

APPENDIX E5
STAKEHOLDER CORRESPONDENCE

21 September 2022

Mr Johan and Mrs Cecile Kondos

By hand

Dear Mr & Mrs Kondos,

**HARMONY MOAB KHOTSONG SOLAR PV FACILITY, VIERFONTEIN, FREE STATE PROVINCE
(DESTE Reference No.: To be Issued)**

Harmony Moab Khotsong Operations (Pty) Ltd is looking to supplement its energy supply by implementing Photovoltaic (PV) generation, aiding their transition to a more sustainable and environmentally friendly energy mix.

The development of a solar photovoltaic (PV) facility with a generating capacity of up to 100MW is proposed north of the Harmony Gold Moab operations, approximately ~10km north of the town of Vierfontein within the Moqhaka Local Municipality, Fezile Dabi District Municipality, Free State Province. The solar PV development will be known as Harmony Moab Khotsong Solar PV Facility.

The PV development area includes eleven (11) farm portions, all owned by the Mine. These include:

- » Farm Anglo 593;
- » Farm Hoekplaats 598;
- » Farm Mispah 274;
- » Portion 1 of Farm Zaaiplaats 190;
- » Remaining Extent of Farm Doornkom Wes 446;
- » Farm Chrystalkop 69; and
- » Portions 1, 3, 4, 5, and the Remaining Extent of the Farm Zuiping 394.

The Harmony Moab Khotsong Solar PV Facility is located within the Klerksdorp Renewable Energy Development Zone (REDZ). The project is therefore subject to a Basic Assessment (BA) process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation in accordance with the EIA Regulations, 2014 (as amended), as well as, GNR 114 as formally gazetted on 16 February 2018.

A Basic Assessment (BA) process is being undertaken in order to obtain Environmental Authorisation (EA) for the development of the PV facility and associated infrastructure. The public participation process provides the public with an opportunity to comment on the project.

OVERVIEW OF THE PROJECT

The generation is intended for own-use by the Mine, reducing the Mine's reliance on Eskom. The preferred site for the project is on properties which are owned by the Mine and are available for the proposed project and are therefore deemed technically feasible for such development to take place.

A project site considered to be technically suitable for the development of the solar PV facility, with an extent of approximately 1400ha, was identified. A development area of ~900ha was demarcated within this project site and allows an adequate footprint for the installation of a solar PV facility with a contracted capacity of up to 100MW, while allowing for the avoidance of environmental site sensitivities.

The full extent of the project site is to be evaluated in the Basic Assessment process to identify environmental sensitivities. Site-specific studies and assessments will be undertaken through the BA process in order to delineate areas of potential sensitivity within the identified study area and grid connection corridor/s. Once constraining factors have been determined, the layout of the solar PV facilities and the grid connection solution can be planned to minimise social and environmental impacts.

The infrastructure associated with the 100MW solar PV facility will include:

- » PV modules and mounting structures
- » Access roads, internal roads and fencing around the development area
- » Temporary and permanent laydown areas
- » Administrative building, control room, workshop, storage building, guard house, auxiliary buildings and structures, water supply infrastructure, weather station
- » Peripheral boundary wall & fencing
- » Inverters, transformers and up to 5 on-site facility substations and switching substations
- » Cabling between the project components, to be laid underground where practical
- » Grid connection infrastructure to be connected to the existing:
 - Vaalreefs Eleven Substation via a ~2km power line (located south-east of the facility);
 - Southvaal Plant Substation via a ~0.5km power line (located north-west of the facility);
 - and
 - Southvaal Substation via a ~4km power line (located north of the facility).

The site is accessible via the R76 south of the project site.

