESIG IS OM VAN MEKAAR AF TE SKUIF. EK HET TOETSGATE LAAT BOOR EN DIT BLYK WEL SO TE WEES. EK MOET DUS AS VOORSORGMAATREËL, GATE DEUR DIE EERSTE KLIPPLAAT LAAT BOOR EN 100 MM STAALPENNE LAAT INSIT TOT 50CM – 100 CM IN DIE TWEDE KLIPPLAAT IN EN DIT OPVUL MET 1 VK M GEWAPENDE BETON, OM TE KEER DAT MY HELE HUIS VORENTOE GAAN SKUIF.
8. HET U ENIGE NAVORSING DAARVOOR GEDOEN, WANT 'N KONSTANTE VIBRASIE, KAN SO 'N VERSKUIWING BESPOEDIG EN TOT GEVOLG HÊ, DAT OESTERBAAI, METTERTYD IN DIE SEE IN KAN VERDWYN. EK SOU GRAAG WOU HÊ, DAT U DIE VERSKYNSEL SAL ONDERSOEK EN VOLLEDIG, VERSLAG DAARVOOR SAL LEWER.
9. TEERPAD? ANDERS AS DIE PERMANENTE INWONERS, DINK EK PERSOONLIK, DIE GRONDPAD WAS NOG ALTYD EEN VAN ONS GROOTSTE BATES. IN DIE SIN DAT DIT ONGEWENSDE ELEMENTE BUITE GEHOU HET EN OOK ONS 8 KM STRAND, VIR ONSSELF, BEHOUE LAAT BLY HET. 'N TEERPAD, GAAN 'N TOEVLOEI VAN DAGBESOEKERS TEWEEG BRING EN DAAR IS NIE TOILETFASILITEITE OF PARKERING VIR BESOEKERS BESKIKBAAR NIE. GAAN U DAARVOOR BETAAL?

OM 'N INLIGTINGSVERGADERING IN SEPTEMBER DAAR TE HOU, GAAN FEITLIK GEEN DOEL DIEN NIE, WANT ONS KAN NIE DAAR WEES NIE. 16 – 20 DESEMBER, SAL DALK 'N BETER DATUM GEWEES HET, WANT IN SEPTEMBER, GAAN U VERGADERING HOU, MET DIE PAAR INWONERS EN DALK 'N PAAR OMLIGGENDE BOERE. DIE BELASTINGBETALERSVERENIGING, HET GEEN MANDAAT OM NAMENS DIE MEERDERHEID INWONERS TE KAN PRAAT NIE, WANT MINDER AS DIE HELFTE VAN DIE EIENAARS IS LEDE VAN DIE BELASTINGBETALERSVERENIGING.

TOE EK VERLEDE JAAR VAN U EN ANDER FIRMA'S SE PLANNE TE HORE GEKOM HET, HET EK REGSOPINIES INGEWIN EN EK WAS VER GEVORDERD OM 'N ARTIKEL 21 MAATSKAPPY TE STIG, WAARTOE VERSKEIE INWONERS, BEREID SOU WEES OM INSETTE TE LEWER EN HULLE TYD TE FAKTUREER EN AS DONASIE TEEN BELASTING AF TE SKRYF. ELKE GRONDEIENAAR SOU EEN AANDEEL IN DIE MAATSKAPPY, GRATIS ONTVANG @ 1C BETALING EN 90% VAN DIE BESLUIT, KON PER INTERNET GENEEM WORD. EK HET OP DAARDIE STADIUM REEDS 65% VAN ALLE GRONDEIENAARS, OP REKORD GEHAD, MAAR ONGELUKKIG HET EK OP 16 DESEMBER, OP OESTERBAAI 'N BEROERTE GEHAD EN DAARVANDAAN, HET MY GESONDHEID, MET RASSESKREDE AGTERUIT GEGAAN.

EK HET GEEN BREINSKADE OPGEDOEN NIE, MAAR WEL ERGE LIGGAAMSINKORTINGS. EK WAS SEDERTDIEN, VANJAAR AL VIR 85 DAE IN VERSKEIE HOSPITALE EN DAN HET DIE WEERLIG OOK NOG MY REKENAAR BYGEKOM, EK KON WEL VAN DIE DATA HERWIN, MAAR DAAR IS DATA WAT VERLORE IS EN NIE OP MY EKSTERNE HARDESKYF GESTOOR WAS NIE.

NODELOOS OM TE Sê, EK HET GEEN VERDERE AANDAG DAARAAN GEGEE NIE. EK HET WEL DIE KONSEP EN E-POSSE WAT EK KON HERWIN HET, TWEE WEKE GELEDE, AS 'N GEDAGTE AAN DIE VOORSITTER VAN DIE BELASBETALERSVERNIGING DEURGEDEE. EK HET DIE KONSEP OPGETEL, BY 'N VRIEND NABY BOESMANSRIVIERMOND. HULLE HET WEGGEDOEN MET 'N BELASTINGBETALERSVERENIGING EN MET GROOT SUKSES 'N ARTIKEL 21 NPO MAATSKAPPY, BEGIN BEDRYF, MET BAIE MEER SUKSES EN INSETTE VAN DIE LEDE EN TOT GROOT VOORDEEL VAN ALLE INWONERS, WANT SKIELIK HET DAAR REGSMENSE, FINANSIËLE KUNDIGES, KONTRAKTEURS, ENS. NA VORE GEKOM EN HULLE KENNIS, VAARDIGHED, ENS. AANGEBIED IN RUIL VIR BELASTINGAFTREKKINGS EN LIDMAATSKAP WAS GRATIS, MITS JY DIE GEREGITREERDE EIENAAR VAN 'N EIENDOM IN DIE GEBIED WAS. HULLE HET MEER KONTANTDONASIES ONTVANG, AS WAT DIE BELASTINGBETALERSVERENIGING OOI MET LIDMAATSKAPGELDE KON GENEREER EN HULLE HET NAMENS 100% VAN ALLE EIENAARS GEPRAAT.

TEN SPYTE VAN DIE WEERLIGSKADE, BESKIK EK STEEDS OOR MEER E-POSSE, AS WAAROR DIE BELASTINGBETALERSVERENIGING BESKIK EN EK HET DIT AAN HULLE DEURGEDEE, SAAM MET DIE KONSEPGRONDWET, WAT EK OPGESTEL HET.

AS DAAR ENIGSENS AANDAG AAN E-POSSE GESKENK WORD, DAN IS MY ONVOORWAARDELIKE GEVOEL 'N DEFINITIEWE NEE. EK DINK OESTERBAAI IS TE KOSBAAR EN DAAR IS DEFINITIEF BETER PLEKKE OM DIT MET MINDER NADELE VIR MINDER MENSE, WEL GEVESTIG KAN WORD.

BY VOORBAAT DANK.

Subject: OESTERBAAI WINDLAAIERS

Follow Up Flag: Follow up
Flag Status: Flagged

GEAGTE MNR JOHNSTON/RAVISHA

EK WIL BEGIN DEUR POSITIEF TE REAGEER, DAT EK IN BEGINSEL NIE GEKANT IS TEEN WINDLAAIERS AS ALTERNATIEWE KRAGOPWEKKING NIE. DIT IS BAIE SKONER AS STEENKOOLKRAGSTASIES EN MINDER GEVAARLIK AS KERKRAAGSENTRALES. EK HET WEL DIE VOLGENDE PROBLEME, M.B.T. DIE LIGGING VAN DIE WINDLAAIERS.

1. OESTERBAAI IS DIE LAASTE STRANDGEBIED, WAAR DAAR NOG KUSERWE UITGESIT KAN WORD. AS U GAAN KYK NA DIE GEBIED TUSSEN GOURITSMOND EN VAN STADENSRIEVRMOND, IS DAAR GROOT STUKKE GROND, WAAR GEEN KUSERWE UITGESIT KAN WORD NIE. EK PERSOONLIK DINK, DIT IS DIE IDEALE AREA OM TE GEBRUIK VIR WINDLAAIERS, WAT SONDER ONGERIEF VAN INWONERS EN WOONGEBIEDE, BENUT KAN WORD.
2. HOEKOM WIL U DIE EEN STUKKIE PARADYS, WAT DAAR NOG IN S.A. BESTAAN, KOM ONTSIER, MET REUSE WINDLAAIERS?
3. DIT GAAN DIE VOLGENDE TOT GEVOLG Hê:
 - 3.1 MY EIENDOMSWAARDE GAAN VAL, GAAN U FIRMA MY VERGOED DAARVOOR? EK HET OP DIE OOMBLIK 'N KOPER, MAAR HY WAG EERS OP DIE UITKOMS VAN U EN ANDER FIRMA'S SE FINALE PLANNE.
 - 3.2 ENIGE ONTWIKKELING, GAAN GEPAARD MET 'N TOESTROMING VAN WERKSOEKERS EN GEPAARDGAANDE HOËR MISDAADSYFERS. DIT GAAN DIE KARAKTER VAN OESTERBAAI DRAMATIES VERANDER. MY KINDERS HET DAAR OPGEGROEI. EK SELF IS TANS AAN 'N ROLSTOEL GEKLUISTER, MAAR MY VROU, HET GEDURENDE DIE AFGELOPE APRILVAKANSIE, NOG ELKE DAG STOKSIELALLEEN, KLIPPEPUNT TOE EN TERUG GESTAP, SONDER ENIGE VREES.
 - 3.3 IS U FIRMA BEREID OM DAARDIE VEILIGHEID, WAT ONS DIE AGELOPE 20 JAAR ERVAAR HET TE WAARBORG?
 - 3.4 HOEWEL EK HIER BO IN GAUTENG SIT, IS MY VERSEKERINGSMAATSKAPPY, NOG GELUKKIG MET 'N ALARM, GEEN DIEFWERING OF VEILIGHEIDSDEURE, SOOS WAT HIER VAN MY VERWAG WORD NIE. SOU MISDAAD TOENEEM, GAAN DIT DAAR OOK VEREIS WORD. GAAN U FIRMA DIE KOSTE DAARVOOR DRA?
4. GERAASBESOEDELING: ENIGE DING WAT DRAAI, OF DIT NOU 'N HUISWAAIER, LUGREËLING, WINDPOMP, WINDLAAIER OF WAT OOKAL IS, MAAK 'N KONSTANTE LAWAAI. HOE OUER, HOE ERGER. U KAN Sê NET WAT U WIL, EK WAS IN EUROPA EN HET MET MENSE GEPRAAAT EN SELF GELUISTER. SELFS SO VER AS 10 KM WINDAF, TEL JY NOG DIE GERAAS OP. WIL U DIT REGTIG ONAANGENAAM VIR ONS AS INWONERS MAAK, OM DIE STILTE WAT ONS TANS ERVAAR, PRYS TE GEE?
5. DIE IMPAK WAT DIT OP ONS VOËLLEWE, ALLEEN GAAN Hê, IS ENORM GROOT, WANT OOR 'N AREA VAN KILOMETERS, KAN HULLE NIE MEER HULLE NORMALE VLUGPATRONE, HANDHAAF NIE.
6. MY GROOTSTE VREES, IS DAT ONS BY OESTERBAAI, OOR BEWEGENDE GRONDFORMASIE SIT. ONS IS GEBOU OP BEWEGENDE DUINE EN ROTSPLAATTE. HET U AL DIE UITWERKKING VAN DIE KONSTANTE VIBRASIE DAAROP ONDERSOEK EN IS DIT, ENIGSENS IN U IMPAKSTUDIES AANGESPREEK, SOU DAAR SKADE DAARVOOR ONTSTAAN, SOU U PA STAAN VIR DIE KOSTE DAARVAN?
7. MY EIE HUIS IS OP KLIP GEBOU, MAAR HOEWEL EK GEEN KRAKE IN MY MURE HET NIE, HET EK BARSTE IN MY VLOERTEËLS BEGIN OPTEL. NA WYE KONSULTASIE MET OMGEWINGSKENNERS, INGENEERS, BOUERS, ENS. WAS DIE SLOTSOM, DAT BEHALWE DIE BEWEGENDE DUINE, DAAR OOK TWEE KLIPPLATE IS WAT TOENEMEND DRUK ERVAAR, VAN GEBOUE TEEN DIE RAND EN DAT DIE KLIPPLATE OOK BESIG IS OM VAN MEKAAR AF TE SKUIF. EK HET TOETSGATE LAAT BOOR EN DIT BLYK WEL SO TE WEES. EK MOET DUS AS VOORSORGMAATREËL, GATE DEUR DIE EERSTE KLIPPLAAT LAAT BOOR EN 100 MM STAALPENNE LAAT INSIT TOT 50CM – 100 CM IN DIE TWEDE KLIPPLAAT IN EN DIT OPVUL MET 1 VK M GEWAPENDE BETON, OM TE KEER DAT MY HELE HUIS VORENTOE GAAN SKUIF.

