

APPENDIX E:

PUBLIC PARTICIPATION PROCESS

Provides a description of the Public Participation Process followed.

1. PUBLIC INVOLVEMENT

A public participation process was undertaken in accordance with the EIA Regulations, 2014, as amended.

The public participation and communication process aims to identify issues in order to maximise the social and environmental benefits, and to minimise the social and environmental costs of the proposed project. Interested and affected parties (I&APs) were consulted and afforded the opportunity to participate. I&APs were informed and involved in the project from the outset in order to promote participation and transparency.

The aim of this public participation process is to achieve the following broad goals:

- identification of all key I&APs and stakeholders;
- the active involvement of all I&APs with respect to decision making;
- an exchange of information relevant to the proposed project through Background Information Documents (BID), consultations and newspaper advertisements.
- the development of an understanding with regards to the broader project objectives and goals and knowledge of the project; and
- the identification of issues and concerns with regards to all potential alternatives associated with the proposed development.

2. APPROACH TO UNDERTAKING THE PUBLIC PARTICIPATION PROCESS

The following approach was followed in undertaking the public participation process:

2.1 Proof of Site Notice

Site notifications in English in A2 format requesting comments or objections were placed at the site on 30 January 2017. Please find the proof of site notices erected in Appendix 1.

2.2 Written Notices Issued

Notification letters were written to the following Interested and Affected Parties and either faxed or e-mailed:

- o Department of Water and Sanitation;
- o City of Tshwane Municipality;
- o Adjacent landowners;
- o Relevant Ward Councillor.

A Background Information Document was compiled and distributed to identified I&APs. The main objective of the BID was to introduce I&APs to the proposed project.

The notices and BID are included in Appendix 2.

2.3 Proof of Newspaper Advertisement

In accordance with the EIA Regulations, 2014, as amended, an advertisement was placed requesting I&APs to register their interest in the project. An advertisement was placed in the Rekord North of 9 November 2016. A copy of the advertisement is included in Appendix 3.

2.4 Communications to and from I&APs

Please see the communication included in Appendix 4.

2.5 Minutes of Public/Stakeholder Meetings

A meeting was held on 30 January 2017 at the site with the relevant ward councilor, Cllr Molatelo Mashola of ward 7.

Please see the minutes of the meeting and the attendance register in Appendix 5.

2.6 Comments and Response Report

A comments and response report was drafted that included all the issues raised by the Interested and/or Affected Parties as well as the responses to the issues raised. The Comments and Response report is included in Appendix 6.

2.7 Comments from I&APs on Draft Basic Assessment Report

As required by legislation, a review process was undertaken affording I&APs an opportunity to comment on the draft Basic Assessment Report. The draft BAR was available for comment at the 54 Marais Street, Schoemansville, Hartbeespoort, South Africa, Tel: 012 253-1177 for 30 days from 7 July 2017 to 7 August 2017.

Any comments on the Draft BAR is included in Appendix 7.

2.8 Copy of the register of I&APs

A list of key I&APs was generated for the environmental process. These include:

- o Department of Water and Sanitation;
- o Adjacent landowners;
- o City of Tshwane Municipality;
- o Relevant Ward Councillor.

A list of the registered I&APs is attached as Appendix 9.

2.9 Comments from I&APs on the application

Any comments on the application will be included in the final BAR.

3. WAY FORWARD

The comments received will be incorporated into the final Basic Assessment Report and the final report will be submitted to the Gauteng Department of Agriculture and Rural Development for authorisation.

APPENDIX 1 – PROOF OF SITE NOTICE

Photo 1: Site notice erected at the site

Photo 2: Site notice erected at the site

APPENDIX 2 – WRITTEN NOTICES ISSUED

THE PROPOSED WIDENING OF BRIDGE 649 AND ROAD P249

BACKGROUND INFORMATION DOCUMENT

NOVEMBER 2016

1. INTRODUCTION

This Background Information Document (BID) serves to inform the public of the intention of the Gauteng Department of Roads and Transport to widen bridge 649 and a section of road P249 in the Gauteng province.

