Dear Madam

RE: BACKGROUND INFORMATION DOCUMENT FOR THE PROPOSED MELMOTH IRON ORE PROJECT NEAR MELMOTH, WITHIN THE KING CETSHWAYO DISTRICT MUNICIPALITY

Reference is made to the Background Information Document (BID) received electronically by the Department of Water and Sanitation (Department) on the 10th August 2021. This Department has the following comments **which must be addressed and form part of the subsequent environmental assessment process**. The subsequent environmental report(s) must be **submitted to this office** for further review to ensure compliance with statutory requirements, assessment of scientific and technical adequacy and to ensure issues raised have been adequately addressed.

1. This Department appreciates the commitment by the Applicant to apply for a Water Use Authorization in terms of the National Water Act, 1998 (Act No. 36 of 1998) and looks forward to receiving this application.
2. This Department appreciates the commitment by the Applicant to investigate the status of the following environmental aspects: Geotechnical, Groundwater, Surface Water, Waste Classification, Biodiversity and Hydropedology and looks forward to their incorporation in the subsequent environmental reports to be submitted to this office.
3. The Applicant is reminded to include details on water and wastewater provisions for the proposed project/ development, amongst others;

- 3.1 A breakdown of the water requirements for all phases of the development;
 - 3.2 The source of water to be used for the development;
 - 3.3 Wastewater and sewage treatment and/or management for all phases of the development;
and
 - 3.4 Proof of sustainability of both water and wastewater provisions for the lifetime of the project/
development.
4. The Applicant is reminded to conduct an impact assessment to determine the potential impacts of the proposed development on watercourses including the mitigation measures outlining how the impacts will be mitigated and managed to avoid detrimental impacts on the watercourse.
 5. The Applicant is reminded to indicate the cradle to grave management plan for the waste (both general and hazardous waste) to be generated.
 6. A detailed Environmental Management Programme for all phases of the project must be attached.
 7. The Applicant is reminded to include the erosion control measures to be implemented.
 8. The Applicant is reminded to include a Storm Water Management Plan for the proposed development/ project.
 9. The Applicant is reminded to reflect all the proposed infrastructure in legible, drawn to scale site layout maps. The Maps should, amongst others:
 - a) Show all watercourses: channels, drainage lines, streams, tributaries, rivers, wetlands, etc. within and around the site of interest;
 - b) Show the 1:100 year floodline of all drainage lines, channels, streams, tributaries, rivers (in and around the site) or 100m distance (whichever is greatest);
 - c) Show all wetlands (in and around the site), their delineated boundaries as well as the buffer zone(s) to be applied for this development;
 - d) Superimpose all the proposed development infrastructure (temporary & permanent) which forms part of this development.
 - e) The maps should be on high resolution, with legible legends and drawn to scale.

It is the responsibility of the Applicant to identify all water uses triggered by the undertakings in terms of Section 21 of the National Water Act, 1998 (Act No. 36 of 1998) and to ensure that all applicable water uses are authorized as such.

N.B.

The Applicant is reminded that if this development, parts of it and its infrastructure are located within the regulated area then the project must be authorized by this Department prior to commencement of the activity. Therefore the Applicant will be required to apply for a Water Use Authorisation as the activity will not be a permissible water use as stipulated in Section 22 of the National Water Act, Act 36 of 1998.

Please do not hesitate to contact this office should you have any concerns, comments or queries.

A handwritten signature in black ink, appearing to be 'Dk', is written above a horizontal line.

Hi Chris,

Your emails below have reference. As discussed telephonically, unfortunately in light of the new COVID restrictions there will be no public meeting held tomorrow at the Melmoth Golf Club. The public meeting has therefore been postponed until further notice.

With regards to your logistics enquiries, we unfortunately can neither provide for nor subsidize any logistics arrangements made to attend the public meetings. If your organization will be unable to make it to the physical public meeting (once restrictions have been eased and a new date advised), please kindly consider attending the virtual meeting which will take place on Microsoft Teams on 06 July at 3pm.

Please kindly let me know if your organization would be interested in attending the virtual meeting, and if so the names and email addresses of the attendees so I can send them a meeting link closer to the time.

Please also note that you have been registered onto our database as an Interested and/or Affected Party and will continue to be informed about the project and given the opportunity to provide input into the Scoping & Environmental Impact Assess process. Furthermore, your registration and response form has been noted and well received.

Kind regards,
Gugu

Email – gdlamini@slrconsulting.com

Attention – Ms Gugu Dlamini

Date: 26 June 2021

Re-request to register as a 1 & AP on the proposed project and EIA process for the local public participation.

1. We hereby kindly acknowledge the receipt of all the detailed prescribed written documentary information as dated 17/06/2021, as pertaining to : **The Jindal: Melmoth Iron Ore Mine Project – notice of applications for mining right , integrated environmental authorization and water use licence for the proposed Melmoth iron ore mine project.**
2. An indigenous Isizwe sakwaDludla Mthonjaneni co-operative tribal trust's democratic public representatives are as follows:
 1. Tribal Representative & Administrative Secretary – Mr Dumisani Dlodla - 5001055182086
 2. Tribal Inkosi – Mr Christias Dlodla - 394045538089
 3. Tribal Chairperson - Mphasobheni Dlodla - 6010095555085
 4. Vice Chairperson - Mr Madlenkosi Mthimkhulu - 6907245447081
 5. Tribal Treasurer - Mr Nhlanhla Biyela - 5502085633089
 6. Additional Member - Mr Mthembiseni Dubazane - 6011265382086
Ms Rose Buthelezi - 6012250486088
Ms Sibongile Dlodla
Ms Jabu Dlamini
Mr Samuel Mhlongo
3. For the attendance of the meeting of 30/06/2021 our Tribal constituency members have unanimously resolved that only no 1, 3, 4 and 5 representatives as listed above shall be the ones who have been delegated to attend on the 30/06/2021, thus their registration forms have been completed and all attached as marked pages P.2..... to P..... herein, but that is not compulsory that they should attend, but at least three of them only can, all depending on your requirements.
4. Then could you please kindly advise us as to :
 - a) How shall we be funded for the transport fees to and from our various residences i.e for the meeting transport allowance?
 - b) And as it appears that the meeting shall be at Melmoth Golf Club at 3pm and thus we shall have no transport to take us back to our scattered away rural residences as our public transport is not available in the evenings.
 - c) Shall our overnight sleeping accommodation be arranged for us at Melmoth Town, so that we can be able to leave in the morning of the next day i.e the 1st/07/21, when the public transport is available for us during the day?
 - d) And how shall the issue of food provision be provided if a relevant accommodation is available for us?
 - e) Is there any possible meeting allowance available?
 - f) Please kindly provide us with a relevant information hereof as we are very much willing and prepared to participate at this S & EIA process right from the background deliberations as we also so participated during the first Jindal- Usungusungu group explorations during April 2012 at this same area of Melmoth as we are the democratic local indigenous direct descendant's representatives of the greater Mthonjaneni Isizwe sakwaDludla.

Hoping for your prompt, kind, fair, just favourable and professional; co-operation in this vital public participation regard.

With our kind regards

Yours Faithfully

Isizwe sakwaDludla Mthonjaneni Tribal Co-operative Trust.

Land conflicts stall mine

EVER REPORTER

THE plan to establish a billion-dollar iron-ore mine near Melmoth has been hit by clan divisions and disputes over land ownership.