8. HET U ENIGE NAVORSING DAAROO GEDOEN, WANT 'N KONSTANTE VIBRASIE, KAN SO 'N VERSKUIWING BESPOEDIG EN TOT GEVOLG HÊ, DAT OESTERBAAI, METTERTYD IN DIE SEE IN KAN VERDWYN. EK SOU GRAAG WOU HÊ, DAT U DIE VERSKYNSSEL SAL ONDERSOEK EN VOLLEDIG, VERSLAG DAAROO SAL LEWER.
9. TEERPAD? ANDERS AS DIE PERMANENTE INWONERS, DINK EK PERSOONLIK, DIE GRONDPAD WAS NOG ALTYD EEN VAN ONS GROOTSTE BATES. IN DIE SIN DAT DIT ONGEWENSDE ELEMENTE BUITE GEHOU HET EN OOK ONS 8 KM STRAND, VIR ONSSELF, BEHOUE LAAT BLY HET. 'N TEERPAD, GAAN 'N TOEVLOEI VAN DAGBESOEKERS TEWEEG BRING EN DAAR IS NIE TOILETFASILITEITE OF PARKERING VIR BESOEKERS BESKIKBAAR NIE. GAAN U DAARVOOR BETAAL?

OM 'N INLIGTINGSVERGADERING IN SEPTEMBER DAAR TE HOU, GAAN FEITLIK GEEN DOEL DIEN NIE, WANT ONS KAN NIE DAAR WEES NIE. 16 – 20 DESEMBER, SAL DALK 'N BETER DATUM GEWEES HET, WANT IN SEPTEMBER, GAAN U VERGADERING HOU, MET DIE PAAR INWONERS EN DALK 'N PAAR OMLIGGENDE BOERE. DIE BELASTINGBETALERSVERENIGING, HET GEEN MANDAAT OM NAMENS DIE MEERDERHEID INWONERS TE KAN PRAAT NIE, WANT MINDER AS DIE HELFTE VAN DIE EIENAARS IS LEDE VAN DIE BELASTINGBETALERSVERENIGING.

TOE EK VERLEDE JAAR VAN U EN ANDER FIRMA'S SE PLANNE TE HORE GEKOM HET, HET EK REGSOPINIES INGEWIN EN EK WAS VER GEVORDERD OM 'N ARTIKEL 21 MAATSKAPPY TE STIG, WAARTOE VERSKEIE INWONERS, BEREID SOU WEES OM INSETTE TE LEWER EN HULLE TYD TE FAKTUREER EN AS DONASIE TEEN BELASTING AF TE SKRYF. ELKE GRONDEIENAAR SOU EEN AANDEEL IN DIE MAATSKAPPY, GRATIS ONTVANG @ 1C BETALING EN 90% VAN DIE BESLUIT, KON PER INTERNET GENEEM WORD. EK HET OP DAARDIE STADIUM REEDS 65% VAN ALLE GRONDEIENAARS, OP REKORD GEHAD, MAAR ONGELUKKIG HET EK OP 16 DESEMBER, OP OESTERBAAI 'N BEROERTE GEHAD EN DAARVANDAAN, HET MY GESONDHEID, MET RASSESKREDE AGTERUIT GEGAAN.

Dear Gerald,

Thank you for your email. RES Southern Africa are also keen for our projects to both be successful and to eliminate or minimise any negative effects on each other. Firstly, I just wanted to check that you had received our previous correspondence which is attached to this email. We hope the information within can give us the framework around which to discuss this further. I propose that we organise a conference call including our respective technical teams to discuss the specific separation distances between the turbines that you mention that are of concern.

Please be assured that RES Southern Africa are committed to finding a mutually agreeable solution.

Kind regards

Duncan Ayling

Dear Duncan

The Red Cap Kouga Development Company is looking forward to having RES's and its own wind farms working side by side with each other. However, we are still concerned with a few of your proposed turbine positions due to the impact they will likely have on the efficiencies of some of our turbine locations as approved in our Environmental Authorization. In this regard we are concerned with your turbines numbered: 59, 60, 61, 72, 74 & 77 and their impact on our turbines numbered: 70, 71, 72 and 74. Please will you provide us with the technical verification of the anticipated impacts on our efficiencies so that we have a framework around which we can discuss this further? We look forward to getting the required information and working with you to come to a suitable solution.

Subject: Oyster Bay wind project
Attachments: 45556737-0915s-090906.pdf

Dear Sir

As requested below are the farm portions for the Oyster Bay wind energy facility, Eastern Cape:

- » Portion 3 of Farm Klein Rivier 713
- » Portion 1, 2, 3, 4 and the Remainder of Farm Rebok Rant 715
- » Portion 1 and 3 of Farm Ou Werf 738
- » Portion 5 of Farm Klippedrift 732
- » Portion 10 and Portion 12 of Farm Kruis Fontein 681.

Please let me know if you require any further information. A CD copy of the EIA report has been sent to Anneliza Collet's office in Pretoria.

Kind Regards

Ravisha Ajodhapersadh

6th October 2011

Dear Mr van Van Niekerk

Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process.

Generally, although not exclusively, there is no specific set-back distance for wind farms that is strictly specified in various markets around the world. From an acoustics point of view setback does not ensure protection for neighbours - a setback of, say XXXm (550m in Ontario, Canada for instance), **may** be entirely suitable to ensure protection of amenity for “smaller” machines (say 50m rotor diameter), but not sufficient for protection of amenity should larger (say 100m rotor diameter) machines be employed.

The obvious solution to this is to make the set-back a function of rotor diameter. In Northern Ireland there is a loose recommendation for 10 times rotor diameter, which is what RES typically adhere to in initial layout design. However the acceptability of a project cannot be guaranteed through this means either because:

1. The specific turbine might be noisy (or quiet) for its size
2. The noise incident upon a property will be dependent upon the number of machines in close proximity to it – i.e. the context and layout of the wind farm. A house which is XXXm from one turbine (maybe the wind farm layout is like a line) does not receive the same noise incident upon it as a house which is XXXm from 5 turbines (essentially broadside, or encircling, the house).

Therefore the concept of setback is of more relevance to visual dominance aspects or as a guide to ensuring acoustic amenity. The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from international guidance on this issue.

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

Head of Development, RES Southern Africa

6th October 2011

Dear Mr van Staden

Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process and will do my best to answer your questions in green below:

Ek wil begin deur positief te reageer, dat ek in beginsel nie gekant is teen windlaaiers as alternatiewe kragopwekking nie. Dit is baie skoner as steenkoolkragstasies en minder gevaarlik as kernkragentrales. Ek het wel die volgende probleme, m.b.t. die ligging van die windlaaiers:

Let me start off by responding positively; that in principle I am not opposed to the use of wind chargers as an alternative source of power generation. It is considerably cleaner than coal-fired power stations and less dangerous than nuclear power stations. I do however have the following issues with regard the location of the wind chargers:

1. Oesterbaai is die laaste strandgebied, waar daar nog kuserwe uitgesit kan word. As u gaan kyk na die gebied tussen Gouritsmond en Van Stadensriviermond, is daar groot stukke grond, waar geen kuserwe uitgesit kan word nie. Ek persoonlik dink, dit is die ideale area om te gebruik vir windlaaiers, wat sonder ongerief van inwoners en woongebiede, benut kan word.

Oyster Bay is the last coastal area where stands can still be laid out. If you go and look at the area between Gouritsmond and the Van Staden's River Mouth, there are large areas of land where no coastal stands can be laid out. Personally I think that it would be the ideal area to use for wind chargers, which can be utilised without causing inconvenience to residents and residential areas.

Whilst coastal areas are indeed suitable areas for wind energy generation in terms of wind resource, RES are mindful that the coastal areas are usually of significant environment sensitivity.

2. Hoekom wil u die een stukkie paradys, wat daar nog in S.A. bestaan, kom ontsier, met reuse windlaaiers?

Why do you want to mar this one small piece of paradise that still exists in South Africa with giant wind chargers?

Most of the Oyster Bay project turbines are approximately 6km from the coast and the closest turbine is over 4km from the coast. The visual impact assessment shows that most Oyster Bay residents will not be able to see the wind turbines due to the village being mostly on the side of the hill looking seaward. Residents living on the top of the hill will only be able to see the wind turbines if they face inland.

3. Dit gaan die volgende tot gevolg hê:

This will have the following consequences:

3.1 My eiendoms waarde gaan val, gaan u firma my vergoed daarvoor? Ek het op die oomblik 'n koper, maar hy wag eers op die uitkoms van u en ander firma's se finale planne.

The value of my property is going to drop; will your company compensate me for this? At this stage I have a buyer, but he is awaiting the outcome of yours and another company's final plans.

Studies have been carried out in other countries and there is no proven link between proximity to wind farms and property prices.

1. *What is the impact of wind farms on house prices?* by Peter Dent and Dr Sally Sims of Oxford Brookes University, examined three locations in Cornwall. See www.rics.org/Environmentalandlandconsultancy/Energy/Renewableenergy/Wind%20farm%20FiBRE.html
2. *The Effect of Wind Development on Local Property Values*, Renewable Energy Policy Project, May 2003, online at www.crest.org/articles/static/1/binaries/wind_online_final.pdf
3. *Impact of Wind Farms on Residential Property Prices – Crystal Rig Case Study*, Edinburgh Solicitors' Property Centre, February 2007, available from ESPC. See www.espc.com

3.2 Enige ontwikkeling, gaan gepaard met 'n toestroming van werksoekers en gepaardgaande hoër misdaadsyfers. Dit gaan die karakter van oesterbaai dramaties verander. My kinders het daar opgegroeï. Ek self is tans aan 'n rolstoel gekluister, maar my vrou, het gedurende die afgelope Aprilvakansie, nog elke dag stoksielalleen, klippepunt toe en terug gestap, sonder enige vrees. Any development is associated with an influx of job seekers and associated higher crime figures. This is going to dramatically change the character of Oyster Bay. My children grew up there. Currently I am confined to a wheelchair, but even during the past April holidays, my wife was able to walk to the rocky point and back all alone and without fear.

You are indeed correct that development is normally associated with an influx of job seekers and associated higher crime figures. This has been identified as an impact within the social impact report. RES will implement mitigation measures to reduce this risk:

1. Except for security, no workers will be housed on site overnight
2. Approximately 160 semi-skilled and low-skilled workers will be employed during the construction. In order to reduce influx of new people, RES will attempt to source the majority of these workers from existing communities in the local area.
3. Workers will be closely managed and a code of conduct will be enforced.

3.3 Is u firma bereid om daardie veiligheid, wat ons die afgelope 20 jaar ervaar het te waarborg?

Is your company willing to guarantee us that safety that we have been enjoying for the past 20 years?

RES will do its best to minimise any negative effect on public safety created by the project however RES cannot be held responsible for influences outside of our control.

- 3.4 Hoewel ek hier bo in Gauteng sit, is my versekeringsmaatskappy, nog gelukkig met 'n alarm, geen diefwering of veiligheidsdeure, soos wat hier van my verwag word nie. Sou misdaad toeneem, gaan dit daar ook vereis word. Gaan u firma die koste daarvoor dra?
Although I reside up here in Gauteng, my insurance company is still happy with an alarm, without any burglar bars or safety doors, which is expected from me here. Should crime increase, this is going to be the requirement there as well. Will your company carry the costs?

Should crime be proven to be directly attributed to the RES project then compensation will be considered.

4. Geraasbesoedeling: enige ding wat draai, of dit nou 'n huiswaaier, lugreëling, windpomp, windlaaier of wat ookal is, maak 'n konstante lawaai. Hoe ouer, hoe erger. U kan sê net wat u wil, ek was in Europa en het met mense gepraat en self geluister. Selfs so ver as 10 km windaf, tel jy nog die geraas op. Wil u dit regtig onaangenaam vir ons as inwoners maak, om die stilte wat ons tans ervaar, prys te gee?
Noise pollution: anything that turns, whether it is a fan at home, an air conditioner, a windmill, wind charger or whatever, makes a constant noise. The older it gets, the worse it becomes. Say what you like, I was in Europe and spoke to people and heard it myself. Even from as far as 10 km downwind, you can hear the noise. Do you really want to make it unpleasant for us as residents, to give up the tranquillity we currently experience?