A Basic Assessment will be undertaken for the proposed activity and environmental authorisation sought. Public consultation is an essential part of the process. You have been identified as an Interested and/or Affected Party (I&AP). All comments from you will be recorded and presented to the project team and regulatory authorities.

Chameleon Environmental was appointed by KBK Engineers (Pty) Ltd to facilitate the Basic Assessment and public participation process for this project.

2. PROJECT DESCRIPTION

a. The current envisaged scope of work will include the following:

- Widening of Bridge 649 and road P249 and 300m of road to accommodate wider traffic lanes and pedestrian sidewalks, 2 × 3.7m lane in each direction, 2.5m shoulders.
- Working on either sides of the active stream bed with associated removal of soil for the foundations of the bridge to be cast on bedrock.
- Install new F-shape barriers.
- Install back to back guardrails that are connected to end-blocks.
- Cut overgrown vegetation.
- Minor spalling and crack repairs to structure.

b. Borrow Pits and Quarries

There are no borrow pits or quarries associated with the project.

PURPOSE OF THIS DOCUMENT

This Background Information Document (BID) has been compiled and distributed for the following purposes:

- To notify Interested and/or Affected Parties (I&APs) of the proposed new development;
- To provide a brief project description;
- To describe the Basic Assessment process.

3. BASIC ASSESSMENT PROCESS

The Basic Assessment (BA) process will be guided by the EIA Regulations, 2014 and environmental management principles and objectives of the National Environmental Management Act, 1998 (Act No. 107 of 1998). The Environment Impact Assessment (EIA) regulations, 2014 were promulgated on 4 December 2014 in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) and came into effect on 8 December 2014. Activities identified in terms of Regulation R. 983 may not commence without environmental authorisation from the competent authority and in respect of which the investigation, assessment and communication of potential impacts of activities must follow the Basic Assessment procedure as prescribed.

A Basic Assessment is a process involving consultation with regulatory authorities and other I&APs that serve to inform a decision on whether or not a development is environmentally acceptable.

The Gauteng Department of Agriculture and Rural Development (GDARD) will be the final decision making authority with regard to this project.

4. STUDY APPROACH AND METHODOLOGY

The goal of the Basic Assessment is to identify and assess the potential environmental impacts (biophysical and social) associated with the proposed development.

The following tasks are included as part of this process:

- Site visit and desk study of available information and identification of key issues;
- Identify and compile a list of I&APs;
- Compile and distribute a Background Information Document (BID) to I&APs;
- Advertise in the local newspaper notifying the public of the project;
- Synthesis issues for preliminary investigation;
- Compile a Draft Basic Assessment Report and make it available for public comment;
- Submit application form and draft BAR to authorities;
- Submit Final Basic Assessment Report to environmental authorities for approval.

5. SPECIALIST STUDIES

It is anticipated that the following specialist studies will be undertaken as part of the Basic Assessment process:

- Aquatic and ecological study.

Specialist consultants will be appointed to assess the potential impacts associated with the proposed project.

The aim of this specialist studies are for the specialist to assess the impact of the project actions on the environment. The specialists will analyse the current situation and will assess the potential impacts of the project actions (and feasible alternatives) on various aspects of the particular issue during the construction and operation phases of the proposed project.

The impacts will be assessed in terms of various criteria such as extent, duration, intensity and whether the impact is positive or negative. The significance of the impact will then be determined through a synthesis of the various criteria used. The specialist will also recommend mitigation actions that they believe can materially affect the significance rating of impacts.

6. AUTHORISATION

The GDARD will consider the final Basic Assessment and will either issue an authorisation with or without conditions, or reject the proposed project. The authorisation issued by the GDARD will be distributed to I&APs as part of the appeal period. An appeal period of 30 days will be provided by GDARD. Formal, motivated appeals should be lodged with the Department. The results of the appeal process will then be made known to the public through the distribution of a final feedback letter.

7. COMMENCEMENT OF CONSTRUCTION

It is proposed that the project will be put out to tender once the authorisation is received from GDARD. Construction cannot commence without authorisation from the environmental authorities. Any enquiries regarding the tender or employment opportunities should be directed to the applicant.