BASIC ASSESSMENT PROCESS

In accordance with the EIA Regulations, 2014 (as amended) published in terms of Section 24(5) of the National Environmental Management Act (No. 107 of 1998) (NEMA), the applicants require Environmental Authorisation (EA) from the Department of Small Business Development, Tourism and Environmental (DESTEA), as the Competent Authority. In terms of Section 24(5) of NEMA, the EIA Regulations, 2014 (GNR 326), Listing Notices (GNR 327, GNR 325, and GNR 324), as well as GNR 114 (the site is located within the Klerksdorp REDZ), the application for EA for the Harmony Moab Khotsong

Solar PV Energy Facility is subject to the completion of a Basic Assessment (BA) process. The application for EA is required to be supported by comprehensive, independent environmental studies undertaken in accordance with Appendix 6 of the EIA Regulations, 2014, as amended, and where relevant, in line with the gazetted protocols.

A BA is an effective planning and decision-making tool. It allows for potential environmental consequences resulting from a proposed activity to be identified and appropriately managed during the construction, operation, and decommissioning phases of development. It also provides an opportunity for the project applicants to be forewarned of potential environmental issues, and allows for the resolution of issue(s) identified and reported on as part of the BA processes, as well as provides opportunity for dialogue with key stakeholders and Interested and Affected Parties (I&APs).

Savannah Environmental has been appointed as the independent environmental consultant responsible for managing the application for EA, undertaking the supporting BA process required to identify and assess potential environmental impacts associated with the project, as well as propose appropriate mitigation and management measures to be contained within the Environmental Management Programme (EMPr). Generic EMPrs in accordance with GNR435 will be compiled for the grid connection solution. I&APs will be actively involved in the BA process through the public participation process.

PUBLIC PARTICIPATION PROCESS

The sharing of information forms the basis of the public participation process and offers I&APs the opportunity to become actively involved in the BA process. Comments and inputs from I&APs are encouraged to ensure that potential impacts are considered throughout the BA process. The public participation process aims to ensure that:

- » Information containing all relevant facts in respect of the application is made available to I&APs for review.
- » I&AP participation is facilitated in such a manner that they are provided with reasonable opportunity to comment on the project.
- » An adequate review period is provided for I&APs to comment on the findings of the Basic Assessment Report.

To ensure effective participation, the public participation process include the following:

- » Identifying I&APs, including affected and adjacent landowners and occupiers of land, and relevant Organs of State, and recording details within a database.
- » Notifying I&APs of the commencement of the BA process and distributing a Background Information Document (BID) to registered I&APs.
- » Providing access to registered parties to Savannah Environmental's website, which centralises project information and stakeholder input in a single digital platform.
- » Providing an opportunity for I&APs to engage with the EIA project team.
- » Placing site notices at the affected properties.
- » Placing an advertisement in a local newspaper.
- » Notifying I&APs of the release of the Report for a 30-day review and comment period.
- » Holding meetings with key stakeholders (virtual and in person), and providing an opportunity to engage with the project team via appropriate virtual platform (MS Teams / Zoom, etc), multi-media (i.e., SMS / WhatsApp).

Where I&APs do not have the applicable facilities or access to internet, alternative means for consultation and to facilitate comment on the projects will be made, including consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

You, as an **adjacent landowner** of _____, have been identified as an interested and affected party for the proposed project as described above. The nature and extent of the solar PV and the associated infrastructure are explored in more detail in the Background Information Document (BID) which be sent to you in due course.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Mr Edwin Muller
Hansie Muller Voerkraal Trust

By hand

Dear Mr Muller,

**HARMONY MOAB KHOTSONG SOLAR PV FACILITY, VIERFONTEIN, FREE STATE PROVINCE
(DESTEA Reference No.: To be Issued)**

Harmony Moab Khotsong Operations (Pty) Ltd is looking to supplement its energy supply by implementing Photovoltaic (PV) generation, aiding their transition to a more sustainable and environmentally friendly energy mix.

The development of a solar photovoltaic (PV) facility with a generating capacity of up to 100MW is proposed north of the Harmony Gold Moab operations, approximately ~10km north of the town of Vierfontein within the Moqhaka Local Municipality, Fezile Dabi District Municipality, Free State Province. The solar PV development will be known as Harmony Moab Khotsong Solar PV Facility.