The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from international guidance on this issue.

5. Die impak wat dit op ons voëllewe, alleen gaan hê, is enorm groot, want oor 'n area van kilometers, kan hulle nie meer hulle normale vlugpatrone, handhaaf nie.
The impact it will have on our avifauna alone is enormous, because over an area of kilometres they would not be able to maintain normal flight patterns.

The impact on avifauna is taken seriously by RES and we have voluntarily employed independent bird specialists to monitor the area following the South African best practice guidelines. The results of the monitoring program will be taken into account in the wind farm design.

6. My grootste vrees, is dat ons by Oesterbaai, oor bewegende grondformasie sit. Ons is gebou op bewegende duine en rotsplaatte. Het u al die uitwerking van die konstante vibrasie daarop ondersoek en is dit, enigsens in u impakstudies aangespreek, sou daar skade daaroor ontstaan, sou u pa staan vir die koste daarvan?
My biggest fear is that in Oyster Bay, we have moving land formations. We were built on moving dunes and rock plates. Have you investigated the effect of the constant vibration on that and has it been addressed in your impact studies at all? Should any damage result from this, will you take responsibility for the costs incurred?

Geological specialist studies on the Oyster Bay project have not identified this as a potential effect. RES have built over 5000MW of wind farms in many countries over the last 25 years and, as far as RES is aware, no reports of this happening have ever been observed.

7. My eie huis is op klip gebou, maar hoewel ek geen krake in my mure het nie, het ek barste in my vloerteëls begin optel. Na wye konsultasie met omgewingskenners, ingenieurs, bouers, ens. was die slotsom, dat behalwe die bewegende duine, daar ook twee klipplate is wat toenemend druk ervaar, van geboue teen die rand en dat die klipplate ook besig is om van mekaar af te skuif. Ek het toetsgate laat boor en dit blyk wel so te wees. Ek moet dus as voorsorgmaatreël, gate deur die eerste klipplaat laat boor en 100 mm staalpenne laat insit tot 50 cm – 100 cm in die tweede klipplaat in en dit opvul met 1 vk m gewapende beton, om te keer dat my hele huis vorentoe gaan skuif.

My own house is built on rock, but although I have no cracks in my walls, I have started noticing cracks in my floor tiles. Following wide consultation with environmental experts, engineers, builders, etc., the conclusion was that, in addition to the moving dunes, there are also two rock plates that are experiencing increased pressure from buildings along the edge and the fact that the rock plates are moving away from each other. I had inspection holes drilled and it indeed seems to be the case. So as a precaution, I have to have holes drilled through the first plate and have 100 mm steel pins inserted 50 cm to 100 cm into the second plate and have it filled up with 1 m² of reinforced concrete to prevent my entire house from moving forward.

8. Het u enige navorsing daaroor gedoen, want 'n konstante vibrasie, kan so 'n verskuiwing bespoedig en tot gevolg hê, dat Oesterbaai, mettertyd in die see in kan verdwyn. Ek sou graag wou hê, dat u die verskynsel sal ondersoek en volledig, verslag daaroor sal lewer.

Have you done any research concerning this, because a constant vibration can accelerate such a movement and could result in Oyster Bay eventually disappearing into the ocean? I would like you to investigate the phenomenon and report back on it comprehensively.

Geological specialist studies on the Oyster Bay project have not identified this as a potential effect. Further investigation on this has not been recommended by the specialists.

9. Teerpad? Anders as die permanente inwoners, dink ek persoonlik, die grondpad was nog altyd een van ons grootste bates. In die sin dat dit ongewensde elemente buite gehou het en ook ons 8 km strand, vir onself, behoue laat bly het. 'n Teerpad, gaan 'n toevloei van dagbesoekers teweeg bring en daar is nie toiletfasiliteite of parkering vir besoekers beskikbaar nie. Gaan u daarvoor betaal? A tarred road? Unlike the permanent residents, I personally believe that the dirt road has always been one of our biggest assets. In the sense that it kept out undesirable elements and conserved our 8 km of beach for ourselves. A tarred road will bring about an influx of day visitors and there are no toilet facilities or parking available for visitors. Are you going to pay for it?

The roads will need to be surveyed and reinforced where necessary but RES have not suggested that a tar road will be built. Reinforcements and repairs required for the RES project will be paid for by RES.

Om 'n inligtingsvergadering in September daar te hou, gaan feitlik geen doel dien nie, want ons kan nie daar wees nie. 16 – 20 Desember, sal dalk 'n beter datum gewees het, want in September, gaan u vergadering hou, met die paar inwoners en dalk 'n paar omliggende boere. Die Belastingbetalersvereniging, het geen mandaat om namens die meerderheid inwoners te kan praat nie, want minder as die helfte van die eienaars is lede van die Belastingbetalersvereniging.

To hold an information session there in September will serve virtually no purpose, because we can't be there. 16 – 20 December could perhaps be a better date, because in September, you are going to conduct a meeting with the few residents and maybe a few farmers from the surrounding area. The Ratepayer's Association has no mandate to speak on behalf of the majority of residents, because fewer than half of the owners are members of the Ratepayer's Association.

The information session is only one part of the public consultation process which the independent environmental assessment practitioners have carried out for RES. Fair and reasonable opportunity has been provide to all interested and affected parties as per South African regulations. Also, a meeting in late December would not be suitable for many people who would be on holiday elsewhere.

Toe ek verlede jaar van u en ander firma's se planne te hore gekom het, het ek regsopinies ingewin en ek was ver gevorderd om 'n Artikel 21 Maatskappy te stig, waartoe verskeie inwoners, bereid sou wees om insette te lewer en hulle tyd te faktureer en as donasie teen belasting af te skryf. Elke grondeenaar sou een aandeel in die maatskappy, gratis ontvang @ 1c betaling en 90% van die besluite, kon per Internet geneem word. Ek het op daardie stadium reeds 65% van alle grondeienaars, op rekord gehad, maar ongelukkig het ek op 16 Desember, op Oesterbaai 'n beroerte gehad en daarvandaan, het my gesondheid, met rasseskrede agteruit gegaan.

Last year, when I heard of your and other companies' plans, I obtained legal opinions. I was far advanced in creating a Section 21 Company, to which various residents were willing to give inputs and to invoice their time and write it off as a donation against tax. Each land owner would receive a free share in the company at payment of 1c and 90% of the resolutions could be taken via the Internet. At that stage I already had 65% of all land owners on record, but unfortunately I had a stroke in Oyster Bay on 16 December and since then my health has deteriorated rapidly.

Ek het geen breinskade opgedoen nie, maar wel erge liggaamsinkortings. Ek was sedertdien, vanjaar al vir 85 dae in verskeie hospitale en dan het die weerlig ook nog my rekenaar bygekom, ek kon wel van die data herwin, maar daar is data wat verlore is en nie op my eksterne hardeskyf gestoor was nie.

I didn't suffer any brain damage, but I do have serious physical limitations. So far this year I have spent 85 days in various hospitals and then the lightning hit my computer. I was able to retrieve some of the data, but some data has been lost and was not stored on my external hard drive.

Nodeloos om te sê, ek het geen verdere aandag daaraan gegee nie. Ek het wel die konsep en e-posse wat ek kon herwin het, twee weke gelede, as 'n gedagte aan die Voorsitter van die Belasbetalersverniging deurgegee. Ek het die konsep opgetel, by 'n vriend naby Boesmansriviermond. Hulle het weggedoen met 'n Belastingbetalersvereniging en met groot sukses 'n Artikel 21 NPO

Maatskappy, begin bedryf, met baie meer sukses en insette van die lede en tot groot voordeel van alle inwoners, want skielik het daar regsmense, finansiële kundiges, kontrakteurs, ens. na vore gekom en hulle kennis, vaardighede, ens. aangebied in ruil vir belastingaftrekkings en lidmaatskap was gratis, mits jy die geregistreerde eienaar van 'n eiendom in die gebied was. Hulle het meer kontantdonasies ontvang, as wat die Belastingbetalersvereniging ooit met lidmaatskapsgeelde kon genereer en hulle het namens 100% van alle eienaars gepraat.

Needless to say, I have not given the matter any further attention. I have given the concept and the emails I could retrieve as a concept to the Chairperson of the Ratepayers' Association two weeks ago. I got the concept from a friend near Boesmansriviermond. They did away with a Ratepayers' Association and started operating a Non-profit Section 21 Company with great success; much more success and inputs from members and to a great benefit of all residents, since legal experts, financial experts, contractors, etc. suddenly came to the fore to offer their knowledge, skills, etc. in return for tax deductions. Membership was free if you were a registered owner of property in the area. They received more cash donations than Ratepayers' Associations ever could generate with their membership fees and they spoke on behalf of 100% of all owners.

Ten spyte van die weerligskade, beskik ek steeds oor meer e-posse, as waaroor die Belastingbetalersvereniging beskik en ek het dit aan hulle deurgegee, saam met die Konsepsgrondwet, wat ek opgestel het.

Despite the lightning damage, I still have more emails than the Ratepayers' Association and I have given it to them, together with the Draft Constitution that I have compiled.

As daar enigsens aandag aan e-posse geskenk word, dan is my onvoorwaardelike gevoel 'n definitiewe nee. Ek dink oesterbaai is te kosbaar en daar is definitief beter plekke om dit met minder nadele vir minder mense, wel gevestig kan word.

If any attention is paid to the emails, then my unconditional feeling is a definitive 'no'. I think Oyster Bay is too valuable and there are definitely better places to establish this with fewer disadvantages for fewer people.

By voorbaat dank.

Thanking you in advance.

Koos van Staden

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

6th October 2011

Dear Lynn Slogrove, Jenny Barwood, Renee Botha, Michelle Strydom,

Thank you for submitting your concerns into the public consultation process for the RES Southern Africa Oyster Bay wind energy project. I hope that I can assure you that RES Southern Africa will, at all times, attempt to minimise disruption to the local residents of St Francis Bay whilst at the same time delivering the project to Oyster Bay and bringing the associated benefits to the local community in that area.

I agree that over 400 heavy vehicles will have an impact on the road and on traffic congestion, however this is over a probable 2 year time period and so averages approximately 4 abnormal heavy loads per week. RES Southern Africa will therefore be able to contract these deliveries so that they avoid passing by St Francis Bay at busy times of day. We undertake to consult with you and other residents to agree on times to be avoided.

Although the road is currently in a poor state of repair, RES Southern Africa will be required to enter agreements with the roads authorities to ensure the roads are upgraded and reinforced so that they can support the heavy traffic safely. Any damage caused by RES Southern Africa use of the roads will be repaired quickly and efficiently at our cost.

RES Southern Africa identified that traffic near St Francis Bay may bring concern to the residents and so we have already spent extra time identifying an alternative route which approaches Oyster Bay from the West. This Western approach is significantly longer and involves some difficult pinch-points where manoeuvring long blades around corners would be very difficult.

The route survey, contracted by RES Southern Africa, assessed both route options and identified the approach from the East that passes near St Francis Bay to be shorter and more efficient. At this point in time RES Southern Africa would like to keep both routes available as options.

If Department for Environmental Affairs environmental authorisation is granted, and the project is successful in bidding for allocation from the Department of Energy, and all other permits are secured, then construction could start in mid 2013 at the earliest. At that time a new route survey would be needed prior to road strengthening and subsequent commencement of the delivery of materials and components. It is also at this time that we would re-consult the local residents to agree on delivery times to be avoided, as mentioned.

RES Southern Africa is a responsible and experienced family owned company who have been sustainably developing wind energy projects for over 25 years. We very much hope that, through ongoing communication and respectful consideration of concerns, the RES Southern Africa Oyster Bay project can have the support of the residents of St Francis Bay and other local villages.

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

Head of Development, RES Southern Africa

(please tick the relevant box)

Note: You are required to register as an I&AP to receive further correspondence regarding the EIA process for the project. Should you register as an I&AP, your contact details may be made public.

Please state your interest in the project (add additional pages if necessary):

I am fully supportive of this, because this is going to create jobs oppo-
rtunities. This will be effective in terms of giving more power
to the electricity that we have. This is also a significant step inter-
ms of creating more development in our community.

Please list your questions, views or concerns regarding the project (add additional pages if necessary):

How are you going to make sure that this is not going to be
on the hands of ~~white~~ people? I would also want to know how
much general workers will pay per day, because we sick and tired
of white people underpay us here. I'll propose and plea to you to
help our soccer team in order to upgrade the field and also
sponsorship as our club in already joined the league.