Sungu Sungu Iron Ore (Pty) Ltd was last year granted prospecting rights on Ekuthuleni 24 and portion 2 of Wilhelmina 22, about 10km outside the town - and has since been locked in negotiations with land owners and affected parties.

Several registered as Interested and Affected Parties following legal notice in the local media late December.

But progress seems to have been stalled by the fact that some parties are opposed to the mine, while others are in favour.

There are tensions between Mthombeni Royal House leaders and some communities as well as tensions between different clans of residents who lay claim to the land.

The Mnyendu family at Ekuthuleni claims to own the land while the Empangeni-based Izimbube Trust claims that the Dladla family are the rightful heirs.

The Izimbube Trust in 1995 lodged a land claim encompassing most of Mthonjaneni, including the town of Melmoth.

Their claim is currently being processed with a Land Claims court session scheduled for later this month.

Dumisani Dladla, representing the Trust, said over 300 people had attended their meeting in Melmoth last weekend and there was broad-based support for the

establishment of the mine

He said the tribe had mined in the Mthonjaneni area for centuries. "The iron-ore (inketina) mining at our place is the continuity of what was started by our original forebears. History is repeating itself. This is our heritage. Let's come together to negotiate."

"[At present] things are brought secretly for the purpose of dividing the citizens who are less informed, so that any benefits and royalties end up in the hands of wrong people to the disadvantage of the place's citizens. Negotiated settlements are not made fairly," said Dladla.

Strongly opposing the mine development is the Rural Network Organisation, representing current inhabitants and communities.

The organisation's Rev Mhikisem Mavuso said thousands of families would be affected by the mining operation. They are opposed to the removal of people to establish a mine.

He said two meetings had been held between the mining group and the affected community, where the entire community had voiced their opposition to the mine.

However, he added, "We can agree [to the project] if they talk to the people and they agree to pay compensation to each family."

Mavuso said conflict had been stoked when a traditional leader signed a deal with the mining company, while his community was opposed to the mine.

"We are saying, they (the community) must sign for themselves,

High Tea for Cansa

Umfolozi Resort staffers (L to R): Zena Lambrechts, Pam Nagappa, Cindy Shabalala, Sharon Meyer, Thelma Mphore, Cindy Van Eyk, Reaka Maharaj and Jackie De Boer took the Cansa Tea Party 2012 prize at the Cansa high tea held in Empangeni on Saturday. See the story and more photos on page 8.

they must all agree to the deal," said Mavuso.

He said families were angry that they would not get compensation or payments.

The mining group has insisted that all royalties would be paid into the Inqonyama Trust, a trust Mavuso said served the amakhozi.

Another registered affected

party, Mthonjaneni Municipality, has expressed support for the mine, lauding the creation of jobs.

The mining group has said that up to 5 000 people could be employed when the mine is operational.

Sungu Sungu Group is in partnership with Jindal Africa, a subsidiary of India-based mining

and energy giant Jindal Steel and Power.

Sungu Sungu Iron Ore (Pty) Ltd managing director Thabang Khomo said they had raised \$1.5 bn (about R12 bn) for the project.

The company was invited to comment on the reported conflicts but had not done so at the time of going to press.

SOUTH AFRICAN GEOGRAPHICAL NAMES COUNCIL

APPLICATION FOR PROPOSED NEW GEOGRAPHICAL NAME AND/OR CHANGE OF EXISTING GEOGRAPHICAL NAME.

FOR OFFICE USE ONLY:	Date:
Name approved by Minister:	

NB: Use one form for each proposed feature to be named.

001	Proposed name	First choice	ENKETHENI
		Second choice	
002	(i) Give the meaning and the language from which the name has been derived?	<div style="border: 2px solid black; border-radius: 50%; padding: 10px; display: inline-block;"> <p>ZULU language Inkethe is iron ore available underground at this place ENKetheni - place of Inkethe (iron ore)</p> </div>	
	(ii) Give the origin of the name if you know it. (e.g Gauteng - place of gold)		
003	For which feature is the proposed name intended? (e.g. a post office, railway station, town, township, suburb, mountain, bay, beach, cape, dam, gorge, hill, island, kloof, lake, neck, pan, pass, plain, ridge, river, stream, valley or vlei, settlement, village)	TOWN	
004	In which Local, District Municipality and Province is the place situated?	Mthonjaneni Local Uthungulu District KZN Province	
005	(i) How far and in what direction is the feature situated from the nearest town/magistrate's office (e.g. 15 km north-west of)?	<p>It is the town itself.</p> <p>Lat : Long:</p>	
	(ii) Indicate the geographical co-ordinates in latitudes and longitudes (if possible). Enclose an A2 size map.		
		First choice	Second choice
006	Is the proposed name of long standing (50 years or more), relatively new (10-50 years), or new (5 years or less)?	<p>longstanding from as far back as the 1700s during the reign of King Senzangakhona to date</p> <p>The name of the place was ENKetheni ever since</p>	
007	In the case of a proposed change of a name give former name and reasons for the change	<p>It is now called MEmoth - a new name as was imposed by the British settlers by colonization, apartheid and eviction systems of our forebears who originally resided there.</p>

UMBONO WEPHEPHANDABA

ngesanto
Isolezwe

Ikhombisa ubudoda inkulumo kaMengameli

INKULUMO ethulwe nguMengameli uMnuz Cyril Ramaphosa ngoLwesine ngesikhathi kugujwa uSuku lwamaGugu, idinga ukushayelwa elikhulu ihlombe.

URamaphosa ngaphandle kokuncetheza, ulibeke ngembaba elokuthi kufanele kushintshwe amagama amadolobha nezinye izindawo, zibizwe ngamaqhawe abantu abansundu kukhishwe lawo asikhumbuza izikhathi ezinzima zobandlululo.

Inkulumo kaRamaphosa idodile impela. Ingayinhle kakhulu uma izohambisana nezenzo ezibonakalayo maduze nje, kungagcini ngenkulamo emmandi kodwa engeke isize muntu.

Sesikwejwayele ukuzwa abaholi bekhuluma kahle benanelwe yisiwoko sehloombe kodwa uma sekufanele kuye ngamagama enkehli, zivele ziyime emthumeni.

URamaphosa uze wathi akufanele kugcine ngokuqanjwa kabusha kwezindawo ezikhona kodwa kwakhiwe nezinye izizinda zokugcina umlando ezintsha bese zibizwa ngamaqhawe.

Kuyihlazo ukuthi amadolobha amaningi asabizwa ngamagama alabo ababeqonela izwe lethu kudala. Lokhu kwakha isithombe esibi sengathi abamnyama abanawo amaqhawe abangaqamba ngawo izindawo.

Uma singaqala sibale amaqhawe abamnyama kungaphela sona sikhala sokuloba. Sinamaqhawe amaningi abamba iqhaza ngezindlela ezehlukene esisahlelwe wukuwahlonipha.

Uma sithi akuqanjwe ngamaqhawe akuchazi ukuthi sekuyoba wosopolitiki kuphela kodwa kukhona nalawo ahlabana kudala kungakasungulwa namaqembu ezepolitiki.

Kuyiqiniso futhi kuyancomeka ukuthi zikhona izindawo eziningi eziqanjwe ngamaqhawe amnyama kodwa siyobe singakazisiphuli izisekelo zobandlululo uma kusekhona izindawo ezisahlonipha abacindezeli.

