Dear Sir

BASIC ASSESSMENT REPORT FOR THE PROPOSED ERECTION OF 30M LATTICE MAST ON ERF 957 OBERHOLZER EXTENSION 1, CARLETONVILLE, GUATENG PROVINCE.

The Merapong City Local Municipality: Spatial Planning and Environmental Management section has received and reviewed the above mentioned report.

Based on the information given on the Basic Assessment Report (BA), key environmental issues have been identified and addressed as such Merapong City Local Municipality is in support of the proposed project as no significant environmental impact is going to happen as a result of erecting the proposed mast. The municipality recommend that mitigations measures outlined in the Environmental Management Programme (EMP) be followed.

Hope you find the above in order.

Yours faithfully