English Afrikaans

St Francis Kromme Trust

The St Francis Kromme Trust supports the quest for renewable energy production for South Africa and particularly environmentally-friendly sources of renewable energy. The issues we have with wind power are its inefficiency, high cost, and major impact on the environment.

An Eskom spokesperson estimates that a wind farm is doing well if it's putting power into the grid 27% of the time¹. The actual amount of power produced is minimal, about a quarter of the capacity claimed². And it is extremely expensive: in Britain at least twice the price of electricity from conventional power stations. In South Africa, if the 2009 REFIT tariff applies, it will be two and a half times the price. But most of all, the impact on the environment is substantial.

Hundreds of giant turbines, sunk into huge cubes of concrete, planted over hectare after hectare of rural landscape. There are at least ten wind farms³ planned in the area of the Kouga Municipality in the Eastern Cape. Eight of these facilities are within a 20km radius of one another, and four of them either border on one another or almost do (Tsitsikamma, Red Cap West, RES Oyster Bay, and Red Cap Central).

Four of these proposed developments have already received environmental authorisation. The Jeffreys Bay Wind Project, Red Cap's Western Cluster, Red Cap's Central Cluster, and Red Cap's Eastern Cluster will be spread over 12 000 hectares – almost 6% of the whole Kouga area.

Construction of all these facilities would not only permanently alter the nature of this rural landscape, the effect on bird species would also be significant. This particular area is the country's stronghold for Denham's Bustard, a vulnerable species, and Blue Cranes, White-bellied Korhaan, White Stork. Greater and Lesser Flamingo and Secretarybird are also found here in high densities.

The most severely threatened of South Africa's ten bustard species is the Denham's Bustard. Wind farms, like power lines, pose a serious threat to bustards (and to cranes). Internationally, bustards are at the top of the mortality lists for wind turbines. The reason has recently been identified through research, which shows that bustard visual fields have large blind sectors projecting forwards. Unlike herons, which need comprehensive forward vision for close-range stealth-foraging, bustards need wide ranging vision to detect predators and food sources at considerable distances. Blind spots are the evolutionary price they pay, and without man-made obstacles in their flight paths the price would be negligible. (Information from Birdlife SA's *Bustard Beat*: research by Graham Martin and Jessica Shaw)

We submit that, for an inefficient power source, these environmental costs are too high.

ATT: The Chairperson

RE: Wind Energy Facility, near Oyster Bay, Eastern Cape Province

Dear Sir / Madam

Savannah Environmental acknowledges receipt of your letter which was received on 19 July 2011 via email. We thank you for your contribution and encourage you to communicate any further concerns to us without hesitation.

The requested response to your issues/ concerns stated in your letter is provided herewith (in blue text) by the EIA Project team, and where applicable, by the developer, RES Southern Africa.

1. Bird and Bat Impacts

Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e. "A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa..." Only in this way will sufficient data be accumulated to assess accurately the level of impact associated with renewable energy facilities.

UNIT 606, 1410 EGLIN OFFICE PARK, 4 EGLIN ROAD, SUNNINGHILL, GAUTENG
PO BOX 142, SUNNINGHILL, 2157, GAUTENG
TEL: +27 (0)11 234 6621 • FAX: +27 (0)86 684 0547 • E-MAIL: INFO@SAVANNAHSA.COM
WWW.SAVANNAHSA.COM

DIRECTORS: KM JODAS • J THOMAS • M MATSABU
COMPANY REGISTRATION NO.: 2006/000127/01
VAT REGISTRATION NO.: 4780226736

We concur that the impacts of wind energy facilities on birds and bats are unknown in South Africa, this is because no large scale wind energy facility exists in the country. In the absence of this knowledge the wind energy facility development will be guided by the EIA specialists' studies and by international best practice. Note that the undertaking of bird monitoring at proposed wind energy facility sites within South Africa is currently considered as good practice and is not a legal requirement. This will remain the case until guidelines are adopted and gazetted by the regulating authorities.

RES Southern Africa is committed to the responsible and sustainable development of wind energy and their development manager is the South African Wind Energy Association's board member who is working collaboratively with the BAWESG on the further development of the bird monitoring guidelines and other strategic bird, bat and wind energy issues. Note that RES Southern Africa has already initiated a bird monitoring programme on their site to consider bird presence and movement on their proposed development site for a period of one year as per the BAWESG guidelines. Bat sensitivities will be assessed in the EIA studies and if monitoring is required it will be implemented pre-construction. This will fulfil any requirements for pre-construction monitoring as proposed by the guidelines for bird monitoring, as well as any requirement which may be included within an Environmental Authorisation for the project (should it be authorised).

2. Decommissioning Sureties

Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, including concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.

Provision for the possible requirement for financial provision for rehabilitation is made within the EIA Regulations (refer to Regulation 33 (g)(v)). This will be considered within the drafting of the Environmental Management Programme for the project. In addition, National DEA will have to consider the request for financial surety as part of their decision-making for the EIA. However, it is anticipated that the wind energy facility will have a lifespan of up to 20-25 years. The current EIA Regulations requires a separate environmental assessment for decommissioning of the facility at the end of the project lifespan. Any decommissioning activities will be required to comply with the legislation relevant at the time.

RES Southern Africa is fully owned by RES Group which is an established, family owned company with over 1000 employees worldwide. RES has been developing, constructing and operating wind farms for over 25 years and is one of the world's

leading international developers. RES has an impressive track record of producing successful wind energy facilities of very high quality.

Should you have any queries kindly contact us.

Subject: RE: Submission re Oyster Bay wind project

Hi Rav,

Is this something that needs replying to? Or do we wait until the EIA public review period in August?

FYI:

- A wind turbine actually produce power 70-85% of the time depending on location and wind regime.
- Capacity factors of 25-35% are common so they are 'almost' correct about wind farms producing a quarter of their rated capacity.
- And cost... well, we know conventional power costs are going up and wind power costs are going down. How soon will these costs meet is the only significant question.

Attachments: WTG Co-ordinates - Only Central - Final.pdf

Dear Duncan and Ravisha

Please find attached the co-ords of our turbines. As you will be aware, these may change slightly due to the need for final micro-siting.

Regarding the details on our turbines, our hub height will be between 80-100m and the blade length will be between 45-55m depending on what we finalise based on the bid criteria. Please can you work with these and get back to us with regard to how you have taken this into consideration in your proposed layout.

Thanks and Regards

Lance

Hi Lance,

Thanks for the turbine layout. Please provide turbine location coordinates, expected turbine type, model and size, as this will help us make allowances and determine adequate spacing.

Please also let us know if any of the details above change over time.

Best regards

Subject: Oyster Bay Wind Farm DEA Ref No 12/12/20/1585

Dear Ravisha

Thanks for your time on the phone last week. As indicated Red Cap has an Environmental Authorisation for the Red Cap Kouga Wind Farm which borders on the East of the wind farm indicated in the Oyster Bay Wind Farm (DEA Ref No 12/12/20/1585) for which you are the EAP. As we are adjoining neighbours and the development on the Oyster Bay wind farm may impact on our wind farm I would like to be registered as an IAP for this project.

Furthermore, I have attached the layout of our central cluster for our wind farm (this is the cluster that is on the Eastern Boarder of the Oyster Bay wind farm) which was approved in our EA. Please will you make sure that our approved layout, and particularly the turbines along this boundary, are taken account of in your

layout determination and specifically with regard to any impact on the efficiencies of our turbines. If you require any further information in this regard please do not hesitate to contact me.

Please confirm that I will be registered as an IAP and that this information will be taken account of in refining the layout on this proposed wind farm.

Thanks and regards

Subject: Turbine spacing

Dear Lance,

RES has significant experience at designing and constructing wind farms and in particular has a considerable understanding of different wind regimes and turbine manufacturer siting rules. Taking into account this knowledge and making use of software that has been developed to simulate the impacts of wakes on energy yield as well as turbine loading RES is designing the Oyster Bay turbine layout to minimise the effects on the adjacent Redcap turbines.

Specifically, taking into account site constraints, RES will be using a minimum spacing of 5 rotor diameters based on our maximum turbine envelope in the prevailing (bi-directional east west) wind directions, 3 rotor diameters for non-predominant directions, this will ensure any impacts on yield from increased turbulence and velocity deficits are kept to a minimum. The turbine layout would then be run with the predicted wind climate through software that has been based on the IEC standard 61400 (Edition 3 amended) that simulates the wake added turbulence on each turbine and a corresponding fatigue calculation to ensure that none of the turbines (both within the Oyster Bay layout and Redcap layout) would be at risk of manufacturer imposed curtailment.

Taking into account the above steps that RES are taking in their layout design there should be no significant impact on the operation of the Redcap turbines.

Please let me know if you have any questions or further concerns.

Kind regards

St Francis Kromme Trust

19 July 2011

The St Francis Kromme Trust raises two pressing concerns:

1. Bird and Bat Impacts

Bird and bat impacts are imperfectly known in South African conditions and specialist EIA studies are insufficient for assessing the probable impacts. It is important that monitoring be undertaken on all potential renewable energy facility sites, following the BAWESG (Birds and Wind Energy Specialist Group) protocols, for at least 1 year (all four seasons) before any construction is authorized. Any environmental authorization should include the conditions attached to the proposed Kouga Wind Farm Project, i.e.

“A bird monitoring programme must be implemented to document the effect of the operation of the wind energy facility on avifauna and bats. This should commence prior to construction, and continue during operation of the wind energy facility...Reports must be submitted to Birdlife South Africa, Endangered Wildlife Trust [EWT] and this Department [Environmental Affairs] on a quarterly basis... The baseline data collected and documented during the survey must be shared with the EWT and Birdlife South Africa...”

Only in this way will sufficient data be accumulated to assess accurately the level of impact associated with renewable energy facilities.

2. Decommissioning Sureties

Decommissioning could become necessary if the developer fails, as well as at the end of the life of a project. Decommissioning requires the removal of all structures and infrastructure, *including* concrete foundations. This is a costly exercise and a bankrupt business will not have the funds necessary for the job. The St Francis Kromme Trust urges that the Department of Environmental Affairs make it a requirement for financial sureties to be lodged at the outset of construction, sufficient to cover future decommissioning costs.

07 September 2011

Dear Stakeholder

**PROPOSED ESTABLISHMENT OF A WIND ENERGY FACILITY
ON A SITE NORTH OF OYSTER BAY, EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/1585)**

**ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
NOTICE OF PUBLIC REVIEW PERIOD FOR THE DRAFT EIA REPORT &
PUBLIC MEETING**

Renewable-Energy Systems (RES) Southern Africa (Pty) Ltd is proposing to establish a commercial wind energy facility and associated infrastructure on a site located approximately 6 km north of Oyster Bay in the Eastern Cape Province. An area which falls within the Kouga Local Municipality has been identified for consideration within an Environmental Impact Assessment (EIA). It is proposed for a cluster of up to 80 wind turbines to be constructed over an area of approximately 23 km² in extent. The nature and extent of this facility is explored in more detail in this document.

The proposed turbines would be appropriately located on the identified site, which covers an area of ~23 km². The broader site is proposed to accommodate both the wind turbines as well as the associated infrastructure which is required for such a facility including:

- » **Wind turbines** (between 80 – 120m hub height) and **concrete foundations** to support them.
- » **Cabling** between the turbines, to be laid underground where practical.
- » **Internal access roads** to each turbine.
- » **Workshop area** for control, maintenance and storage.
- » An on-site **substation** to facilitate the connection between the wind energy facility and the grid.
- » New overhead **power line** to connect to Eskom's existing Melkhout (132/66kV) substation, which is located approximately 20km from the site.

INVITATION FOR PUBLIC REVIEW OF THE DRAFT EIA REPORT

In accordance with the EIA Regulations, a Draft EIA Report is being compiled and will be available for public review and comment by Interested and Affected Parties (I&APs) and stakeholders. You are invited to review and comment on the draft report at the following locations:

- » Oyster Bay Library
- » Humansdorp Public Library
- » St Francis Bay Library
- » www.res-sa.com (follow the link to Our Projects)
- » www.savannahSA.com/projects

The period for public review is from **14 September 2011 to 14 October 2011**. Please submit written comment to Savannah Environmental no later than 14 October 2011. All comments received will be included in the Final Scoping Report, which will be submitted to DEA for their consideration and decision.