Kumele azi ukuthi njengoba esebeke inkulumo emtoti esizweni, usefana nomuntu okhombela inkomo, wayethula ebandleni selilinde ukuthi ayihlabe bese ihlinzwa ikhishwe ngezithebe, bese liyathokoza ibandla. Udodile meqameli! Fingqa imikhono kuqale kusetshenzwe,

Gugu Dhlamini

Good afternoon Mr Lucas

Thank you for your email.

As the Project is still in the early stages of the Bankable Feasibility Study we are not able to provide the shapefiles as the final project infrastructure is still being finalised. In a similar vein the TSF and alternatives are still being determined and will be undertaken as a separate (but integrated) application. Your name will be registered as an I&AP for the full Project and you will be given the opportunity to review and make comments throughout the EIA process.

Gugu can you please ensure that Mr Lyle is on the database and included in the relevant meeting.

Kind regards

From: Gugu Dhlamini <gdhlamini@slrconsulting.com>

Dear Gugu,

I hope that this mail finds you well.

As per our telephonic correspondence we herewith would like to register as an Interested and Affected Party. Furthermore, we request copies of the .shp/.kml files for the maps provided of the intended project. Lastly, not much information has been provided regarding the proposed Tailings Storage Facility or the alternatives explored.

We look forward to hearing from you and receiving the Microsoft teams invite for the public information meeting.

Kind Regards

Lyle Lucas

Subject: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT

Importance: High

ATTENTION: INTERESTED AND AFFECTED PARTY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR will be consulting with stakeholders through a variety of engagements. Public information meetings have been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021 at 3 pm	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

ATTENTION: Ms Gugu Dhlamini
Email: gdhlamini@slrconsulting.com Telephone: 011 467 0945
Post: PO Box 1596. Cramerview, 2060 Cell phone: 066 082 3687
(Note: If using post, please also contact us telephonically to notify us of your submission)

Please feel free to pass this document on to any other persons whom you believe may be interested in this project. We welcome any comment or questions.

Yours faithfully

Subject: RE: Jindal- Melmoth Iron Ore Project Virtual Meeting
Attachments: 2021-07-27_Melmoth Iron Ore Project-BID-Updated.pdf

Dear Gugu,

I hope that this mail finds you well.

I have been made aware of the updated BID issued, this is only for those who were unable to attend the online information session correct?

Furthermore, I would just like to confirm that the concerns raised during the online information session have been noted.

These included:

- Displacement of local communities (where our employees and families reside)
- Potential contamination of water sources (potentially impacting our Farm)
- The location of the proposed activities in relation to our farm
- Farm water extraction points close Mhlatuze – irrigating our Farm (Bridgeford, Mvubu and Sunnyside) which is nearby / on stream of the proposed Tailings Facility
- Water resources already stressed; Farm has been running on limited water usage for years

- Environmental Impact
 1. Dust pollution/generation
 2. Loss of biodiversity
 3. Water resource stress
 4. Water contamination
 5. Soil contamination

- Social Impact
 1. Relocation of communities
 - May result in encroachment
 - Impact upon local community structures
 - Movement of Farm workers families who reside in these communities
 2. Possible human consumption of contaminated water sources
 3. Job security
 - Reduced arability of soil
 - Contamination of water resources

- Fiscal impact
 1. Reduction in value of farm based on environmental impacts
 2. Reduced arability/productivity of land as a result of water and soil contamination may result in a loss of jobs
 3. Availability of drinking water and water for irrigation
 4. We are a commercial export farm
 - a. Must comply with export standards
 - i. BRC, GlobalGAP, HACCP, etc.
 - b. Unable to meet accreditation/failing to meet abovementioned standards = potential loss of access to key export markets

Kind Regards

Lyle Lucas

Dear Lyle,

The current commenting period (for initial comments) closes end of July, and the next round of Public Participation will be when the Scoping Report goes out for public review. We unfortunately cannot give specific dates at this point due to our project programme being largely affected by the riots and COVID restrictions. We will have to have a relook at the programme once the dust has settled and restrictions have been lifted.

Kind regards,

Gugu

Subject: RE: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT

Morning Gugu,

Thanks for the orientation meeting with SAFDA on Friday on the proposed Melmoth Iron Ore Mine Project. We had discussed in the meeting that SAFDA would share some initial comments on the initial information shared. Please find these below;

1. Distance between Melmoth agricultural operations and proposed open mine pit
2. Specialist studies must be undertaken on the potential environmental impacts (air, noise from the blasts and water) to understand the reach of the mining on surrounding communities and agriculture
 - a. Water impacts on Goedertrouw dam
 - b. Water impacts on potable human consumption
 - c. Water impacts on irrigated water supply

- d. Water impacts from groundwater seepage and from the tailings storage facility (TSF)
3. How would the mining in the area potentially affect the export standards for agricultural produce exported out of Melmoth e.g. Avo's
 4. Water Use licence – would the MR WULA – impact the water allocation for irrigated agriculture i.e. could there be proposed reduced on irrigated agriculture water use licences. I see that it falls into upper reach of the Mhlatuze catchment which has been under scrutiny for some time in terms of water use allocation and pressure has been placed in past on the irrigated sector in the Mhlatuze.
 5. In 2014 and 2015 an S&EIA process was done and specialist studies were undertaken. The DEA did not approve and required further clarification. What was the outcome of these specialist studies and what questions did the regulatory authority raise then.
 6. The BID refers to potential expansion and also for some of the infrastructure activities to take place outside of the MR site, how much additional land would be required outside of the 21 170 ha, has land been identified for this and what is the current land use of this land
 7. If the project goes ahead, will Jindal be offering the local community a percentage shareholding in the Melmoth Iron Ore Mine
 8. Has iron ore surveys been undertaken previously in the area, the project talks of potential expansion, do we have a spatial idea of the extent of iron ore in the area and where it lies?
 9. The beneficiation iron ore will be transported by road or rail and there is reference to potential rail siding. Could the local sugarcane producers partner in the use of the rail siding for transport their cane to near sugar mill to reduce their transport costs.
 10. Is the North and South MR blocks suitable on soils of high agricultural potential land. If yes what % percentage of the MR area is high agricultural potential land
 11. What would happen in terms of land ownership in the area? Currently refers to ITB, state, private and companies, traditional authorities
 12. Would SLR Consulting facility bilaterals with the specialist studies services providers especially those that could impact the agricultural sector and local community.

SAFDA would like to register as an I&AP

Kind Regards,

Subject: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT

Importance: High

ATTENTION: COMMENTING AUTHORITY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potential commenting authority, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you/your Department may have an interest in, or be a commenting authority on, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR will be consulting with stakeholders through a variety of engagements. Meetings will be arranged with commenting authorities. Public information meetings have been arranged, as below.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021 at 3 pm	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

ATTENTION: Ms Gugu Dhlamini

Good morning Maryna,

In light of the new COVID restrictions, we unfortunately will **no longer** be having the physical meeting at the Melmoth Golf Club on Wednesday (30 June, 3 pm). The public meeting has therefore been postponed until further notice. Once the COVID restrictions have been lifted, we will inform you of the new date.

Any inconvenience caused is regretted.

Kind regards,
Gugu

Good day,

Thank you for your comment sheet, it has been well received.

