Subject: RE: Background Information Document: EIA process for the incinerator upgrade at Grahamstown Veterinary Laboratory, Eastern Cape

Importance: High

Hi Wanda

Thank you for your document.

Please be advised that this facility has no authorisation to operate at present and based on the BID document this means that they have operated illegally from an Air Quality aspect. Consequently they would need to undergo a section 22A process in terms of the AEL. Chris Hani is the AEL Licensing authority for Queenstown.

I would propose a meeting to discuss this matter as it affects your process as envisaged in the BID document.

Unfortunately today is my last day before I go on leave and won't be able to accommodate this for at least a month due to end of Financial Work Pressures when I return.

Regards
Lyndon Mardon

Importance: High

To Interested and Affected Parties, Stakeholders and Authorities,

Background Information Document: EIA process for the incinerator upgrade at Grahamstown Veterinary Laboratory, Eastern Cape

Please find attached the Background Information Document (BID) which serves as notice of the proposed incinerator upgrade at the Grahamstown Veterinary Laboratory in the Eastern Cape.

Should you wish to register as an Interested & Affected Party (IAP), please complete the Registration & Comment Sheet provided in the BID and return to me via email or fax. Future communications regarding the process as well as notification of the availability of reports will only be sent to registered IAPs.

Please ensure that your comments reach SRK Consulting by **12h00** on **30 March 2016** to ensure that they will be included and addressed in the draft Scoping Report. This deadline refers solely to your initial comments on the content of the BID. All registered IAPs will be afforded further opportunities for comment throughout the process (please refer to the flow diagram on page 2 of the BID for more details).

Kind Regards,

Marais, Wanda

Hi Nikki and Philip

Forwarded for your information. Given what the attached doc says and the location (away from housing) I am not sure I have anything to say about this development. It's replacing an old incinerator, so I presume it will generate less fumes. I will look in more detail later.

regards

Tim