Comments can be made as written submission via fax, post or e-mail to Shawn Johnston.

PUBLIC MEETING

In order to facilitate comments on the draft EIA Report, a public meeting will be held during the public review period. All interested and affected parties are invited to attend a public meeting:

DATE: 20 September 2011
TIME: 18:00
VENUE: Oyster Bay Community Hall

The aim of the public meeting is to provide you with more information regarding the proposed project (including technical details, project process and timeframes etc.), to provide a summary of the findings of the EIA undertaken, to invite

comment on the proposed project, and to further discuss possible issues of specific concern to you which may need to be investigated and managed through the EIA process.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the proposed project. Our team welcomes your participation and looks forward to your involvement throughout this process.

Yours sincerely,

Shawn Johnston

Process Facilitator for the EIA Phase of the Oyster Bay Wind Energy Facility Environmental Impact Assessment Process

SUSTAINABLE
FUTURES ZA

07 September 2011

Dear Stakeholder

**NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS:
CONSTRUCTION OF THE PROPOSED
TSITSIKAMMA COMMUNITY WIND ENERGY FACILITY
EASTERN CAPE PROVINCE
(DEA Ref No. 12/12/20/2209)**

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT PROCESS

Exxaro Resources and Watt Energy (Pty) Ltd are proposing to establish a commercial wind energy facility and associated infrastructure on a site located within the Kouga Local Municipality in the Eastern Cape Province. The proposed site is situated approximately 30 km west of Humansdorp, south of the N2 National Road in the Tsitsikamma area. Based on an extensive pre-feasibility analysis and site identification process undertaken, as well as an analysis of the wind resource in the area, a favourable area has been identified for consideration and assessment as per the requirements of an Environmental Impact Assessment (EIA). Wind turbines with a capacity of up to **100 MW**, collectively referred to as a **wind energy facility**, are planned to be constructed over an area of approximately 54 km² in extent.

PUBLIC FEEDBACK MEETING

All interested and affected parties are invited to attend a public feedback meeting to be held on 22 September 2011, 18h00 at the Clarkson Community Hall, Clarkson

DRAFT EIA REPORT AVAILABLE FOR REVIEW

The Draft EIA Report has been made available for public review from 16 September 2011- 17 October 2011 at the following locations:

- » www.savannahSA.com
- » Kareedouw Library
- » Clarkson Library

To obtain further information and register on the project database, please submit your name, contact information and interest in the project to the contact person below.

Comments can be made as written submission via fax, post or e-mail.

Please submit your comments to

Shawn/Ravisha

I am the owner of 10 Brander Street , Oysterbay.

In principle I do not have a problem with a windfarm (it generates clean electricity), as long as it is erected and maintained in accordance with good international practice. So proper assurance must please be given in this regard.

One of the biggest problems with windfarms, is the irritating low frequency noise it generates, for anybody living nearby. In Europe, as I witnessed again recently, these facilities are never erected close to residential areas, specifically for this reason.

I do not know what an acceptable distance is between a windfarm and a residential area, in international good practice. I would however appreciate it if you could provide me (and other Oysterbay residents) with this information, as well as the assurance that the intended windfarm is outside the specified good practice distance.

Regards
Bram de Klerk

Hi

I am very much against this.

If really needed, the turbunes must be on the north side of the gravel road from palmietvley - oyster bay - Humansdorp.

Nothing close to the sea - it will mess up the seafront and corrosion will be too high as well.

From the map I see that some of the turbunes will be close to the sea, why can't all of them be north of the gravel road?

ShawnJohnston <swjohnston@mweb.co.za>

Dear Maggie

Your attached letter refers. Attached is RES response regarding the concern about the access road to be used.\

Below is an additional response on the cumulative bird impacts concern:

The avifauna study considered the cumulative effect of the authorised wind projects in the Overberg region. RES I welcome the suggested possible mitigation for cumulative impacts. As this is a strategic level mitigation RES would suggest that it should be discussed in the SAWEA/BAWESG working group which is the dedicated forum for strategic topics such as these. RES will ask for it to be placed on the agenda of the next SAWEA meeting.

Kind Regards

Hi Shawn,
Herewith submission for Oyster Bay EIA.

Is Exxaro a member of SAWEA? I will send a similar submission for Tsitsikamma if so but I don't see their name on the website? Incidentally, what is the closing date for Tsitsi. submissions?

Hope you had a good meeting in Clarkson!

Subject: OESTERBAAI WINDLAAIERS

GEAGTE MNR JOHNSTON/RAVISHA

EK WIL BEGIN DEUR POSITIEF TE REAGEER, DAT EK IN BEGINSSEL NIE GEKANT IS TEEN WINDLAAIERS AS ALTERNATIEWE KRAGOPWEKKING NIE. DIT IS BAIE SKONER AS STEENKOOLKRAGSTASIES EN MINDER GEVAARLIK AS KERNKRAGSENTRALES. EK HET WEL DIE VOLGENDE PROBLEME, M.B.T. DIE LIGGING VAN DIE WINDLAAIERS.

1. OESTERBAAI IS DIE LAASTE STRANDGEBIED, WAAR DAAR NOG KUSERWE UITGESIT KAN WORD. AS U GAAN KYK NA DIE GEBIED TUSSEN GOURITSMOND EN VAN STADENSRIVIERMOND, IS DAAR GROOT STUKKE GROND, WAAR GEEN KUSERWE UITGESIT KAN WORD NIE. EK PERSOONLIK DINK, DIT IS DIE IDEALE AREA OM TE GEBRUIK VIR WINDLAAIERS, WAT SONDER ONGERIEF VAN INWONERS EN WOONGEBIEDE, BENUT KAN WORD.
2. HOEKOM WIL U DIE EEN STUKKIE PARADYS, WAT DAAR NOG IN S.A. BESTAAN, KOM ONTSIER, MET REUSE WINDLAAIERS?
3. DIT GAAN DIE VOLGENDE TOT GEVOLG Hê:
 - 3.1 MY EIENDOMSWAARDE GAAN VAL, GAAN U FIRMA MY VERGOED DAARVOOR? EK HET OP DIE OOMBLIK 'N KOPER, MAAR HY WAG EERS OP DIE UITKOMS VAN U EN ANDER FIRMA'S SE FINALE PLANNE.
 - 3.2 ENIGE ONTWIKKELING, GAAN GEPAARD MET 'N TOESTROMING VAN WERKSOEKERS EN GEPAARDGAANDE HOËR MISDAADSYFERS. DIT GAAN DIE KARAKTER VAN OESTERBAAI DRAMATIES

VERANDER. MY KINDERS HET DAAR OPGEGROEI. EK SELF IS TANS AAN 'N ROLSTOEL GEKLUISTER, MAAR MY VROU, HET GEDURENDE DIE AFGELOPE APRILVAKANSIE, NOG ELKE DAG STOKSIELALLEEN, KLIPPEPUNT TOE EN TERUG GESTAP, SONDER ENIGE VREES.

- 3.3 IS U FIRMA BEREID OM DAARDIE VEILIGHEID, WAT ONS DIE AFGELOPE 20 JAAR ERVAAR HET TE WAARBORG?
- 3.4 HOEWEL EK HIER BO IN GAUTENG SIT, IS MY VERSEKERINGSMAATSKAPPY, NOG GELUKKIG MET 'N ALARM, GEEN DIEFWERING OF VEILIGHEIDSDEURE, SOOS WAT HIER VAN MY VERWAG WORD NIE. SOU MISDAAD TOENEEM, GAAN DIT DAAR OOK VEREIS WORD. GAAN U FIRMA DIE KOSTE DAARVOOR DRA?
4. GERAASBESOEDELING: ENIGE DING WAT DRAAI, OF DIT NOU 'N HUISWAAIER, LUGREËLING, WINDPOMP, WINDLAAIER OF WAT OOKAL IS, MAAK 'N KONSTANTE LAWAAI. HOE OUER, HOE ERGER. U KAN SÊ NET WAT U WIL, EK WAS IN EUROPA EN HET MET MENSE GEPRAAAT EN SELF GELUISTER. SELFS SO VER AS 10 KM WINDAF, TEL JY NOG DIE GERAAS OP. WIL U DIT REGTIG ONAANGENAAM VIR ONS AS INWONERS MAAK, OM DIE STILTE WAT ONS TANS ERVAAR, PRYS TE GEE?
5. DIE IMPAK WAT DIT OP ONS VOËLLEWE, ALLEEN GAAN HÊ, IS ENORM GROOT, WANT OOR 'N AREA VAN KILOMETERS, KAN HULLE NIE MEER HULLE NORMALE VLUGPATRONE, HANDHAAF NIE.
6. MY GROOTSTE VREES, IS DAT ONS BY OESTERBAAI, OOR BEWEGENDE GRONDFORMASIE SIT. ONS IS GEBOU OP BEWEGENDE DUINE EN ROTSPLAATTE. HET U AL DIE UITWERKING VAN DIE KONSTANTE VIBRASIE DAAROP ONDERSOEK EN IS DIT, ENIGSENS IN U IMPAKSTUDIES AANGESPREEK, SOU DAAR SKADE DAARVOOR ONTSTAAN, SOU U PA STAAN VIR DIE KOSTE DAARVAN?
7. MY EIE HUIS IS OP KLIP GEBOU, MAAR HOEWEL EK GEEN KRAKE IN MY MURE HET NIE, HET EK BARSTE IN MY VLOERTEËLS BEGIN OPTEL. NA WYE KONSULTASIE MET OMGEWINGSKENNERS, INGENEURS, BOUERS, ENS. WAS DIE SLOTSOM, DAT BEHALWE DIE BEWEGENDE DUINE, DAAR OOK TWEE KLIPPLATE IS WAT TOENEMEND DRUK ERVAAR, VAN GEBOUE TEEN DIE RAND EN DAT DIE KLIPPLATE OOK BESIG IS OM VAN MEKAAR AF TE SKUIF. EK HET TOETSGATE LAAT BOOR EN DIT BLYK WEL SO TE WEES. EK MOET DUS AS VOORSORGMAATREËL, GATE DEUR DIE EERSTE KLIPPLAAT LAAT BOOR EN 100 MM STAALPENNE LAAT INSIT TOT 50CM – 100 CM IN DIE TWEDE KLIPPLAAT IN EN DIT OPVUL MET 1 VK M GEWAPENDE BETON, OM TE KEER DAT MY HELE HUIS VORENTOE GAAN SKUIF.
8. HET U ENIGE NAVORSING DAARVOOR GEDOEN, WANT 'N KONSTANTE VIBRASIE, KAN SO 'N VERSKUIWING BESPOEDIG EN TOT GEVOLG HÊ, DAT OESTERBAAI, METTERTYD IN DIE SEE IN KAN VERDWYN. EK SOU GRAAG WOU HÊ, DAT U DIE VERSKYNSSEL SAL ONDERSOEK EN VOLLEDIG, VERSLAG DAARVOOR SAL LEWER.
9. TEERPAD? ANDERS AS DIE PERMANENTE INWONERS, DINK EK PERSOONLIK, DIE GRONDPAD WAS NOG ALTYD EEN VAN ONS GROOTSTE BATES. IN DIE SIN DAT DIT ONGEWENSDE ELEMENTE BUITE GEHOU HET EN OOK ONS 8 KM STRAND, VIR ONSSELF, BEHOUE LAAT BLY HET. 'N TEERPAD, GAAN 'N TOEVLOEI VAN DAGBESOEKERS TEWEEG BRING EN DAAR IS NIE TOILETFASILITEITE OF PARKERING VIR BESOEKERS BESKIKBAAR NIE. GAAN U DAARVOOR BETAAL?

OM 'N INLIGTINGSVERGADERING IN SEPTEMBER DAAR TE HOU, GAAN FEITLIK GEEN DOEL DIEN NIE, WANT ONS KAN NIE DAAR WEES NIE. 16 – 20 DESEMBER, SAL DALK 'N BETER DATUM GEWEES HET, WANT IN SEPTEMBER, GAAN U VERGADERING HOU, MET DIE PAAR INWONERS EN DALK 'N PAAR OMLIGGENDE BOERE. DIE BELASTINGBETALERSVERENIGING, HET GEEN MANDAAT OM NAMENS DIE MEERDERHEID INWONERS TE KAN PRAAT NIE, WANT MINDER AS DIE HELFTE VAN DIE EIENAARS IS LEDE VAN DIE BELASTINGBETALERSVERENIGING.