Your RSVP for the public meeting on the 30th of June has been noted. We have registered two of your organisation's members.

The link for the virtual meeting on the 06th will be sent to you closer to the time.

Best regards,
Gugu

Good morning

Thank you once again for this opportunity

Find the completed documents for your attention

We would really like for our Representatives to be present on the 30 June 2021 with the meeting at the Golf Club in Melmoth.

With the Covid 19 once again and restriction I will understand if it would not be possible. If possible, please confirm the RSVP for that day.

In that case I would be pleased if you could send the link for the online meeting on the 6th of July 2021.

Thank you very much

Regards
Maryna Smith

Subject: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT

Importance: High

ATTENTION: INTERESTED AND AFFECTED PARTY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MIING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a

Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR will be consulting with stakeholders through a variety of engagements. Public information meetings have been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021 at 3 pm	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

S&EIA FOR THE PROPOSED MELMOTH IRON ORE PROJECT NEAR MELMOTH, KWAZULU-NATAL

BACKGROUND INFORMATION DOCUMENT

June 2021

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a project site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality in the KwaZulu-Natal Province (Figure 1).

The **Melmoth Iron Ore Project** would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. A **Bankable Feasibility Study** is in progress to determine specific details of the mine plan.

Jindal intends to lodge an application for a **Mining Right** (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

ENVIRONMENTAL AUTHORISATION PROCESS

In order for the DMRE (the Competent Authority) to grant a MR the applicant must apply for and obtain an **Environmental Authorisation** (EA) in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA).

To inform the DMRE's decision on the EA application, a **Scoping and EIA** (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). The S&EIA process will include application, scoping, and environmental impact assessment phases, as well as the compilation of an **Environmental Management Programme** (EMPr) for the management of environmental and social impacts during the life of the Melmoth Iron Ore Project.

In addition to the requirement for an EA, Jindal will make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd ('SLR') has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) to undertake the specified environmental regulatory processes for the Melmoth Iron Ore Project. Separate applications may be required for certain components of the project.

PURPOSE

This document provides initial information to stakeholders about the proposed Melmoth Iron Ore Project and S&EIA process.

YOUR ROLE

You have been identified as a potential Interested and Affected Party (I&AP) who may want to be informed about the project and have input into the S&EIA process.

You have an opportunity to register as an I&AP, review this BID and provide your initial comment to SLR for incorporation into the S&EIA process.

Registered I&AP will also be given the opportunity to provide input, including at information meetings, and to review and comment on the Scoping and EIA Reports.

All I&AP comments will be recorded and included in the reports submitted to the Competent Authorities for decision-making.

HOW TO RESPOND

Responses can be submitted by means of the attached comments sheet and/or through communication with the contact person listed below.

WHO TO CONTACT

SLR Consulting

Gugu Dhlamini

Tel: (011) 467 0945

Cell: 066 082 3687

Email: gdhlamini@slrconsulting.com

Post: PO Box 1596, Cramerview 2060

Please submit initial comments to SLR by end July 2021.

Registered I&APs will have opportunity to Comment on the Scoping and EIA Reports, and will be notified of report availability.

Project documents will be available from SLR's website:

APPLICATION PROPERTIES

North Block: RESERVE NO.11 15831 (Ptn 3, 4), NTEMBENI 16921.

South Block: NTEMBENI 16921, DIRKCHINBURG 6125, KROMDRAAI 6110, NTEMBENI 16921, BLACK EYES 13385 (Ptn 1, 2, 3, 4, RE), WILDERNESS 6107 (Ptn 3, 4, 5, 6, 7, 8, 12, 13, 14, 15, 16), GOEDGELOOF 6106 (Ptn 1, 2, 3, RE) and VERGELEGEN 6104.

Other properties may underlie some of the infrastructure and will be specified once known.

CURRENT STATUS OF THE ENVIRONMENT

This S&EIA will investigate the biophysical and social aspects of the project affected area to better understand the social and environmental sensitivities that may be impacted by the proposed project.

The topography of the area is rugged, with steep hilly terrain. Elevation rises from approximately 200 metres above mean sea level (mamsl) in the low-lying valleys to a high of approximately 850 mamsl along the ridges and peaks. Soil type varies considerably, including soils with high agricultural potential. The soils are frequently susceptible to erosion due to the topography, rainfall intensity and soil characteristics.

Land ownership varies across the MR application area with undivided properties falling under the jurisdiction of public bodies and the Ingonyama Trust Board, with other farms being owned by individuals and companies. All of the North Block and most of the eastern portion of the South Block falls under Traditional Authorities including the Zulu-Entembeni, Obuka and Yanguye.

The MR application area is predominantly rural in nature, with sparsely distributed development (mostly on hill tops and ridgelines). Primary land uses include indigenous vegetation, traditional settlements with associated infrastructure, subsistence and small-scale agriculture (e.g. crops and livestock). Commercial agriculture (e.g. citrus, sugar cane and timber) is undertaken on adjacent land.

Groundwater flow follows topography, with substantial variance. Groundwater is generally fit for human consumption and is relied on by rural communities. Some areas do, however receive piped water.

The MRA area is located within the upland region of the Mhlathuze River catchment. The Mhlathuze River and Phobane (Goedetrouw) Dam border the southern portion of the South Block. These water resources are important for potable water supply (e.g. Richards Bay), commercial irrigation (e.g. Nkwaleni Valley), mining (e.g. Fairbreeze) and environmental requirements. The South Block is drained by KwaMazula River and the North Block by the Mfule River. The entire area has numerous minor tributaries. Wetlands are relatively uncommon. Surface water quality is reasonable, although under pressure from increasing salinity, eutrophication, abstraction and siltation.

Vegetation of the MRA area is predominantly Ngongoni Veld with areas of Eastern Valley Bushveld, Northern Zululand Sourveld and Zululand Lowveld. The site falls within the Maputoland – Pondoland floristic region, which is the second richest floristic region in southern Africa. Various endemic plant species occur, most being found within grassland vegetation. Numerous rare and threatened plant species have been recorded in the area, however, many areas also have high densities of alien and invasive plant species. The area has potential to host rare and threatened fauna from various classes. Mammal abundance is likely to be low. Birds are particularly diverse and some sites in the area form part of the Zululand Birding Route. The presence of such species requires verification.

Zulu people have occupied the Melmoth region for some 200 years. Grave sites, artefacts and cultural heritage resources abound. Traditional culture is still observed by many residents and community social structures remain strong. Homesteads have remained within families for many generations and many residents have strong ties to the land. In some areas occupation arose due to the Apartheid policies. The density of homesteads continues to increase in many of the areas.

The town of Melmoth (12km from South Block and 8km from North Block boundaries) is the main commercial and administrative centre in the Mthonjaneni Local Municipality. It services the rural community and commercial agriculture. Economic opportunities are relatively limited and unemployment levels remain high. Commercial agriculture is the primary employer in the region. Persons from surrounding rural areas are mainly dependant on informal trading and subsistence agricultural production.

The R66 is a tarred road which passes between the North and South blocks, connecting Melmoth with Eshowe, via the Nkwaleni Valley. The local road network is unsurfaced and sparsely distributed. Most rural persons reside in formal housing, but service provision (water, electricity, sanitation and waste) levels are low and decrease with distance from the formal road network. Government has established schools and clinics within the area. These are generally located at major nodes on the road network.