8. PUBLIC INVOLVEMENT

Please contact Chameleon Environmental if you require further information on the application and or activity. Please submit your name, contact information, interest and relevant issue in writing before or on the 15th of December 2016. The contact details are:

Dear Mr Natoane

NOTIFICATION LETTER: THE PROPOSED WIDENING OF BRIDGE 649 AND A SECTION OF ROAD P249, GAUTENG: NOTIFICATION OF BASIC ASSESSMENT PROCESS

It is the intention of the Gauteng Department of Roads and Transport to widen bridge 649 and a section of road P249 in Gauteng.

- a. The current envisaged scope of work will include the following:
- Widening of Bridge 649 and road P249 and 300m of road to accommodate wider traffic lanes and pedestrian sidewalks, 2 × 3.7m lane in each direction, 2.5m shoulders.
 - Working on either sides of the active stream bed with associated removal of soil for the foundations of the bridge to be cast on bedrock.
 - Install new F-shape barriers.
 - Install back to back guardrails that are connected to end-blocks.
 - Cut overgrown vegetation.
 - Minor spalling and crack repairs to structure.
- b. Borrow Pits and Quarries

There are no borrow pits or quarries associated with the project.

Chameleon Environmental was appointed to undertake the environmental studies on their behalf. Notice is hereby given in terms of the Environmental Impact Assessment Regulations of 18 June 2010 promulgated in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998), that a Basic Assessment will be conducted for the proposed development for submission to the Gauteng Department of

Agriculture and Rural Development (GDARD) for authorisation. Please see a Background Information Document and locality plan with regard to the proposed project included with this letter.

You are registered as an Interested party to the project and you will be kept informed as the process progresses. Any comments or enquiries regarding the above matter should be referred in writing to the undersigned.

For more information, do not hesitate to contact me.

Hallo,

I came to the spa yesterday to discuss the proposed widening of the B649 bridge as well as a section of the P249 (R511) road close to the spa. I am conducting the environmental process for the proposed project. Please find a locality plan and a Background Information Document for the project.

The spa entrance will not change or move in any way. It is foreseen that the wider bridge and road will considerably improve the road safety in the area.

If you have any questions, please do not hesitate to contact me.

Kind regards

Hallo,

1. Raas faktor

U bekommernis oor die geraas sal aangespreek word in die Basiese Asseserings verslag en in die Omgewings bestuursplan vir die projek. Daar word mitigerings maatreëls in die Omgewings bestuursplan ingesluit wat geraas spesifiek aanspreek. Die Gauteng Omgewingsdepartement sal hierdie BAR en plan goedkeur en die kontrakteur wat deur die kliënt aangestel word vir die konstruksie van die projek, sal verplig wees om hierdie Omgewings bestuursplan te implimenteer. Indien U enige probleme of klagtes oor die kontrakteur het tydens die konstruksie periode, kan u die raadgewende ingenieurs wat toesig oor die projek hou, kontak. Dit sal KBK Ingenieurs wees by tel 012 348-1822. U kan my ook gerus kontak en ek sal u na die korrekte persoon kan verwys.

2. Vergoeding

Daar behoort 'n toestemming vanaf die Provinsiale owerheid in plek te wees vir toegang vanaf die pad na die besigheid. U sal hierdie toestemming vanaf die Provinsiale padowerheid moet besigtig om te kyk of daar enige vergoeding ter sprake is. Die toestemming is gewoonlik in die vorm van 'n Wayleave wat beide partye se verantwoordelikhede uitspel teenoor mekaar. Die ooreenkoms sal ook gewoonlik uitspel dat die Provinsie die reg het om verbeteringe aan te bring tot die roete en dat die eienaar geen verweer daarteen het nie.

Dit word ook voorsien dat die beter en veiliger pad en brug u besigheid oor die langduur positief kan beïnvloed omdat die pad veiliger sal ry en meer kapasiteit het.

Groete

Goeie more Dr. Bothma,

Baie dankie vir die terugvoer en antwoorde op ons kwelvrae.