The PV development area includes eleven (11) farm portions, all owned by the Mine. These include:

- » Farm Anglo 593;
- » Farm Hoekplaats 598;
- » Farm Mispah 274;
- » Portion 1 of Farm Zaaiplaats 190;
- » Remaining Extent of Farm Doornkom Wes 446;
- » Farm Chrystalkop 69; and
- » Portions 1, 3, 4, 5, and the Remaining Extent of the Farm Zuiping 394.

The Harmony Moab Khotsong Solar PV Facility is located within the Klerksdorp Renewable Energy Development Zone (REDZ). The project is therefore subject to a Basic Assessment (BA) process, as well as a shortened timeframe of 57 days for the processing of an Application for Environmental Authorisation in accordance with the EIA Regulations, 2014 (as amended), as well as, GNR 114 as formally gazetted on 16 February 2018.

A Basic Assessment (BA) process is being undertaken in order to obtain Environmental Authorisation (EA) for the development of the PV facility and associated infrastructure. The public participation process provides the public with an opportunity to comment on the project.

OVERVIEW OF THE PROJECT

The generation is intended for own-use by the Mine, reducing the Mine's reliance on Eskom. The preferred site for the project is on properties which are owned by the Mine and are available for the proposed project and are therefore deemed technically feasible for such development to take place.

A project site considered to be technically suitable for the development of the solar PV facility, with an extent of approximately 1400ha, was identified. A development area of ~900ha was demarcated within this project site and allows an adequate footprint for the installation of a solar PV facility with a contracted capacity of up to 100MW, while allowing for the avoidance of environmental site sensitivities.

The full extent of the project site is to be evaluated in the Basic Assessment process to identify environmental sensitivities. Site-specific studies and assessments will be undertaken through the BA process in order to delineate areas of potential sensitivity within the identified study area and grid connection corridor/s. Once constraining factors have been determined, the layout of the solar PV facilities and the grid connection solution can be planned to minimise social and environmental impacts.

The infrastructure associated with the 100MW solar PV facility will include:

- » PV modules and mounting structures
- » Access roads, internal roads and fencing around the development area
- » Temporary and permanent laydown areas
- » Administrative building, control room, workshop, storage building, guard house, auxiliary buildings and structures, water supply infrastructure, weather station
- » Peripheral boundary wall & fencing
- » Inverters, transformers and up to 5 on-site facility substations and switching substations
- » Cabling between the project components, to be laid underground where practical
- » Grid connection infrastructure to be connected to the existing:
 - Vaalreefs Eleven Substation via a ~2km power line (located south-east of the facility);
 - Southvaal Plant Substation via a ~0.5km power line (located north-west of the facility);
 - and
 - Southvaal Substation via a ~4km power line (located north of the facility).

The site is accessible via the R76 south of the project site.

BASIC ASSESSMENT PROCESS

In accordance with the EIA Regulations, 2014 (as amended) published in terms of Section 24(5) of the National Environmental Management Act (No. 107 of 1998) (NEMA), the applicants require Environmental Authorisation (EA) from the Department of Small Business Development, Tourism and Environmental (DESTEA), as the Competent Authority. In terms of Section 24(5) of NEMA, the EIA Regulations, 2014 (GNR 326), Listing Notices (GNR 327, GNR 325, and GNR 324), as well as GNR 114 (the site is located within the Klerksdorp REDZ), the application for EA for the Harmony Moab Khotsong

Solar PV Energy Facility is subject to the completion of a Basic Assessment (BA) process. The application for EA is required to be supported by comprehensive, independent environmental studies undertaken in accordance with Appendix 6 of the EIA Regulations, 2014, as amended, and where relevant, in line with the gazetted protocols.

A BA is an effective planning and decision-making tool. It allows for potential environmental consequences resulting from a proposed activity to be identified and appropriately managed during the construction, operation, and decommissioning phases of development. It also provides an opportunity for the project applicants to be forewarned of potential environmental issues, and allows for the resolution of issue(s) identified and reported on as part of the BA processes, as well as provides opportunity for dialogue with key stakeholders and Interested and Affected Parties (I&APs).