SPECIALIST STUDIES

SLR will appoint a suite of specialists to investigate the status of the environmental and social aspects within project affected area and to identify sensitive sites. These will include: Geotechnical, Groundwater, Surface Water, Waste Classification, Air Quality & Noise, Biodiversity, Hydrogeology, Visual, Traffic, Heritage, Soils, Land Capability & Agriculture, Blasting & Vibration, Socio-economic, Greenhouse Gases & Climate Change, Health, Resettlement Planning and Closure studies. Specialist study scopes will be detailed in the Scoping Report.

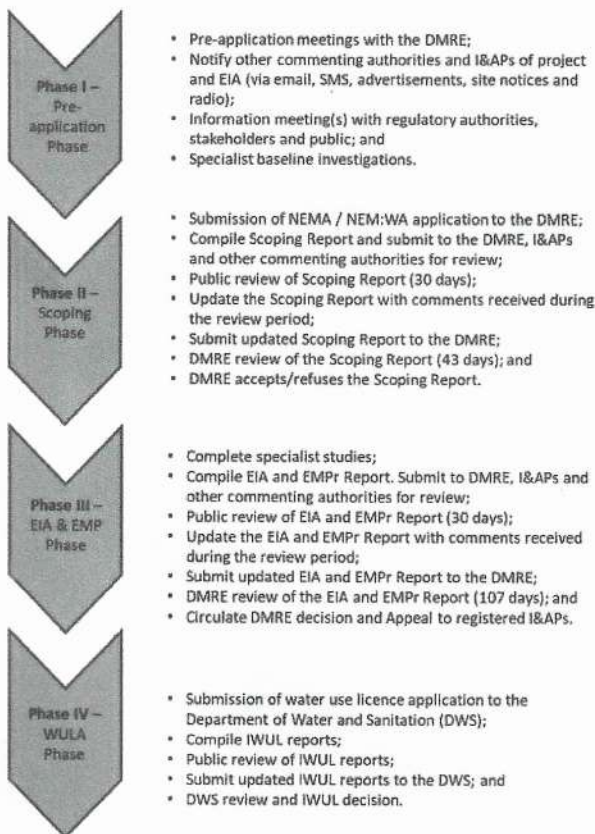

S&EIA PROCESS TO BE FOLLOWED

The S&EIA regulatory process aims to:

- notify I&APs and provide reasonable opportunity for involvement;
- provide information on the project and its alternatives;
- document the baseline environment that may be affected;
- identify, in consultation with I&APs, and assess the potential impacts of the proposed project and its alternatives;
- present appropriate mitigation or optimisation measures to minimise potential impacts or enhance potential benefits, respectively; and
- allow for informed, transparent and accountable decision-making by the relevant authorities.

STEPS IN THE S&EIA PROCESS

The process steps for the S&EIA, are in accordance with the EIA Regulations, 2014 and are outlined below. The S&EIA process, from application to decision, is 300 days in duration.

IMPACT ASSESSMENT

Mining projects have the potential to result in both negative and positive environmental, cultural, economic and social impacts. These impacts can relate to biodiversity, water, air, noise environment, visual resource, use of the land, heritage, safety, sense of place, economic and social wellbeing of an area.

Potential impacts will be identified and assessed during the S&EIA process. Mitigation measures to minimise negative and enhance positive impacts will be identified.

S&EIA LIMITS

The scope of the S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (DMRE as authority).

The assessment of future development phases falls outside of the scope of this S&EIA process. If such work were to be proposed, Jindal would be required to seek further approval from the DMRE in terms of the MPRDA and NEMA. Any further approval would be subject to an additional environmental assessment process, with further public consultation, as required by the NEMA.

ROLE OF INTERESTED AND AFFECTED PARTIES

I&APs play a key role in any S&EIA process. I&APs are encouraged to participate in the process by registering their contact details with SLR; by sending in any questions related to the project; by sharing their knowledge of the area; by reviewing and commenting on information made available through the S&EIA; by notifying other parties and participating in public participation activities. Registered I&APs will receive notification of public participation opportunities in advance.

All comments received will be recorded and included through a Comments & Response Report to be submitted with the Scoping and EIA Reports.

WHAT WILL HAPPEN NEXT?

High level timelines (see below), provide I&APs an indication of when I&APs could expect to be involved in, or need to provide input to, the S&EIA processes.

Identification, notification and registration of I&APs

I&AP Identification, notification of the project (including distribution of the BID, adverts and site notices) and initial registration of I&APs (June – July 2021)

Scoping engagements with I&APs

Through a blended approach of face-to-face interactions and other engagement tools (June - August 2021)

Review of environmental reports

Scoping and EIA Reports to be made available for a 30-day review period. Non-technical summaries will be distributed in English and isiZulu.

(Scoping ~ August 2021, EIA ~ December 2021)

Feedback engagements with I&APs

Through a blended approach of face-to-face interactions and other engagement tools

(early 2022)

I&AP notification of decisions

(~ mid 2022)

PARTIES INVOLVED IN THE ENVIRONMENTAL APPLICATION PROCESS

The stakeholder groups initially identified for consultation during the S&EIA include:

REGULATORY AUTHORITIES

- Department of Mineral Resources and Energy;
- Department of Human Settlements, Water and Sanitation;
- KwaZulu-Natal Department of Cooperative Governance and Traditional Affairs;
- KwaZulu-Natal Department of Agriculture, Rural Development and Land Reform;
- KwaZulu-Natal Department of Economic Development, Tourism, Environmental Affairs;
- KwaZulu-Natal Department of Transport;
- South Africa Heritage Resource Agency (SAHRA) and AMAFA; and
- Ezemvelo KZN Wildlife.

LOCAL AUTHORITIES

- King Cetshwayo District Municipality;
- Mthonjaneni Local Municipality and Ward Councillors.

TRADITIONAL AUTHORITIES

- Zulu-Entembeni, Obuka and Yanguye Traditional Councils and Nduna's

LANDOWNERS

- Ingonyama Trust Board and owners of property underlying the application area.

I&APs

- Adjacent landowners, land users and surrounding communities;
- Businesses, associations and parastatals;
- Non-governmental organisations; and
- Interested Parties

Please let us know of additional parties that should be involved.

NB Updating of the I&AP database to include any new registrations will continue throughout the process.

NOTICE OF PUBLIC INFORMATION MEETING

1. **Melmoth Golf Club (Golf Street, Melmoth)** on 30 June 2021 at 3 pm. Attendance numbers limited, only by RSVP to SLR.
2. **Online meeting via MS® Teams** on 6 July 2021 at 3 pm. Contact SLR to register and receive a meeting link.

Focus meetings will also be held with directly affected stakeholders.

Minutes of all meetings will be included in the relevant reports that will be made available for review by I&APs.

COVID CONSIDERATIONS

NB - to ensure the health and safety of all stakeholders, COVID protocols will be observed at public meetings and during any face to face interactions. This may require attendance numbers at meetings to be limited.

POPI

It is assumed that in providing your Personal Information to be registered as an I&AP you authorise SLR to retain and use your Personal Information for this and/or other EIA processes and that you confirm your acceptance for SLR to contact you regarding this and/or other EIA processes. SLR warrants that we will not process your Personal Information, other than as permitted or required for the EIA process or as required by law or public policy. SLR will use reasonable, appropriate security safeguards in order to protect Personal Information, and to reasonably prevent any damage to, loss of, or unauthorised access or disclosure of Personal Information, other than as required for EIA processes or as required by any law or public policy. You may request for your Personal Information to be deleted from the database at any time by contacting SLR.