Omdat die aard van ons besigheid ontspanning is kan ons nie anders as om bekommerd te wees oor die "RAAS FAKTOR" wat gewoonlik deur die werkers veroorsaak word nie – ons erken dat die "RAAS FAKTOR" reeds bestaan as gevolg van die vinnige verkeer op die R511 maar ons voorsien dat die verkeersvloei aansienlik stadiger sal wees sodra konstruksie begin en derhalwe sal die klank wat deur verkeer veroorsaak word gedemp wees en die werkers se stemme duidelik hoorbaar sal wees.

Ons verstaan ook dat dit in ons eie belang sal wees om 'n breer en veiliger brug en pad voor ons besigheid te he maar wil tog versoek dat die konstruksie werkers atend gemaak sal word op die aard van ons besigheid en dat die Voorman of Bestuurder wat die projek sal bestuur dienooreenkomstig verwittig sal word.

Die ander kwelpunt is natuurlik die "ry-stop" stelsel en ons voorsien dat dit 'n negatiewe monetere invloed op ons besigheid sal he – indien dit wel die geval is – kan u ons asb meedeel wat ons regte is aangaande skadevergoeding wat ons vanaf die Departement van Vervoer sal eis.

By voorbaat dank,

Groete,
Gerhard Koen

Subject: Widening of bridge B649 and P249

Hallo,

Die antwoorde op u e-pos is die volgende:

1. Dit word voorsien om die brug en pad eers aan die een kant te verbreed met 2 lane en 'n skouer. Hierdie proses sal ongeveer 3 maande duur en dan sal daar 'n "stop-go" sisteem wees om die verkeer te reguleer. Na die 3 maande word die verkeer oorgesit op die 2 nuwe lane, en die brug word daarna aan die ander kant verbreed. Daar sal in hierdie fase nie nodig wees vir die "stop-go" sisteem nie. Dit word voorsien dat die verkeer dus vir ongeveer 3 maande ontwrig sal word.
2. Die bestaande beton op die brug se dek sal afgebreek moet word. Hierdie proses sal ongeveer 6 weke onderbroke duur wat daar 'n toename in geraas voorsien word maar net op die korttermyn. Daar sal ook die standaard konstruksie geraas wees maar daar word voorsien dat dit nie meer sal wees as wat tans deur die pad gegenereer word nie.
3. Die hele proses sal ongeveer 12 maande duur.

Dit word voorsien dat die brug aansienlik veiliger sal wees vir padgebruikers as die konstruksie eers voltooi is.

Vir verdere inligting kan u my gerus weer kontak.

Groete

Goeie Dag Dr. Bothma,

Dankie vir die inligting en e-pos dit word waardeer.

Ons kan egter nie anders as om ietwat bekommerd te wees aangaande die impak wat dit moontlik op ons Besigheid kan he nie.

Van die vrae wat onmiddelik by my opkom is bv:

Hoe sal dit die verkeersvloei vanaf Sandton na Hartbeespoort en vice versa be-invloed?
Die aard van ons besigheid is ontspanning – gaan die projek ons klieente se rus versteur?
Hoe lank sal dit vat om die projek af te handel?

U terugvoer aangaande die bogenoemde sal opreg waardeer word.

Groete,

Gerhard Koen

**THE PROPOSED WIDENING OF BRIDGE 649 AND A SECTION OF ROAD
P249, GAUTENG**

MEETING WITH WARD COUNCILLOR

DATE: 30 JANUARY 2017

VENUE: AT BRIDGE 649

MINUTES OF MEETING

1. Attendance

- a. Mr B Schlebusch (KBK Engineers)
- b. Cllr Molatelo Mashola (Ward 7)
- c. Dr Jenine Bothma (Chameleon Environmental)

2. Discussion

Dr Bothma gave an introduction to the project and indicated that KBK Engineers were appointed by the client, Gautrans, to undertake the detailed design for the widening of the bridge and that Dr Bothma of Chameleon Environmental was appointed to undertake the environmental studies for the project. Dr Bothma distributed the attendance register for signature.