Savannah Environmental has been appointed as the independent environmental consultant responsible for managing the application for EA, undertaking the supporting BA process required to identify and assess potential environmental impacts associated with the project, as well as propose appropriate mitigation and management measures to be contained within the Environmental Management Programme (EMPr). Generic EMPrs in accordance with GNR435 will be compiled for the grid connection solution. I&APs will be actively involved in the BA process through the public participation process.

PUBLIC PARTICIPATION PROCESS

The sharing of information forms the basis of the public participation process and offers I&APs the opportunity to become actively involved in the BA process. Comments and inputs from I&APs are encouraged to ensure that potential impacts are considered throughout the BA process. The public participation process aims to ensure that:

- » Information containing all relevant facts in respect of the application is made available to I&APs for review.
- » I&AP participation is facilitated in such a manner that they are provided with reasonable opportunity to comment on the project.
- » An adequate review period is provided for I&APs to comment on the findings of the Basic Assessment Report.

To ensure effective participation, the public participation process include the following:

- » Identifying I&APs, including affected and adjacent landowners and occupiers of land, and relevant Organs of State, and recording details within a database.
- » Notifying I&APs of the commencement of the BA process and distributing a Background Information Document (BID) to registered I&APs.
- » Providing access to registered parties to Savannah Environmental's website, which centralises project information and stakeholder input in a single digital platform.
- » Providing an opportunity for I&APs to engage with the EIA project team.
- » Placing site notices at the affected properties.
- » Placing an advertisement in a local newspaper.
- » Notifying I&APs of the release of the Report for a 30-day review and comment period.
- » Holding meetings with key stakeholders (virtual and in person), and providing an opportunity to engage with the project team via appropriate virtual platform (MS Teams / Zoom, etc), multi-media (i.e., SMS / WhatsApp).

Where I&APs do not have the applicable facilities or access to internet, alternative means for consultation and to facilitate comment on the projects will be made, including consulting with the Ward Councillor, the ward committee members, community representatives and local community forum members.

You, as an **adjacent landowner** of _____, have been identified as an interested and affected party for the proposed project as described above. The nature and extent of the solar PV and the associated infrastructure are explored in more detail in the Background Information Document (BID) which be sent to you in due course.

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Midvaal Water Company

Dear Ms Scheepers,

Our e-mail notification below has reference.

It will be appreciated if you can inform us who at Midvaal Water Company, registered owner of **Portion 12 of the Farm Buffelsfontein 443**, we need to consult with regarding the above-mentioned proposed project.

In terms of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, adjacent landowners to a development site need to be notified and consulted with of the proposed development.

We are looking forward to receive the requested information.

Kind regards,

**HARMONY MOAB KHOTSONG PLANT SOLAR PV FACILITY, VIERFONTEIN, FREE STATE PROVINCE
(DESTEA Reference No.: To be Issued)**

Dear Stakeholder and Interested & Affected Party,

Harmony Moab Khotsong Operations (Pty) Ltd is looking to supplement its energy supply by implementing Photovoltaic (PV) generation, aiding their transition to a more sustainable and environmentally friendly energy mix.

The development of a solar photovoltaic (PV) facility with a generating capacity of 100MW is proposed on a site located north of the Harmony Gold Moab and south of the Harmony Gold Great Nologwa operations, approximately ~10km north of the town of Vierfontein within the Moqhaka Local Municipality, Fezile Dabi District Municipality, Free State Province. The solar PV development will be known as Harmony Moab Khotsong Solar PV Facility.

The nature and extent of the solar PV facility is explored in more detail in the Background Information Document (BID) attached.

A Basic Assessment (BA) process is being undertaken to obtain Environmental Authorisation (EA) for the development of the PV facility and associated infrastructure. The public participation process provides the public with an opportunity to comment on the project.

Please find attached for your perusal the following documents:

- Background Information Document in which the nature and extent of the solar PV facility is explored in more detail; and
- Notification of availability of the Basic Assessment Report for review and comment.