THANK YOU FOR TAKING THE TIME TO READ THIS DOCUMENT AND FOR YOUR PARTICIPATION

035 7511 073
Medler Services Pty Ltd

THE MELMOTH IRON ORE PROJECT - BACKGROUND

Jindal holds two Prospecting Rights (PRs) over the project site. The North (PR 10644) and South (PR 10652) blocks have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks.

In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine. A conceptual mine plan was developed.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Consultants have been appointed to update the engineering work and conduct the studies required to inform the **Mining Right Application (MRA)**.

OVERVIEW

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project as described below.

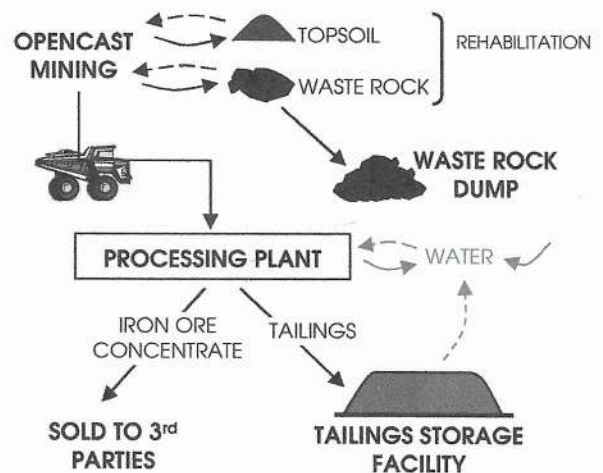

PHASE 1: CONCEPT

NB the current Phase 1 mine plan is **CONCEPTUAL** and derived from the 2015 Prefeasibility Engineering Study.

An open cast pit mining operation would be developed in the south east area of the South Block. Waste rock stripped from the pit would be disposed on a WRD within the MRA. Run of mine ore would be hauled to a primary processing plant for crushing, milling and magnetic separation. The plant would produce iron ore concentrate and tailings. The iron ore concentrate would be transported to the Richards Bay Port via either rail or pipeline. The concentrate will be exported as there are limited local markets. Tailings would be

disposed to a TSF (location to be finalised as part of a separate process). Associated infrastructure to support the mine could include access and haul roads, electrical transmission line and sub-stations, raw water abstraction and pipelines, stormwater management infrastructure, tailings pipelines, concentrate pipelines, rail siding and offices, change house, workshops and perimeter fencing (amongst others).

CONCEPTUAL MINING SEQUENCE

Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

PHASE 1: DETAIL

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future.

The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available. Alternatives will be considered.

SEPARATE APPLICATION AND ASSESSMENT(S)

Under NEMA the DMRE is not the competent authority for activities post primary-processing of a mineral where these are located outside of the MR area. Where the project requires such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation.

POSSIBLE FUTURE PHASES

Results from prospecting would inform planning of possible future phases of the Melmoth Iron Ore Project. The likely concept for future phases would be to increase the life of mine and production rate by accessing iron ore from additional mine pits and/or increasing the capacity of the primary processing plant. Any future development phases of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

ATTENTION: INTERESTED AND AFFECTED PARTY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).

- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR will be consulting with stakeholders through a variety of engagements. Public information meetings have been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
30 June 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR.
6 July 2021 at 3 pm	Online via Microsoft Teams	Contact SLR to register and receive a meeting link.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end July 2021. Comments can however be submitted throughout the regulatory process. Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

Subject: JINDAL: MELMOTH IRON ORE MINE PROJECT - NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT

ATTENTION: INTERESTED AND AFFECTED PARTY

Dear Sir/Madam,

NOTICE OF APPLICATIONS FOR MINING RIGHT, INTEGRATED ENVIRONMENTAL AUTHORISATION AND WATER USE LICENCE FOR THE PROPOSED MELMOTH IRON ORE MINE PROJECT NEAR MELMOTH, KWAZULU-NATAL

This email serves to notify you, as a potentially interested and affected party, of the applications for a Mining Right, integrated Environmental Authorisation and Water Use Licence for the proposed Melmoth Iron Ore Mine Project. The required applications will be made to the respective competent authorities, whom are the Department of Mineral Resources and Energy (DMRE) and the Department of Human Settlement, Water and Sanitation.

INTRODUCTION

Jindal Iron Ore (Pty) Ltd (Jindal), owned by Jindal Steel and Power (Mauritius) Limited (74%) and Jindal's BEE partner, Mr. Thabang Khomo (26%), is proposing the development of an open pit iron ore mine and associated infrastructure on a site located 25 km southeast of Melmoth, within the Mthonjaneni Local Municipality, in KZN.

Jindal intends to lodge an application for a Mining Right (MR) with the Department of Mineral Resources and Energy (DMRE) in terms of Section 22 of the Minerals and Petroleum Resources Development Act, 2002 (No. 28 of 2002) (MPRDA).

In order for the DMRE (the Competent Authority) to consider the grant of a Mining Right the applicant must, amongst other requirements, apply for and obtain an Environmental Authorisation in terms of the National Environmental Management Act, 1998 (No. 107 of 1998) (NEMA). To inform the DMRE's decision on the Environmental Authorisation application, a Scoping and EIA (S&EIA) process must be undertaken in terms of Regulations 21 – 24, and 39 – 44 of the Environmental Impact Assessment (EIA) Regulations 2014 (as amended in 2017). In addition to the requirement for an Environmental Authorisation, Jindal will also make application for permits / licenses required in terms of the following legislation:

- National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEM: WA).
- National Water Act, 1998 (No. 36 of 1998) (NWA).

SLR Consulting (South Africa) (Pty) Ltd (SLR), has been appointed by Jindal as the Environmental Assessment Practitioner (EAP) responsible for undertaking the environmental regulatory processes and conducting public participation in support of these applications.

PROJECT BACKGROUND

Jindal holds two Prospecting Rights over the proposed project site. The North (PR 10644) and South (PR 10652) Prospecting Right blocks, which have a total combined extent of 20 170 ha. Jindal has previously undertaken prospecting activities, including drilling, within selected areas of these blocks. In 2014 and 2015, Jindal conducted a Prefeasibility Engineering Study to determine the technical and financial feasibility of developing an open pit iron ore mine.

At that time Jindal had appointed an independent EAP to undertake a S&EIA process for the proposed project. Various public participation activities and specialist studies were undertaken, and draft Scoping Reports were submitted to the Department of Economic Development, Tourism and Environmental Affairs (EDTEA). However, the Scoping Reports were returned to Jindal with requests for more clarity on various aspects of the project. This, in parallel with a decline in global iron ore prices, caused Jindal to reduce development of the project. That S&EIA process was discontinued in January 2016.

Through 2020 the global iron ore price has recovered, to a level that encouraged Jindal to recommence their consideration of the Melmoth Iron Ore Project. Jindal have appointed consultants to update the engineering work and conduct the studies required to inform the Mining Right Application (MRA).

CURRENT PROJECT

Jindal is now proposing development of the Melmoth Iron Ore Project as an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining Phase 1 operation.

