**Subject:** Re: Walker Bay MPA boundary  
**Attachments:** WBMPA.jpg

Dear Kozette

The pdf is the metadata, all other files are components of a shapefile that you can open in GIS software.

The HWM on the coastal viewer is a draft line that was done by the WCG for the Coastal Management Lines project. I do not know which line was used when delineating the boundary of the MPA, but the MPA definitely preceded the generation of the HWM.

When I add the elevation to the area you focussed on, it seems like quite a drop between the buildings and the water, so my assumption is that the MPA "coastline" was taken from the bottom of the cliff. The buildings are seemingly situated >10m above mean sea level.

Kind regards,

**Lauren Williams** Pr.Sci Nat | GTg GISc0832

**To:** Lauren Williams; Nicolette Vink; Funanani Ditinti; Siyabonga Dlulisa; Daisy Kotsedi; Radia Razack; Ryan Peter

**Subject:** RE: Walker Bay MPA boundary

Hi Lauren,

As discussed, I managed to download the shape files, but could not open them – the file with the shp extension is actually a pdf document and doesn't want to open (please see attached).

I then went onto the DEA coastal viewer and accordingly I could find a draft HMW line and the MPA boundary, which shows a separation between the HWM and the boundary. Can we interpret the boundary then to be at the LWM according to that (please see attached)?

Kind regards,

*Kozette Myburgh*

**To:** Nicolette Vink; Funanani Ditinti; Siyabonga Dlulisa; Daisy Kotsedi; Radia Razack; Lauren Williams

**Subject:** RE: Walker Bay MPA boundary

**Importance:** High

Dear Nikki,

Thank you so much. That clarifies the seasonal aspect.

What we also need to get clarification on the Whale sanctuary area boundary:

The Westcliffe beacon 34°25'.782S; 19°13'.768E (34.4297S; 19.2295E) then east and south east along the coastline to a point onshore at Sopiesklip 34°27'.199S; 19°16'.80E (34.4533S; 19.3353E) to a point offshore of the Westcliffe beacon 34°29'.65S; 19°16'.80E (34.4942S; 19.28E) to the Westcliffe beacon 34°25'.782S; 19°13'.768E (34.4297S; 19.2295E)

This description refers to "east and south east along the coastline". We are not clear on what "coastline" means and if it refers to the high water mark or low water mark.

There is no definition of coastline in NEMICMA or the National Environmental Management Protected Areas Act 57 of 2003 and the ordinary definition according to the Oxford dictionary is "the particular shape of the coast, especially as seen from above, from the sea, or on a map" (which is also not specific). Other definitions include: a line that forms the boundary between the land and the ocean (therefore the HWM?)

Hence our inquiry whether the boundary of the MPA falls along the HWM or LWM. The implication is that if the boundary falls along the HWM, the development could not be allowed to go ahead because of the NEMPAA requirements.

Please advise at your earliest convenience.

Kind regards,

*Kozette Myburgh*

**(DEA&DP) REF # 16/3/3/6/7/1/E2/15/1135/19**

Dear Funanani,

Our discussion of this morning refers.

At the meeting in March (notes attached), we requested clarity on the boundary of the Walker Bay MPA, as this could affect the application for the path substantially. The proclamation is not clear on the exact boundary. The

attendees at the meeting was of the opinion that the boundary was at the Low water mark, but opted to respond formally upon receiving the first draft BAR for comment.

This issue came up during public participation and we really depend on clarification going forward.

It would assist our process to a great extent if you could provide a preliminary comment in this regard.

Kind regards,

**Kozette Myburgh**

**Categories:** Authority engagement

Hi Ieptieshaam,

Our discussion of earlier this week refers.

I met with Funanani Ditinti on another site this week and asked her also – when she gets the updated report to comment, she will also circulate internally and source the MPA conditions / restrictions, in case the border does fall on the HWM.

For now we will use the general opinion at our March 2019 meeting as the assumption that the MPA is seasonal and due to its nature being a whale sanctuary, that the boundary could well be the LWM.

Kind regards,

*Kozette Myburgh*

**Importance:** High

Hi Ieptieshaam,

I trust you are well.

Fortunately for the Cliff path process there has been some 'quiet time' over the holidays, but we are picking up strings again.

My previous emails below and meeting with the land surveyor last year which I noted refers.

He previously inquired to the SG's office regarding various descriptions of the property boundaries and received the attached response. Accordingly, coastline on SG Diagrams is regarded as the HWM. My concern is that this will then also apply to the MPA boundary because of the wording in the proclamation.

We please need a definitive legal interpretation on this to present the correct information in our reports and address the MPA and National Environmental Management Protected Areas Act 57 of 2003 requirements if necessary.

Would you kindly see if you could engage with DEFF about this matter again, as you previously offered?

I would really appreciate your help!

Kind regards,

*Kozette Myburgh*

Good morning Ieptieshaam,

Hope you are well?

We did not receive further feedback from DEA O&C regarding the MPA boundary and I am just following up if you had any further discussions in this regard, as per our tele-meeting discussions below?

We had a recent meeting with a land surveyor who previously inquired to the SG's office regarding various descriptions of the property boundaries and received the attached response. Accordingly, coastline on SG Diagrams is regarded as the HWM. My concern is that this will then also apply to the MPA boundary because of the wording in the proclamation.

We please need a definitive legal interpretation on this to present the correct information in our reports and address the MPA and National Environmental Management Protected Areas Act 57 of 2003 requirements if necessary.

