Project Description & Location (31° 28' 16.60"S, 19° 45' 42.32"E)

The Ranskop abattoir is currently registered to slaughter 600 sheep/ goats per day (100 Units). It is proposed that the slaughter capacity be increased from 600 to 1000 sheep/goats per day (167 Units). All waste products, as well as deceased sheep or carcasses (condemned material), gets buried in trenches at a designated area adjacent to the abattoir. All water used at the abattoir, emanating from the slaughter floor and pens/krale, gets pumped into a separator where solids gets separated from the liquid waste produced by the abattoir. After this, waste water than gets pumped through a pipeline to the municipality's oxidation dams; and any other remaining solid waste than also gets buried in the trenches mentioned above.

Description of Alternatives:

Alternative includes layout options and the option of not proceeding with the proposed development (the No-Go option) will be discussed in the application process.

Public Participation:

Interested and Affected Parties (I&APs) are hereby notified of the application and invited to register (in writing) and/or provide initial comments and identify any issues, concerns or opportunities relating to this project to the contact details provided below, **on or before 18 September 2017**.

In order to register or submit a comment, I&APs should refer to the project name, and provide their name, address & contact details (*indicating your preferred method of notification*) and an indication of any direct business, financial, personal, or other interest which they have in the application.