TOE EK VERLEDE JAAR VAN U EN ANDER FIRMA'S SE PLANNE TE HORE GEKOM HET, HET EK REGSOPINIES INGEWIN EN EK WAS VER GEVORDERD OM 'N ARTIKEL 21 MAATSKAPPY TE STIG, WAARTOE VERSKEIE INWONERS, BEREID SOU WEES OM INSETTE TE LEWER EN HULLE TYD TE FAKTUREER EN AS DONASIE TEEN BELASTING AF TE SKRYF. ELKE GRONDEIENAAR SOU EEN AANDEEL IN DIE MAATSKAPPY, GRATIS ONTVANG @ 1C BETALING EN 90% VAN DIE BESLUIT, KON PER INTERNET GENEEM WORD. EK HET OP DAARDIE STADIUM REEDS 65% VAN ALLE GRONDEIENAARS, OP REKORD GEHAD, MAAR ONGELUKKIG HET EK OP 16 DESEMBER, OP OESTERBAAI 'N BEROERTE GEHAD EN DAARVANDAAN, HET MY GESONDHEID, MET RASSESKREDE AGTERUIT GEGAAN.

EK HET GEEN BREINSKADE OPGEDOEN NIE, MAAR WEL ERGE LIGGAAMSINKORTINGS. EK WAS SEDERTDIEN, VANJAAR AL VIR 85 DAE IN VERSKEIE HOSPITALE EN DAN HET DIE WEERLIG OOK NOG MY REKENAAR BYGEKOM, EK KON WEL VAN DIE DATA HERWIN, MAAR DAAR IS DATA WAT VERLORE IS EN NIE OP MY EKSTERNE HARDESKYF GESTOOR WAS NIE.

NODELOOS OM TE Sê, EK HET GEEN VERDERE AANDAG DAARAAN GEGEE NIE. EK HET WEL DIE KONSEP EN E-POSSE WAT EK KON HERWIN HET, TWEE WEKE GELEDE, AS 'N GEDAGTE AAN DIE VOORSITTER VAN DIE BELASBETALERSVERNIGING DEURGEDEE. EK HET DIE KONSEP OPGETEL, BY 'N VRIEND NABY BOESMANSRIVIERMOND. HULLE HET WEGGEDOEN MET 'N BELASTINGBETALERSVERENIGING EN MET GROOT SUKSES 'N ARTIKEL 21 NPO MAATSKAPPY, BEGIN BEDRYF, MET BAIE MEER SUKSES EN INSETTE VAN DIE LEDE EN TOT GROOT VOORDEEL VAN ALLE INWONERS, WANT SKIELIK HET DAAR REGSMENSE, FINANSIËLE KUNDIGES, KONTRAKTEURS, ENS. NA VORE GEKOM EN HULLE KENNIS, VAARDIGHED, ENS. AANGEBIED IN RUIL VIR BELASTINGAFTREKKINGS EN LIDMAATSKAP WAS GRATIS, MITS JY DIE GEREGITREERDE EIENAAR VAN 'N EIENDOM IN DIE GEBIED WAS. HULLE HET MEER KONTANTDONASIES ONTVANG, AS WAT DIE BELASTINGBETALERSVERENIGING OOI MET LIDMAATSKAPGELDE KON GENEREER EN HULLE HET NAMENS 100% VAN ALLE EIENAARS GEPRAAT.

TEN SPYTE VAN DIE WEERLIGSKADE, BESKIK EK STEEDS OOR MEER E-POSSE, AS WAAROOR DIE BELASTINGBETALERSVERENIGING BESKIK EN EK HET DIT AAN HULLE DEURGEDEE, SAAM MET DIE KONSEPGRONDWET, WAT EK OPGESTEL HET.

AS DAAR ENIGSENS AANDAG AAN E-POSSE GESKENK WORD, DAN IS MY ONVOORWAARDELIKE GEVOEL 'N DEFINITIEWE NEE. EK DINK OESTERBAAI IS TE KOSBAAR EN DAAR IS DEFINITIEF BETER PLEKKE OM DIT MET MINDER NADELE VIR MINDER MENSE, WEL GEVESTIG KAN WORD.

BY VOORBAAT DANK.

Subject: OESTERBAAI WINDLAAIERS

Follow Up Flag: Follow up
Flag Status: Flagged

GEAGTE MNR JOHNSTON/RAVISHA

EK WIL BEGIN DEUR POSITIEF TE REAGEER, DAT EK IN BEGINSSEL NIE GEKANT IS TEEN WINDLAAIERS AS ALTERNATIEWE KRAGOPWEKKING NIE. DIT IS BAIE SKONER AS STEENKOOLKRAGSTASIES EN MINDER GEVAARLIK AS KERKRAAGSENTRALES. EK HET WEL DIE VOLGENDE PROBLEME, M.B.T. DIE LIGGING VAN DIE WINDLAAIERS.

1. OESTERBAAI IS DIE LAASTE STRANDGEBIED, WAAR DAAR NOG KUSERWE UITGESIT KAN WORD. AS U GAAN KYK NA DIE GEBIED TUSSEN GOURITSMOND EN VAN STADENSRIEVRMOND, IS DAAR GROOT STUKKE GROND, WAAR GEEN KUSERWE UITGESIT KAN WORD NIE. EK PERSOONLIK DINK, DIT IS DIE IDEALE AREA OM TE GEBRUIK VIR WINDLAAIERS, WAT SONDER ONGERIEF VAN INWONERS EN WOONGEBIEDE, BENUT KAN WORD.
2. HOEKOM WIL U DIE EEN STUKKIE PARADYS, WAT DAAR NOG IN S.A. BESTAAN, KOM ONTSIER, MET REUSE WINDLAAIERS?
3. DIT GAAN DIE VOLGENDE TOT GEVOLG Hê:
 - 3.1 MY EIENDOMSWAARDE GAAN VAL, GAAN U FIRMA MY VERGOED DAARVOOR? EK HET OP DIE OOMBLIK 'N KOPER, MAAR HY WAG EERS OP DIE UITKOMS VAN U EN ANDER FIRMA'S SE FINALE PLANNE.
 - 3.2 ENIGE ONTWIKKELING, GAAN GEPAARD MET 'N TOESTROMING VAN WERKSOEKERS EN GEPAARDGAANDE HOËR MISDAADSYFERS. DIT GAAN DIE KARAKTER VAN OESTERBAAI DRAMATIES VERANDER. MY KINDERS HET DAAR OPGEGROEI. EK SELF IS TANS AAN 'N ROLSTOEL GEKLUISTER, MAAR MY VROU, HET GEDURENDE DIE AFGELOPE APRILVAKANSIE, NOG ELKE DAG STOKSIELALLEEN, KLIPPEPUNT TOE EN TERUG GESTAP, SONDER ENIGE VREES.
 - 3.3 IS U FIRMA BEREID OM DAARDIE VEILIGHEID, WAT ONS DIE AGELOPE 20 JAAR ERVAAR HET TE WAARBORG?
 - 3.4 HOEWEL EK HIER BO IN GAUTENG SIT, IS MY VERSEKERINGSMAATSKAPPY, NOG GELUKKIG MET 'N ALARM, GEEN DIEFWERING OF VEILIGHEIDSDEURE, SOOS WAT HIER VAN MY VERWAG WORD NIE. SOU MISDAAD TOENEEM, GAAN DIT DAAR OOK VEREIS WORD. GAAN U FIRMA DIE KOSTE DAARVOOR DRA?
4. GERAASBESOEDELING: ENIGE DING WAT DRAAI, OF DIT NOU 'N HUISWAAIER, LUGREËLING, WINDPOMP, WINDLAAIER OF WAT OOKAL IS, MAAK 'N KONSTANTE LAWAAI. HOE OUER, HOE ERGER. U KAN Sê NET WAT U WIL, EK WAS IN EUROPA EN HET MET MENSE GEPRAAAT EN SELF GELUISTER. SELFS SO VER AS 10 KM WINDAF, TEL JY NOG DIE GERAAS OP. WIL U DIT REGTIG ONAANGENAAM VIR ONS AS INWONERS MAAK, OM DIE STILTE WAT ONS TANS ERVAAR, PRYS TE GEE?
5. DIE IMPAK WAT DIT OP ONS VOËLLEWE, ALLEEN GAAN Hê, IS ENORM GROOT, WANT OOR 'N AREA VAN KILOMETERS, KAN HULLE NIE MEER HULLE NORMALE VLUGPATRONE, HANDHAAF NIE.
6. MY GROOTSTE VREES, IS DAT ONS BY OESTERBAAI, OOR BEWEGENDE GRONDFORMASIE SIT. ONS IS GEBOU OP BEWEGENDE DUINE EN ROTSPLAATTE. HET U AL DIE UITWERKKING VAN DIE KONSTANTE VIBRASIE DAAROP ONDERSOEK EN IS DIT, ENIGSENS IN U IMPAKSTUDIES AANGESPREEK, SOU DAAR SKADE DAARVOOR ONTSTAAN, SOU U PA STAAN VIR DIE KOSTE DAARVAN?
7. MY EIE HUIS IS OP KLIP GEBOU, MAAR HOEWEL EK GEEN KRAKE IN MY MURE HET NIE, HET EK BARSTE IN MY VLOERTEËLS BEGIN OPTEL. NA WYE KONSULTASIE MET OMGEWINGSKENNERS, INGENEURS, BOUERS, ENS. WAS DIE SLOTSOM, DAT BEHALWE DIE BEWEGENDE DUINE, DAAR OOK TWEE KLIPPLATE IS WAT TOENEMEND DRUK ERVAAR, VAN GEBOUE TEEN DIE RAND EN DAT DIE KLIPPLATE OOK BESIG IS OM VAN MEKAAR AF TE SKUIF. EK HET TOETSGATE LAAT BOOR EN DIT BLYK WEL SO TE WEES. EK MOET DUS AS VOORSORGMAATREËL, GATE DEUR DIE EERSTE KLIPPLAAT LAAT BOOR EN 100 MM STAALPENNE LAAT INSIT TOT 50CM – 100 CM IN DIE TWEDE KLIPPLAAT IN EN DIT OPVUL MET 1 VK M GEWAPENDE BETON, OM TE KEER DAT MY HELE HUIS VORENTOE GAAN SKUIF.

8. HET U ENIGE NAVORSING DAAROO GEDOEN, WANT 'N KONSTANTE VIBRASIE, KAN SO 'N VERSKUIWING BESPOEDIG EN TOT GEVOLG HÊ, DAT OESTERBAAI, METTERTYD IN DIE SEE IN KAN VERDWYN. EK SOU GRAAG WOU HÊ, DAT U DIE VERSKYNSSEL SAL ONDERSOEK EN VOLLEDIG, VERSLAG DAAROO SAL LEWER.
9. TEERPAD? ANDERS AS DIE PERMANENTE INWONERS, DINK EK PERSOONLIK, DIE GRONDPAD WAS NOG ALTYD EEN VAN ONS GROOTSTE BATES. IN DIE SIN DAT DIT ONGEWENSDE ELEMENTE BUITE GEHOU HET EN OOK ONS 8 KM STRAND, VIR ONSSELF, BEHOUE LAAT BLY HET. 'N TEERPAD, GAAN 'N TOEVLOEI VAN DAGBESOEKERS TEWEEG BRING EN DAAR IS NIE TOILETFASILITEITE OF PARKERING VIR BESOEKERS BESKIKBAAR NIE. GAAN U DAARVOOR BETAAL?

OM 'N INLIGTINGSVERGADERING IN SEPTEMBER DAAR TE HOU, GAAN FEITLIK GEEN DOEL DIEN NIE, WANT ONS KAN NIE DAAR WEES NIE. 16 – 20 DESEMBER, SAL DALK 'N BETER DATUM GEWEES HET, WANT IN SEPTEMBER, GAAN U VERGADERING HOU, MET DIE PAAR INWONERS EN DALK 'N PAAR OMLIGGENDE BOERE. DIE BELASTINGBETALERSVERENIGING, HET GEEN MANDAAT OM NAMENS DIE MEERDERHEID INWONERS TE KAN PRAAT NIE, WANT MINDER AS DIE HELFTE VAN DIE EIENAARS IS LEDE VAN DIE BELASTINGBETALERSVERENIGING.