Jindal's intent with this MRA is to consolidate the PRs for the North and South blocks into a single MR. The MRA and S&EIA will consider the entire extent of the two PR blocks, but with a specific focus on the area for Phase 1 of the Melmoth Iron Ore Project.

Phase 1 of the Melmoth Iron Ore Project would comprise of an open pit, processing plant, waste rock dump (WRD), tailing storage facility (TSF) and associated infrastructure. Mining activities and infrastructure would only be undertaken/developed in portions of the Mining Right area and some infrastructure may be located outside of the area. The Iron ore concentrate would be transported to the Richards Bay Port either by rail or pipeline. The concentrate will be exported as there are limited local markets. Prospecting would be undertaken in the North and South blocks in parallel with the Phase 1 mining.

The Melmoth Iron Ore Project would initially target production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future. The method, scale, and location of the Phase 1 mining and mine infrastructure will be determined by the Bankable Feasibility Study, with inputs from this S&EIA process. Additional layout and design details will be presented in the Scoping and EIA Reports as they become available.

The scope of the current S&EIA process is aligned with, and focused on, identifying and assessing impacts of Phase 1 of the proposed mining operation (with DMRE as authority). Under NEMA the DMRE is not the competent authority for activities post the primary-processing of a mineral, where these are located outside of the MR area. Should

the Melmoth Iron Ore Project require such infrastructure, this will be subject to separate application, assessment and approval process(es), as required by applicable legislation. Additionally, any future development phase of the Melmoth Iron Ore Project would need to be subject to the requisite regulatory application, assessment, and approval processes.

PUBLIC PARTICIPATION

Interested or affected parties play a key role in any S&EIA process. As part of the initial phase of public consultation, SLR is notifying and distributing information to as many interested or affected parties as possible. Through various resources SLR has obtained contact details for potential stakeholders. Our information leads us to believe that you may have an interest in, or be affected by, the project. We would thus like to notify you of the applications and provide you with introductory information on the proposed project.

A Background Information Document (BID) has been produced and contains initial information on the proposed project; the regulatory requirements; an outline of the S&EIA process; the baseline environment of the site; and how stakeholders can have involvement. The updated BID is attached and available on our website at www.slrconsulting.com/za/slr-documents. Navigate to the 'Melmoth Iron Ore Project' page.

SLR is in the process of consulting stakeholders through a variety of engagements. In that regard, a public information meeting has been arranged, as below. You are invited to attend.

Date and Time	Venue	Notes
18 August 2021 at 3 pm	Melmoth Golf Club, Golf Street, Melmoth	To ensure the health and safety of all stakeholders, Covid-19 protocols will be observed at the meeting. NB Attendance numbers are limited and only by RSVP to SLR. Organisations/businesses are encouraged to please limit the number of their representatives to one.

Please note that this is the rescheduling of the initial public meeting that was intended to take place on 30 June 2021 at 3pm but was postponed due to the implementation of the adjusted Alert Level 4 Restrictions (from the 28th of June 2021 to the 25th of July 2021) which prohibited gatherings to address, prevent and combat the spread of COVID-19.

You must register as an I&AP if you would like to receive more information or wish to participate in the assessment process of the project. All personal information submitted to SLR for the S&EIA process will be managed in accordance with the Protection of Personal Information Act, 2013.

Stakeholders are invited to submit initial comments or raise any environmental issues or concerns on the project and EIA process to SLR by end of August 2021. Comments can however be submitted throughout the regulatory process.

Registered I&APs will have opportunity to comment on Reports produced during the environmental authorisation process. Registered I&APs will be notified of availability of the Scoping and EIA Reports for public review.

To register as an I&AP and/or to submit any comment or concern on the proposed project and EIA process, please contact SLR at the details below:

Cc: Kate Hamilton <khamilton@slrconsulting.com>
Subject: RE: Jindal- Melmoth Iron Ore Project Virtual Meeting

Dear Lyle,

Compliments of the New Year!

There were concerns and/or comments further raised by I&APs during this process. These have been noted by SLR and will be included and addressed (by Jindal, SLR and/or the relevant specialists) in the Comments and Response Report which will form part of the Scoping Report. You will be notified once the Scoping Report is made available for public review.

The specialist studies that have/will be undertaken have slightly been expanded upon. The Biodiversity Study will also include an Aquatic Biodiversity Study – which wasn't clearly indicated in the meeting presentation. A Hydropedology Study has also been included as part of the studies as well as a Social and Labour Plan.

Air pollution will be encompassed in the Air Quality study.

Kind regards,
Gugu

Subject: RE: Jindal- Melmoth Iron Ore Project Virtual Meeting

Dear Gugu and Kate,

I hope that this mail finds you well.

Thank you for the mail and information provided. Were no further concerns raised by I&AP's during this process.

Could you please provide insight as to how our concerns will be addressed and which specialist studies will be undertaken.

Are these studies limited to those mentioned below or have they been expanded upon.

PROJECT TEAM – SPECIALISTS

	Specialist Study	Company
1	Terrestrial Biodiversity	Eco-Pulse Environmental Services
2	Soil, Land Capability & Agricultural Agro-Ecosystem	TerraAfrica
3	Heritage	eThembeni Cultural Heritage Management
4	Visual	Graham A Young Landscape Architect
5	Socio-Economic	Urban-Econ Development Economists
6	Health	Professor J. Myers
7	Air Quality & Noise	WKC Group
8	Climate Change	Promethium Carbon
9	Traffic	Siyazi
10	Blasting and Vibration	Blast and Management Consulting
11	Surface Water	SLR
12	Groundwater	SLR
13	Geotechnical	SLR
14	Waste Classification	SLR
15	Resettlement Planning	SLR
16	Closure	SLR

Would dust pollution be encompassed in the Air Quality study or in the Soil, Land Capability & Agricultural Agro-Ecosystem study.

Thanking you in advance.

Kind Regards

Dear Lyle,

The current commenting period (for initial comments) closes end of July, and the next round of Public Participation will be when the Scoping Report goes out for public review. We unfortunately cannot give specific dates at this point due to our project programme being largely affected by the riots and COVID restrictions. We will have to have a relook at the programme once the dust has settled and restrictions have been lifted.

Kind regards,
Gugu

Good day,

Thank you for taking the time to attend the Melmoth Iron Ore Project Virtual Meeting which was held on the 06th of July 2021.

Please kindly find attached the presentation for your information.

Should you have any questions or queries at this point, please feel welcomed to contact SLR.

Kind regards,

Gugu Dhlamini

Feel free to make your submission in your home language

PLEASE IDENTIFY YOUR INTEREST IN THE PROPOSED PROJECT

I am a farmer in the Nkwalini Valley and I am worried how the mining will effect the farm and my people

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE

Noise pollution. Dust is bad for our citrus. We will not have enough water. / Electricity will be short. The people will have no jobs as they are not skilled for mining. Many of them will lose their homes and they have lived here for generations.

PLEASE NOTIFY SLR OF ANY OTHER INTERESTED & AFFECTED PARTY THAT SHOULD BE INCLUDED IN THIS S&EIA PROCESS.

The chiefs and indunas will need to be brought into discussion. The farmers need to have a meeting to be heard.

(use additional pages if required)

Please return completed forms to:

SLR Consulting, attention: Gugu Dhlamini

Feel free to make your submission in your home language

PLEASE IDENTIFY YOUR INTEREST IN THE PROPOSED PROJECT

I am a Sugar Cane + Citrus Farmer in Nkwatini.
I am concerned about the future of the farm and how it will affect the people who work there.

