ENVIRONMENTAL APPLICATIONS FOR CHANGES TO INFRASTRUCTURE AT BAKUBUNG PLATINUM MINE, LEDIG, NORTH WEST PROVINCE

NOTICE OF APPLICATION FOR ENVIRONMENTAL AUTHORISATION, ENVIRONMENTAL MANAGEMENT PROGRAMME AMENDMENT, WATER USE LICENCE & WASTE MANAGEMENT LICENCE

Wesizwe Platinum Limited is the owner of Bakubung Platinum Mine, currently shaft sinking on the farm Frischgewaagd 96JQ (Portions 3, 4 and 11). The mine is located near Ledig, south of the Pilanesburg Game Reserve & Sun City, North West Province. Two reefs are mined for platinum, palladium, rhodium and gold, with copper and nickel as by-products. The Bakubung Platinum Mine received Environmental Authorisation in 2009, in terms of both the National Environmental Management Act (Act 107 of 1998) (NEMA) & Mineral and Petroleum Resources Development Act (Act 28 of 2002) (MPRDA). The mine's Water Use Licence (WUL) was issued in 2010 in terms of the National Water Act 36 of 1998 (NWA).

Wesizwe would like to make several changes to infrastructure at the approved mine which require an additional Environmental Authorisation, Waste Management Licence (WML) & WUL amendment. The proposed project will likely involve the following changes to the approved mine, some of which require Environmental Authorisation: larger tailings dam & tailings pipeline; increased capacity of concentrator plant & product stockpiles; relocation of ore crusher from underground to surface; inclusion of minerals in waste rock into the mining licence; erosion control; storage & handling of dangerous goods; sewage & water pipelines; internal roads; pipeline & road crossings over watercourses; ventilation shafts & raise boreholes; back-up generators.

Water uses which require an amendment to the Bakubung Platinum Mine's WUL include: dewatering mine shafts; water reservoirs; watercourse crossings & erosion control; tailings dam; return water dams; storm water dams; waste rock dumps; sewage treatment plant; ore stockpiles; pollution control dams; dust suppression with water & increased capacity of settling dams. Waste activities which require a WML include: tailings dam; waste rock dumps & salvage yard.

Notice is hereby given in terms of the legislation listed below, of the various environmental approvals required prior to changes to the approved Bakubung Platinum Mine. The preliminary lists of likely listed activities are included below:

NEMA - GNR 983: activity 2, 9, 10, 12, 14, 19, 25, 27, 28. GNR 984: activity 2, 4, 6, 15, 17, 21, 25. GNR 985: activity 4, 10, 12.

National Environmental Management: Waste Act (59 of 2008) - GN 921 Category B 7.

NWA - Water uses in section 21 a, b, c, g, h, i, j.

MPRDA - Section 102 amendment.

SLR Consulting (Africa) (Pty) Ltd has been appointed as the independent environmental practitioner responsible for undertaking the necessary environmental work and conducting the public participation process for the project. These applications will be supported by a full Environmental Impact Assessment Process in terms of the Environmental Impact Assessment Regulations (GNR982).

Public Open Days will be held for this project. If you would like to receive details of the Open Days, find out more information, register as an interested & affected party, or raise issues & concerns contact: Chiara Kotze or Shelley Seton-Rogers.