TOE EK VERLEDE JAAR VAN U EN ANDER FIRMA'S SE PLANNE TE HORE GEKOM HET, HET EK REGSOPINIES INGEWIN EN EK WAS VER GEVORDERD OM 'N ARTIKEL 21 MAATSKAPPY TE STIG, WAARTOE VERSKEIE INWONERS, BEREID SOU WEES OM INSETTE TE LEWER EN HULLE TYD TE FAKTUREER EN AS DONASIE TEEN BELASTING AF TE SKRYF. ELKE GRONDEIENAAR SOU EEN AANDEEL IN DIE MAATSKAPPY, GRATIS ONTVANG @ 1C BETALING EN 90% VAN DIE BESLUIT, KON PER INTERNET GENEEM WORD. EK HET OP DAARDIE STADIUM REEDS 65% VAN ALLE GRONDEIENAARS, OP REKORD GEHAD, MAAR ONGELUKKIG HET EK OP 16 DESEMBER, OP OESTERBAAI 'N BEROERTE GEHAD EN DAARVANDAAN, HET MY GESONDHEID, MET RASSESKREDE AGTERUIT GEGAAN.

EK HET GEEN BREINSKADE OPGEDOEN NIE, MAAR WEL ERGE LIGGAAMSINKORTINGS. EK WAS SEDERTDIEN, VANJAAR AL VIR 85 DAE IN VERSKEIE HOSPITALE EN DAN HET DIE WEERLIG OOK NOG MY REKENAAR BYGEKOM, EK KON WEL VAN DIE DATA HERWIN, MAAR DAAR IS DATA WAT VERLORE IS EN NIE OP MY EKSTERNE HARDESKYF GESTOOR WAS NIE.

NODELOOS OM TE Sê, EK HET GEEN VERDERE AANDAG DAARAAN GEGEE NIE. EK HET WEL DIE KONSEP EN E-POSSE WAT EK KON HERWIN HET, TWEE WEKE GELEDE, AS 'N GEDAGTE AAN DIE VOORSITTER VAN DIE BELASBETALERSVERNIGING DEURGEDEE. EK HET DIE KONSEP OPGETEL, BY 'N VRIEND NABY BOESMANSRIVIERMOND. HULLE HET WEGGEDOEN MET 'N BELASTINGBETALERSVERENIGING EN MET GROOT SUKSES 'N ARTIKEL 21 NPO MAATSKAPPY, BEGIN BEDRYF, MET BAIE MEER SUKSES EN INSETTE VAN DIE LEDE EN TOT GROOT VOORDEEL VAN ALLE INWONERS, WANT SKIELIK HET DAAR REGSMENSE, FINANSIËLE KUNDIGES, KONTRAKTEURS, ENS. NA VORE GEKOM EN HULLE KENNIS, VAARDIGHED, ENS. AANGEBIED IN RUIL VIR BELASTINGAFTREKKINGS EN LIDMAATSKAP WAS GRATIS, MITS JY DIE GEREGITREERDE EIENAAR VAN 'N EIENDOM IN DIE GEBIED WAS. HULLE HET MEER KONTANTDONASIES ONTVANG, AS WAT DIE BELASTINGBETALERSVERENIGING OOI MET LIDMAATSKAPGELDE KON GENEREER EN HULLE HET NAMENS 100% VAN ALLE EIENAARS GEPRAAT.

TEN SPYTE VAN DIE WEERLIGSKADE, BESKIK EK STEEDS OOR MEER E-POSSE, AS WAAROO DIE BELASTINGBETALERSVERENINIGING BESKIK EN EK HET DIT AAN HULLE DEURGEDEE, SAAM MET DIE KONSEPGRONDWET, WAT EK OPGESTEL HET.

AS DAAR ENIGSENS AANDAG AAN E-POSSE GESKENK WORD, DAN IS MY ONVOORWAARDELIKE GEVOEL 'N DEFINITIEWE NEE. EK DINK OESTERBAAI IS TE KOSBAAR EN DAAR IS DEFINITIEF BETER PLEKKE OM DIT MET MINDER NADELE VIR MINDER MENSE, WEL GEVESTIG KAN WORD.

BY VOORBAAT DANK.

Dear Gerald,

Thank you for your email. RES Southern Africa are also keen for our projects to both be successful and to eliminate or minimise any negative effects on each other. Firstly, I just wanted to check that you had received our previous correspondence which is attached to this email. We hope the information within can give us the framework around which to discuss this further. I propose that we organise a conference call including our respective technical teams to discuss the specific separation distances between the turbines that you mention that are of concern.

Please be assured that RES Southern Africa are committed to finding a mutually agreeable solution.

Kind regards

Duncan Ayling

Dear Duncan

The Red Cap Kouga Development Company is looking forward to having RES's and its own wind farms working side by side with each other. However, we are still concerned with a few of your proposed turbine positions due to the impact they will likely have on the efficiencies of some of our turbine locations as approved in our Environmental Authorization. In this regard we are concerned with your turbines numbered: 59, 60, 61, 72, 74 & 77 and their impact on our turbines numbered: 70, 71, 72 and 74. Please will you provide us with the technical verification of the anticipated impacts on our efficiencies so that we have a framework around which we can discuss this further? We look forward to getting the required information and working with you to come to a suitable solution.
Best Regards

Would you like to register as an interested and affected party (I&AP)? YES NO
(please tick the relevant box)

Note: You are required to register as an I&AP to receive further correspondence regarding the EIA process for the project.

Please state your interest in the project (add additional pages if necessary):

In the supply of steel plates in full sheets and cut and rolled to requirements.

Please list your questions, views or concerns regarding the project (add additional pages if necessary):

When is the project due to start?
What is the duration of the project?
What quantities of steel will be required?
What grade of steel will be required for the project?

Please provide contact details of other persons who you regard as a potential interested or affected party:

6th October 2011

Dear Mr van Van Niekerk

Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process.

Generally, although not exclusively, there is no specific set-back distance for wind farms that is strictly specified in various markets around the world. From an acoustics point of view setback does not ensure protection for neighbours - a setback of, say XXXm (550m in Ontario, Canada for instance), **may** be entirely suitable to ensure protection of amenity for “smaller” machines (say 50m rotor diameter), but not sufficient for protection of amenity should larger (say 100m rotor diameter) machines be employed.

The obvious solution to this is to make the set-back a function of rotor diameter. In Northern Ireland there is a loose recommendation for 10 times rotor diameter, which is what RES typically adhere to in initial layout design. However the acceptability of a project cannot be guaranteed through this means either because:

1. The specific turbine might be noisy (or quiet) for its size
2. The noise incident upon a property will be dependent upon the number of machines in close proximity to it – i.e. the context and layout of the wind farm. A house which is XXXm from one turbine (maybe the wind farm layout is like a line) does not receive the same noise incident upon it as a house which is XXXm from 5 turbines (essentially broadside, or encircling, the house).

Therefore the concept of setback is of more relevance to visual dominance aspects or as a guide to ensuring acoustic amenity. The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from international guidance on this issue.

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

Head of Development, RES Southern Africa

6th October 2011

Dear Mr van Staden

Thank you for your interest in the proposed wind project at Oyster Bay. I welcome your input into the process and will do my best to answer your questions in green below:

Ek wil begin deur positief te reageer, dat ek in beginsel nie gekant is teen windlaaiers as alternatiewe kragopwekking nie. Dit is baie skoner as steenkoolkragstasies en minder gevaarlik as kernkragentrales. Ek het wel die volgende probleme, m.b.t. die ligging van die windlaaiers:

Let me start off by responding positively; that in principle I am not opposed to the use of wind chargers as an alternative source of power generation. It is considerably cleaner than coal-fired power stations and less dangerous than nuclear power stations. I do however have the following issues with regard the location of the wind chargers:

1. Oesterbaai is die laaste strandgebied, waar daar nog kuserwe uitgesit kan word. As u gaan kyk na die gebied tussen Gouritsmond en Van Stadensriviermond, is daar groot stukke grond, waar geen kuserwe uitgesit kan word nie. Ek persoonlik dink, dit is die ideale area om te gebruik vir windlaaiers, wat sonder ongerief van inwoners en woongebiede, benut kan word.

Oyster Bay is the last coastal area where stands can still be laid out. If you go and look at the area between Gouritsmond and the Van Staden's River Mouth, there are large areas of land where no coastal stands can be laid out. Personally I think that it would be the ideal area to use for wind chargers, which can be utilised without causing inconvenience to residents and residential areas.

Whilst coastal areas are indeed suitable areas for wind energy generation in terms of wind resource, RES are mindful that the coastal areas are usually of significant environment sensitivity.

2. Hoekom wil u die een stukkie paradys, wat daar nog in S.A. bestaan, kom ontsier, met reuse windlaaiers?

Why do you want to mar this one small piece of paradise that still exists in South Africa with giant wind chargers?

Most of the Oyster Bay project turbines are approximately 6km from the coast and the closest turbine is over 4km from the coast. The visual impact assessment shows that most Oyster Bay residents will not be able to see the wind turbines due to the village being mostly on the side of the hill looking seaward. Residents living on the top of the hill will only be able to see the wind turbines if they face inland.

3. Dit gaan die volgende tot gevolg hê:

This will have the following consequences:

3.1 My eiendoms waarde gaan val, gaan u firma my vergoed daarvoor? Ek het op die oomblik 'n koper, maar hy wag eers op die uitkoms van u en ander firma's se finale planne.

The value of my property is going to drop; will your company compensate me for this? At this stage I have a buyer, but he is awaiting the outcome of yours and another company's final plans.

Studies have been carried out in other countries and there is no proven link between proximity to wind farms and property prices.

1. *What is the impact of wind farms on house prices?* by Peter Dent and Dr Sally Sims of Oxford Brookes University, examined three locations in Cornwall. See www.rics.org/Environmentalandlandconsultancy/Energy/Renewableenergy/Wind%20farm%20FiBRE.html
2. *The Effect of Wind Development on Local Property Values*, Renewable Energy Policy Project, May 2003, online at www.crest.org/articles/static/1/binaries/wind_online_final.pdf
3. *Impact of Wind Farms on Residential Property Prices – Crystal Rig Case Study*, Edinburgh Solicitors' Property Centre, February 2007, available from ESPC. See www.espc.com

3.2 Enige ontwikkeling, gaan gepaard met 'n toestroming van werksoekers en gepaardgaande hoër misdaadsyfers. Dit gaan die karakter van oesterbaai dramaties verander. My kinders het daar opgegroeï. Ek self is tans aan 'n rolstoel gekluister, maar my vrou, het gedurende die afgelope Aprilvakansie, nog elke dag stoksielalleen, klippepunt toe en terug gestap, sonder enige vrees. Any development is associated with an influx of job seekers and associated higher crime figures. This is going to dramatically change the character of Oyster Bay. My children grew up there. Currently I am confined to a wheelchair, but even during the past April holidays, my wife was able to walk to the rocky point and back all alone and without fear.

You are indeed correct that development is normally associated with an influx of job seekers and associated higher crime figures. This has been identified as an impact within the social impact report. RES will implement mitigation measures to reduce this risk:

1. Except for security, no workers will be housed on site overnight
2. Approximately 160 semi-skilled and low-skilled workers will be employed during the construction. In order to reduce influx of new people, RES will attempt to source the majority of these workers from existing communities in the local area.
3. Workers will be closely managed and a code of conduct will be enforced.

3.3 Is u firma bereid om daardie veiligheid, wat ons die afgelope 20 jaar ervaar het te waarborg?

Is your company willing to guarantee us that safety that we have been enjoying for the past 20 years?

RES will do its best to minimise any negative effect on public safety created by the project however RES cannot be held responsible for influences outside of our control.

- 3.4 Hoewel ek hier bo in Gauteng sit, is my versekeringsmaatskappy, nog gelukkig met 'n alarm, geen diefwering of veiligheidsdeure, soos wat hier van my verwag word nie. Sou misdaad toeneem, gaan dit daar ook vereis word. Gaan u firma die koste daarvoor dra?
Although I reside up here in Gauteng, my insurance company is still happy with an alarm, without any burglar bars or safety doors, which is expected from me here. Should crime increase, this is going to be the requirement there as well. Will your company carry the costs?

Should crime be proven to be directly attributed to the RES project then compensation will be considered.

4. Geraasbesoedeling: enige ding wat draai, of dit nou 'n huiswaaier, lugreëling, windpomp, windlaaier of wat ookal is, maak 'n konstante lawaai. Hoe ouer, hoe erger. U kan sê net wat u wil, ek was in Europa en het met mense gepraat en self geluister. Selfs so ver as 10 km windaf, tel jy nog die geraas op. Wil u dit regtig onaangenaam vir ons as inwoners maak, om die stilte wat ons tans ervaar, prys te gee?
Noise pollution: anything that turns, whether it is a fan at home, an air conditioner, a windmill, wind charger or whatever, makes a constant noise. The older it gets, the worse it becomes. Say what you like, I was in Europe and spoke to people and heard it myself. Even from as far as 10 km downwind, you can hear the noise. Do you really want to make it unpleasant for us as residents, to give up the tranquillity we currently experience?