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE

There will be significant job loss in a period of high unemployment anyway.
Communities will have to be reluctantly moved to another area. Many have burial sites on their property.
There will be water shortage as well as pressure on Eskom to provide enough electricity.

PLEASE NOTIFY SLR OF ANY OTHER INTERESTED & AFFECTED PARTY THAT SHOULD BE INCLUDED IN THIS S&EIA PROCESS.

All the farmers in Nkwatini + local communities Citrus farmers especially are at risk as the dust will harm / scar the export crops.

To whom it may concern

I am writing this email in response to the proposed open cast **iron ore**? mine in Nkwalini.

Nkwalini is an agricultural area, growing export quality citrus fruit, sugar cane and various other crops. There is a serious risk of water contamination from this proposed mine, which will have negative impacts on the very strict export rules, and thus make it impossible for the farmers to sell their fruit on the export market.

The dust factor is also going to be problematic, not only to humans but also to the crops, particularly the fruit orchards. Excessive dust will impair the growth of citrus trees and reduce fruit yields.

My farm borders the railway line, and the noise from the line being in constant use with ore transportation versus seasonal sugar cane transportation, will make noise pollution another serious factor.

The particular type of agriculture which occurs in Nkwalini, namely citrus and sugar, are highly labour intensive. If the farms in Nkwalini are affected in any way, this will lead to huge job losses and the spin-off will be widespread as many, many families will suffer. The effect will not only be felt in Nkwalini itself, but in the larger surrounding area as well.

Keeping commercial farmers on the land is surely part of the Government's food security plan.

I strongly oppose any form of mine coming to Nkwalini, and sincerely hope that the decision-makers look at the holistic long term view, and not at anybody's short-term enrichment.

Open cast mining itself is a scar on the landscape, and there is enough environmental evidence against them to disallow it from ever happening in Nkwalini or elsewhere.

Sincerely

Concerned Farmer

Dear Sir/s

Ref: Potential devastating effects of Jindal mining on Agriculture in Nkwaleni specifically Dundulu and Caspidge Farms and surrounding communities.

“Association’s opinion on the proposed development. Such opinion could include any concerns regarding the development and its impact on the agricultural sector and the specific production areas/ farms that are owned/ operated by association members, any opportunities which may exist for the proposed project to support or promote their production activities, or just general comments.”

1) Threat to water supply and quality thereof.

- Agriculture is solely reliant on the Goedetrou Dam for water supply any adverse effect on supply, would devastate the production of export citrus.
- If the quality of said water is polluted with heavy metals or “other” pollutants, this would destroy the viability of export citrus production.
- (The citrus industry is already under pressure from foreign citrus buyers – to use “clean” water in all aspects of production.
- I request that we be furnished with a list of all by-products of said mining operation.

2) Air pollution “particularly” dust – is hugely detrimental to citrus fruit skin quality and tree health.

3) If as a result of the mine – citrus becomes non-viable, the loss of jobs in the valley will be astronomical. The roll-on negative effect would plunge local communities into further poverty.

4) Noise pollution – would seriously degrade the quality of life with in the Valley – due to proximity to the mine but also to the processing plants and transportation hubs.

5) Road infrastructure would not sustain additional heavy vehicles.

6) Any attempt by Jindal to bring in “foreign” workers would lead to bloodshed.

Cont:

Possible means of negating negative effects on Agriculture and Communities

Nkwaleni Water Users Association has over the years – commissioned the design of a pressurised pipeline system to replace the existing earthen canal, at the last investigation into the cost of said pipeline, we were faced with an approximate figure of 135 million rand.

The benefits of said line would guarantee or at least protect the water from pollutants.

- 1) Jindal funds the construction pressurized pipeline – as their commitment to supporting agriculture and the communities.
- 2) Jindal at their cost funds all water samples for the entirety of its mine’s commercial life plus 25 years after the date of closure. The frequency of sampling to be agreed upon by Commercial Agriculture and Community groups.
- 3) Jindal prior to operations beginning – explain the full employment requirements to local communities. Misleading the communities with expectations of employment only to renege – through “loopholes” would lead to Bloodshed.

I hope this submission, serves to prepare all parties involved in pushing the mining agenda without proper investigation into the consequences, that any failure to follow lawful protocol and or “promises made or inferred” will have serious ramifications.

Kind Regards

Clinton Gray

Subject: RE: FW: Melmoth Iron Ore Project - request for engagement,

Dear Sir,

Further to discussions about the proposed mining venture in the Nkwalini Area. We wish to vehemently voice our objection to this proposal. Valley is world renowned for citrus exports and 90% of the population here is finally dependent on their farming jobs. We believe that there will be no value adding in the mining process and that the operation is nothing more than the rape of this countries resources. The venture should be cancelled forthwith.

Yours Sincerely,
T.R.D. Wafer
Owner/ Managing Director

Dear Vernon and Clinton

We have not managed to secure an engagement regarding the proposed iron ore mine development and I have no record of a response to my last email request, dated 21 September 2021.

I would like to provide the Nkwalini Farmers Association (NFA) a final opportunity to provide input into our investigation. I therefore encourage you and the NFA to provide me with a formal submission, in writing via return email to me, regarding the Association's opinion on the proposed development. Such opinion could include any concerns regarding the development and its impact on the agricultural sector and the specific production areas/ farms that are owned/ operated by association members, any opportunities which may exist for the proposed project to support or promote their production activities, or just general comments.

Please see the following link for some information on the project:

-  [Background Information Document \(BID\)](#) which provides critical information on the project.
-  [A presentation](#) that was delivered during the public participation process last year.

Please could you provide a submission by no later than the **close of business on Thursday, 10 February 2022.**

Should you require further information to inform your opinion, please let me know and I will gladly provide what I can.

Subject: Melmoth Iron Ore Project - request for engagement

Dear Vernon

Urban-Econ has been appointed to undertake a socio-economic impact assessment (SEIA) as part of a team of specialists conducting studies for the proposed Jindal Melmoth Iron Ore Mine, located in Mthonjaneni Local Municipality. The studies form part of the Social and Environmental Impact Assessment (S&EIA) process which is legally required for the Environmental Authorisation (EA) application for a Mining Right.

The proposed Melmoth Iron Ore Project is an open cast mine and processing facility to produce iron ore concentrate for export. Development of the mine and mining infrastructure would be phased. Currently mining is only proposed to be undertaken in specific areas where the iron ore resource has been defined. Infrastructure would be developed to support this mining operation. The proposed project would entail production of up to 20 million tonnes per annum (Mtpa) of iron ore, with production possibly being increased in future.

Additional information on the project is attached to this email.

You have been identified as a potential Interested and Affected Party (I&AP) who may want to be informed about the project and provide input into the S&EIA process. We therefore request the following:

- i) An opportunity to formally engage with you, or a duly designated authority in your organisation, to understand your perspective on the proposed project and to gauge the anticipated impacts (both positive and negative) of the project, and to determine its need and desirability.
- ii) To register as an I&AP so that you are kept up to date on the proposed project and afforded opportunity to input into the EIA process. Note that this registration is a separate process to our investigation.

Please indicate your interest in participating in our specialist study, so that we can set up an appointment. If you are not the correct person within your organisation, please would you provide contact details for the correct person.

Regards