Mr Schlebusch displayed the preliminary plans compiled for the widening of the bridge. He explained that the reason for the widening of the bridge is that the current situation at the bridge is very dangerous as the bridge is currently narrower than the current road width. The bridge will therefore, be widened with 300m of road to accommodate wider traffic lanes and pedestrian sidewalks, 2 × 3.7m lanes in each direction and 2.5m shoulders.

Mr Mashola enquired when construction will commence. Dr Bothma indicated that the project will only be able to go out on tender once the environmental authorisation is received from GDARD. Mr Schlebusch indicated that it is envisaged that construction will commence towards the end of 2017.

Dr Bothma indicated that a draft Basic Assessment report will be compiled once the public participation process is completed. The draft BAR report will then be submitted to the public for comment for a 30 day period. The final BAR will then be submitted to the GDARD for authorisation. She indicated that Mr Mashola will be kept up to date as to the progress of the environmental process.

Mr Mashola indicated that he supports the project.

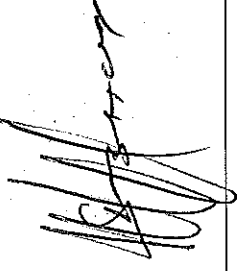

Dr Bothma thanked them for the meeting and indicated that they can contact her for any additional questions or issues regarding the project.

This process will take about three months and then there will be a "stop-go" system to regulate traffic. After 3 months, the traffic will be reverted onto the two new lanes and the bridge and road is then widened to the other side. During this second phase, there will be no need for the "stop-go" system. It is envisaged that the traffic will be disrupted for approximately 3 months.</p>

NAME	ISSUE/COMMENT	RESPONSE
	<p>customers – will the project disturb our client's rest? How long will it take to complete the project?</p> <p>Your feedback regarding the above will be much appreciated.</p>	<p>2. The existing concrete on the bridge deck will be demolished. This process will take about six interrupted weeks and an increase is foreseen in noise during this time but only in the short term. There will also be the standard construction noise but it is anticipated that it will not be more than currently generated by the road. The whole process will take about 12 months to complete.</p> <p>It is anticipated that the bridge will be considerably safer for road users when construction is completed.</p> <p>For further information please do not hesitate to contact me again.</p>
<p>By e-mail: 6 February 2017</p>	<p>Thank you for your feedback and comments on our concerns.</p> <p>Because the nature of our business is relaxation, we cannot help but worry about the noise factor that is usually caused by the workers. We recognize that the noise factor already exist due to the rapid traffic movement on the R511 but we anticipate that the traffic flow will be considerably slower when construction commences and that the noise from the traffic will be muted causing the workers' voices to be clearly audible.</p> <p>We also understand that the wider bridge and safer road would be in our own interest and beneficial to the business but request that the construction workers be made aware of the nature of our business and that the foreman or manager</p>	<p>1. Noise factor</p> <p>You worry about the noise will be addressed in the Basic Assessment Report and the Environmental Management Programme for the project. Mitigation measures will be included in the Environmental Management Programme which addresses noise specifically. The Gauteng Environmental Department (GDARD) will have to approve the BAR and EMPr and the contractor appointed by the customer for the construction of the project will be required to implement this Environmental Management Programme. If you have any problems or complaints about the contractor during the construction period, you can contact the consulting engineers overseeing the project. They will be KBK Engineers at 012348-1822. You are</p>

NAME	ISSUE/COMMENT	RESPONSE
	<p>of the project management will be notified accordingly.</p> <p>The other area of concern is of course the "stop-go" system and we believe that it could have a negative monetary impact on our business. If this is the case, can you please inform us as to our rights to claim damages from the Department of Transport.</p>	<p>also welcome to contact me and I will be able to point you to the correct person.</p> <p>2. Compensation</p> <p>There should be a permission in place between the provincial road authority and yourself for access from the road to your business. You should consult this permission from the provincial road authority to see if there is any compensation involved. The permission is usually in the form of a Wayleave that clearly include both parties' responsibilities to each other. The agreement usually includes that the provincial road authority has the right to make improvements to the road with no compensation involved to the business party.</p> <p>It is also envisaged that the better and safer road and bridge could have a positive effect on your business over the long term because the road will drive safer and have more traffic capacity.</p>