The best way of ensuring acoustic amenity is a combination of setback, which RES has done here at Oyster Bay, and actual noise modelling compared against relevant limits, which RES has also done here with due regard to both South African legislation and taking due regard of best practice from international guidance on this issue.

5. Die impak wat dit op ons voëllewe, alleen gaan hê, is enorm groot, want oor 'n area van kilometers, kan hulle nie meer hulle normale vlugpatrone, handhaaf nie.
The impact it will have on our avifauna alone is enormous, because over an area of kilometres they would not be able to maintain normal flight patterns.

The impact on avifauna is taken seriously by RES and we have voluntarily employed independent bird specialists to monitor the area following the South African best practice guidelines. The results of the monitoring program will be taken into account in the wind farm design.

6. My grootste vrees, is dat ons by Oesterbaai, oor bewegende grondformasie sit. Ons is gebou op bewegende duine en rotsplaatte. Het u al die uitwerking van die konstante vibrasie daarop ondersoek en is dit, enigsens in u impakstudies aangespreek, sou daar skade daaroor ontstaan, sou u pa staan vir die koste daarvan?

My biggest fear is that in Oyster Bay, we have moving land formations. We were built on moving dunes and rock plates. Have you investigated the effect of the constant vibration on that and has it been addressed in your impact studies at all? Should any damage result from this, will you take responsibility for the costs incurred?

Geological specialist studies on the Oyster Bay project have not identified this as a potential effect. RES have built over 5000MW of wind farms in many countries over the last 25 years and, as far as RES is aware, no reports of this happening have ever been observed.

7. My eie huis is op klip gebou, maar hoewel ek geen krake in my mure het nie, het ek barste in my vloerteëls begin optel. Na wye konsultasie met omgewingskenners, ingenieurs, bouers, ens. was die slotsom, dat behalwe die bewegende duine, daar ook twee klipplate is wat toenemend druk ervaar, van geboue teen die rand en dat die klipplate ook besig is om van mekaar af te skuif. Ek het toetsgate laat boor en dit blyk wel so te wees. Ek moet dus as voorsorgmaatreël, gate deur die eerste klipplaat laat boor en 100 mm staalpenne laat insit tot 50 cm – 100 cm in die tweede klipplaat in en dit opvul met 1 vk m gewapende beton, om te keer dat my hele huis vorentoe gaan skuif.

My own house is built on rock, but although I have no cracks in my walls, I have started noticing cracks in my floor tiles. Following wide consultation with environmental experts, engineers, builders, etc., the conclusion was that, in addition to the moving dunes, there are also two rock plates that are experiencing increased pressure from buildings along the edge and the fact that the rock plates are moving away from each other. I had inspection holes drilled and it indeed seems to be the case. So as a precaution, I have to have holes drilled through the first plate and have 100 mm steel pins inserted 50 cm to 100 cm into the second plate and have it filled up with 1 m² of reinforced concrete to prevent my entire house from moving forward.

8. Het u enige navorsing daaroor gedoen, want 'n konstante vibrasie, kan so 'n verskuiwing bespoedig en tot gevolg hê, dat Oesterbaai, mettertyd in die see in kan verdwyn. Ek sou graag wou hê, dat u die verskynsel sal ondersoek en volledig, verslag daaroor sal lewer.

Have you done any research concerning this, because a constant vibration can accelerate such a movement and could result in Oyster Bay eventually disappearing into the ocean? I would like you to investigate the phenomenon and report back on it comprehensively.

Geological specialist studies on the Oyster Bay project have not identified this as a potential effect. Further investigation on this has not been recommended by the specialists.

9. Teerpad? Anders as die permanente inwoners, dink ek persoonlik, die grondpad was nog altyd een van ons grootste bates. In die sin dat dit ongewensde elemente buite gehou het en ook ons 8 km strand, vir onself, behoue laat bly het. 'n Teerpad, gaan 'n toevloei van dagbesoekers teweeg bring en daar is nie toiletfasiliteite of parkering vir besoekers beskikbaar nie. Gaan u daarvoor betaal? A tarred road? Unlike the permanent residents, I personally believe that the dirt road has always been one of our biggest assets. In the sense that it kept out undesirable elements and conserved our 8 km of beach for ourselves. A tarred road will bring about an influx of day visitors and there are no toilet facilities or parking available for visitors. Are you going to pay for it?

The roads will need to be surveyed and reinforced where necessary but RES have not suggested that a tar road will be built. Reinforcements and repairs required for the RES project will be paid for by RES.

Om 'n inligtingsvergadering in September daar te hou, gaan feitlik geen doel dien nie, want ons kan nie daar wees nie. 16 – 20 Desember, sal dalk 'n beter datum gewees het, want in September, gaan u vergadering hou, met die paar inwoners en dalk 'n paar omliggende boere. Die Belastingbetalersvereniging, het geen mandaat om namens die meerderheid inwoners te kan praat nie, want minder as die helfte van die eienaars is lede van die Belastingbetalersvereniging.

To hold an information session there in September will serve virtually no purpose, because we can't be there. 16 – 20 December could perhaps be a better date, because in September, you are going to conduct a meeting with the few residents and maybe a few farmers from the surrounding area. The Ratepayer's Association has no mandate to speak on behalf of the majority of residents, because fewer than half of the owners are members of the Ratepayer's Association.

The information session is only one part of the public consultation process which the independent environmental assessment practitioners have carried out for RES. Fair and reasonable opportunity has been provide to all interested and affected parties as per South African regulations. Also, a meeting in late December would not be suitable for many people who would be on holiday elsewhere.

Toe ek verlede jaar van u en ander firma's se planne te hore gekom het, het ek regsopinies ingewin en ek was ver gevorderd om 'n Artikel 21 Maatskappy te stig, waartoe verskeie inwoners, bereid sou wees om insette te lewer en hulle tyd te faktureer en as donasie teen belasting af te skryf. Elke grondeienaar sou een aandeel in die maatskappy, gratis ontvang @ 1c betaling en 90% van die besluite, kon per Internet geneem word. Ek het op daardie stadium reeds 65% van alle grondeienaars, op rekord gehad, maar ongelukkig het ek op 16 Desember, op Oesterbaai 'n beroerte gehad en daarvandaan, het my gesondheid, met rasseskrede agteruit gegaan.

Last year, when I heard of your and other companies' plans, I obtained legal opinions. I was far advanced in creating a Section 21 Company, to which various residents were willing to give inputs and to invoice their time and write it off as a donation against tax. Each land owner would receive a free share in the company at payment of 1c and 90% of the resolutions could be taken via the Internet. At that stage I already had 65% of all land owners on record, but unfortunately I had a stroke in Oyster Bay on 16 December and since then my health has deteriorated rapidly.

Ek het geen breinskade opgedoen nie, maar wel erge liggaamsinkortings. Ek was sedertdien, vanjaar al vir 85 dae in verskeie hospitale en dan het die weerlig ook nog my rekenaar bygekom, ek kon wel van die data herwin, maar daar is data wat verlore is en nie op my eksterne hardeskyf gestoor was nie.

I didn't suffer any brain damage, but I do have serious physical limitations. So far this year I have spent 85 days in various hospitals and then the lightning hit my computer. I was able to retrieve some of the data, but some data has been lost and was not stored on my external hard drive.

Nodeloos om te sê, ek het geen verdere aandag daaraan gegee nie. Ek het wel die konsep en e-posse wat ek kon herwin het, twee weke gelede, as 'n gedagte aan die Voorsitter van die Belasbetalersverniging deurgegee. Ek het die konsep opgetel, by 'n vriend naby Boesmansriviermond. Hulle het weggedoen met 'n Belastingbetalersvereniging en met groot sukses 'n Artikel 21 NPO

Maatskappy, begin bedryf, met baie meer sukses en insette van die lede en tot groot voordeel van alle inwoners, want skielik het daar regsmense, finansiële kundiges, kontrakteurs, ens. na vore gekom en hulle kennis, vaardighede, ens. aangebied in ruil vir belastingaftrekkings en lidmaatskap was gratis, mits jy die geregistreerde eienaar van 'n eiendom in die gebied was. Hulle het meer kontantdonasies ontvang, as wat die Belastingbetalersvereniging ooit met lidmaatskapsgeelde kon genereer en hulle het namens 100% van alle eienaars gepraat.

Needless to say, I have not given the matter any further attention. I have given the concept and the emails I could retrieve as a concept to the Chairperson of the Ratepayers' Association two weeks ago. I got the concept from a friend near Boesmansriviermond. They did away with a Ratepayers' Association and started operating a Non-profit Section 21 Company with great success; much more success and inputs from members and to a great benefit of all residents, since legal experts, financial experts, contractors, etc. suddenly came to the fore to offer their knowledge, skills, etc. in return for tax deductions. Membership was free if you were a registered owner of property in the area. They received more cash donations than Ratepayers' Associations ever could generate with their membership fees and they spoke on behalf of 100% of all owners.

Ten spyte van die weerligskade, beskik ek steeds oor meer e-posse, as waaroor die Belastingbetalersvereniging beskik en ek het dit aan hulle deurgegee, saam met die Konsepsgrondwet, wat ek opgestel het.

Despite the lightning damage, I still have more emails than the Ratepayers' Association and I have given it to them, together with the Draft Constitution that I have compiled.

As daar enigsens aandag aan e-posse geskenk word, dan is my onvoorwaardelike gevoel 'n definitiewe nee. Ek dink oesterbaai is te kosbaar en daar is definitief beter plekke om dit met minder nadele vir minder mense, wel gevestig kan word.

If any attention is paid to the emails, then my unconditional feeling is a definitive 'no'. I think Oyster Bay is too valuable and there are definitely better places to establish this with fewer disadvantages for fewer people.

By voorbaat dank.

Thanking you in advance.

Koos van Staden

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

Head of Development, RES Southern Africa

6th October 2011

Dear Lynn Slogrove, Jenny Barwood, Renee Botha, Michelle Strydom,

Thank you for submitting your concerns into the public consultation process for the RES Southern Africa Oyster Bay wind energy project. I hope that I can assure you that RES Southern Africa will, at all times, attempt to minimise disruption to the local residents of St Francis Bay whilst at the same time delivering the project to Oyster Bay and bringing the associated benefits to the local community in that area.

I agree that over 400 heavy vehicles will have an impact on the road and on traffic congestion, however this is over a probable 2 year time period and so averages approximately 4 abnormal heavy loads per week. RES Southern Africa will therefore be able to contract these deliveries so that they avoid passing by St Francis Bay at busy times of day. We undertake to consult with you and other residents to agree on times to be avoided.

Although the road is currently in a poor state of repair, RES Southern Africa will be required to enter agreements with the roads authorities to ensure the roads are upgraded and reinforced so that they can support the heavy traffic safely. Any damage caused by RES Southern Africa use of the roads will be repaired quickly and efficiently at our cost.

RES Southern Africa identified that traffic near St Francis Bay may bring concern to the residents and so we have already spent extra time identifying an alternative route which approaches Oyster Bay from the West. This Western approach is significantly longer and involves some difficult pinch-points where manoeuvring long blades around corners would be very difficult.

The route survey, contracted by RES Southern Africa, assessed both route options and identified the approach from the East that passes near St Francis Bay to be shorter and more efficient. At this point in time RES Southern Africa would like to keep both routes available as options.

If Department for Environmental Affairs environmental authorisation is granted, and the project is successful in bidding for allocation from the Department of Energy, and all other permits are secured, then construction could start in mid 2013 at the earliest. At that time a new route survey would be needed prior to road strengthening and subsequent commencement of the delivery of materials and components. It is also at this time that we would re-consult the local residents to agree on delivery times to be avoided, as mentioned.

RES Southern Africa is a responsible and experienced family owned company who have been sustainably developing wind energy projects for over 25 years. We very much hope that, through ongoing communication and respectful consideration of concerns, the RES Southern Africa Oyster Bay project can have the support of the residents of St Francis Bay and other local villages.

Please do not hesitate to contact Savannah Environmental or myself should you have any further questions or concerns.

Yours faithfully,

Duncan Ayling

Head of Development, RES Southern Africa