Kind regards,

*Kozette Myburgh*

**To:** 'Ieptieshaam Bekko'

**Subject:** RE: PROPOSED POOLE'S BAY PEDESTRIAN PATH - PUBLIC PARTICIPATION PROCECSS (AUTH)

**Importance:** High

Hi Ieptieshaam,

Thank you for your time this morning to discuss the Poole's Bay path application we are currently busy with.

Just a few notes:

1. Comment –

We would appreciate your comment from a coastal access point of view. You would be able to send it through within the next two weeks.

Although I have spoken to Funanani about requiring detailed comment (they only reacted on our letter stating that they would comment in the next round) I highlighted the importance of confirmation on the boundary of the MPA, but have not received formal comment yet.

2. MPA –

Although it is normally assumed that an MPA boundary is at the HWM, it was discussed at the meeting with DEA in March that, considering the purpose of the Walker Bay MPA being associated with whales, that it would rather be regarded as the LWM. It was also stated that DEA would address this formally in their comment on the BAR. We have not received this comment yet and in follow up inquiries from me, there has not been formal confirmation that it is in fact the LWM. I did receive feedback from Lauren Wiliams (please see email attached, with trailing emails, also from Nikki Vink indicating that it is beyond her area of expertise), her assumption is that the boundary is MPA "coastline" was taken from the bottom of the cliff, which also doesn't confirm LWM clearly. You will follow up with them to issue formal confirmation.

3. Landowners consent –

We must continue including both DPW (for landowners consent) and the Cape Nature Seashore lease when the time comes to submit an application, although the Seashore Act would likely be repealed before the authorisation is granted, which will then obviate the need for it.

4. Liabilities –

Needs to be addressed in the EMP, proper signage is required (also illustrative), or signing of a disclaimer. You also noted the municipality's more positive attitude towards the project and that there would have to be an agreement on responsibilities, e.g. litter removal.

5. Black Oyster Catcher in IBA –

Although you don't regard there to be a great risk, we will nevertheless obtain an opinion from a bird specialist as there might be some disturbance during construction.

Please let me know if there is anything to add.

We look forward to receiving your comment.

Kind regards,

*Kozette Myburgh*

Hi Ieptieshaam,

Thanks for your email.

Your comment will be very valuable, so I will give you a call on Monday around 8h00 to discuss if ok and also by when we will need your comment.

I have minutes where the statement re the LWM boundary was made, but they also indicated that they would formally provide comment in response to the application. We have not received that yet. Are you perhaps referring to a different meeting? If so, then those minutes will be of help if I may refer to them in our report.

Kind regards,

*Kozette Myburgh*

Hi Kozette

I was on leave for a while and am still catching up on all my emails.

We would appreciate the opportunity to provide input in light of work that we commissioned in terms of the Coastal Access Audit for the Overberg.

At a meeting held with DEFF: Oceans and Coasts it was stated that the boundary for the MPA is the low water mark. I will check if there was minutes of the meeting that could be referred to in order to confirm this.

I am out of office today and tomorrow. By when would you require our comments?

Best regards,

Hi Ieptieshaam,

I trust you are well and that you had a good break.

I am just following up on if you will still be commenting on the pre-application BAR. I am not ready with the revised report yet and could still incorporate comment, should you have any.

I have received feedback from Andrew Ballantyne, which basically says that the SG will not confirm the HWM in this case. The Land Survey Act only makes provision for that where subdivision of private properties are involved.

I am also awaiting feedback regarding the position of DoPW on the custodianship for the Coastal Public Property and whether they should be the ones to give consent as landowner, or whether it should simply be a lease through Cape Nature under the Seashore Act. It seems to veer towards the Cape Nature responsibility. There would have been a meeting today in this regard.

On the MPA issue, the boundary is still unclear due to lack of definition, but on the maps there is a definite divide between the draft HWM and boundary and Lauren Williams (DEA GIS) is also of the opinion that the boundary determination preceded the HWM determination and therefore it could be the LWM. In absence of confirmation, I will have to present this information as it is on the map (see attached), although when you add elevations, it may tell a different story. Any comment from your side on that?

Kind regards,

*Kozette Myburgh*

Dear Ieptieshaam, Radia and Funanani,

We are finalising the comments received and I would like to know if you will still be commenting on the pre-application draft BAR. If possible, could I have your feedback then by Tuesday 13 August?

At the meeting in March we discussed issues around your stance on the HWM and also about the boundary of the MPA (see notes attached again, which was also included with the BAR that went out for comment). We would really appreciate your input in this regard, so we may confirm / address it in the process.

I have also spoken to Basson Geldenhuis on the landowner issue as well as confirmation of the HWM and he has put me in touch with Andrew Ballantine from the SG's office. I am hoping to arrange a meeting with him to determine their exact requirements. I would really appreciate any additional advice on this matter as well.

I am looking forward to hearing from you.

Kind regards,

*Kozette Myburgh*

**(DEA&DP) REF # 16/3/3/6/7/1/E2/15/1135/19**

Dear Sir or Madam,

My correspondence of 21 June 2019 below refers.

This is just a friendly reminder that your comments for the above must please be submitted by Wednesday 24 July 2019.

Thank you to those from whom I have already received comments. These will be addressed in the revision to the current draft Basic Assessment Report.

Kind regards,

*Kozette Myburgh*

Dear Sir or Madam,

The attached letter regarding the above proposed development refers.

We are currently in the pre-application phase of the environmental assessment process and would like to invite you to participate and register as a stakeholder.

A draft Basic Assessment Report has been prepared for comment, which will be available at the Hermanus Public Library from 24 June 2019. For your convenience, the documents are also available at the following link:

[POOLES BAY PATH PRE-APPLICATION DBAR](#)

Please do let me know if you have any comments or inquiries.

Kind regards,

**Kozette Myburgh**