The Basic Assessment Report is available for downloading from our website [click here](#).

Please do not hesitate to contact us should you require any additional information and/or clarification regarding these projects.

Our team welcomes your participation and look forward to your involvement throughout the Basic Assessment Process.

SAWEA Award for Leading Environmental Consultant on Wind Projects in 2013 & 2015

26 September 2022

Dear Stakeholder and Interested and Affected Party,

**HARMONY MOAB KHOTSONG SOLAR PV FACILITY, VIERFONTEIN, FREE STATE PROVINCE
(DESTEA Reference No.: To be Issued)**

**NOTIFICATION OF BASIC ASSESSMENT AND PUBLIC PARTICIPATION PROCESS
and
NOTIFICATION OF BASIC ASSESSMENT REPORT AND AVAILABILITY FOR REVIEW AND COMMENT**

Harmony Moab Khotsong Operations (Pty) Ltd is looking to supplement its energy supply by implementing Photovoltaic (PV) generation, aiding their transition to a more sustainable and environmentally friendly energy mix.

The development of a solar photovoltaic (PV) facility with a generating capacity of 100MW is proposed on a site located north of the Harmony Gold Moab and south of the Harmony Gold Great Nologwa operations, approximately ~10km north of the town of Vierfontein within the Mqohaka Local Municipality, Fezile Dabi District Municipality, Free State Province. The solar PV development will be known as Harmony Moab Khotsong Solar PV Facility.

The PV development area includes eleven (11) farm portions, all owned by the Mine, and these includes:

- » Farm Anglo 593;
- » Farm Hoekplaats 598;
- » Farm Mispah 274;
- » Portion 1 of Farm Zaaiplaats 190;
- » Remaining Extent of Farm Doornkom Wes 446;
- » Farm Chrystalkop 69; and
- » Portions 1, 3, 4, 5, and the Remaining Extent of the Farm Zuiping 394.

The nature and extent of the solar PV facility is explored in more detail in the Background Information Document (BID). A Basic Assessment (BA) process is being undertaken to obtain Environmental Authorisation (EA) for the development of the PV facility and associated infrastructure. The public participation process provides the public with an opportunity to comment on the project.

The infrastructure associated with the 100MW solar PV facility will include:

- » PV modules and mounting structures
- » Access roads, internal roads and fencing around the development area
- » Temporary and permanent laydown areas
- » Administrative building, control room, workshop, storage building, guard house, auxiliary buildings and structures, water supply infrastructure, weather station
- » Peripheral boundary wall & fencing
- » Inverters, transformers and up to 5 on-site facility substations and switching substations
- » Cabling between the project components, to be laid underground where practical
- » Grid connection infrastructure to be connected to the existing:
 - Vaalreefs Eleven Substation via a ~2km power line (located south-east of the facility);
 - Southvaal Plant Substation via a ~0.5km power line (located north-west of the facility); and
 - Southvaal Substation via a ~4km power line (located north of the facility).

Most of the site is located within the Vaal River Mining Area and is accessible via the Vermaasdrift road originating from the R76 south of the project site, and via the Stokkiesdraai road originating from the R30 west of the project site.

Additional technical information regarding this Solar PV facility is available in the Background Information Document attached to this notification letter.

BASIC ASSESSMENT PROCESS

In accordance with the EIA Regulations, 2014 (as amended) published in terms of Section 24(5) of the National Environmental Management Act (No. 107 of 1998) (NEMA), the applicants require Environmental Authorisation (EA) from the Department of Small Business Development, Tourism and Environmental (DESTEA), as the Competent Authority. In terms of Section 24(5) of NEMA, the EIA Regulations, 2014 (GNR 326), Listing Notices (GNR 327, GNR 325, and GNR 324), as well as GNR 114 (the site is located within the Klerksdorp REDZ), the application for EA for the Harmony Moab Khotsong Solar PV Energy Facility is subject to the completion of a Basic Assessment (BA) process. The application for EA is required to be supported by comprehensive, independent environmental studies undertaken in accordance with Appendix 6 of the EIA Regulations, 2014, as amended, and where relevant, in line with the gazetted protocols.

A BA is an effective planning and decision-making tool. It allows for potential environmental consequences resulting from a proposed activity to be identified and appropriately managed during the construction, operation, and decommissioning phases of development. It also provides an opportunity for the project applicants to be forewarned of potential environmental issues, and allows for the resolution of issue(s) identified and reported on as part of the BA processes, as well as provides opportunity for dialogue with key stakeholders and Interested and Affected Parties (I&APs).

Savannah Environmental has been appointed as the independent environmental consultant responsible for managing the application for EA, undertaking the supporting BA process required to identify and assess potential environmental impacts associated with the project, as well as propose appropriate mitigation and management measures to be contained within the Environmental Management Programme (EMPr). Generic EMPrs in accordance with GNR435 will be compiled for the grid connection solution. I&APs will be actively involved in the BA process through the public participation process.

You and/or the Department/Organization/Company, which you represent, have been identified as a stakeholder for the proposed project as described above. The nature and extent of the solar PV are explored in more detail in the BID which is attached to this letter and is also available for download from the Savannah Environmental website <https://savannahsa.com/public-documents/energy-generation/>.

PUBLIC INVOLVEMENT PROCESS

The public participation (PP) process is being undertaken in accordance with the requirements of Regulations 39 to 44 of the Environmental Impact Assessment (EIA) Regulations, 2014, as amended, (GNR 326). The aim of the public participation process is primarily to ensure that:

- » information containing all relevant facts in respect of the application is made available to I&APs for review;
- » I&AP (Interested and Affected Party) participation is facilitated in such a manner that they are provided with reasonable opportunity to comment on the project;
- » adequate review period is provided for I&APs to comment on the findings of the BA Report; and
- » comments received from potential stakeholders and I&APs are recorded and incorporated into the BA process.

Savannah Environmental have established an online stakeholder engagement platform, where you are invited to register your interest in the project, and view project documentation. Please visit our website (link provided above). You are also welcomed to complete the registration and comment form attached to this letter and submit it to the public participation team.

Where I&APs do not have the applicable facilities or access to internet, alternative means for consultation and to facilitate comment on the projects will be made through the Ward Councilor and/or Ward Committee Members. I&APs are also able to make contact via the "Please call me" functionality available on our public participation mobile phone (060 978 8396).

BASIC ASSESSMENT REPORT AVAILABLE FOR PUBLIC REVIEW AND COMMENT

The Basic Assessment Report for Harmony Moab Khotsong Solar PV facility is available for review and comment from **26 September 2022 to 26 October 2022**. The report is available for download from the Savannah Environmental website (link provided above).

In terms of Regulation 3(1) of the NEMA EIA regulations, the report will be available on 26 September 2022, with 27 September 2022 being the first day of the 30-day review and comment period. The due date for written comment is 26 October 2022.

Please submit your written comments on the BA Report via one of the following means:

- E-mail: publicprocess@savannahsa.com
- Post: PO Box 148, Sunninghill, 2157xxx
- Fax: 086 684 0547
- Telephone: 011 656 3237
- Mobile: 060 978 8396 (including "please call me")

All comments should be addressed to Nicolene Venter at Savannah Environmental.

All comments received during the 30-day review and comment period will be recorded and included in the Final Basic Assessment Report for submission to the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs (DESTEA) in line with Regulation 44 of the EIA Regulations, 2014, as amended (GNR 326).

Please do not hesitate to contact us should you require additional information and/or clarification regarding the project. Our team welcomes your participation and look forward to your involvement throughout this process.

Kind regards

Beste Hannes & Edwin,

Dankie vir die tyd wat julle verlede week Woensdag aan my en Chantelle afgestaan het om die bogenoemde projek aan julle bekend te stel en julle kommentaar, in beginsel, aan te hoor.

Soos belowe, vind hierby aangeheg die Grondeienaars- en Liggingskaart.

Vriendelike groete,
